# GENERAL ANNOUNCEMENTS 2014-2015

 

# Introduction

The undergraduate experience at Rice is one of intense personal interactions. The close sense of community created by individual placement in residential colleges is extended to warm intellectual and personal relationships with members of the Rice faculty. “Inside the hedges,” the beautifully designed, spacious campus is small enough to encourage a sense of belonging even as students engage with the lively cultural currents of one of the country’s largest cities.

The academic philosophy at Rice is to offer students beginning their college studies both a grounding in the broad fields of general knowledge and the chance to concentrate on very specific academic and research interests. By completing the required distribution courses, all students gain an understanding of the literature, arts, and philosophy essential to any civilization, a broad historical introduction to thought about human society, and a basic familiarity with the scientific principles underlying physics, chemistry, and mathematics. Building on this firm foundation, students then concentrate on studies in their major areas of interest.

Rice University is accredited by the Commission on Colleges of the Southern Association of Colleges and Schools (SACS), the recognized regional accrediting body in the 11 U.S. Southern states.

Rice grants two undergraduate degrees, the Bachelor of Arts (BA) and the Bachelor of Science (BS), in a range of majors. The majority of undergraduates earn the BA degree. The BS degree is offered in some science fields and in various fields of engineering. The programs leading to the BS degrees in Bioengineering, Civil Engineering, Chemical Engineering, Electrical Engineering and Mechanical Engineering are accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org. Undergraduates may major in any of the numerous fields provided by the various schools of architecture, humanities, music, social sciences, science, and engineering. To accommodate the full range of individual student interests, specific interdepartmental majors and minors also are available, as are various departmental minors and selectively approved area majors. In certain departments, students also have the option of overlapping the upper-level course work of their undergraduate degree with those basic requirements necessary to earn an advanced degree in the field, considerably reducing the time required to complete their graduate studies. The Shepherd School of Music offers a joint degree in music (BMus/MMus) that may be completed with a fifth year of study.

Through Rice’s Education Certification Program, students interested in teaching in secondary schools may complete a program of teacher training, leading to certification in the state of Texas, together with the BA degree. Students interested in satisfying the requirements for admission to medical, dental, or law school should consult with the Office of Academic Advising for completing these programs in conjunction with the various majors.

| **June** | **Fri, 12** | **Deadline:** Last day for instructors to submit final grades to resolve "Other" (OT) grades for courses taken in Spring 2015 |

# Admission

*Jump to:*

Dating back to the founding of Rice University, our first president, Edgar Odell Lovett, mandated that we aspire to be a world-class university of the highest standing. Dr. Lovett challenged us “to assign no upper limit to our educational endeavor.” He envisioned students and faculty as a community of scholars, their minds exercised by spirited discourse (John Boles, A University So Conceived: A Brief History of Rice, p. 17, third rev. ed. 2006). Therefore, as an integral part of the university’s mission, we seek a broadly diverse student body where educational diversity increases the intellectual vitality of education, scholarship, service, and communal life at Rice. We seek students, both undergraduate and graduate, of keen intellect and diverse backgrounds who not only show potential for success at Rice, but also who will contribute to the educational environment of those around them. Rice determines which group of applicants, considered individually and collectively, will take fullest advantage of what we have to offer, contribute most to the educational process at Rice, and be most successful in their chosen fields and in society in general. Our evaluation process employs many different means to identify these qualities in applicants. History shows that no single gauge can adequately predict a student’s preparedness for a successful career at Rice. For example, we are cautious in the use of standardized test scores to assess student preparedness and potential. An applicant is considered in competition with all other applicants. In making a decision to admit or award financial aid, we are careful not to ascribe too much value to any single metric, such as rank in class, grade point average, the SAT/ACT, or Graduate Record Exam.

We use a broader perspective that includes such qualitative factors as the overall strength and competitive ranking of a student’s prior institution, the rigor of his or her particular course of study, letters of recommendation, essays, responses to application questions, and (where required) auditions and portfolios. Taken together with a student’s academic record and test scores, these additional factors provide a sound basis to begin assessing the applicant’s potential on all levels.

Beyond indicators of academic competence, we look for other qualities among applicants, such as creativity, motivation, artistic talent, and leadership potential. We believe that students who possess these attributes in combination with strong academic potential will contribute to, and benefit from, a more vibrant, diverse educational atmosphere. Through their contributions and interactions with others, students will enrich the educational experience of all faculty and students. These qualities are not revealed in numerical measurements, but are manifest in the breadth of interests and the balance of activities in their lives.

Rice University strives to create on its campus a rich learning environment in which all students will meet individuals whose interests, talents, life experiences, beliefs, and world views differ significantly from their own. We believe that an educated person is one who is at home in many different environments, at ease among people from many different cultures, and willing to test his or her views against those of others. Moreover, we recognize that in this or any university, learning about the world we live in is not by any means limited to the structured interaction between faculty and students in the classroom, but also occurs through informal dialogue between students outside the classroom.

To encourage our students’ fullest possible exposure to the widest possible set of experiences, Rice seeks through its admission policies to bring bright and promising students to the university from a range of socioeconomic, cultural, geographic, and other backgrounds. We consider an applicant’s race or ethnicity as a factor in the admission process and believe that racial and ethnic diversity is an important element of overall educational diversity. Though race or ethnicity is never the defining factor in an application or admission decision, we do seek to enroll students from underrepresented groups in sufficient and meaningful numbers as to prevent their isolation and allow their diverse voices to be heard. We also seek students whose parents did not attend college as well as students from families with a well-established history of college-level education. Rice places a premium on recruitment of students, regardless of their races or ethnicities, who have distinguished themselves through initiatives that build bridges between different cultural, racial, and ethnic groups. In so doing, we endeavor to craft a residential community that fosters creative, intercultural interactions among students, a place where prejudices of all sorts are confronted squarely and dispelled.

In assessing how well an applicant can contribute to enlivening the learning environment at Rice, we also try to determine the relative challenges that he or she may have faced. For economically disadvantaged students, this may mean achieving a high level of scholastic distinction while holding down a job in high school. For a first generation college student, it might mean achieving high standards for academic success within an environment relatively indifferent to intellectual attainment. Or it might mean overcoming a disability to excel in sports, music, or forensics. For students who do not have particular disadvantages, we also look at whether they chose a more challenging road than the normal path through high school. This might mean an especially strenuous course of study, a prolonged, in-depth engagement in a school project, or a particularly creative and wide-ranging set of extracurricular activities.

Rice does not view offers of admission as entitlements based on grades and test scores. Our admission process combines an examination of academic ability with a flexible assessment of an applicant's talents, experiences, and potential, including potential diversity contributions; it precludes any quick formula for admitting a given applicant or for giving preference to one particular set of qualifications without reference to the class as a whole. Rice is a highly selective institution and receives many more applications from viable candidates than it has available spaces. An inevitable consequence of Rice's approach is that some highly accomplished students will not be admitted. However, by selecting a wide range of matriculants of all types, the admission process seeks to enrich the learning environment at Rice and thus improve the quality of a Rice education for all students.

Due to the nature of the Rice education, Rice enrolls undergraduate degree candidates on a full-time basis only.

Applicants are selected on a competitive basis in six academic divisions: architecture, engineering, humanities, music, natural sciences, and social sciences. Candidates should give careful consideration to the category under which they wish to be considered. However, once enrolled, students are able to move freely among most divisions after consultation with their advisors. Music students must pursue the music program for at least the first year before changing divisions. The schools of music and architecture maintain limited enrollments; all majors are subject to faculty approval.

Those offered admission are expected to complete the remainder of their high school courses with the same superior performance that led to their admission.

## First-Year Applicants

The areas of focus generally used in evaluation of first-year candidates for admission include: scholastic record as reflected by the courses chosen and the quality of academic performance, recommendations from high school, the application presentation of personal information, special talents, essays, and standardized testing (the SAT and two SAT Subject Tests, or the ACT Plus Writing test).

**The High School Record—**Students must complete at least 16 college preparatory units as follows:

| | | | |
|---|---|---|---|
| English | 4 | Laboratory science (e.g., biology, chemistry, physics) | 2 |
| Social studies | 2 | A foreign language | 2 |
| Mathematics | 3 | Additional credits in any of the categories above | 3 |

The natural science and engineering divisions require trigonometry (precalculus) or other advanced mathematics courses and both chemistry and physics. Students may substitute a second year of chemistry or biology for physics.

Students admitted with academic deficiencies will be asked to complete the required work by taking high school or college-level courses during the summer before enrollment at Rice.

**Note: Because of the admission competition to enter Rice, successful applicants generally have taken 20 or more college preparatory courses in high school, many at the college level. Therefore, only those students who have more than 20 college preparatory courses may have the Office of the Registrar consider for Rice credit their college courses taken in high school.**

**Transfer of Coursework Taken During High School—**College-level courses taken during high school years may be considered for credit at Rice University on receipt of the following documentation:

1. An official transcript of all college courses sent directly from the college(s) attended. The college courses should be part of the normal curriculum of the college and taught by regular members of the college faculty.
2. Official notification by letter from the high school principal or guidance counselor that the credit earned was not used to meet high school diploma requirements. College-level courses that appear on the high school transcript will not yield credits at Rice.

**Recommendations—**Candidates must submit evaluations from their guidance counselor and one teacher. The necessary forms are included on the Common Application and the Universal Application websites.

**The Application—**All freshman applicants must complete the Common Application or the Universal College Application. The application and the Rice supplement provide the committee with important information on the student's background and gives the applicant an opportunity to provide statements on his or her interests, experiences, and goals. The application fee is $75. Students for whom this fee creates a hardship may apply for a waiver. Freshman applicants should provide proof of a fee waiver for the SAT or ACT test or eligibility for the school lunch program. In any case, a letter from the student's high school counselor is required. Financial stress created by application fees to other institutions is not considered a valid reason to grant a fee waiver. Only U.S. citizens and permanent residents are eligible for an application fee waiver.

**Standardized Testing—**All freshman applicants must take either the SAT and two SAT Subject Tests in fields related to their proposed area of study, or the ACT Plus Writing test. These exams are administered by the College Board and the American College Testing Program. The applicant is responsible for arranging to take the tests, and official score reports must be submitted to Rice before the student can be considered for admission. The College Board code for Rice is 6609. The ACT code is 4152.

Rice uses the highest scores from any sitting on the SAT in order to consider each applicant's most positive test results. Recognizing that this policy could disadvantage those students who cannot afford repeated testing or expensive test prep coaching, we believe a comprehensive testing history provides us with the appropriate context required for making a fair judgment of what the test scores mean in a holistic admission process. Therefore, we require all applicants submitting the SAT to submit all scores to Rice. The ACT does not condone splitting and combining subscores from multiple sittings, therefore, it is Rice's policy to use the highest ACT composite score in admission consideration.

Additionally, applicants for whom English is not their native language are required to submit official results of either the TOEFL or IELTS exam. A minimum score of 100 is required on the internet-based TOEFL or a 600 on the paper-based TOEFL. The minimum acceptable score for the IELTS exam is 7.0. Applicants may be exempt from this requirement if the language of instruction at the school(s) they attended for the most recent two full years (minimum) is English.

**Personal Interview—**Although a personal interview is not a requirement, we recommend an interview for first-year applicants as an excellent opportunity to discuss the applicant's interests, needs, and questions. On-campus interviews are conducted by the admission staff and a select group of Rice senior students. Off-campus interviews are conducted throughout the United States and abroad by Rice alumni. The Committee on Admission makes no distinction between on-campus and off-campus interviews. Interviews are available to seniors only.

**Music Audition—**The deadline for submitting all required documents is December 1.

**Architecture Portfolio—**Architecture applicants must submit a portfolio along with the required application materials by the deadline for either the Early Decision or Regular Decision Plan.

## Decision Plans

**Early Decision Plan—**Early Decision is a binding decision plan designed for students who have selected Rice as their first choice. Students may initiate applications to other colleges under nonbinding plans but must withdraw those applications if admitted to Rice.

Early Decision applicants must complete the required standardized testing prior to or by the November testing dates in their senior year. All other materials should be submitted by November 1. Admission notices will be mailed by mid December. The committee will admit, defer, or deny Early Decision applicants. Deferred applicants are considered with the Regular Decision pool.

**It is important to note that, if admitted under Early Decision, a candidate must withdraw all other college applications, may not submit any additional applications after accepting the offer, and must accept Rice's offer of admission by submitting a $300 nonrefundable deposit by January 1.** An additional $100 housing deposit is required of those desiring on-campus accommodations.

Those accepted under Early Decision who demonstrate financial aid eligibility will receive a financial aid package in the admission packet. To apply for need-based aid, Early Decision applicants must submit the College Scholarship Service Profile and the student and parent 2013 income tax and W-2 forms by November 15, 2014. Register for the CSS PROFILE at www.collegeboard.com. Students will complete the PROFILE online. The PROFILE number for Rice is 6609.

**Shepherd School of Music—**All candidates applying to the Shepherd School of Music must submit their application and all required supporting documents by December 1. Admission notification is April 1. Admitted students must submit a $300 nonrefundable deposit by May 1.

**Rice/Baylor Medical Scholars Program—**All candidates interested in the Rice/Baylor Medical Scholars Program must submit the Baylor College of Medicine application to Rice University by December 1. Rice application materials are due by November 1 for Early Decision or December 1 for Regular Decision.

**Regular Decision Plan—**Students who apply Regular Decision must submit their materials by January 1 to receive notification by April 1. Candidates who miss the deadline must do so in full knowledge that they are in a less competitive position. Regular Decision applicants must complete their standardized tests by December of their senior year of high school.

Regular Decision applicants who are offered admission should submit a $300 enrollment deposit by May 1 to reserve their places in the incoming class. Those who desire a room on campus must pay an additional $100 deposit. Enrollment deposits are not refundable.

## Accelerated Students

Rice University will accept applications from students who are completing high school in less than four years. It is important to note that these students will compete with other candidates who will be completing four years of high school. Therefore, it is the candidate's responsibility to demonstrate that he or she has exhausted all college preparatory course work at his or her school. Further, because of the residential focus and commitment to student self-governance at Rice, candidates must also demonstrate the maturity and personal development that would allow them to participate fully and responsibly in campus life. **Because of the unique circumstances surrounding the accelerated student, it is strongly recommended that these candidates have an on-campus interview with an admission officer well before the application deadline**.

## Home-Schooled Applicants

The Committee on Admission and Financial Aid recognizes that each home-schooled applicant is in a unique educational program. To ensure that our evaluation process is fully informed, home-schooled applicants are encouraged to provide clear, detailed documentation of curriculum of study, assessment tools, and learning experiences. Rice requires evaluations from a guidance counselor and a teacher from all applicants. For home-schooled applicants, at least one of these evaluations must be from someone not related to the student.

## Transfer Students

Students with superior records from two-year or four-year colleges or universities may apply as transfer candidates. Applicants should have completed at least 12 semester hours of college work since graduating from high school. Students with less than 12 semester hours should apply through the freshman admission process. High school students enrolled in an Early College program or Dual Enrollment program are not eligible to apply as transfer students and should apply through the freshman admission process. Students who have already completed a bachelor's degree may not apply for transfer admission.

Applicants for transfer admission must file the following with the Office of Admission:

- The Transfer Common Application and the Rice Writing Supplement or the Universal College Application and Rice Supplement
- Official transcripts of all high school and college work completed to date, as well as courses in progress
- Professional evaluation of transcripts from non-U.S. institutions. Recommended evaluators are SpanTran (www.spantran.com) and Education Credential Evaluators (www.ece.org).
- Two college instructor evaluations
- The college official's report
- SAT or ACT Plus Writing scores
- A $75 application fee

Applications with the appropriate documents must be submitted by March 15 for fall term admission. Notification of the admission decisions are made on a rolling basis between May 1 and June 1. The criteria used in evaluating transfer applications are similar to those applied to applicants for the first-year class, except that special emphasis is given to performance at the college level. Because of the highly competitive nature of transfer admission, it is recommended that applicants have a minimum 3.20 (4.00 scale) grade point average on all college work. The SAT or ACT Plus Writing must be taken by February 15. The SAT Subject Tests are not required.

Additionally, applicants for whom English is not their native language are required to submit official results of either the TOEFL or IELTS exam. A minimum score of 100 is required on the internet-based TOEFL or a 600 on the paper-based TOEFL. The minimum acceptable score for the IELTS exam is 7.0. Applicants may be exempt from this requirement if the language of instruction at the school(s) they attended for the most recent two full years (minimum) is English.

Students for whom the $75 application fee creates a hardship may apply for a waiver. Transfer applicants must send a copy of the Student Aid Report that they receive after completing the Free Application for Federal Student Aid (FAFSA) along with a request for a fee waiver to the Office of Admission. Financial stress created by application fees to other institutions is not considered a valid reason to grant a fee waiver. Only U.S. citizens and permanent residents are eligible for an application fee waiver.

Transfer students must be registered in residence at Rice for at least four full semesters during the fall or spring terms and must complete no fewer than 60 semester hours before earning a Rice degree.

## Advanced Placement/International Baccalaureate/International Certificate Programs

**Advanced Placement—**Students who score a four or five on the applicable Advanced Placement College Board examinations taken before matriculation at Rice may receive university credit for the corresponding Rice course(s). For more information, see AP Credit.

**International Baccalaureate—**Students who complete the International Baccalaureate diploma and receive a score of six or seven on a higher-level IB exam may receive course credit for the corresponding Rice course(s). For more information, see IB Credit.

**International Certificate Programs—**Students who have completed various international certificate programs may receive course credit for corresponding Rice courses; however, each student's documentation will be reviewed individually and on a case-by-case basis.The General Certificate of Education A-Level (United Kingdom), the Abitur (Germany), and the Baccalaureate (France) are eligible for review. For more information, see International Exam Credit.

*Back to top*

Last Revised : August 11, 2014

# Auditing Courses

Currently enrolled students may audit one or more courses at Rice without charge by securing permission of the instructor and by registering as an auditor with the Office of the Registrar. Upon completion, the audited course will appear on the student's transcript with a grade of either "AUD" or "NC" (No Credit). There are no credit hours associated with audited courses, and auditing a course does not affect a student's GPA. Request to audit a class or to change from audit to credit or vice versa must be done by the end of the second week of the semester.

# Majors and Minors

*Jump to:*

## Undergraduate Majors

To receive a bachelor's degree, a student must complete the requirements for at least one major. Rice offers majors in many fields. Within some majors, students have the choice of a particular area of concentration. Students also may choose to fulfill the requirements for more than one major; such majors do not necessarily need to be in related fields. More detailed information on the departmental majors described below may be found in the Undergraduate Degree chart, in the section "Departments and Interdisciplinary Programs" or by contacting the department. The process for declaring majors appears in the section Declaring Majors and Minors and Area Majors.

**School of Architecture**—Students admitted to the university as architecture majors must first complete four years of the BA program (architecture major) before applying to the BArch program in their senior year. If admitted, they are assigned a preceptorship with an architectural firm for a one-year period, after which they return to Rice to complete the BArch degree program.

**George R. Brown School of Engineering**—Rice offers majors in bioengineering, chemical engineering, civil engineering, computational and applied mathematics, computer science, electrical engineering, environmental engineering sciences, mechanical engineering, materials science and engineering, and statistics. These programs lead to either the BA or the BS degree and may qualify students for further graduate study.

**School of Humanities**—Students may declare majors in art history, classical studies, English, French studies, German studies, Spanish and Portuguese, history, linguistics, philosophy, religious studies, and visual and dramatic arts. Interdisciplinary majors are available in Ancient Mediterranean Civilizations, Asian Studies, Medieval and Early Modern Studies, and the Study of Women, Gender, and Sexuality, while an interdepartmental major in policy studies combines courses from the School of Humanities and the School of Social Sciences.

**Shepherd School of Music**—Music students may opt for either a BA or a Bachelor of Music (BMus) degree in performance, composition, music history, and music theory. Students who pass a special qualifying examination may elect an honors program that leads to the simultaneous awarding of the BMus and Master of Music (MMus) degrees after five years of study.

**Wiess School of Natural Sciences**—All natural sciences departments, including biochemistry and cell biology, chemistry, earth science, ecology and evolutionary biology, mathematics, and physics and astronomy offer programs leading to the BA degree. BS degrees are offered in some departments. Majors include astronomy, astrophysics, biochemistry, biology, kinesiology, chemical physics, chemistry, earth science, mathematics, and physics. Students also may elect double majors combining one of the programs in natural sciences with another science, a humanities discipline, or an engineering field.

**School of Social Sciences**—Rice offers majors in anthropology, economics, mathematical economic analysis, political science, psychology, sociology, and sport management. Both the interdepartmental policy studies major and the cognitive sciences majors include science, engineering, and humanities courses, while the managerial studies major incorporates course work in the schools of engineering and management.

## Declaring Majors and Minors

Students declare their major via the Declaration of Major form. The department chair or designee must sign the form acknowledging the declaration. The department will counsel the student about the requirements that must be met to complete the major and the likelihood the student will be able to meet them. If the department believes a student is not well prepared for success in its major, it may express its reservations on the form and/or propose a specific course of study to help a student improve his or her background. No department or program, except the School of Architecture

and Shepherd School of Music, may refuse to admit an undergraduate as a major unless specific curricular conditions for such refusals are included in the relevant description of the requirements for the major, or in cases of resource limitations. Students may not obtain both a BA and a BS in the same major.

Students are encouraged to declare an official major as soon as they have decided on it, so that a major advisor can be assigned. Students may declare a major at any time up to, before or during the spring semester of their second year at Rice. They will not be permitted to register for the fall semester of their third year without having declared a major. The major declaration deadline is listed in the Academic Calendar each year. (Transfer students should declare within their first year or before reaching junior level status.) Students are always free to change their major by completing the Change of Major form. However, such a change may entail one or more additional semesters at the university. Area majors are an exception to this rule and must be declared by the fourth semester before graduation (see Area Majors below).

Students may declare a minor only after they have first declared a major. The declaration of minor process is identical to that of majors. Students may not major and minor in the same subject.

Once a student declares a major or minor, the title of the major or minor is noted on the student's transcript, and a faculty advisor in the appropriate department is assigned. To gain full benefit of departmental or program course offerings, students should meet regularly with faculty major or minor advisors. To assess progress toward degree requirements, students must complete two steps: 1) students should request ECAPP degree audits (via ESTHER) to review progress toward university and general degree requirements; 2) students should meet regularly with their faculty major and minor advisors to review progress toward completion of major, minor or degree requirements.

For instructions on how to declare a major or minor in ESTHER, visit the Major and Minors page of the Office of the Registrar's website.

## Area Majors

Students with well-defined needs that are not met by established departmental or interdisciplinary majors may propose an area major. Area majors combine courses from more than one department into a cohesive plan of original study that is equivalent in quality and rigor to a traditional major.

Area majors are rare and limited by the available academic resources and must be distinct from other majors at Rice. They differ from double majors, which must conform to the requirements of both departments. An area major constitutes a single major with specific requirements that include courses from two or more departments. An area major may not be used to form a double major, and students with area majors must still meet all the other university graduation requirements.

Students initiate an area major after first consulting with faculty advisors from each of the departments involved. Once support has been obtained from these faculty advisors, students should consult the Office of Academic Advising which serves as a liaison to the Committee on the Undergraduate Curriculum (CUC). Students work closely with each faculty advisor to design a comprehensive and substantial course of study and to decide on an appropriate title. This course of study must be formulated in a written proposal. Each faculty advisor and the Office of Academic Advising must sign off on the plan before submission to the chair of the CUC. The CUC determines final approval. As part of the review process, the CUC consults chairs of the involved departments to confirm that courses necessary for successful and timely completion of the major will be offered. If approved, the Office of Academic Advising officially certifies the area major plan to the Office of the Registrar and goes on to oversee the major on behalf of the faculty advisors. Any change in the area major requirements needs the approval of both the faculty advisors and the CUC.

Students may not propose an area major if they are within three semesters of graduation unless the Committee on Examinations and Standing rules that exceptional circumstances warrant this action. Under no circumstances may students propose an area major in their final semester before graduation.

# Study Abroad

Rice University Study Abroad provides substantial, intellectually rigorous and culturally enriching international opportunites. Rice Study Abroad is committed to providing high quality academic-based educational programs in collaboration with prestigious international universities and select program providers. Rice approved programs are distinguished by their academic focus contributing to the cirricular needs of Rice University as well as integration with host communities through intensive language instruction, field studies, professional internships and independent study opportunities.

Students must make their study abroad arrangements through Rice Study Abroad in order to ensure proper enrollment, credit transfer, financial aid portability, scholarship eligibility and risk management coverage.

Transfer credit for study abroad is governed by the guidelines established by the Faculty Senate, available here.

Last Revised : August 13, 2014

 

# Teacher Education

Students in the teacher education program earn Texas state teacher certification at the secondary level, grades 7–12. Subjects include art, English, history, Latin, life sciences, mathematics, physical sciences, physics/mathematics, science, social studies, and Spanish. For more information on teacher education programs at the undergraduate and graduate levels, see Teacher Education.

Last Revised : August 11, 2014

 

# Undergraduate Degrees

*Jump to:*

## Bachelor of Arts

The specific requirements of individual majors leading to the Bachelor of Arts degree vary widely. No department may specify more than 80 semester hours (required courses, prerequisites, and related laboratories included) for the Bachelor of Arts.

In addition to meeting the degree requirements for all bachelor's degrees, to qualify for the Bachelor of Arts, students in all fields except architecture must complete at least 60 hours in course work outside the major, and students in architecture must complete at least 36 hours in course work outside the major.

## Bachelor of Science in the Wiess School of Natural Sciences

The Bachelor of Science degree is offered in astrophysics, biochemistry and cell biology, chemistry, chemical physics, earth science, ecology and evolutionary biology, mathematics, and physics. The specific degree requirements vary from field to field and differ from those of the Bachelor of Arts in that there are greater technical requirements. No department may specify more than 80 semester hours (required courses, prerequisites, and related laboratories included) for the Bachelor of Science. To earn a BS degree in one of these fields, students must complete at least 60 hours in course work outside the major.

## Bachelor of Science Degrees in Engineering

- Chemical Engineering (BSChE)
- Civil Engineering (BSCE)
- Computer Science (BSCS)
- Electrical Engineering (BSEE)
- Materials Science (BSMSNE)
- Mechanical Engineering (BSME)
- Bioengineering (BSBE)

The Bachelor of Science degree in a given engineering field is distinct from the Bachelor of Arts degree in that it must meet greater technical requirements. In establishing a departmental major for the degree of bachelor of science in electrical engineering, materials science, and mechanical engineering, the department may specify no more than 92 semester hours (required courses, prerequisites, and related laboratories included).

In establishing the departmental major for the BS in chemical engineering, the department may specify no more than 100 semester hours (required courses, prerequisites, and related laboratories included). The bioengineering department specifies 94 semester hours for the BS degree (required courses, prerequisites, and related laboratories included). The civil and environmental engineering department specifies 93 semester hours for the BS degree (required courses, prerequisites, and related laboratories included). To earn a BS degree, students must meet the following minimum semester hour requirements in course work:

- All majors except chemical engineering, mechanical engineering, civil and environmental engineering, and computer science—a total of at least 134 hours
- Chemical engineering majors—a total of at least 132 hours, depending on area, up to 137 hours
- Mechanical engineering and civil engineering—132 hours total
- Computer science majors—a total of at least 128 hours

The programs leading to BS degrees in Bioengineering, Civil Engineering, Chemical Engineering, Electrical Engineering

and Mechanical Engineering are accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org.

## Other Bachelor's Degrees

The professional Bachelor of Architecture (BArch) degree requires a fifth year of study and a one-year preceptorship. The Bachelor of Music (BMus) degree requires advanced courses in performance and ensemble in addition to the core music curriculum.

# Academic and Judicial Discipline

*Jump to:*

## Academic Probation

Students are placed on academic probation at the end of any semester if:

- Their grade point average for that semester is less than 1.67, or
- Their cumulative grade point average is less than 1.67 (this requirement is waived if the grade point average for that semester is at least 2.00)

The period of probation extends to the end of the next semester in which the student is enrolled. Students on probation (academic or other disciplinary matters) may not be candidates for, or hold, any elected or appointed office, nor are they allowed to enroll in more than 17 semester hours.

## Academic Suspension

Students are suspended from the university at the end of any semester if they:

- Earn grades that will place them on academic probation a third time, or
- Have a grade point average for the semester that is less than 1.00 (exceptions are made for students completing their first semester at Rice).

Students readmitted after a previous suspension will again be suspended if in any succeeding semester they fail to achieve at least one of the following requirements:

- a cumulative and semester grade point average of at least 1.67, or
- a semester grade point average of at least 2.00.

The first suspension period is normally one semester; the second suspension period is at least two semesters. Students may only return for a fall or spring semester following suspension, not for summer school. Students are not readmitted after a third suspension.

Participation in student activities on and off campus and use of Rice facilities, including, but not limited to, the student center, the colleges, the playing fields, the gym, and the computer labs, are limited to *enrolled* students.

Students placed on academic suspension are notified by the Office of the Registrar after all final grades have been received and posted to their record. Suspension is lifted the first day of class of the semester when the student returns to the university. When students serve the nominal term of suspension but do not intend to return to Rice, suspension is lifted after permission from the Committee on Examinations and Standing is granted.

Students facing a first or second academic suspension who verify with the Office of the Registrar, academic advising, and their department that successful completion of their proposed academic plan would satisfy their degree requirements in one semester if allowed to return, may have their suspension reduced to probation. This is known as the "senior exception rule," and students may invoke this rule only once for a given academic degree plan. Students who graduate at the end of a semester under academic circumstances that would normally place them on probation or suspension will not have the terms “academic probation” or “suspension” placed on their transcript for that semester.

## Readmission After Suspension

Students seeking readmission after academic suspension should address a letter of petition to the Committee on

Examinations and Standing, in care of the Office of the Dean of Undergraduates, which must be received by June 1 for readmission in the fall semester and November 1 for readmission in the spring semester. The petition should demonstrate what the student did while they were separated from Rice and how they have prepared themselves to successfully function as a student at Rice. The petition must include two supporting letters from persons for whom the student has worked during the suspension period as a student or an employee, as well as an academic plan. Academic plans must be reviewed and approved by the Office of Academic Advising by June 1 for readmission in the fall semester and November 1 for readmission in the spring semester. To allow time for review and revision of the academic plan, students must submit their first draft academic plan at least three weeks in advance of the deadline. Guidelines for completing an academic plan can be found at www.rice.edu/advising. If the problems causing the previous difficulty appear to be resolved, the student generally is readmitted. Students returning from academic suspension must maintain regular contact with the Office of Academic Advising or a designated faculty advisor throughout the semester. In the first semester upon return from an academic suspension, students may not become candidates for, or hold, any elected or appointed office, nor are they allowed to enroll in more than 17 semester hours.

In some instances, the committee may postpone approval of readmission or rule that suspension is permanent. Although it may do so at its discretion, the Office of the Registrar does not normally place on probation or suspension students who perform poorly in the Rice Summer School. Students should be aware, however, that Rice Summer School grades are included in their grade point averages.

## Disciplinary Probation, Suspension, and Expulsion

The Code of Student Conduct applies to all Rice students and encompasses conduct both on and off campus. The Office of Student Judicial Programs may sanction students--including implementing disciplinary probation, suspension, or expulsion--for violations of the Code of Student Conduct or the Honor Code. Students who have been expelled, who are serving a suspension, who are under investigation for disciplinary violations, or who have pending Code of Conduct or Honor Code proceedings against them may not receive their degree, even if they have met all academic requirements for graduation. Students who are suspended or expelled must leave the university within the timeframe specified by Student Judicial Programs, generally 48 hours from being informed of the decision, though in cases of unusual hardship, Student Judicial Programs may extend the deadline. Any tuition refund will be prorated from the official date of suspension or expulsion, determined by the Office of the Registrar. A grade of "W" will be awarded to all enrolled courses regardless of when the suspension or expulsion began. Expelled students will have the expulsion noted on their transcript.

While on disciplinary probation or suspension, students may not run for, or hold, any elective or appointed office in any official Rice organization. Participation in student activities on and off campus and use of Rice facilities, including, but not limited to the student center, the colleges, the playing filed, the recreation center, and the computer labs, are reserved for enrolled students.

Students seeking readmission after a suspension for Code of Student Conduct or Honor Code violations or other nonacademic action should submit a petition in writing to the Office of Student Judicial Programs via email (SJP@rice.edu). The petition should include information on activities while on leave from Rice, including any education or employment; how the student met the requirements described by Rice at the time of separation; how the student addressed issues leading to the separation; and what the student learned from the separation. Once approved by Student Judicial Programs, the petition is forwarded to the dean of undergraduates for final readmission approval and action.

## Degree Revocation

The University reserves the right to revoke any degrees granted. A degree awarded may be revoked if the University becomes aware that the degree should not have been granted, such as a degree that was obtained by violating the Honor Code or Code of Student Conduct or by deception, misrepresentation, falsification of records, academic misconduct, research misconduct, or if the work submitted in fulfillment of -- and indispensable to -- the requirements for such degree are determined to fail to meet the academic standards that were in effect at the time the degree was awarded. Notification of the date of revocation will appear on the student's transcript, and the student will be asked to return the diploma. The Provost receives all recommendations for revocation of degrees and, after consideration and review, forwards to the President any recommendations deemed to be warranted. The Provost may also initiate and forward to the President his or her own recommendation for a degree revocation. The President will consider such all such recommendations forwarded by the Provost and effectuate those he or she determines to be warranted. Procedures governing degree revocations may be obtained from the offices of the Registrar, Provost or President.

The University also reserves the right to withdraw a degree to correct an administrative error, such as an incorrectly listed degree, or in a situation where it was found that a student had not actually fulfilled all graduation requirements.

Back to top

# Attendance and Excused Absences

Students are expected to attend all scheduled activities for all of the classes for which they are registered during the entire course of the academic semester for which they are enrolled. The academic calendar indicates normal class days, recesses, and holidays. Instructors, however, may schedule required activities on other days, including recesses, holidays, and weekends, if required by programmatic needs, such as laboratories or field trips. Such requirements must be clearly stated in the online course description available at registration and on the syllabus, and instructors should try to provide compensatory time off for students.

The university understands that students participating in university-sponsored extracurricular activities may, on rare occasions, need to miss a class session during the semester. As a matter of course, students should inform their instructors in advance of absences resulting from participation in university-sponsored activities, and faculty normally will give a reasonable opportunity to make up work missed on such occasions.

No nonacademic university-sponsored event at which student attendance is required may be scheduled or rescheduled for any date after the day following the last day of classes. Exceptions may be granted by a quorum of the Committee on Examinations and Standing only for events where scheduling is not under the control of the university. On the class days falling during the last calendar week of classes, an individual student may participate in only one university-sponsored event, which may be scheduled or rescheduled, so long as no more than one night would be spent outside of Houston for travel. For events during the last week of classes, the reading period, and the final examination period, a quorum of the Committee on Examinations and Standing must be satisfied that each student is in satisfactory academic standing to participate in an event. If a quorum of the Committee on Examinations and Standing cannot meet in a timely fashion, then the executive committee of the Faculty Senate will handle exception requests.

Absences for activities other than university-sponsored events may be negotiated on an informal basis between the student and the faculty member. Alternatively, absences may be formally excused on a case-by-case basis if a petition explaining the nature of the event, accompanied by suitable documentation, is submitted to the Committee on Examinations and Standing at least two weeks before the event.

## Resolving conflicting course obligations scheduled outside of assigned class time

Many courses require presentations that cannot reasonably be accommodated within the scheduled class period. Problems occur when faculty schedule these presentations during times that conflict with other regularly scheduled classes.

**Principles**

- Generally, faculty should plan their course activities to avoid conflicts with other regularly scheduled classes.
- Generally, all deadlines and schedules will be included in the syllabus or announced, in writing, early in the semester.
- It is the responsibility of faculty members to make appropriate accommodations and adjustments when required class exercises are scheduled outside of assigned class time.
- A student must not be penalized either directly or indirectly.

**Resolution of scheduling conflicts**

- Class presentations outside of the scheduled class time should be held on evenings and weekends.
- Registrar-assigned class times take priority over activities of other classes.
- When two or more classes require activities outside of class time, the order of priority is determined by the date at which the exercise was announced in writing and scheduled.
- When two or more classes require activities outside of class time, activities which require external reviewers or coordination of multiple schedules have priority over individual exercises that can rescheduled.
- Required exercises outside of assigned class times that are announced at the last minute do not take priority over those announced earlier, even if they require coordination of multiple schedules.

**Roles and responsibilities**

- Ideally, faculty will cooperate with one another when they need to resolve scheduling conflicts.
- If faculty involved are unable to find a solution that does not penalize or unduly disadvantage the student,

department chairs will resolve the scheduling conflict.

- If department chairs are unable to resolve the scheduling conflict, the matter will be referred to the Dean of Undergraduates or the Dean of Graduate and Postdoctoral Studies, or their designees, who will have final authority for resolution.

Last Revised : August 11, 2014

# Final Examinations

The decision to give a final exam as a required part of the course rests with the instructor. All tests and examinations are conducted under the honor system. No examinations or other course assignments may be due between the last day of classes and the first day of the final examination period.

Examinations are considered final examinations when they:

- Cover more than the material learned since the last exam, or
- Are the only exam in the course, or
- Require comprehensive knowledge of the entire course.

Such exams may be given only during the final examination period.

All class periods will be assigned a final examination time by the Office of the Registrar. Instructors may choose to use that time for a scheduled final. If they choose this option, the Office of the Registrar will assign a room, and the final exam will be administered in that room at the designated time. Instructors may choose instead to give a take-home exam or no exam at all. Some instructors assign end-of-term projects or papers rather than final examinations. With regard to due dates, final papers or projects will be treated the same as take-home exams.

Take home exams should be available to the students as soon as possible after the end of classes, but must be available no later than the end of the next business day after classes have ended. Take home exams may be no longer than five hours in length. The due date of take-home exams may be no earlier than the end of the examination time assigned to that class by the Office of the Registrar. Instructors may specify due dates later than this time, but not later than the end of the last day of the examination period.

No student should be given an extension of time or opportunity to improve a grade that is not available to all members of the class, except for verified illness or justified absence from campus. However, students cannot be required to take more than two scheduled exams in two consecutive calendar days. Students also cannot be required to complete more than two take-home and/or scheduled final exams on the same calendar day (unless this is the last day of the examination period). In both instances, if the student wishes to make alternative arrangements and is unable to work out such arrangements with the instructor(s) involved, the instructor of the third and any subsequent exams will be required to allow the student to reschedule that exam.

Last Revised : April 14, 2011

 

# Grades

*Jump to:*

See also Faculty Grading Guidelines and Syllabus Standards.

## Pass/Fail Option

Undergraduates may register for courses on a pass/fail basis. Students:

- May not take more than one course as a pass/fail per semester for each full year of residence (students studying in off-campus programs through Rice are considered to be in residence for the purpose of this rule).
- May not take more than four courses as pass/fail (even if they are in a five-year degree program).
- May not take more than a total of 14 semester hours total as pass/fail.
- May register for only one course as pass/fail in a semester.
- May not take as pass/fail a repeatable course previously taken and designated as pass/fail.
- May not take as pass/fail those courses used to meet the requirements for their major. If students take such courses pass/fail, the Office of the Registrar will replace the P with the grade earned during the final degree audit. This same rule and process applies to minors.
- Must submit the proper online form for a course to be taken pass/fail no later than the posted deadline, usually the end of the 10th week of semester.
- May not take First-Year Writing-Intensive Seminar (FWIS) courses as Pass/Fail.

Students may convert a pass/fail course to a graded course by submitting the proper online form with the Office of the Registrar. The deadline is by the end of the second week of the following semester.

Students should be aware that while a grade of P does not affect their grade point average, a grade of F is counted as a failure and is included in their GPA. Students who take a course during the Rice summer session as pass/fail also should be aware that this counts toward their allowable total of four courses. For more information, see The Pass/Fail Option.

## Satisfactory/Unsatisfactory

Satisfactory/unsatisfactory courses are those that do not use traditional grading procedures and instead assign a grade of S or U rather than a letter grade. Such courses or labs are designated by the instructor and are, in most cases, graduate level courses. With S/U courses, instructors report the S if the student successfully completes the course, or the U if they have not. Students should be aware that while a grade of S or U does not affect their grade point average, no credit will be awarded if a grade of U is received. Courses with a grade of S will count towards total credits earned.

## Audit

Students have the option of auditing courses. For auditing students, instructors report either the AUD or the NC grade symbol, the AUD if the student met the audit requirements of the class, or the NC if they have not. There are no credit hours associated with audited courses, and auditing a course does not affect a student's GPA. Request to audit a class or to change from audit to credit or vice versa must be done by the end of the second week of the semester. (See Grade Designations AUD and NC below.)

## Grade Symbols

Instructors are required to report a grade for all students whose names appear on the class roster. They grade their

students using the following conventional symbols: A+, A, A-, B+, B, B-, C+, C, C-, D+, D, D-, F.

## Grade Designations

Under certain circumstances, special designations accompany the student's grade. These designations do not affect the grade point average. The special designations include the following:

**AUD ("Audit")**—This designation is only used for people auditing the course, and specifically where the auditing student has met the audit requirements of the course. A grade designation of "NC" (No Credit) is given to students who do not meet the audit requirements. There are no credit hours associated with an AUD grade designation. (See Audit above.)

**INC ("Incomplete")**—Instructors report this designation to the Office of the Registrar when a student fails to complete a course because of verified illness or other circumstances beyond the student's control that occur during the semester. For an INC received in the fall semester, students must complete the work by the end of the first week of the spring semester or an earlier date as defined by the instructor, and instructors must submit a revised grade by the end of the second week. For an INC received in the spring or summer semester, students must complete the work before the start of the fall semester or an earlier date as defined by the instructor, and instructors must submit a revised grade by the end of the first week. If a grade is not submitted by the appropriate deadline, the INC will be automatically converted to a failing grade.

Students with an INC must be certain that tests, papers, and other materials affecting their grade or essential to completing a course requirement are delivered by hand to the appropriate professor or office according to the timeline previously stated, for the instructor to grade the documents and submit the final grade to the Office of the Registrar by the deadline. Loss or lateness because of mail service is not an acceptable excuse for failing to meet academic deadlines. A student who receives two or more INC in a semester may not enroll in the next semester for more than 14 semester hours. Students also should be aware that they may be placed on probation or suspension when the INC is changed to a grade, either by an instructor or by default.

**NC ("No Credit")**—This designation signals that no credit was granted for the course. It is used in situations where a person auditing a course has not met the audit requirements of the course as defined by the instructor.

**OT ("Other")**—Instructors report this designation to the Office of the Registrar when a student fails to appear for the final examination after completing all the other work for the course. Students must resolve the matter, and instructors must submit a revised grade, by the end of the first week of the spring semester or by the end of the fourth week after Commencement, whichever is applicable. An OT awarded during a summer semester must be resolved and the grade sumbitted by the start of orientation week. If a grade is not submitted by the appropriate deadline, the OT will be automatically converted to a failing grade. Students should be aware that they may be placed on probation or suspension when the OT is changed to a grade, either by an instructor or by default.

**W ("Official Withdrawal from University")**—Students who officially withdraw from the university after the designated drop deadline, the seventh week of classes, will receive a final grade of "W" for each course in which they were enrolled at the time of withdrawal.

Students who officially withdraw from the university by the drop deadline will not receive the grade of "W" for any courses in which they were enrolled for that semester. These courses will not be included on the official transcript.

**W ("Late Drop with Approval")**—A student who receives approval from the Committee on Examinations and Standing to drop a course after the designated drop deadline will receive a grade of "W" for that course. When requests for late drops are denied by the committee, the Office of the Registrar records the submitted grade.

If a student drops a class before the designated drop deadline for the semester, the course will not be included on his/her official transcript. New matriculants in their first semester at Rice may drop a class up until the last day of classes, and through the end of week ten in their second semester, if that is a full-term Spring semester, and the course will not be included on the student's official transcript.

**XII ("Article XII")—**This designation is used in various honor council or judicial cases when a student has opted to voluntarily withdraw from the university and forfeit credit for the course in question, with the understanding that the accusation will not otherwise be pursued.

## Grade Points

To compute grade point average, letter grades are assigned numeric values as follows:

| | | | |
|---|---|---|---|
| **A+** | 4.33* | **C** | 2.00 |
| **A** | 4.00 | **C-** | 1.67 |
| **A-** | 3.67 | **D+** | 1.33 |

| | | | |
|---|---|---|---|
| **B+** | 3.33 | **D** | 1.00 |
| **B** | 3.00 | **D-** | 0.67 |
| **B-** | 2.67 | **F** | 0.00 |
| **C+** | 2.33 | | |

* Effective in Fall 2018 semester, the grade A+ will be worth 4.0, not 4.33, in calculating the GPA.

**Grade Point Average Calculation**—For each course, the credit hours attempted and the points for the grade earned are multiplied. The points for each course are added together, and the sum is divided by the total credit hours attempted. Grade point averages are noted each semester on the student's official transcripts.

Last Revised : August 11, 2014

 

# Graduation Requirements

*Jump to:*

## Degree Requirements for All Bachelor's Degrees

Students are responsible for making certain that their plan of study meets all degree and major requirements. To graduate from Rice University, all students must:

- Be registered at Rice full time for at least four full fall and/or spring semesters
- Complete the requirements of at least one major degree program
- Complete at least 120 semester hours (some degree programs require more than 120 hours)
- Complete at least 60 semester hours at Rice University
- Complete at least 48 hours of all *degree* work in upper-level courses (at the 300 level or higher)
- Complete more than half of the upper-level courses in *degree* work at Rice
- Complete more than half of the upper-level courses in their *major* work at Rice (certain departments may specify a higher proportion)
- Complete all Rice courses satisfying *degree* requirements with a cumulative grade point average of at least 1.67 or higher
- Complete all Rice courses that satisfy *major and/or minor* requirements (as designated by the department) with a cumulative grade point average of at least 2.00 or higher.
- Satisfy the Writing and Communication requirement (see below)
- Complete one Lifetime Physical Activity Program (LPAP) course for one credit. Students with disabilities may make special arrangements to satisfy this requirement.
- Complete courses to satisfy the distribution requirements (see below)
- Otherwise be a student in good academic and disciplinary standing and not under investigation

No more than three hours of credit for student-taught College Courses (COLL) may be counted toward graduation. This includes all courses COLL 100-199 as well as COLL 200 Teaching Practicum.

No more than four hours of credit for LPAP courses may be counted toward graduation.

In order to earn a second degree, students must fulfill the requirements outlined in the Dual-Degree Requirements section below.

## Writing and Communication Requirement

All students must complete and pass a First-Year Writing-Intensive Seminar (FWIS). An FWIS is a content-based, 3-credit hour seminar open only to first-year students that can be taught in any department and focus on any topic, and in which writing and communication pedagogy plays a significant role in assignments and grading. To facilitate success in meeting this requirement, all students must take the English Composition Examination prior to matriculating. Students who fail the English Composition Exam, or fail to take it, must successfully complete the FWIS 100 Fundamentals of Academic Writing and Communication course during their first semester, and prior to enrolling in the FWIS course used to meet the graduation requirement. FWIS 100 cannot be used to meet the FWIS graduation requirement.

All first-year students must enroll in and successfully complete an FWIS during their first year at Rice, and all first-year students will be notified prior to Orientation Week if they have been assigned to take an FWIS during the fall or spring of their first year. Students who matriculate as freshmen may not substitute transfer credit for the FWIS. Transfer students who wish to satisfy the FWIS requirement with courses from another institution must apply for this credit before

the end of their Orientation Week. Neither freshmen nor transfer students may satisfy the FWIS requirement by taking an equivalent course at another institution after matriculating at Rice.

All FWIS courses carry the FWIS designation and cannot be taken as Pass/Fail. Students are allowed to change FWIS sections during the first two weeks of classes each semester, but they cannot drop one FWIS section without simultaneously adding another. After week two, FWIS courses cannot be dropped. In extraordinary circumstances, students may submit a petition to the Dean of Undergraduates, who may approve a drop on an exception basis.

See the Program in Writing and Communication's web site for FWIS section descriptions and for more information on the required English Composition Exam.

## Distribution Requirements

### Purpose of Distribution Requirements

The distribution system presupposes that every Rice student should receive a broad education along with training in an academic specialty. This goal is achieved by courses that are broad based, accessible to nonmajors, and representative of the knowledge, intellectual skills, and habits of thought that are most characteristic of a discipline or of inquiry across disciplines. There are three groups of required courses.

**Group I—**These courses have one or more of the following goals: They develop students' critical and aesthetic understanding of texts and the arts; they lead students to the analytical examination of ideas and values; they introduce students to the variety of approaches and methods with which different disciplines approach intellectual problems; and they engage students with works of culture that have intellectual importance by virtue of the ideas they express, their historical influence, their mode of expression, or their critical engagement with established cultural assumptions and traditions.

**Group II—**Three types of courses fulfill this requirement. The first are introductory courses that address the problems, methodologies, and substance of different disciplines in the social sciences. The second are departmental courses that draw on at least two or more disciplines in the social sciences or that cover topics of central importance to a social science discipline. The third are interdisciplinary courses team-taught by faculty from two or more disciplines.

**Group III—**These courses provide explicit exposure to the scientific method or to theorem development, develop analytical thinking skills and emphasize quantitative analysis, and expose students to subject matter in the various disciplines of science and engineering.

### Academic Planning for Distribution Requirements

Each student is required to complete at least 12 semester hours of designated distribution courses in each of Groups I, II, and III. The 12 hours in each group must include courses in at least two departments in that group. Divisional or interdisciplinary designations, e.g., HUMA or NSCI, count as departments for this purpose. Interdivisional courses approved for distribution credit may count toward the 12 semester hours in any relevant group; however, students may not count any one such course toward the 12 required hours in more than one group and may count no more than one such course toward the 12 required hours in any one group.

Students must complete the distribution requirements in each group by taking courses that are designated as a distribution course at the time of course registration, as published in that semester's *Course Offerings*. Courses taken outside of Rice and transferred in can be used to satisfy distribution requirements, assuming they are on the list of approved and designated distribution courses at the time they were taken. Completed courses taken prior to matriculation are subject to the list of designated distribution courses at the time of matriculation.

## Applicable Academic Graduation Requirements

Students enrolled in four- (or five-) year bachelor's programs may decide whether to follow the graduation general and major requirements in effect when they first matriculated at Rice or those in effect when they graduate. If they graduate more than seven (or eight) years after their matriculation, students must graduate under the regulations in effect at the time of their last readmission or those in effect when they graduate. Also, departments may review courses completed in a major more than seven (or eight) years before the student's anticipated graduation. If the department concludes that a course no longer satisfies the requirements of the major, it is not credited toward the major program, although it remains on the student's record.

Departmental major requirements may vary from year to year during the period between a student's matriculation and graduation. The department may, at its discretion, make any of these variations available to a student for completion of the major requirements. When declaring the major or minor, students and advisors should identify and clearly document the set of major requirements to be followed. Each should retain a copy of the documented major requirements. If a new degree program, major, or minor is created during the student's time at Rice, the new program will be available to the

student as if the program appeared in the General Announcements at the time of matriculation.

## Application for Degree and Degree Conferral

All students must complete and submit an Application for Degree Form available in ESTHER. This form is required for all students who plan to complete their degree requirements at the end of the fall or spring semester. A late fee will be assessed for applying after the deadline (please consult the semester-specific Academic Calendar for deadline).

Upon completion of degree requirements, degrees are approved by the faculty and conferred only in December and May. Degree recipients may then participate in the annual commencement ceremony, celebrated each year after the conclusion of the spring semester. Under specific, limited circumstances, an undergraduate student may participate in commencement without being a degree recipient, provided that the student would be joining his or her matriculating class in that commencement. The specific policy, rules and procedures are available from the Office of the Dean of Undergraduates and may be found on that office's website.

## Dual-Degree Requirements

To earn a second four-year bachelor's degree, also known as a dual degree, currently enrolled undergraduates who have not yet completed their first bachelor's degree must:

- Be accepted for the second major by the major department
- Fulfill all requirements for the second degree
- Complete at least 30 additional semester hours at Rice beyond the hours required for their first degree (these hours are applied to the second degree)

Students seeking a second degree should submit an additional declaration of major form with the Office of the Registrar. This paperwork should include the addition of the proposed degree and major programs along with the approval of the chair or undergraduate advisor of each department involved, indicating that the proposed course program satisfies all major and degree requirements.

Students with a previously earned bachelor's degree from Rice who wish to earn a second bachelor's should look at the Non-Traditional Student section.

Back to top

Last Revised : August 11, 2014

# Leaves and Withdrawals

## General Information

All students taking a leave or withdrawal from Rice should submit their request on a Separation Form. Approval of a withdrawal and leave of absence is always contingent on the student's satisfactory completion of course work in the semester preceding the leave. Students performing poorly may have their approved leave converted to suspension.

After a separation of more than four semesters, students seeking to return to Rice must submit a written petition to the Committee on Examinations and Standing no later than June 1 for the fall semester and November 1 for the spring semester. The petition should include an academic plan approved by the Office of Academic Advising and two letters of support. Academic plans must be reviewed and approved by the Office of Academic Advising by June 1 for readmission in the fall semester and November 1 for readmission in the spring semester. To allow time for review and revision of the academic plan, students must submit their first draft academic plan by October 7 in the fall semester and by May 7 in the spring semester. Guidelines for completing an academic plan can be found on the Academic Advising web site.

## Leave of Absence

Students may request a leave of absence from the university by applying in writing to the Office of the Dean of Undergraduates at any time before the first day of classes in the semester for which they are requesting a leave. A leave of absence taken after the first day of classes is considered a voluntary withdrawal.

To gain readmission following an approved leave of absence of not more than four semesters, students must notify the Office of the Dean of Undergraduates no later than June 1 for the fall semester and November 1 for the spring semester. We strongly recommend that the student consult with the Office of Academic Advising about their academic plan.

After a leave of more than four semesters, students must submit a written application to the Committee on Examinations and Standing no later than June 1 for the fall semester and November 1 for the spring semester. Academic plans must be reviewed and approved by the Office of Academic Advising by June 1 for readmission in the fall semester and November 1 for readmission in the spring semester. To allow time for review and revision of the academic plan, students must submit their first draft academic plan by October 7 in the fall semester and by May 7 in the spring semester. Guidelines for completing an academic plan can be found on the Academic Advising web site.

## Military Leave of Absence

Students who require a leave of absence because of being called to active military duty should contact the Office of the Dean of Undergraduates.

## Voluntary Withdrawal and Readmission

Students may withdraw voluntarily from the university at any time during the semester up until the last day of classes. Students wishing to withdraw should inform their college master in person and give written notification to the Office of the Dean of Undergraduates, who notifies other offices of the university as necessary. Students who fail to give notice of withdrawal should expect to receive grades reflective of any missed academic work.

If they are in good academic standing at the time of their withdrawal, students may be considered for readmission after they submit a written application to the Office of the Dean of Undergraduates. The petition, received no later than June 1 for the fall semester, and November 1 for the spring semester, should include an academic plan approved by the Office of Academic Advising and two letters of support. Academic plans must be reviewed and approved by the Office of Academic Advising by June 1 for readmission in the fall semester and November 1 for readmission in the spring semester. To allow time for review and revision of the academic plan, students must submit their first draft academic plan by October 7 in the fall semester and by May 7 in the spring semester. Guidelines for completing an academic plan can be found on the Academic Advising web site.

If students withdraw within five weeks of the last day of classes, they must submit the written application to the dean of

undergraduates who has discretion to submit it to the Committee on Examinations and Standing. If students withdraw within five weeks of the last day of classes, the Committee on Examinations and Standing takes into account their grades (which reflects their performance up to the day of withdrawal) when ruling on their readmission. For purposes of readmission, students whose grades would have led to suspension had they not withdrawn are treated as if they had been suspended.

If students voluntarily withdraw for major medical or psychological/psychiatric reasons, however, they must meet the readmission conditions for a medical or involuntary withdrawal.

## Medical Withdrawal

Students may request a medical withdrawal from the university by applying in writing to the Office of the Dean of Undergraduates at any time during the semester, up until the last day of classes.

Following a medical withdrawal, students should submit a written petition for readmission to the Office of the Dean of Undergraduates no later than June 1 for the fall semester and November 1 for the spring semester. This petition must include documentation of treatment provided. Students also may be required to schedule an interview with the director of the Rice Counseling Center or Student Health Services or their designees. Academic plans must be reviewed and approved by the Office of Academic Advising by June 1 for readmission in the fall semester and November 1 for readmission in the spring semester. To allow time for review and revision of the academic plan, students must submit their first draft academic plan by October 7 in the fall semester and by May 7 in the spring semester. Guidelines for completing an academic plan can be found at www.rice.edu/advising.

Students who withdraw for psychological reasons within the last five weeks of the fall semester will not be eligible to apply for immediate readmission. An appeal for readmission will not be considered until the fall semester of the following year, and must be received no later than June 1.

Students considering taking time off for personal reasons related to their wellbeing and mental health are also encouraged to contact the Student Wellbeing Office for further information regarding the medical withdrawal and readmission process. The Student Wellbeing Office is part of the Dean of Undergraduates Division and serves as a liaison to the medical readmission process when students are ready to return.

## Involuntary Withdrawal

The university may insist on a student's involuntary withdrawal if, in the judgment of the Dean of Undergraduates or his/her designee, the student's behavior includes, but is not limited to, one or more of the following:

- Poses a threat to the safety or welfare of him/herself or other members of the Rice community;
- Has a serious medical or a psychological condition that the student cannot effectively address while enrolled or which is likely to be severely exacerbated by the Rice academic and/or living environment;
- Demonstrates behavior that seriously interferes with the education of other members of the Rice community;
- Is not able to continue functioning as a student.

Following an involuntary withdrawal, students should submit a written petition for readmission to the Office of the Dean of Undergraduates no later than June 1 for the fall semester and November 1 for the spring semester. This petition must include documentation of treatment provided. Students may be required to schedule an interview with the director of the Rice Counseling Center or Student Health Services or their designees. Academic plans must be reviewed and approved by the Office of Academic Advising by June 1 for readmission in the fall semester and November 1 for readmission in the spring semester. To allow time for review and revision of the academic plan, students must submit their first draft academic plan by October 7 in the fall semester and by May 7 in the spring semester. Guidelines for completing an academic plan can be found on the Academic Advising web site. Further information is available by contacting the Office of the Dean of Undergraduates.

Students taking time off for due to an involuntary withdrawal are also encouraged to contact the Student Wellbeing Office about the roadmap back to Rice. The Student Wellbeing Office is part of the Dean of Undergraduates Division and serves as a liaison to the medical readmission process when students are ready to return.

Students who are involuntarily withdrawn for psychological reasons after the designated drop deadline of the fall semester may not petition for readmission for the spring semester immediately following the semester from which they are withdrawn. Petitions should be received no later than June 1 to be considered for readmission for the upcoming fall semester.

## Unauthorized Withdrawal

Students who leave the university without proper notification of withdrawal are considered to have resigned. Resigned students will only be considered for readmission under exceptional circumstances. In order to be considered for

readmission, students must submit a petition no later than June 1 for the fall semester and November 1 for the spring semester to the Committee on Examinations and Standing, in care of the Office of the Dean of Undergraduates. Academic plans must be reviewed and approved by the Office of Academic Advising by June 1 for readmission in the fall semester and November 1 for readmission in the spring semester. To allow time for review and revision of the academic plan, students must submit their first draft academic plan by October 7 in the fall semester and by May 7 in the spring semester. Guidelines for completing an academic plan can be found on the Academic Advising web site.

## Resignation

A student may resign from the university by notifying the Dean of Undergraduates in writing. Resignation means the student is withdrawing, is no longer a student at Rice, and will not return to Rice. A resignation becomes effective when accepted by the Dean of Undergraduates. In general, if a student is under investigation for a potential Code of Student Conduct violation or has charges pending under the Code, those proceedings will terminate upon the Dean of Undergraduate's acceptance of the resignation.

## All Separated Students, Presence on Campus

All students separated from Rice, whether voluntarily or involuntarily, withdrawn, resigned, or due to academic or disciplinary suspension, must leave campus within 48 hours. Exceptions are granted by the Dean of Undergraduates or, in the case of disciplinary suspensions, the Office of Student Judicial Programs and, if the student is living on campus, the College Master. All separated students must return their college key to their college coordinator and their student ID to the Dean of Undergraduates. All separated students must understand that participation in student activities on and off campus and use of Rice facilities, including, but not limited to, the student center, the colleges, the playing fields, the gym, and the computer labs, are limited to enrolled students. Separated students are expected to be away from Rice during the term of the separation. If the student is employed by Rice at the time of separation, he or she must relinquish such employment or petition the Dean of Undergraduates for written permission to continue the on-campus employment. Noncompliance with these requirements may delay readmission.

## All Readmitted Students, Return to Campus

Students who have been readmitted must comply with any restrictions or requirements placed upon them by the Dean of Undergraduates or the Office of Student Judicial Programs. Failure to comply with or follow the restrictions or requirements may be cause for disciplinary action under the Code of Student Conduct. Student Judicial Programs may implement a period of disciplinary probation and/or other restrictions as a condition of any readmission.

## Completing Graduation Requirements Elsewhere

Students planning to complete graduation requirements at another institution must first secure formal written approval from the Dean of Undergraduates. Transfer credit is subject to all Rice's transfer credit policies and must be approved by the Registrar. All other graduation requirements apply, and the student is expected to adhere to all requirements and deadlines.

Last Revised : August 11, 2014

# Name Changes

To comply with a number of government agencies' reporting requirements, the university must record the name of each student who is a U.S. citizen as the student's name appears on his or her Social Security card. Students who need to change their names on Rice University records and who are U.S. citizens must notify the Office of the Registrar and present a Social Security card, marriage license, divorce decree or court order, and picture identification when submitting the form. After the change is implemented, the name on the Rice University transcript will read as printed on the supporting document(s).

Last Revised : June 20, 2011

 

# Registration

*Jump to:*

Currently enrolled students register in April for the fall semester and in November for the spring semester. Student registration is prioritized based on the hours completed and on academic history. Students matriculating in the fall complete their registration during Orientation Week before classes begin in August. Students matriculating mid-year register during Mid-Year Orientation before classes begin in January. Students are strongly encouraged to meet with their divisional or major advisor to discuss their courses for the upcoming semester.

New students may not register or attend classes until they return a properly completed health data form and meet immunization and TB screening requirements. Additionally, all first-time undergraduate students, including transfers, must meet the meningococcal meningitis vaccine requirement to live on campus. Immunizations required for admission are diphtheria/tetanus, measles, rubella, and mumps, meningococcal meningitis, with immunizations against hepatitis B and chicken pox recommended. The Mantoux tuberculin skin test is also required. A late fee of $30 is charged for failure to submit a fully completed health data form by the required date.

Each year, the Office of the Registrar publishes the specific deadlines for the semesters of that year. Unless students elect a special payment plan, they must pay all tuition, fees, room/board, and insurance charges for the fall semester by August 1 for first year students and by August 10 for all others. Spring semester charges are due by January 5. Any student not registered as of the last day to add classes or any student who is in arrears or becomes in arrears after the last day to add classes will be withdrawn from the university. Withdrawn students will not be allowed to receive credit for the withdrawn semester.

Appeals to this policy must be addressed to the dean of undergraduates. If readmitted, students must petition the Committee on Examinations and Standing to add classes late and must pay a late registration fee of $125. Additionally, students who are readmitted after being withdrawn for nonpayment will be assessed a $350 readmission fee.

## Drop/Add

During the first two weeks of classes, students may add or drop courses without penalty. After the second week of the semester, the following conditions apply for adds and drops. Undergraduate students:

- May not add courses after the second week of classes, except in extenuating circumstances and with the approval of the Committee on Examinations and Standing (a $75 fee per course will be assessed).
- May drop courses through the seventh week without penalty.
- May not drop courses after the end of the seventh week of classes except in extenuating circumstances and with the approval of the Committee on Examinations and Standing (a $75 fee per course will be assessed). Students who receive approval to drop a course after the designated drop deadline will receive a grade of “W” for that course.

Newly matriculated undergraduate students, both new first-time and transfer students in their first full-term semester at Rice (Fall or Spring), are permitted to drop courses up to the last day of classes. These same students, in their second semester at Rice, if that semester is a full-term Spring semester, are permitted to drop courses through the tenth week of classes without a fee.

Students are allowed to change FWIS sections during the first two weeks of classes each semester, but they cannot drop one FWIS section without simultaneously adding another. After week two, FWIS courses cannot be dropped. In extraordinary circumstances, students may submit a petition to the Dean of Undergraduates who may approve a drop on an exception basis.

For courses with start and end dates not coinciding with Rice’s typical semester calendar, otherwise known as “part of

term" courses, the Office of the Registrar will consult with the instructor and:

- Set the add deadline approximately one-seventh of the way into the course
- Set the drop deadline approximately one-half of the way into the course
- Post these special deadlines on the Office of the Registrar's website.

Students may not drop courses where the Honor Council has ruled a loss of credit.

*Note: Weeks are defined as academic instruction; thus, midterm recess is not included in this calculation.

## Course Load

Students at Rice normally enroll for 15 to 17 semester hours each semester. For most students, this allows completion of graduation requirements in eight semesters. Students must secure permission in writing from the Office of the Academic Advising if they want to register for more than 20 credits. Guidelines for securing permission for more than 20 credits can be found on the Academic Advising website. Petitions for more than 24 credit hours will not be considered. No student may receive credit for more than 20 credits in a semester, including courses taken elsewhere, without prior written approval.

Students must secure permission in writing from the Office of the Dean of Undergraduates before registering for courses if they want to:

- Register for less than 12 credits
- Register concurrently at another university
- Complete graduation requirements elsewhere

Students also should be aware that the Office of the Registrar must report a student's part-time status to various groups, such as loan agencies, scholarship foundations, insurance companies, etc. It is in the student's best interest to determine if he or she will be affected in any way by part-time status.

For more information, visit the Office of the Registrar website.

## Course Numbering System

Courses numbered 100-499 are generally considered undergraduate level, with the 100-299 sequence classified as lower-level (freshman/sophomore) and the 300-499 sequence classified as upper-level (junior/senior). Courses numbered 500 and above are generally considered to be at the post-baccalaureate or graduate level. Graduate and undergraduate students may, with departmental approval, take certain courses outside their designated level.

## Repeated Courses

Students may repeat courses previously taken, but the record of the first attempt (and grade) remains on the transcript, and both grades are included in term and cumulative grade point average calculations. In most cases, if students repeat courses previously passed, credit is awarded only once. For example, a student took HIST 117 and received a grade of B. The student repeated HIST 117 and received a grade of A. Both grades—the A and B—appear on the transcript and are included in his/her GPA; however, he/she only receives three credits toward his/her degree. On the transcript, a repeated course is indicated by one of the following values:

I– Included in GPA and earned hours

A– Included in GPA, but excluded from earned hours

E– Excluded from both GPA and earned hours

Some Rice University courses may be repeated for credit. They are specifically noted in the Course Offerings each semester. If a course may be repeated for credit, each grade appears on the permanent record and is included in the grade point average.

If students repeat courses for which they have received either advanced placement or transfer credit, credit will not be counted. Nor can credit be received twice for students transferring courses that repeat previous enrollment at Rice.

Students may not receive credit twice for cross-listed, equivalent, or graduate/undergraduate equivalency courses taken at the same time. If the course is not repeatable, students may not receive credit for cross-listed, equivalent, or graduate/undergraduate equivalency courses taken in different semesters.

## Change in Registration

The academic calendar lists deadlines for dropping or adding a course or section. This schedule is binding for all students. Adding or dropping a course, including transferring from one section to another or changing credit status in a course must be accomplished online or through the completion of the appropriate forms and submission to the Office of the Registrar. Changing a course to/from audit must be done within the first two weeks of the semester. Students can request exceptions to these deadlines by petitioning the Committee on Examinations and Standing.

*Back to top*

Last Revised : August 11, 2014

# Transcript Policies

Official transcripts are issued only at the request of the student. Official transcript requests should be made at least five working days before the desired date of issue. A $5 fee per transcript must be received before a transcript is issued.

Transcripts that have been presented for admission or evaluation of credit become a part of the student's permanent record and are not reissued. Transcripts from other institutions, if needed, must be sent to Rice University directly from the original issuing institution.

Last Revised : August 11, 2014

 

# Transfer Credit

*Jump to:*

*Prematriculation Transfer Credit*
*Postmatriculation Transfer Credit*
*International Transfer Credit*

Courses taken at another college or university that are appropriate to the Rice curriculum may be approved for transfer credit toward a Rice undergraduate degree. Students must have taken the course at a United States academic institution accredited by a regional accrediting agency, or at a foreign institution accredited by the appropriate agency, such as the government's Ministry of Education. Studies done in one's home country constitute transfer credit through the Office of the Registrar. Official transcripts from the transfer credit institution must be sent directly from the institution's registrar to Rice's Office of the Registrar or hand-delivered in an official sealed envelope. For students participating in an official study abroad program (i.e., studying in a country that is not one's home country) this coursework must be approved by Rice's Study Abroad Office.

All coursework must have earned a grade of at least a C- or the equivalent. Students may not transfer courses taken pass/fail or on a similar basis at other institutions. Generally, grades earned for transfer credit are not entered on the Rice transcript, and transferred courses have no effect on a student's Rice grade point average. However, where coursework taken at other institutions has been approved by the faculty as an explicitly specified component to a program's curriculum, the courses will be entered on the transcript and counted in the student's Rice grade point average (including grades lower than C-). Such opportunities are listed in the program curriculum description. Students should keep in mind that if they choose to pursue an advanced degree, the transcripts from transfer credit institutions, with the actual grades earned in the transferring courses, will be requested as part of a graduate school's admission process.

After matriculation at Rice, students are limited to 15 semester hours of summer school transfer credit. This restriction is waived for credit earned during an official summer study abroad program through the Study Abroad Office. Individual departments may place additional restrictions on particular courses and/or institutions. Similarly, various majors, minors, certificates and degree programs may limit the amount of transfer credit that students may apply to them.

All transferable credits from schools utilizing a system other than the semester hour (such as quarter hours or ECTS credits) will be converted to semester hours. In accordance with university guidelines and based on the external transcript, the Office of the Registrar will determine appropriate transferable credit hours and whether the credits are upper-level or lower-level.

Students with much transfer credit should be aware of the general graduation requirements: Students must be registered at Rice full time for at least four full fall and/or spring semesters, complete at least 60 semester hours, more than half of their upper-level degree work, and more than half of their upper-level major work at Rice. (Students also should check their specific departmental major requirements).

## Prematriculation Transfer Credit

For transfer work completed prior to matriculation, the Office of the Registrar, in conjunction with the academic departments, determines whether courses are appropriate for transfer to Rice as Rice equivalent courses or as TRAN, general elective hours. TRAN will be indicated as either upper- or lower-level and will count toward the total hours needed for graduation and for required upper-level credit if the TRAN credit is designated by the Office of the Registrar as upper-level. If courses transferred to Rice as TRAN credit are subsequently granted Rice equivalent course credit by the Office of the Registrar and academic department, the TRAN credit is reduced by the number of credit hours of the Rice equivalent course. The Rice equivalent course is then listed on the student's transcript and satisfies the university and major requirements the Rice course satisfies.

## Postmatriculation Transfer Credit

Continuing students who plan to transfer courses are strongly advised to seek prior approval. Without such approval, students cannot be certain transfer credit will be accepted at Rice. To receive Rice equivalent credit, students are

required to complete the appropriate form through the Office of the Registrar and secure approval from the designated transfer credit advisor in the department offering the Rice equivalent course. Unless approval is secured before or after completing the transfer credit, students can expect transferable courses to be granted TRAN. Transfer credit will be evaluated only after the Office of the Registrar receives an official transcript from the other college or university.

## International Transfer Credit

Students seeking transfer credit for courses taken prematriculation and postmatriculation at institutions outside the United States must present a professional course-by-course evaluation of the foreign official transcript. The professional evaluation must verify that the foreign institution is equivalent to a regionally accredited U.S. academic institution and must include an explanation of credits earned (including U.S. semester hour equivalents), grade equivalents, and course levels (lower or upper level). Two reliable services with course-by-course evaluations that include this required information are:

SpanTran (www.spantran.com) and
Education Credentials Evaluators (www.ece.org).

All professional evaluations should be obtained from one of these two recommended credential services and submitted to the Office of the Registrar. Payment for the professional evaluation is the responsibility of the student.

Students participating in an official study abroad program through the Study Abroad Office are exempt from the requirement of having the international transcript professionally evaluated, unless the Office of the Registrar is unable to make a clear distinction of the credit earned. Study abroad international transfer credit may be transferred back to Rice in the following situations:

**Third-Party Providers** -- Students participating in a study abroad program with a third party provider must provide a School of Record transcript in order to transfer credit back to Rice.

**Direct Enrollment** -- Students participating in a study abroad program with direct enrollment into a foreign university should be prepared to provide a professionally evaluated transcript if the Office of the Registrar is unable to make a clear distinction of the credit earned.

A number of European institutions use the European Credit Transfer System (ECTS). One ECTS credit is comparable to one-half (0.5) semester credit at Rice. It is suggested that students take 30 ECTS credits per semester, which will transfer to Rice as 15 semester hours. A minimum full-time load during the fall and spring semesters is 24ECTS, which will transfer as 12 Rice semester hours.

Transfer credit for study abroad is governed by the guidelines established by the Faculty Senate, available here.

# Veterans Information

Qualified veterans, dependents of deceased or disabled veterans whose death or disability is a direct result of their military service, or dependents in receipt of transferred benefits from a veteran may be eligible for VA educational benefits under one of the following programs while attending Rice University:

- Chapter 30: Montgomery G.I. Bill-Active Duty/Discharged
- Chapter 31: Vocational Rehabilitation
- Chapter 32: Veterans Educational Assistance Program (VEAP)
- Chapter 33: Post 9/11 G.I. Bill
- Chapter 35: Dependents Education Assistance
- Chapter 1606: Montgomery G.I. Bill-Selected Reserve
- Chapter 1607: Reserve Education Assistance Program (REAP)

At Rice University, veterans' benefits are managed through the Office of the Registrar. This office assists all veterans and their dependents who wish to receive Veterans Administration (VA) educational benefits

Please see the Registrar's website regarding the documentation required to obtain educational allowances from the VA.

Veterans who are planning to attend the university should contact Rice University's Veterans Affairs Representative at least two months before the date of entry. Such time is required to expedite the processing of paperwork for educational allowances from the VA.

For certification of benefits, students should have an enrollment of at least half time (6 credits for undergraduates).

For additional information regarding other veterans' educational programs, contact the Office of the Registrar at 713-348-4999 or registrar@rice.edu.

Last Revised : August 11, 2014

# Clubs and Organizations

*Jump to:*

## Office of Student Activities

The Office of Student Activities, located in the Rice Student Center, oversees the activities of various campus wide student organizations, student requests for facilities usage, and coordination of various leadership development programs.

In addition to managing the registration process, finances, and general advising for the 200 plus registered clubs at Rice University, Student Activities provides direct advising to the following organizations:

- Student Association (SA) - Undergraduate student government, including college presidents
- Graduate Student Association (GSA) - Graduate student government
- Impact Rice Retreat (IRR) - freshmen and sophomore leadership development retreat
- Leadership Summit - advanced leaders' retreat
- Rice Program Council

The Rice University clubs are divided into six categories: Academic/Honorary, Cultural/International, Political, Recreational/Sport, Religious/Spiritual, Service, Social, and Special Interest. Additional information about the clubs can be found online at http://clubs.rice.edu. Student Activities also provides leadership development opportunities in the form of Lunch and Lead Programs, the Impact Rice Retreat, the Leadership Summit, and the Women LEAD program.

A large number of student organizations address special student interests, such as the Black Student Association, the Hispanic Association for Cultural Education at Rice, the Chinese Student Association, Rice Young Democrats, and Rice College Republicans. There also are numerous sport related clubs such as sailing, rugby, lacrosse, volleyball, and soccer. Some of the special-interest groups include a premed society, a pre-law society, and Habitat for Humanity.

Many organizations are associated with academic and professional disciplines, such as foreign language clubs, honor societies, and student affiliates groups such as the American Chemical Society, the American Society of Civil Engineers, and the American Society of Mechanical Engineers.

Student Activities also recognizes a number of religious and spiritual organizations. These include, but are not limited to, Chi Alpha Christian Ministries, the Baptist Student Union, Canterbury Association, Catholic Student Association, Hillel Foundation, InterVarsity Christian Fellowship, the Muslim Student Association, and Rice Interfaith Dialogue Association. Many of these clubs are assisted by local clergy or staff, and form the Joint Campus Ministers.

The Clubs Office is located in the basement of the Rice Memorial Center, and provides computers, workspace, and a color copier for club convenience. Also in the same area is the student organization workspace that has office spaces, storage, and computers for student use.

## Center for Civic Leadership

The Center for Civic Leadership (CCL) identifies and cultivates opportunities for Rice students, faculty, and staff to engage the Houston community and the world through engaged scholarship, active service, and meaningful leadership. The CCL connects Rice faculty and students with each other and community partners.

The CCL supports three programs:  the Community Involvement Center, Office of Fellowships and Undergraduate

Research, and Leadership Rice. Further information can be found at http://ccl.rice.edu.

## Office of Fellowships and Undergraduate Research

The Office of Fellowships and Undergraduate Research (OFUR) helps Rice undergraduates, graduate students, and recent alumni find additional academic opportunities beyond the classroom. OFUR sponsors several research programs intended to foster undergraduate interest in pursuing a Ph.D and works with departments and programs on and off-campus to help students find faculty-mentored research opportunities. As part of the Center for Civic Leadership (CCL), the office promotes and develops opportunities for undergraduates to engage directly with the City of Houston through collaborative, community-based research and design. Through fellowships advising, the office enables students to build upon their academic, leadership, and service experiences to identify undergraduate and post-baccalaureate opportunities that best meet their future goals.

## Community Involvement Center

Housed in the Center for Civic Leadership suite of the Rice Memorial Center, the Community Involvement Center works to develop a culture of service within the university by functioning as an advocate for community service, social responsibility, and an increased awareness of social and community issues. The center acts as a clearinghouse for resources and referrals involving local, national, and international community agencies and service opportunities. By making educational programs and information available, the center fosters a lifelong commitment to service among students, faculty, and staff. It also organizes alternative semester break service trips, volunteer fairs, beach cleanups, and other activities. The Community Involvement Center advises a number of student service organizations, including Rice Habitat for Humanity, Amnesty International, and the Rice Student Volunteer Program. To learn more about the programs of the Community Involvement Center, visit http://cic.rice.edu.

## Rice Student Volunteer Program

By heightening student awareness of community needs and generally raising social consciousness, the Rice Student Volunteer Program (RSVP) has organized volunteer projects for Rice students, faculty, and staff since 1985. The largest event of each semester is Outreach Day, a Saturday when approximately 500 students volunteer with more than 30 nonprofit agencies throughout the Houston area, learning how to take thoughtful action to build a stronger, more just community. With an office in the cloisters of the Rice Memorial Center, RSVP invites each student's involvement as an officer, a college representative, a committee member, a project organizer, or an interested participant in any RSVP event. To learn more about the programs sponsored by the Rice Student Volunteer Program, visit http://www.rice.edu/rsvp.

## Intercollegiate Speech and Debate

Consistently ranked in the top 10 nationally, the George R. Brown Forensic Society sponsors competition in the categories of Individual Events, Lincoln–Douglas, and Parliamentary Debate. The society provides students with the chance to hone their public speaking skills and to qualify for competition both at the American Forensic Association National Individual Events Tournament and at the National Parliamentary Debate Championships. Recognizing the importance of developing strong communication skills, the society has an open admission policy, inviting students with little or no previous experience as well as those with extensive high school backgrounds to become members of one of the most successful teams at Rice. For more information on speech and debate, please go to: www.ruf.rice.edu/~forensic/.

## Office of Multicultural Affairs

The Office of Multicultural Affairs (OMA) has, as its primary mission, coordinating and implementing comprehensive educational, cultural and social programs designed to emphasize inclusiveness, while promoting intercultural dialogue, awareness and respect for diversity. Through advocacy, cultural programs and education, OMA also helps students understand and appreciate racial, ethnic, gender and other differences, while creating opportunities for students to challenge prejudice and expand their cultural knowledge and appreciation. OMA utilizes its programming and support systems to provide an optimum developmental environment where all members of the University community may develop to the highest level of their potential in an atmosphere free from harassment and bias, thereby ensuring Rice's standing as an intellectually and culturally vibrant community. Cultural student clubs, such as the Black Student Association, the Hispanic Association for Cultural Enrichment at Rice and the Rice Native American Student Association, meet regularly with OMA to discuss programming logistics and other issues. OMA also directly advises ADVANCE (advancing Diversity and the Need for Cultural Exchange), a student club that hosts a weekly discussion on a topical issue and organizes an annual cultural fair. Other programs for students under OMA include HARAMBE, (Swahili for "working together in unity" or "let's pull together") a group that seeks to create a unifying event for entering African-American students, allowing them to build social and academic connections with peers, faculty, and staff, and FRESH, a group dedicated to forming relationships through education, scholarship and heuristics at Rice. For more information about OMA, please visit this website.

# Disability Support Services

Located on the first floor of Allen Center, Disability Support Services coordinates campus services for individuals with documented disabilities. For academic accommodations, adaptive equipment, or disability-related housing needs, Disability Support Services is the campus resource for all students with disabilities. Information is maintained on scholarships, internships, and other programs specific to students with disabilities. For more information, see the Disability Support Services website at http://dss.rice.edu. Students can schedule an appointment with the director of Disability Support Services by calling 713-348-5841.

*Section 504/ADA Coordinator*—The director of affirmative action serves as the Section 504/ADA coordinator at Rice University. Concerns or complaints relative to disability issues should be directed to the Office of Affirmative Action 205 Allen Center, 713-348-4930.

Last Revised : August 12, 2013

 

# Financial Aid

*Jump to:*

The financial aid programs at Rice provide assistance to meet demonstrated need for university attendance for all admitted students. Through grants, endowments, low-interest loans, campus work opportunities, or a combination of these programs, Rice makes every effort to provide students and families assistance to meet their educational expenses. The financial aid program receives funding from many sources. Rice uses contributions from alumni and friends to establish and maintain scholarships and loan funds. Federal and state grant, work, and loan programs also provide funds. Awards are based primarily on financial need and a computed Expected Family Contribution (EFC), although there also are attractive loan opportunities for students and families who demonstrate no need.

The university determines need for first-time students by having them complete the College Scholarship Service (CSS) PROFILE. Students register for CSS PROFILE by visiting its website at www.collegeboard.com. Students will complete the PROFILE online. The PROFILE number for Rice is 6609. First-time students also complete the Free Application for Federal Student Aid (FAFSA). The FAFSA school code for Rice is 003604. Student and parent income tax document, including W-2 forms, are required to be submitted to The College Board using Institutional Documentation (IDOC) Service.

The university determines need for continuing students by having them complete the FAFSA and the PROFILE; continuing students also submit student and parent income tax and W-2 forms to The College Board.

“Need” is the amount required to meet the difference between each student’s basic educational expenses and his or her family’s resources. Parents are expected to contribute according to their financial means, taking into account income, assets, home equity, number of dependents, and other relevant factors. Students are expected to contribute as well from their own assets and earnings, including appropriate borrowing against future earnings.

The brochure *Financing Your Education* explains the assistance programs in detail. Copies are available from the Office of Admission.

## Need-Based Application Process

Rice University is a need-blind school. Applicants are admitted to the university regardless of their family’s ability to pay for college. Rice will meet 100% of demonstrated financial need as determined by university calculations. Rice considers applicants for all appropriate assistance administered by the university, including grants, scholarships, loans, and work. Students receive notification of an offer after their financial aid files are complete. The Office of Financial Aid provides financial assistance only for coursework sponsored through Rice University.

To apply for financial assistance, first-time students (including Early Decision students) must submit the following:

- CSS PROFILE, priority date March 1
- Free Application for Federal Student Aid (FAFSA), priority date March 1
- Student and parent income tax and W-2 forms, priority date March 1

Continuing students must submit the following:

- FAFSA, priority date April 15
- CSS Profile , priority date April 15
- Student and parent income tax and W-2 forms, priority date April 15

## Decision

Financial aid offers are made annually. Award amounts are specified in the financial aid offer letter. Because financial circumstances change from year to year, Rice conducts an annual review of need and offers aid accordingly. For this reason, continuing students must complete CSS Profile , file the FAFSA, and submit parent and student tax documents every year that they seek assistance.

The university, from time to time, may adjust its methods of computing financial need or its policies regarding the types of financial assistance that it offers so as to meet the financial needs of the largest possible number of students. Therefore, the amount and type of financial aid may change from year to year, even when the student's financial situation appears to remain relatively stable.

## Types of Financial Aid and Assistance

**Need-Based Scholarships/Grants—**Various need-based scholarships and grants are awarded to assist students with demonstrated need.
**Merit Scholarships—**Merit Scholarships are offered through the Office of Admission to incoming students. Merit scholarships may only be used for coursework sponsored by Rice University. Should a student with a merit award graduate early, unexpended merit funds will not be granted to the student.
**Student Loan Funds—**To assist students and parents with educational financing, the Office of Financial Aid participates in the following programs:

- **Federal Direct Loans—**These are low-interest loans made to students attending school on at least a half-time basis. Subsidized loans require need-based financial aid eligibility, but unsubsidized loans are not based on financial need.
- **Federal Direct PLUS Loan—**The PLUS loan is a low-interest loan to parents or legal guardians of dependent undergraduate students. Eligibility is not based on demonstrated financial need.
- **Federal Perkins Loan Program—**These are low-interest loans made to students attending school on at least a half-time basis and who demonstrate high need.
- **Private Education Loans—**These nonfederal loans are available to students attending school on at least a half-time basis. Eligibility is not based on financial need. These are credit-based loans and may require a co-signer.

A few endowments for student loans have been established at Rice primarily as memorial tributes. These funds exist separately from the normal financial aid program. Rice uses them to make small emergency loans to students experiencing unexpected financial problems or showing additional need beyond regular eligibility. All requests for these loans must be submitted to the Office of Financial Aid.

**Student Employment Programs—**Opportunities for employment are available to students, either on or off campus, during the academic year. Students are eligible to work under either the Federal Work-Study Program or the Rice University Work Program. Students interested in employment should access the Office of Financial Aid webpage.
**Deferred Payment Plan—**Rice offers a deferred payment plan to enable families to finance students' educational costs. This plan divides each semester's charge over four installments. Details are available to eligible students each semester at the time of billing. Students arrange for deferred payment through the Cashier's Office.
**Summer Aid—**Students who have not exceeded 10 semesters at Rice may be eligible to apply for limited financial aid for the summer terms.

## Financial Aid Eligibility

Undergraduate students are eligible to apply for need-based Rice sponsored and federal/state/private aid during the first eight semesters at Rice; for transfer students the number of semesters is prorated based on the number of hours transferred. If a student is enrolled beyond eight semesters, the student may apply for federal/state/private aid for an additional two semesters. (Architecture students may apply for Rice sponsored aid for two semesters following their preceptorship to complete the architecture degree.) If a student attends part time during a semester or withdraws during a term, the semester is counted toward the number of semesters aid is available.

## Loan Counseling

Students who are recipients of federal student loans will be required to complete online loan entrance counseling before funds will be credited to student accounts. Students also will be required to complete online exit counseling at the completion of a program of study at Rice. Failure to complete online loan exit counseling will result in a transcript hold.

## Satisfactory Academic Progress

Federal regulations (CRF § 668.34) require that students demonstrate satisfactory academic progress toward completion of their degree to continue to receive institutional, federal and state financial aid. With the exception of the

five-year program in architecture, eligibility for institutional aid is limited to the equivalent of 8 semesters of undergraduate enrollment, including coursework taken at other colleges and universities. In addition to meeting the standard for receiving financial aid, students must also meet the academic standards of Rice University.

Satisfactory academic progress is comprised of three areas as required by federal regulations. A student must complete their degree within a specified period that does not exceed 150% of the published length of the program, demonstrate they are making progress towards the completion of their degree by successfully completing 66% percent of all attempted courses, and maintain a cumulative 1.67 GPA, which is consistent with meeting graduation requirements. This regulation applies to each financial aid applicant, whether a previous recipient or not.

Credits counted in the maximum time are all attempted credits (even when not a financial aid recipient). Attempted credits include:

- Earned credits – Passed (A through D-), Satisfactory (S)
- Repeated courses
- Withdrawal
- Failures – Failed (F), Unsatisfactory (U)
- Incomplete
- All accepted transfer credits (including Study Abroad courses) toward the degree program

If a student fails to meet the satisfactory academic progress standards by the end of the academic year, the student will be placed on Financial Aid Suspension and will not be eligible for aid until the satisfactory academic progress standards are met.

**Appeal**—Students are allowed to appeal their Financial Aid Suspension in cases of the death of a relative, an injury or illness of the student, or other special circumstances. Students must submit a letter discussing why the student failed to make satisfactory academic progress, and what has changed in the student's situation that will allow the student to demonstrate satisfactory academic progress at the next evaluation. Supporting documentation (doctor's letter or academic plan) must accompany the appeal letter and must be submitted to the Office of Financial Aid prior to the beginning of the subsequent term. The Appeals Committee will review appeals on a case-by-case basis.

If an appeal is approved by the Appeals Committee, the student will be placed on financial aid probation and may receive financial aid for one probationary semester. At the end of the probationary term, the student must meet the satisfactory academic progress standards or meet the requirements of an approved academic plan developed by the student’s academic department(s).

**Financial Aid after academic suspension**—Students who have been suspended by the university for academic reasons need to be aware that if they are readmitted by the Committee on Examinations and Standing, they may not be eligible for financial aid based on their prior academic performance. Students who are petitioning for readmission are advised to contact the Office of Financial Aid to determine their aid eligibility.

## Return of Title IV Funds

Students who receive federal funds as part of their aid packages and do not complete the academic term may be subject to returning a portion of those funds. Contact the Office of Financial Aid for information about “Return of Title IV Funds” policies and procedures.

*Back to top*

Last Revised : August 11, 2014

# Health, Counseling and Wellbeing

*Jump to:*

## Student Health Fee

By paying an annual student health service fee, all students gain access to the Student Health Services, Rice Counseling Center and the Student Wellbeing Office. Detailed information on the care and services each provide is available from these centers.

## Student Health Services

Student Health Services, an outpatient medical clinic, is located in the Morton L. Rich Health Center. The clinic is staffed by primary care physicians, nurses, and ancillary support staff. More information can be found at health.rice.edu.

Clinic hours are from 8:00 a.m. to 5:00 p.m., Monday through Friday, during fall and spring semesters. For after-hours and weekend medical care, students may choose among a number of local clinics and hospitals (guidance on self-care as well as local healthcare options can be found on the website). Students must pay for all medical care outside the clinic's purview, including blood tests, x-rays, and outside physician consultations. Should such medical care be necessary, students are urged to review their insurance coverage and pick the best available option.

Care at the clinic is arranged through appointment at 713-348-4966. In emergencies, students should call the Rice University Police Department at 713-348-6000.

The clinic is open full time from the first day of Orientation Week until the day before commencement. It is closed during Thanksgiving and the winter break. The clinic also is open for reduced hours during the summer months.

The Student Health Service provides the following:

- Medical care for illness and injury with referrals to specialists when needed
- Maintenance of health records for all students
- Immunizations and other preventive services
- General information for all students
- Contraceptive counseling and routine Pap smears
- Allergy shots (students must provide serum after a specialist allergy workup)
- Physical examinations

## Confidentiality

The Student Health Service physician–patient relationship is a confidential one. Medical records will be released only on receipt of written authorization from the student or as required by law or when the patient poses a significant risk to herself or himself or another person.

## Health Insurance

All registered students are required to maintain health insurance through Rice University or provide proof of acceptable coverage. To ensure compliance with this university policy, all students are required to either enroll in the Rice plan or complete an online waiver application identifying the Affordable Care Act (ACA) compliant coverage that is in place. All students are automatically billed for Medical Insurance as a reminder to enroll or waive coverage. Charges will be removed after waiver applications are approved. The insurance application and waiver applications, as well as specific

dates for enrolling, can be found on the Rice Student Health website: www.studenthealthinsurance.rice.edu.

Students who do not complete either an enrollment or waiver application by August 15 for the fall semester or January 5 for the spring semester will be considered non-compliant and have an Insurance Hold put on their accounts. This prevents students from droppings or adding classes.

Fall semester students who do not complete either an enrollment or waiver application by September 5 will be automatically enrolled in the annual insurance plan. Please note the automatic enrollment process can take up to two weeks to complete. Spring semester students that are new or enrolled in a fall only plan who do not complete either an enrollment or waiver application by January 23 will automatically be enrolled in the spring only insurance plan. Please note the automatic enrollment process can take up to two weeks to complete.

For questions concerning the Rice plan please contact studentinsurance@rice.edu or call (713) 348-5544.

NOTE: If you waive coverage in the fall, you are still expected to have ACA compliant coverage for the spring.

International students should visit the OISS website (http://oiss.rice.edu) for detailed information concerning the approved alternative insurance option through Student Assurance Services (SAS). Application and rate information can also be found on this website.

## Rice Counseling Center

### General Information

Rice Counseling Center addresses students' psychological needs with various programs and services.

Typically, most students who use the counseling services bring with them very common concerns: roommate problems, breakup of a relationship, academic and/or interpersonal anxiety, family problems, difficulties adjusting to Rice, or confusion about personal goals, values, and identity. Counselors are equipped to handle a variety of issues, including substance abuse, eating disorders, sexual assault/abuse/date violence, depression, and the coming-out process. Rice Counseling Center offers both individual and group counseling, as well as educational workshops and programs.

When students need long term or specialized counseling or treatment, counselors refer them to an outside provider. The students, or their health insurance, must pick up these costs. All students who have paid the Health Service Fee are eligible for initial assessment sessions, consultations, crisis intervention, and educational programming. Students who have worked with a mental health professional prior to enrolling at Rice are encouraged to make contact with the Rice Counseling Center prior to coming to Rice. This will allow the student to make arrangements for a continued care plan. This plan may involve working with the Rice Counseling Center or working with the center to find a suitable off-campus provider.

The Rice Counseling Center can be contacted at 713-348-4867 and at http://wellbeing.rice.edu/rcc/. The Rice Counseling Center provides the following services:

- Psychological crisis intervention, on a walk-in emergency basis during regular office hours or by phone at any time, 24 hours a day, by calling 713-348-4867. This includes after hours and weekends.
- Brief initial assessments, often by phone, to quickly receive information about a situation and assign an appropriate counselor
- Short-term individual and couples counseling
- Group therapy and support groups
- Medication consultations with the center's psychiatrist for students in counseling at the center
- Other consultations (e.g., how to make a referral or how to respond to a friend in distress)
- Educational programming (e.g., various presentations on mental health issues)

### Confidentiality

Counseling services are confidential; information about a student is not released outside the university without that student's written permission. Information to protect, or information necessary to assess the need to protect, the health, safety and welfare of the student or other members of the community may be released within the university to administrative officials who are in a need to know position without a specific signed waiver. Students may be required to share assessments, diagnoses, or treatment plans from non-Rice treating professionals with the counseling center or with need-to-know administrative officials if that information is necessary to protect or assess the need to protect the health, safety, and welfare of the student or other members of the community. In addition, by state law, confidentiality does not extend to circumstances where (1) there is risk of imminent harm to the student or others; (2) the counselor has reason to believe that a child or an elderly or handicapped person is, or is in danger of, being abused or neglected; (3) a court order is issued to release information; (4) the student is involved in a criminal lawsuit; or (5) the counselor suspects that the student has been the victim of sexual exploitation by a former health provider during the course of treatment with that provider.

## Student Wellbeing Office

The Student Wellbeing Office supports students who have experienced wellbeing challenges that may be impacting their personal and/or academic goals and overall success at Rice. The office works to connect students to university resources and procedural options to help students during their enrollment. When students decide to take time off to focus on their well-being needs, the office works with them and serves as a liaison to the medical readmission process when students are ready to return. The Student Wellbeing Office also coordinates with the Rice Counseling Center to provide mental health and wellbeing related education for the student body. The Student Wellbeing Office is located in the Barbara and David Gibbs Recreation and Wellness Center. For appointments or more information, contact the Student Wellbeing Office at 713-348-3311, wellbeing@rice.edu or at http://wellbeing.rice.edu.

*Back to top*

Last Revised : August 11, 2014

# Student Government

All undergraduates are members of the Rice Student Association (SA), which is governed through the Student Senate. The senate includes the president, two vice presidents, the secretary, the treasurer, the eleven college presidents, and eleven college senators. Each year committees are appointed within the SA to work on immediate projects. The SA strives to communicate with the Rice administration, faculty and staff to implement changes benefiting the Rice population and to collaborate with the eleven colleges to establish a Rice identity. The SA is also the umbrella organization for all registered undergraduate student clubs and is a constant resource for any student. Please visit http://sa.rice.edu for more information about the SA.

**Award Presentations—**The Rice Student Association presents three coveted awards annually, two to students and one to a faculty or staff member. The Rice Outstanding Senior Awards are presented to graduating seniors who have contributed the most to excellence throughout their time at Rice. The Rice Service Award, a memorial to Hugh Scott Cameron, first dean of students at Rice, is awarded to currently enrolled or former members of the association who have rendered distinguished service to the student body. The Mentor Recognition Award recognizes extraordinary service to the student body by a current member of the faculty or staff. A committee of faculty and students appointed by the association makes the selections.

Last Revised : August 11, 2014

# Tuition, Fees and Expenses

*Jump to:*

Charges for tuition, fees, room/board, and insurance are billed to students each semester. Students may pay the charges in full by the due date or in installments over the course of the semester. The fall semester due date is August 1 for first-year and August 10 for all other students. The spring semester due date is January 5.

The following costs apply to undergraduates in the 2014-15 school year:

| **Tuition** | **Hour*** | **Semester** | **Annual** |
|---|---|---|---|
| Undergraduate tuition (entering & continuing) | $1,662.00 | $19,940.00 | $39,880.00 |
| *By special permission only | | | |
| **Required Fees** | **Fall** | **Spring** | **Annual** |
| Student activities** | $53.50 | $53.50 | $107.00 |
| Student Rec Center fee | $48.50 | $48.50 | $97.00 |
| Health service | $241.00 | $241.00 | $482.00 |
| ***Health Insurance - student premium only (unless waiver has been approved) | $805 | $1,304 | $2,109 |
| **Fifth-year students in professional degree programs and students working toward a second bachelor's degree pay a reduced student activities fee of $6.85 per semester, which covers the Student Association, Student Organizations Activity, University Court, and Honor Council portions of the activity fee. | | | |
| **Orientation Week Fees** | | | **Fall** |
| O-Week room and board – freshman | | | $295.00 |
| O-Week activity fee – freshman | | | $280.00 |
| *iPrep Program fee (incoming international undergraduate and exchange students)* | | | $160.00 |
| **Room and Board** | | **Semester** | **Annual** |
| Room | | $4,550.00 | $9,100.00 |
| Board - Option A | | $2,150.00 | $4,300.00 |
| Telecommunication fee | | $15.00 | $30.00 |
| Off-campus board–Plan B | | $725.00 | $1,450.00 |
| Off-campus board–Plan C | | $616.00 | $1,232.00 |
| Off-campus board–Plan D | | $362.00 | $724.00 |
| Off-campus board–Plan E | | $181.00 | $362.00 |

## Other Fees

Unless students elect a special payment plan, they must pay all tuition, fees, and insurance for the fall semester by August 1 for first-year and August 10 for all other students, and by January 5 for the spring semester. A late payment penalty of $155 will be assessed after these deadlines.

## Refund of Tuition and Fees

Students who withdraw during the first two weeks of the semester are not charged tuition or fees for that semester. Students who withdraw during the third week must pay 30 percent of the semester's tuition, receiving a 70 percent refund. The amount of the refund drops by 10 percent at the beginning of each successive week that passes before withdrawal until the ninth week, after which no refund is made. Federal regulations require a refund calculation for all students receiving Title IV funds. The length of time during which a refund must be calculated is up to 60 percent of the payment period (semester). If a student withdraws on or before the 60 percent point in time, a portion of the Title IV funds awarded to a student (Pell Grant, Federal SEOG, Federal Perkins Loan, Federal Subsidized and Unsubsidized loans, Federal PLUS Loans, the Texas LEAP Grant) must be returned, according to the provisions of the Higher Education Act as amended. The calculation of the return of these funds may result in the student owing a balance to the university and/or the Department of Education.

For students withdrawing after the second week of classes in a semester, fees or special charges are not refunded. Similarly, students withdrawing or taking leaves of absence in the spring semester do not receive a partial refund of fees paid for the full year. Students withdrawing at any time forfeit the $300 enrollment deposit they paid as incoming students.

## Part-Time Students

Students must receive approval to enroll with a course load of fewer than 12 hours. Approval must be received and the course schedule must be adjusted within the first two weeks of the semester. Students with part-time approval and a course load of fewer than 12 hours will be charged the per hour rate plus a part-time registration fee. There are no refunds for part-time enrollment or for students whose course load drops below 12 hours after the first two weeks of the semester.

Students unable to resolve with the Cashier's office any request for special consideration in connection with waivers, refunds, or adjusted payments on tuition, fees, and other charges should forward their appeals to the dean of undergraduates. Exceptions are granted by the dean of undergraduates only under extraordinary circumstances.

## Living Expenses

Residence fees cover dining hall costs and residence maintenance. They are established each year as needs dictate. For 2014–15, the annual room and board charge for residence in a residential college is $13,400. This charge includes the room and all the meals eaten during the year.

**Housing—**When current students receive their residential college room assignments for the academic year to follow, they must sign a housing agreement electronically by accessing their Esther account online. To reserve their space, a housing agreement must be signed by the date established by their respective colleges but no later than April 30.

New students must make a $100 housing deposit before May 1. These nonrefundable deposits are applied to the following semester's room and board charges.

For more information about housing, see Undergraduate Student Life.

**Meal Plans—**The College Food Service provides all-you-care-to-eat meals with the purchase of the meal plan. All students living on campus must purchase a meal plan. It is recommended that students living off-campus also purchase a meal plan. More information is available from the residential dining website (dining.rice.edu).

**Payments and Refunds—**Students may pay their residence fee in installments. The exact amounts and due dates appear on the student's online statement in the Bill Payment Suite, which can be accessed through Esther. Students who move out of their college for any reason may receive a refund (or a credit to their account) equal to the difference between the payments received and the reduced room and board charges. They will be charged a termination processing fee. Possible exceptions such as academic suspension, Rice-sponsored study abroad and family emergencies are treated on a case-by-case basis.

## Special Charges - Undergraduates

The following charges are separate from the regular fees. Charges due to late registration or course changes made after the deadline are described in the Registration section.

| | | |
|---|---|---|
| Preceptorship per semester | | $295 |
| Internship per semester | | $295 |
| Study Abroad fee per semester | | $380 |
| Study Abroad fee for summer | | $190 |
| Late payment penalty | | $155 |
| Undergraduate application fee | | $75 |
| Part-time registration | | $140 |
| Orientation Week room and board (coordinators) | | $190 |
| Late registration fee 1 | | $75 |
| Late registration fee 2 | | $125 |
| Deferred payment plan late fee | | $40 |
| College withdrawal-suspension | | $150 |
| College withdrawal-breaking of housing agreement | | $750 |
| Diploma fee: parchment | | $50 |
| Diploma fee: facsimile | | $20 |
| Diploma mailing fee: domestic | | $30 |
| Diploma mailing fee: air mail | | $50 |
| Transcript fee | | $5 |
| Letter of standing | | $5 |
| Replacement ID | | $10 |
| Readmission fee after withdrawal for nonpayment | | $350 |
| Returned check fee | | $30 |
| Late course change fee (add/drop) | | $75 |
| Summer Health Services 1 | | $134 |
| Recreation Center Membership Fees | *Summer* | *Annual* |
| Student only | $32 | $97 |
| 1 *Applies to early matriculants and summer returns from leave*<br>2 *Student nine-month fee for membership paid with tuition. Summer additional* | | |

## *** Health Insurance

All students, full time or part time--including those on away status--must have appropriate health insurance. For information about health insurance, visit Health, Counseling and Wellbeing.

## Education Certification Program Fees

Students enrolling in the summer student teaching apprenticeship must pay a $90 registration fee. The registration fee for the internship is $295. These fees are in lieu of tuition for the apprenticeship or internship. For more information, see Teacher Education.

## Delinquent Accounts

Students in arrears on their financial obligation to Rice as of the last day to add courses for any semester may be withdrawn. The university will not issue certificates of attendance, diplomas, or transcripts at any time for a student whose account is in arrears.

Students who have not made satisfactory arrangements with the Cashier for payment of current charges or who have moved on campus without a proper campus housing agreement may be withdrawn from the university. Accounts not settled by the first day of classes incur a late payment penalty and are subject to a billing hold that prevents them from dropping or adding classes.

## Transcripts

Transcripts can be ordered online through Esther. There is a $5 charge for each transcript ordered. Charges can be

paid in advance using a major debit or credit card or eCheck. Current students can also have the charge added to their student account.

Last Revised : August 11, 2014

 

# Undergraduate Student Life

*Jump to:*

## Residential Colleges

Each undergraduate student at Rice, whether living on campus or not, is a member of one of 11 residential colleges. All colleges are sex and gender neutral.

Each college has faculty masters who live in a house next to the college. Reporting to the dean of undergraduates, the masters have overall responsibility for all aspects of student life in the college, especially for encouraging broad cultural and intellectual interests and for promoting self-discipline and effective self-government within the college. Upon agreement, the students and masters invite other members of the Rice faculty to become resident and nonresident associates of the college. Faculty associates act as advisors to the students and participate in the various activities of the college. Colleges also have nonfaculty university associates and community associates drawn from various professions in the Houston area.

Each college exists as a self-governing group of students. The elected officers and representatives are responsible to the masters and to the college membership for:

- Directing the college's academic, cultural, social, and athletic activities
- Expenditure of college funds
- Maintaining order in the college

While uniformity among the colleges has never been sought and each college has developed its own particular interests and character, all seek to foster fellowship among their members and a mature sense of honor, responsibility, and sound judgment.

### College Assignment

Each undergraduate, upon acceptance by the university, is designated a member of one of the colleges. Two students entering Rice for the first time may request assignment to the same college, but they may not designate which college. New students also may request membership in the same college as a close relative. Except for these cases, students have no individual choice of college.

### Housing

College buildings include a dining hall and public rooms, which are available to both resident and nonresident members, and living quarters for resident students from all classes and all academic disciplines.

The university guarantees housing for all incoming students. Information about the residential colleges and room application forms accompany the notice of admission sent to each new undergraduate. Room reservations cannot be made before notification of admission.

About 75 percent of Rice undergraduates live in the on-campus residential colleges. **On-campus housing is not guaranteed beyond the freshman year at Rice.** Although most of the students who want to live in the colleges can be accommodated, demand usually exceeds the available number of rooms. The determination of housing for sophomores, juniors, and seniors is made by their residential college government. Sophomores, juniors, and seniors draw for rooms according to the priority system of their residential college. Some students, while remaining full members of the college, choose voluntarily to live off-campus for one or more years. No student is required to live on

campus; however, those members of the colleges who live off campus are encouraged to eat in their colleges and to participate in college activities. Further information on housing in the residential colleges is available from the Office of the Dean of Undergraduates, and information on off-campus housing is available from the Student Center Administration Office.

### Meal Plans

The College Food Service provides all-you-care-to-eat meals with the purchase of the meal plan. All students living on campus must purchase a meal plan. It is recommended that students living off-campus also purchase a meal plan. Its other services include:

- Assistance with special diets prescribed by a physician
- Sack lunches for students who must miss a meal due to a job conflict
- Sick trays for students when requested by the Student Health Service
- Alternate menu entrées, whenever possible, to accommodate students' religious practices

Meals are served cafeteria style. The colleges provide three meals per day Monday through Friday, breakfast and lunch on Saturday, and lunch and dinner on Sunday. Meals are not served during the Thanksgiving holiday, winter break, or spring break.

For more information on room and board, see Tuition, Fees and Expenses.

### College Courses

One of the colleges' important activities is their sponsorship of courses and workshops open to all students. By expanding course offerings outside the traditional departments, college courses promote the academic involvement of the colleges while introducing students to interdisciplinary topics of particular interest.

For more information, see the College Courses listing.

## Rice Student Center

The Rice Student Center strives to build community within the university through services, facilities, and programs that provide student development opportunities. It currently houses a variety of retail operations including the campus bookstore, a copy center, a convenience store, restaurant facilities, as well as student life and other offices. There are a variety of meeting rooms for departments, clubs and organizations. Visitors can also make use of a copier, fax machine, and ATM. Most popular stops are the student-run businesses. Students enjoy a beverage of their choice and fellowship with their peers at the ever-bustling Rice Coffee House, rent a bike for the semester from Rice Bikes or, for those over 21, enjoy an inexpensive brew at the student-run Willy's Pub.

For more information on the Student Center, go to http://studentcenter.rice.edu.

Last Revised : August 11, 2014

# Access to Student Records

## Notification of Rights under the Family Educational Rights and Privacy Act (FERPA)

The Family Educational Rights and Privacy Act (FERPA) is a federal law designed to protect the privacy of, and limit access to, student education records. The law affords students the following rights with respect to their education records:

1. the right to inspect and review the student's education records within 45 days after the date Rice University ("Rice") receives a request for access;

2. the right to seek amendment of the student's education records that the student believes are inaccurate, misleading, or otherwise in violation of the student's privacy rights under FERPA;

3. the right to provide written consent to disclosures of personally identifiable information (PII, as defined by law) contained in the student's education records, except to the extent FERPA authorizes disclosure without consent;

4. the right to file a complaint with the U.S. Department of Education concerning alleged failures by Rice to comply with the requirements of FERPA. The name and address of the federal office that administers FERPA is: Family Policy Compliance Office, U.S. Department of Education, 400 Maryland Ave. S.W., Washington, DC 20202-8520.

**Inspect and review records**: A student should make written request to any offices that maintain student education records, identifying the record(s) the student wishes to inspect. Though not exhaustive, as a guide for students, this is a list of offices that maintain student education records: Office of the Registrar, Office of the Dean of Undergraduates, Office of Graduate and Postdoctoral Studies, Office of the Assistant Dean of Student Judicial Programs, Admissions Office, Office of Financial Aid, Center for Career Development, Office of Student Activities, Office of Academic Advising, Office of International Students and Scholars, Cashier's Office, and departmental offices. The appropriate Rice official will make arrangements for access and notify the student of the time and place where the records may be inspected. If the records are not maintained by the Rice official to whom the request is submitted, that Rice official will advise the student of the correct official to whom the request should be addressed.

**Amendment of records**: Any questions, problems, or written requests for amendment of records should be submitted to the Office of the Registrar. A student who wishes to ask Rice to amend a record should clearly identify the part of the record the student wants changed and specify why it should be changed. If Rice decides not to amend the record as requested, Rice will notify the student in writing of the decision and of the student's right to a hearing regarding the request for amendment. Additional information regarding the hearing procedures will be provided to the student when the student is notified of the right to a hearing.

**Disclosure of information**: As permitted by FERPA, Rice reserves the right to publish or release the following directory information without prior consent.

1. Name, local and permanent address, telephone and mobile number(s), campus email address(es), and instant messenger address(es)
2. Date and place of birth, and gender
3. Classification and major and minor fields of study
4. Participation in officially recognized activities and sports
5. Weight and height of members of athletic teams
6. Dates of attendance, degrees and awards received
7. The most recent previous educational agency or institution attended by the student
8. Photographic image

Students who would like Rice to withhold this directory information may do so by logging in to ESTHER, clicking Personal Information, clicking Release or Withhold Directory Information, and indicating that the information should be withheld; thereafter, Rice will withhold access to, or release of, the student's directory information until further written

instruction is received. For more information regarding FERPA, please visit the U.S. Department of Education's website.

FERPA permits the disclosure of PII from students' education records, without consent of the student, if the disclosure meets certain conditions found in §99.31 of the FERPA regulations. Except for disclosures to school officials, disclosures related to some judicial orders or lawfully issued subpoenas, disclosures of directory information, and disclosures to the student, §99.32 of FERPA regulations requires the institution to record the disclosure. Eligible students have a right to inspect and review the record of disclosures. A postsecondary institution may disclose PII from the education records without obtaining prior written consent of the student –

- To other school officials, within Rice whom Rice has determined have legitimate educational interests and require this information in order to perform instructional, supervisory, advisory, administrative, or other duties for Rice. These school officials include faculty, staff, trustees, or students serving on official committees (such as disciplinary or grievance committees) or assisting another school official. A school official has a legitimate educational interest if the official needs to review an educational record in order to fulfill his or her professional responsibility for Rice. This includes contractors, consultants, auditors, attorneys, collection agents, volunteers, or other parties to whom Rice has outsourced institutional services or functions, provided that the conditions listed in §99.31(a)(1)(i)(B)(1) - (a)(1)(i)(B)(2) are met. (§99.31(a)(1))

- To officials of another school where the student seeks or intends to enroll, or where the student is already enrolled if the disclosure is for purposes related to the student's enrollment or transfer, subject to the requirements of §99.34. (§99.31(a)(2)) Disclosures may be made and information forwarded by Rice without prior notification to the student.

- To authorized representatives of the U. S. Comptroller General, the U. S. Attorney General, the U.S. Secretary of Education, or State and local educational authorities, such as a State postsecondary authority that is responsible for supervising the university's State-supported education programs. Disclosures under this provision may be made, subject to the requirements of §99.35, in connection with an audit or evaluation of Federal- or State-supported education programs, or for the enforcement of or compliance with Federal legal requirements that relate to those programs. These entities may make further disclosures of PII to outside entities that are designated by them as their authorized representatives to conduct any audit, evaluation, or enforcement or compliance activity on their behalf. (§§99.31(a)(3) and 99.35)

- In connection with financial aid for which the student has applied or which the student has received, if the information is necessary to determine eligibility for the aid, determine the amount of the aid, determine the conditions of the aid, or enforce the terms and conditions of the aid. (§99.31(a)(4))

- To organizations conducting studies for, or on behalf of, the school, in order to: (a) develop, validate, or administer predictive tests; (b) administer student aid programs; or (c) improve instruction. (§99.31(a)(6))

- To accrediting organizations to carry out their accrediting functions. ((§99.31(a)(7))

- To parents of an eligible student if the student is a dependent for IRS tax purposes, though Rice limits such information to financial details of the student's enrollment. (§99.31(a)(8))

- To comply with a judicial order or lawfully issued subpoena. (§99.31(a)(9))

- To appropriate officials in connection with a health or safety emergency, subject to §99.36. (§99.31(a)(10))

- Information the school has designated as "directory information" above and pursuant to §99.37. (§99.31(a)(11))

- To a victim of an alleged perpetrator of a crime of violence or a non-forcible sex offense, subject to the requirements of §99.39. The disclosure may only include the final results of the disciplinary proceeding with respect to that alleged crime or offense, regardless of the finding. (§99.31(a)(13))

- To the general public, the final results of a disciplinary proceeding, subject to the requirements of §99.39, if the school determines the student is an alleged perpetrator of a crime of violence or non-forcible sex offense and the student has committed a violation of the school's rules or policies with respect to the allegation made against him or her. (§99.31(a)(14))

- To parents of a student regarding the student's violation of any Federal, State, or local law, or of any rule or policy of the school, governing the use or possession of alcohol or a controlled substance if the school determines the student committed a disciplinary violation and the student is under the age of 21. (§99.31(a)(15))

For further information regarding Rice's policy on student education records, please contact the Office of the Registrar.

Rice University
Office of the Registrar–MS 57
6100 Main Street
Houston, TX 77005-1892
Email: registrar@rice.edu

Last Revised : August 11, 2014

# Code of Student Conduct

The Office of Student Judicial Programs oversees the judicial system and enforces the Code of Student Conduct, which governs the administration of student order and discipline and participates in title IX investigations. The Code of Student Conduct applies to all students, including undergraduate, graduate, and transfer students; those enrolled in professional and Continuing Studies programs; and visiting students, Visiting Post Baccalaureates, second degree students, and auditors, from the time they arrive on campus for orientation until their degree is conferred or they have permanently left Rice. Organizations also are subject to this Code. All enrolled students also are subject to Rice University policies, rules, and regulations.

Alleged violations of university or college rules are handled in accordance with the Code of Student Conduct. Students may appeal decisions as described in the Code of Student Conduct. Rice retains ultimate authority in all matters of discipline and over all actions that affect its educational function or the safety and wellbeing of members of the university community.

The Code of Student Conduct and other related information and resources are located at: www.students.rice.edu/students/Conduct.asp.

After Rice's grievance process has been exhausted and documented, students may also pursue an external complaints process.

Last Revised : August 11, 2014

# Honor System

The honor system, one of the oldest and proudest traditions at Rice, is administered by the Honor Council, whose student members are elected each year by the student body. Adopted by a student vote in 1916, the honor system has remained essentially the same since that time but for changes in the procedures and membership of the Honor Council.

Students take all written examinations and complete any specifically designated assignments under the honor system. By committing themselves to the honor system, all students accept responsibility for assuring the integrity of the examinations and assignments conducted under it. The Honor Council is responsible for investigating reported violations and for conducting a hearing when the facts warrant. The Office of Student Judicial Programs, which reviews the results of the investigations and hearings, considers the council's recommendations when issuing penalties.

The Honor Council conducts an ongoing program to acquaint new students and faculty with the honor system. The Honor Code and other related information and resources are located at the homepage of the Honor Council: http://honor.rice.edu/.

Last Revised : July 20, 2011

 

# Student Responsibility

The university expects all Rice students to exercise personal responsibility over their actions. Their behavior should reflect a respect for the law and for their contractual obligations, a consideration for the rights of others, and shared standards of considerate and ethical behavior.

Students are responsible for knowing and following all information, policies, and procedures listed in this General Announcements. Questions should be directed to the appropriate office or administrator.

Rice utilizes e-mail as an official form of communication and sends correspondence to a student's Rice email address. Students should frequently check and maintain their Rice email inbox. Failure to do so does not relieve students of the responsibility to act or respond in a timely manner to official notices sent via email.

Rice encourages self-discipline, recognizing that effective student government, including judicial processes, and the integrity of the honor system depend on the willingness of all students to meet community standards of conduct.

The university, however, reserves the right to insist on the withdrawal of any student whose conduct it judges to be clearly detrimental to the best interests of either the student or the university. The appropriate authorities take such action only after careful consideration.

No individual or group may use the name of the university or one of its colleges without prior approval of the university or the college.

Last Revised : August 01, 2012

# Academic Honor Societies

Honor societies at Rice include the following:

**Phi Lambda Upsilon**—national honorary chemical society promoting high scholarship and original investigation in all branches of pure and applied chemistry (Rice chapter: 1926).

**Phi Beta Kappa**—founded in 1776 at the College of William and Mary to recognize intellectual achievement and the love of learning among students in the liberal arts and sciences (Rice chapter: March 1, 1929).

**Pi Delta Phi**—organized to interest French students in competing for high standing in scholarship (Theta chapter at Rice: May 1930).

**Society of Sigma Xi**—for the promotion of research in science (Beta of Texas chapter at Rice: March 23, 1938).

**Tau Beta Pi Association**—organized to interest engineering students in competing for high standing in scholarship (Gamma of Texas chapter at Rice: December 18, 1940).

**Delta Phi Alpha**—to promote an interest in the German language and literature (Gamma Xi chapter at Rice: April 1949).

**Sigma Delta Pi**—to promote an interest in the Spanish language and literature (Rice chapter May 14, 1953).

**Tau Sigma Delta**—national honor society in architecture and applied arts (Tau chapter at Rice: May 7, 1961).

**Eta Kappa Nu**—founded in 1904 at the University of Illinois for electrical engineering students to stimulate and reward scholarship as well as assist and encourage its members to grow professionally throughout their lives (Rice chapter: January 1981).

**Omicron Delta Epsilon**—to promote study in economics (Ricechapter: 1981).

**Psi Chi**—founded in 1929 at Yale University to encourage, stimulate, and maintain excellence in scholarship and to advance the science of psychology (Rice chapter: April 23, 1990).

**Chi Epsilon**—the Civil Engineering Honor Society. It serves to recognize students of high scholarship, character, practicality, and sociability. Students are inducted into the society once or twice annually and are selected from the pool of upper division level civil engineering students. (Rice chapter: 1995).

For more information on these honor societies, please visit the Rice Clubs page at the following link: http://clubs.rice.edu/ or the department associated with the Honor Society.

Last Revised : August 12, 2013

 

# Honors Programs

To enroll in the two semester Rice Undergraduate Scholars Program, students register for HONS 470-471 Proposal Development and Research. This program is for juniors and seniors in all disciplines who are considering graduate study and an academic career after graduation. Students enroll in the program plan and execute independent research under the supervision of a sponsoring faculty member (they may apply for funding to cover expenses related to their projects). They meet once a week to discuss each other's work and to hear a range of presentations on life in academia. Students may apply in the spring of each year. For more information, contact the program's faculty co-director.

Individual departments may offer undergraduates the option of honors program enrollment. These programs enable students to receive advanced training or to deepen their understanding of a given discipline through an intensive program of independent supervised research. Customary procedure is for students to submit a proposed project to their department's Undergraduate Committee, which helps them rework it, as needed, into a substantial but feasible proposal. Once accepted, students are assigned a faculty advisor to guide their research. The project concludes in an honors thesis, which the advisor and two readers evaluate, and an oral examination. Departments also use honors programs to formally recognize students who have shown outstanding work through the individual projects. Acceptance into a departmental honors program is at the discretion of the faculty. For specific requirements and procedures, students should contact the individual departments.

Last Revised : August 01, 2012

 

# President’s Honor Roll

The President's Honor Roll, published each semester, recognizes outstanding students. To be eligible, students must have earned grades in a total of 12 or more semester hours without receiving a grade of F. Courses taken as Pass/Fail may not be counted for the purposes of this rule. Approximately the top 30 percent of undergraduates receive recognition each semester. While undergraduates enrolled in a four-year bachelor’s degree program are always eligible for the President’s Honor Roll, students enrolled in five-year bachelor’s or master’s programs are eligible only during their first eight semesters.

Last Revised : September 19, 2013

 

# University Honors

## Latin Honors

Unlike the President's Honor Roll, which recognizes academic excellence achieved over a single semester, eligibility for the three categories of Latin Honors (summa cum laude, magna cum laude, and cum laude) are based on the cumulative grade point average for all undergraduate work at Rice. Recipients are determined at the end of the spring semester and after receipt of all grades. The grade point average within the highest five percent of the year's graduating majors within each school is recommended for the summa cum laude honor. The grade point average included within the next highest 10 percent is used to determine those eligible to graduate with the magna cum laude honor. Finally, the grade point average included within the next 15 percent is used to determine those majors eligible to graduate with the cum laude honor. Thus, approximately 30 percent of each graduating class, distributed approximately evenly across all schools, receives Latin Honors on graduation.

## Distinction in Research and Creative Work

Distinction in Research and Creative Work is a university award for select undergraduates, granted at Commencement, which appears on the transcript and diploma. Students must apply within their department or program to be considered for the award, and the application must be supported by a letter from a faculty member.

Eligibility for the award extends widely to include a variety of research, design, and other creative projects, as well as persistent dedication to research. Projects completed in part or entirely at other institutions or with community partners will be eligible for consideration.

Applicants must be in good academic standing and have a cumulative GPA of at least 3.30 in courses completed at Rice at the time of their graduation. The award will be granted only to projects that produce a concrete outcome--e.g. an essay, invention, design, musical composition--and demonstrate commitment and/or achievement above and beyond the norm. Students who complete senior theses, senior design projects or other required senior capstone projects are eligible and may submit their thesis or capstone project for consideration; however, these students do not qualify automatically for consideration for this university distinction.

Responsibility for judging applications and determining those that merit the distinction award rests with the undergraduate degree programs or departments. Annually, departments publish clear expectations and criteria for the research and design projects that will be considered for the award, as well as guidelines for what constitutes research or creative work above and beyond the norm within their respective fields. Departments may designate additional requirements as well, such as completion of a research seminar or oral defense.

# GENERAL ANNOUNCEMENTS 2014-2015

## Introduction

Since Rice opened in 1912, the university has recognized the importance of graduate study and research as a principal means of advancing knowledge. The first doctor of philosophy degree was awarded in 1918 in mathematics. Since that time, graduate study has expanded to encompass the schools of architecture, engineering, humanities, management, music, natural sciences, and social sciences, as well as interdepartmental programs. Rice now enrolls approximately 2,300 graduate students and offers advanced degrees in 34 fields of study.

Graduate programs lead to either research or professional degrees. Research programs generally require the completion of a publishable thesis that represents an original and significant contribution to the particular field of study. Research degrees include the doctor of philosophy (PhD), doctor of architecture (DArch), master of arts (MA), and master of science (MS).

Professional programs provide advanced course work in several disciplines but do not generally include independent research. These programs lead to degrees in most of the major schools, including many engineering disciplines. (See the Graduate Degree Chart and the Interdepartmental and Cooperative Programs Chart on pages 5–11 for a complete listing of degrees offered.)

All degrees conferred by the university are awarded solely in recognition of educational attainments and not as warranty of future employment or admission to other programs of higher education.

For additional information on graduate programs and requirements, please go to graduate.rice.edu.

# Admission

Graduate study is open to a limited number of extremely well-qualified students with a substantial background in their proposed field of study (this usually, though not always, means an undergraduate major in the field). Each department determines whether applicants have enough preparation to enter a given program, emphasizing the quality of their preparation rather than the particular academic program they completed or the credits they earned.

Admittance to a Rice University graduate-degree program, with the exception of those in the School of Music, requires a baccalaureate degree or its equivalent as determined by the Office of Graduate and Postdoctoral Studies. For the Shepherd School of Music, the equivalent to the baccalaureate degree will be determined by its graduate committee.

Applicants for admission to graduate study should either contact the appropriate department for application forms and relevant information about the program or visit the department's website for online application information. The Graduate Studies website also has links to the graduate departments' websites. The Graduate Degree Chart lists department chairs with department phone/fax numbers and email addresses.

## Application Process

An application for graduate study should include the completed application form, the application fee, transcript(s), recommendations, and writing samples, if required. Some departments require scores on the aptitude portion of the Graduate Record Examination (GRE) or the Graduate Management Admission Test (GMAT) and an appropriate advanced test. The ETS school code for Rice is 6609; in addition, applicants should send their test scores directly to the admitting department. See individual departmental listings for specific requirement information.

To make sure scores are available when admission decisions normally are made, applicants should take the GRE by the December before the fall for which they are applying. Application deadlines vary by department and degree program. In general, these occur between December and February for fall semester admission, and departments may occasionally consider late applications. Some departments will also accept spring applications. See individual departmental websites for specific information regarding application deadlines.

Admission depends on students' previous academic records, available test scores, and letters of reference from scholars under whom they have studied. Writing samples, portfolios, statements of purpose, and work experience may be evaluated as part of the admissions decision. In general, applicants should have at least a 3.00 (B) grade point average, or the equivalent, in undergraduate work. Applicants who are foreign nationals or whose native language is not English must take either the TOEFL or IELTS test and must score at least 90 on the iBT TOEFL or at least 600 on the paper-based TOEFL. For those students who choose to take the IELTS in lieu of TOEFL, the minimum score is 7. The TOEFL school code for Rice is 6609. The TOEFL and IELTS are not necessary for an international student who has received a degree from a university in which English is the official language of communication. Waiver of the TOEFL and IELTS test may be requested by the admitting department if the department deems that the student has sufficient English communication skills to be successful in their degree program. Departments must send a justification letter for waiving the TOEFL test requirement for applicants with degrees from non-English speaking institutions to the Office of International Students and Scholars. If admitting departments require the student to take additional language courses at the student's expense, this should be explicitly stated in the offer letter.

Graduate students seeking to transfer to another graduate department at Rice must be admitted to the new degree program and be released from their current department.

# GENERAL ANNOUNCEMENTS 2014-2015

## Auditing Courses

Currently enrolled students may audit one or more courses at Rice without charge by securing permission of the instructor and by registering as an auditor with the Office of the Registrar. Upon completion, the audited course will appear on the student's transcript with a grade of either "AUD" or "NC" (No Credit). There are no credit hours associated with audited courses, and auditing a course does not affect a student's GPA. Request to audit a class or to change from audit to credit or vice versa must be done by the end of the second week of the semester.

Last Revised : August 23, 2013

 

# Graduate Degrees

*Jump to:*

## Research Degrees

Research degrees are offered in seven of the eight schools at Rice, with some degrees combining studies in more than one school. Specific requirements for advanced research degrees in each field of study appear in the appropriate departmental pages (see Departments and Programs). Students seeking additional material should contact the appropriate department (see Graduate Degree Chart).

### PhD Programs

The PhD degree is awarded for original studies in the departments listed in the Graduate Degree Chart; in architecture, the equivalent degree is the DArch. Candidates receive a PhD degree after successfully completing at least 90 semester hours of advanced study and concluding an original investigation that is formalized in an approved thesis. As final evidence of preparation for this degree, the candidate must pass a public oral examination and submit the approved thesis to the Office of Graduate and Postdoctoral Studies. (See also Candidacy, Oral Examinations and Thesis.) The residency requirement for the doctorate is four semesters of full-time study at the university.

### Thesis Master's Programs

The MA degree is available in the departments listed in the Graduate Degree Chart, including certain scientific fields of study. The MS degree is offered in the engineering and science fields also listed in the chart. Candidates may undertake the MArch, MArch in Urban Design, and MMus degrees as research degrees by adopting the thesis option. Candidates receive a master's degree after completing at least 30 semester hours of study (including thesis hours), 24 hours of which must be taken at Rice. Thesis Master's programs require original work reported in a thesis and a public oral examination. Most students take three or four semesters to complete a master's degree (some programs may require more time). Students receiving a master's degree must be enrolled in a graduate program at Rice University for at least one fall or spring semester of full-time study.

## Nonthesis Master's Programs

Students also may pursue a nonthesis degree in certain departments. This degree would be based on alternative departmental requirements and would include, but not be limited to, the following:

- At least 30 semester hours of study
- At least 24 semester hours must be at Rice University
- Minimum residency is one fall or spring semester of full-time graduate study, with the exceptions of professional masters programs in the schools of engineering and natural sciences, as well as the Master's of Liberal Studies. For these programs, minimum residency is one fall or spring semester in full-time or part-time graduate study.
- At least 15 hours of course work must be at or above the 500 level
- All courses must be in the relevant field

In certain departments, students may receive a master's degree when they achieve candidacy for the doctoral degree. Students seeking a master's degree in this manner must submit a petition for the degree, signed by their department chair, to the Office of Graduate and Postdoctoral Studies by the deadline specified in the official academic calendar for degree conferral in the year in which the degree is to be awarded. (See also Candidacy, Oral Examinations and Thesis and Course Numbering System.)

## Professional Degrees

Rice University offers advanced degree programs to prepare students for positions in a number of professional fields. The professional degrees offered appear in the Graduate Degree Chart. In some departments, the professional degree also prepares the student for a doctoral-level program. All professional degrees are master's degrees with two exceptions: candidates earn the AD or DMA after concluding a program of advanced music study.

Requirements for professional degrees include the successful completion of 30 semester hours or more of upper-level courses (at the 300 level or higher) with at least 24 hours taken at Rice. Minimum residency for professional master's degrees in the schools of natural sciences and engineering, as well as the Master's of Liberal Studies, is one fall or spring semester of either full-time or part-time study. For all other professional master's degrees, minimum residency is one fall or spring semester of full-time study. At least 15 hours of course work must be at or above the 500 level. All courses must be in the relevant field. Specific information and requirements for individual degrees appear in the Graduate Degree Chart. Program information and application materials also are available from the departments. (See also Course Numbering System.)

Institutional financial aid and tuition waivers are not available to professional master's students. This should be stated in the department's offer letter.

### Rice Undergraduates Entering Graduate Professional Degree Program

Rice undergraduate students who wish to enter a professional master's degree program should apply for admission through the normal procedures and in accordance with the normal timetables for application to such programs. While the GRE requirement may be waived in these cases, the authority for the waiver rests with the department. Departments may consider counting courses taken by the students while an undergraduate as credit toward the degree, if the credit was not already counted towards the undergraduate degree. The department has authority to accept or reject a particular course for graduate credit. For more information, see "Coursework Taken While an Undergraduate at Rice" in the Registration section. In addition, the department also must include in the offer letter a list of those courses taken by the student as an undergraduate that the department will accept for graduate course credit. These courses must be verified and approved by the Office of the Registrar and accepted by the department.

## Transferring from Research/Thesis Program to Professional Program

Admission into a professional program is granted separately from admission into a research or thesis program. Students who wish to change from a thesis program to a professional degree program must petition their department in writing. Upon recommendation of the department and approval by the dean's office, the request is sent to the Office of Graduate and Postdoctoral Studies for consideration and final approval. If approved, students who received tuition waivers while enrolled in the thesis program will be expected to repay the tuition before their professional degrees are awarded. Professional degree programs terminate when the degree is awarded. Students who wish to continue graduate study after completing a professional program must apply for admission into a research program.

## Interdepartmental and Cooperative Programs

Opportunities for graduate study are available in a number of interdisciplinary areas. The advanced degree programs listed in the Interdepartmental and Cooperative Programs Chart (below) are administered by the participating Rice departments. They represent fields of study in rapidly developing areas of science and engineering or those areas subject to multiple investigations and interests. Rice also has established ties with other Houston universities and the Texas Medical Center to enable graduate students to receive training in computational biology research, to earn separate degrees simultaneously, or to focus their doctoral study on the specialized field of medical ethics.

| Program | Degrees Offered | Departments/Areas Of Concentration |
|---|---|---|
| **INTERDEPARTMENTAL PROGRAMS** | | |
| Applied Physics<br><br>Kevin Kelly | MS*, PhD | Departments of physics and astronomy, chemistry, electrical and computer engineering, materials science and nanoengineering, mechanical engineering, bioengineering, and chemical and biomolecular engineering; sciences that underlie important new and emerging technologies. # Academic and Judicial Discipline

*Jump to:*

See also Academic Regulations and Grades.

## Academic Probation

Graduate students are placed on academic probationary status by the Office of Graduate and Postdoctoral Studies if their cumulative grade point average falls below 2.67 or their semester GPA falls below 2.33. The period of probation extends to the end of the next semester in which the student is enrolled. If that probationary semester results in cumulative grade point average below 2.67 or semester grade point average below 2.33, the student will be immediately dismissed without further warning. As a courtesy, students will be notified of their probationary status once final grades have been received and posted to their records. S/U grades cannot be used to end probationary status for low GPA.

A degree program can define stricter standards by publishing those expectations in its graduate student handbook. A program can dismiss a student without a probationary semester by faculty vote.

## Dismissal

The two most common grounds for dismissal of a graduate student are (1) inadequate academic progress and (2) a disciplinary violation. The latter is discussed in detail under Disciplinary Probation, Suspension and Expulsion. The following relates to academic progress.

Graduate programs must provide students upon entry to the program with detailed requirements, deadlines, and other program policies. Students are then responsible for meeting program and university requirements in their program of education. A student who is failing to meet departmental or university requirements, such as failing to meet grade requirements, failing to pass required examinations by the required time, or failing to advance to candidacy or defend her/his thesis within the required time, is subject to dismissal without further warning.

When a student is judged not to be making adequate academic progress, he or she must be warned in writing of the possibility of dismissal and given clear information about what must be done within a specified time period to alleviate the problem. These expectations must be reasonable and consistent with expectations held for all students similarly situated in the program. If the student does not meet the stated requirements within the time frame specified, he or she will be dismissed by the graduate program. A student is not eligible to return to Rice following a dismissal.

It is difficult to give a precise and general definition of “adequate academic progress” for graduate students, due to the variation in requirements among different graduate programs. Nevertheless, some general principles do apply. For example, most graduate programs consist of two stages. The first stage, preceding candidacy, typically consists of explicit requirements and milestones, such as course requirements, exams, research projects, and the like. In this stage, adequate academic progress typically means compliance with the requirements and milestones of the program, as well as research progress when applicable. The second stage, post-candidacy, is often referred to as “all but dissertation” (ABD). In this stage, graduate students are expected to conduct research and write and defend their theses/dissertations. As the second stage typically lacks explicit intermediate milestones, it is harder to assess academic progress during this stage. It is extremely important, therefore, for graduate programs to make their expectations explicit for post-candidacy graduate students.

Post-candidacy graduate students often enroll only in research courses. Such courses can offer standard letter grades or satisfactory/unsatisfactory (S/U) grades. Grading mode, however, must be uniform within a section of a research course. Thus, all students in such a section should receive letter grades or all should receive S/U grades.

Graduate programs must establish mechanisms for tracking, reviewing, and documenting academic progress of graduate students on an ongoing basis and must provide graduate students a written assessment of their academic progress at least annually. In some graduate programs this ongoing progress review is carried out by a student's thesis committee, while in others it is carried out by a standing faculty committee. Although a student's supervisor plays an important role in reviewing the student's academic progress, the responsibility for conducting the review process lies with the program and requires the involvement of additional faculty members in the program. For graduate students who are primarily engaged in coursework, for example, professional master's students, the transcript is an adequate form of written assessment.

Dismissal of a graduate student requires that the student be notified of his/her dismissal from the graduate program. Such a notice is distinct from any earlier warning, which lets the student know of the possibility of dismissal. All dismissal notices, as well as warnings of possible dismissal, must be in writing, with a copy sent to the Office of Graduate and Postdoctoral Studies. Email communication is considered to be "in writing". (Academic units should archive copies of all email communications pertaining to student dismissal.)

Because of the serious consequences of dismissal from a graduate program, dismissed students must receive a 15-day notice of the dismissal. Such a notice may precede the trigger for the dismissal. For example, a program can notify a student 15 days before an examination that failure to pass the examination with a certain minimal grade would result in dismissal. In general, dismissal should not take effect during a semester in which the student is enrolled. Dismissals that take effect during a semester are exceptional and must be approved by the Dean of Graduate and Postdoctoral Studies. A dismissal will be held in abeyance until the petition and appeal process is concluded, as students may petition for a dismissal to be revoked as described in the Dispute Resolution section .

## Disciplinary Probation, Suspension and Expulsion

The Code of Student Conduct applies to all Rice students and applies to conduct both on and off campus. The Office of Student Judicial Programs may sanction students — including implementing disciplinary probation, or suspension or expulsion — for violations of the Code of Student Conduct or the Honor Code. Students who have been expelled, who are serving a suspension, who are under investigation for disciplinary violations, or who have Code of Conduct or Honor Code proceedings pending against them may not receive their degree even if they have met all academic requirements for graduation. Students who are suspended or expelled must leave the university within the timeframe specified by Student Judicial Programs, generally 48 hours of being informed of the decision, though in cases of unusual hardship, Student Judicial Programs may extend the deadline. Any tuition refund will be prorated from the official date of suspension or expulsion, which is determined by the Office of the Registrar. A grade of "W" will be awarded to all enrolled courses regardless of when the suspension or expulsion began.

While on disciplinary probation or suspension, students may not run for, or hold, any elective or appointed office in any official Rice organization. Participation in student activities on and off campus and use of Rice facilities, including, but not limited to, the student center, the colleges, the playing field, the recreation center, and the computer labs, are limited to enrolled students. Students who have been expelled will have the expulsion noted on their transcript.

Students seeking readmission after a suspension for Honor Code or Code of Conduct violations or other nonacademic action should submit a petition in writing to the Office of Student Judicial Programs by emailing SJP@rice.edu. That petition should include information on what the student did while away from Rice, including any schooling or employment; how the student met any requirements described by Rice at the time of separation; what the student did to address any issues leading to the separation; and what the student learned from the separation. Once approved by Student Judicial Programs, the petition is forwarded to the dean of graduate and postdoctoral studies for final readmission approval and action.

## Termination of Financial Support

Graduate students often receive financial support in the form of graduate stipend and tuition waivers. The termination of financial support to a graduate student, while not equivalent to dismissal, is a serious action that could deprive students of their financial ability to continue graduate studies. Consequently, the procedure to terminate a student's financial support before the end of the financial-support commitment period should be analogous to those for dismissal as described above. Therefore, termination of financial support of a graduate student requires that the student be notified of the termination 15 days prior to the cancellation of support. Such a notice is distinct from any earlier warning, which lets the student know of the possibility of support termination. All termination of support notices, as well as warnings of possible termination, must be in writing, with a copy sent to the Office of Graduate and Postdoctoral Studies.

Active participation in required academic activities (for example, laboratory work in certain science and engineering programs) is a basic condition for continued financial support. Students who are absent from such required activities for contiguous two weeks without permission and without mitigating circumstances may be subject to termination of financial support. In addition, they may be judged to be not making adequate academic progress. Thus, if absences have to occur, they must be pre-arranged with the student's supervisor, except for medical and family emergencies, in

which cases timely notification is required. Graduate advisors and programs should be aware of unexplained student absences and must provide immediate written warnings when students are not present and carrying out required academic activities for more than one week.

When the source of a graduate stipend is an externally sponsored research grant, the principal investigator is responsible for certifying that compensation paid to those who are supported by the grant faithfully corresponds to actual effort in carrying out the sponsored research. This process is referred to as “effort certification.” The requirements above to give students warnings and notices before dismissal or termination of stipend are separate and independent of the effort-certification requirement. If a principal investigator determines that a graduate student is not contributing to the sponsored project that is the source of the student’s stipend, then the charge for the affected pay period must be reallocated to another fund by the program.

## Degree Revocation

Rice University reserves the right to revoke any degrees granted. A degree awarded may be revoked if the university becomes aware that the degree should not have been granted, such as a degree that was obtained by violating the Honor Code or Code of Student Conduct or by deception, misrepresentation, falsification of records, academic misconduct, research misconduct, or if the work submitted in fulfillment of -- and indispensable to -- the requirements for the degree are determined to fail to meet the academic standards that were in effect at the time the degree was awarded. Notification of the date of revocation will appear on the student’s transcript, and the student will be asked to return the diploma. The Provost receives all recommendations for revocation of degrees and, after consideration and review, forwards to the President any recommendations deemed to be warranted. The Provost may also initiate and forward to the President his or her own recommendation for a degree revocation. The President will consider all recommendations forwarded by the Provost and effectuate those he or she determines to be warranted. Procedures governing degree revocations may be obtained from the offices of the Registrar, Provost or President.

The university also reserves the right to withdraw a degree to correct an administrative error, such as an incorrectly listed degree, or in a situation where it was found that a student had not actually fulfilled all graduation requirements.

*Back to top*

Last Revised : August 11, 2014

# Academic Regulations and Good Standing

*Jump to:*

See also Registration, Grades, Academic and Judicial Standings, and Code of Student Conduct.

## Good Standing

Graduate students must meet the minima, deadlines, and course or grade requirements detailed in Academic Regulations and Grades to remain in good standing and to graduate from the university. Graduate students must meet other requirements specifically mandated as essential for good standing by the graduate student handbook published by the relevant department or program. Failure to remain in good standing may result in probation, separation from the university or dismissal.

## Residency

PhD and DMA students must complete at least four full fall and/or spring semesters in full-time study at Rice University. Students in professional master's programs in the schools of engineering and natural sciences, as well as the Master's of Liberal Studies, are required to complete at least one fall or spring semester of either full-time or part-time graduate study at Rice. All other master's students must be enrolled in a graduate program at Rice University for at least one fall or spring semester of full-time study.

## Full-Time Study

Semester course load for full-time students is nine hours or more as required by specific departments for the fall and spring semesters. Full-time enrollment during the summer semester is at least six hours. Graduate programs at Rice generally require full-time study. For information about dropping below full-time or changing to part-time status, see below.

## Part-Time Study

Part-time students must register for at least three hours in a semester. All time boundary and degree requirements apply to part-time students. Students who wish to become part-time time in the upcoming semester must obtain written permission from the academic department before the semester begins. Students who wish to obtain part-time status after the semester has started must also obtain the approval of the Office of Graduate and Postdoctoral Studies. In order for students to receive the part-time tuition rate, they must obtain verification of part-time approval from the Office of the Registrar by the end of the second week of classes. Part-time students are not eligible to receive fellowships, assistantship aid, tuition scholarships, or reduced rate tuition from Rice. See also Financial Aid. International students should consult the Office of International Students and Scholars about the possible impact on their visa status of

dropping below full-time.

## Minimum Hours

Students must register for at least three hours in a semester.

## Time to Degree

PhD and DMA students are required to complete their program, including thesis defense, within 10 years of initial enrollment in the degree program. All master's students are required to complete their program, including thesis defense, within five years of initial enrollment. In both cases, students have a limit of six additional months from the date of defense to submit their theses to the Office of Graduate and Postdoctoral Studies. These time boundaries include any period in which the student was not enrolled or enrolled part time, for whatever reason. Failure to meet any university time to degree deadline may result in the student not being able to continue in their degree program.

## Time to Candidacy

PhD and DMA students must be approved for candidacy before the beginning of the ninth semester of their enrollment at Rice. Master's students must be approved for candidacy before the beginning of the fifth semester of their enrollment at Rice. See Candidacy, Oral Examinations and Thesis.

## Time to Defense

PhD and DMA students must defend their theses before the end of the 16th semester of their enrollment at Rice. Master's students must defend their theses before the end of the eighth semester of their enrollment at Rice. See Candidacy, Oral Examinations and Thesis.

## Time to Thesis Submission

Candidates who successfully pass the oral examination in defense of the thesis must submit the thesis must submit the thesis to the Office of Graduate and Postdoctoral Studies no later than six months from the date of the examination. See Candidacy, Oral Examinations and Thesis.

## Deadlines

Students must observe all deadlines listed in the Academic Calendar.

## Departmental Duties

In most research degree programs, students must undertake a limited amount of teaching or perform other services as part of their training. Assigned duties should not entail more than 10 hours per week, averaged over the semester, or extend over more than eight semesters.

## Standard of Conduct

Students are expected to live up to the high standards Rice sets for its community members, as described in the Code of Student Conduct. Graduate students should be in compliance with the Code of Student Conduct at all times and not have holds from Student Judicial Programs or other offices.

## Research and Scholarly Activities

Research and other scholarly activities of all students must conform to Rice University policies. It is recommended that students familiarize themselves with these policies before embarking on research or other scholarly activities. Particularly pertinent to students are policy 324–00 (Research Misconduct), policy 326–98 (Human Health and Safety in the Performance of Research), policy 333 (Patent and Software Policies) and policy 334 (Copyright Policy).

## Non-course Training

Within their first semester of enrollment, graduate students are expected to complete some non-course training:

- Orientation – New graduate students are expected to attend all orientation events.
- Sexual Harassment – New graduate students are required to complete this online training. Students in the MBA and MLS programs are exempt from this training.
- Responsible Conduct of Research – All graduate students are required to complete this online training. Students in the MBA and MLS programs are exempt from this training.

- Lab Safety Training - Lab Safety training is mandatory for all new students in the School of Engineering; in the School of Natural Science, with the exception of the Mathematics Department; and any student outside those schools who will be working in a laboratory at Rice. This training is provided through the Office of Environmental Health and Safety.

## Employment

Students receiving a stipend may accept employment only with the approval of their home academic department. Students working for more than 20 hours per week are not normally eligible for full-time status.

## Second Degree Programs

Graduate students may enroll in a second degree program only with the approval of their home academic department.

## Continuous Enrollment

Students must maintain continuous program involvement and enrollment during fall and spring semesters unless granted an official leave of absence. See Leaves, Interruptions of Study and Withdrawals for more information.

*Back to top*

Last Revised : August 11, 2014

# Candidacy, Oral Examinations and Thesis

*Jump to:*

## Approval of Candidacy

Candidacy marks a midpoint in the course of graduate education. Achieving candidacy for the PhD/DMA signals that a graduate student has: (a) completed required course work, (b) passed required exams to demonstrate his/her comprehensive grasp of the subject area, (c) demonstrated the ability for clear oral and written communication, and (d) shown the ability to carry on scholarly work in his/her subject area. Requirements for achieving candidacy for the thesis master's degree are determined at the departmental level. The department is also authorized to grant waivers or substitutions of specific course requirements, but not to make exceptions to university requirements.

Students enrolled in research degree programs submit their petitions for candidacy for a master's or doctoral degree through the department chair to the dean of graduate and postdoctoral studies. In the petition sent to the dean, the department chair identifies the student's thesis director, recommends a thesis committee, certifies that the applicant has fulfilled the departmental requirements, and provides a course transcript as evidence that work completed within the department is of high quality. Students in nonthesis master's programs, including professional master's programs, must submit a certification of nonthesis master's through their department chair to the Office of Graduate and Postdoctoral Studies.

PhD/DMA students must be approved for candidacy before the beginning of the ninth semester of their enrollment at Rice. Master's students must be approved for candidacy before the beginning of the fifth semester of their enrollment at Rice. However, in order to qualify for a given commencement, they must meet the submission deadline for that commencement per the Academic Calendar. This date falls at the end of October for December degree conferral and the end of February for May degree conferral

Students who are unable to meet the university time boundary for candidacy may petition the dean of graduate and postdoctoral studies or his/her designee for an extension of time to candidacy. Students who exceed their time boundaries without an approved extension request will be charged a fee of $125 for reinstatement to good standing. Students who exceed their time boundaries and do not receive an extension to their time to candidacy are subject to immediate dismissal by the Office of Graduate and Postdoctoral Studies.

## Thesis Committee

The thesis committee administers the oral examination for the student's thesis defense and has final approval/disapproval authority and responsibility for the written thesis.

A thesis committee is composed of at least three members. Two, including the committee chair, must be members of the student's department faculty; in doctoral thesis committees one member must have his or her primary appointment in another department within the university. At least three members of the committee must meet one of the following requirements:

- Tenured or tenure-track members of the Rice faculty
- Research faculty holding the rank of faculty fellow, senior faculty fellow, or distinguished faculty fellow
- Qualified individuals who have been certified as thesis committee members by the dean of graduate and postdoctoral studies

The composition of the thesis committee must always meet the guidelines mentioned above, with the following exceptions:

- **Interdisciplinary programs (Applied Physics & SSPB)-** The Chair of the thesis committee is either the advisor or in

the host department of the student, and is affiliated with the program. The second member of the committee is affiliated with the program. The third committee member is neither in the student's host department nor affiliated with the program. Thesis committee make-up is approved by both the head of the host department and the program. The formal structure of the thesis committee for the programs is in the General Announcements and regularly reviewed by the Office of Graduate and Postdoctoral Studies.

- **Master of Architecture-** The committee chair must be a tenured or tenure-track faculty member. Other committee members can be tenured, tenure-track, or non-tenure track Rice faculty.

The committee chair need not be the thesis director. The chair, however, must be either a tenured or tenure-track member of the major department or a research faculty member of the student's major department. In addition to the three required members, additional members of the committee may be selected with the approval of the department chair.

Candidates are responsible for keeping the members of their committee informed about the nature and progress of their research. They also must establish a schedule for thesis completion and review. The members of the committee, in turn, should review the thesis in a timely manner, approving a preliminary form of the thesis before scheduling the oral examination.

## Announcement of Thesis Defense

Oral examinations for the doctoral degree must be announced at least 14 days in advance. Oral examination announcements are to be submitted to the Office of Graduate and Postdoctoral Studies by entering the information into the Graduate Students Thesis Defense Announcement form at http://events.rice.edu/rgs.

Oral examinations for the master's degree must be announced at least 7 days in advance in the same manner as the doctoral defense.

## Oral Examination in Defense of Thesis

The public oral defense of a thesis is intended to be an examination of a completed body of work and should be scheduled only when the thesis is essentially completed. Students may take the final oral examination in defense of their thesis only after the dean of graduate and postdoctoral studies approves their candidacy. All regulations in this section apply to both masters and doctoral theses, unless otherwise noted.

At least one copy of the thesis must be available in the departmental office not less than two calendar weeks prior to the date of the oral defense. The length of the oral examination and the subject matter on which the candidate is questioned are left to the judgment of the committee. The defense should be scheduled by the student after consultation with the thesis advisor, who agrees that the thesis is completed and ready to be defended. All oral thesis defenses must take place on the Rice University campus with the candidate and all thesis committee members in physical attendance. In exceptional cases, appeals to this requirement can be made in writing to the Dean of Graduate and Postdoctoral Studies. A candidate must be enrolled in the semester in which his or her oral examination is held. Students who defend during the summer must enroll in the summer session of classes. For the purpose of the oral defense only, enrollment in a semester is considered valid through the Friday of the first week of class of the following semester. Students passing the oral examination on or before the end of the first week of classes of any semester do not have to register for that or any subsequent semester even though they may be continuing to make minor revisions to the final copy of their thesis.

Should a candidate fail, the committee chair may schedule a second examination. Students who fail a second time will be dismissed from the university.

Students must submit a copy of their approval of candidacy form, signed by the thesis committee signifying successful defense of the thesis, to the Office of Graduate and Postdoctoral Studies within one week after the oral examination. Instructions to submit this form are located online at graduate.rice.edu/thesis. The original approval of candidacy form must be turned in when the thesis is submitted.

PhD and DMA students must defend their theses before the end of the 16th semester of their enrollment at Rice. Master's students must defend their theses before the end of the eighth semester of their enrollment at Rice. Students who are unable to meet the university time boundary for thesis defense may petition the dean of graduate and postdoctoral studies or his/her designee for an extension of time to defense. Students who exceed their time boundaries without an approved extension request will be charged a fee of $125 for reinstatement to good standing. Students who exceed their time boundaries and do not receive an extension to their time to defense are subject to dismissal by the Office of Graduate and Postdoctoral Studies.

## Thesis Submission Regulations and Procedures

The thesis is the principal record of a student's work for an advanced degree. Instructions for online thesis submission

and guidelines for thesis formatting are available at: graduate.rice.edu/thesis/.

Candidates who successfully pass the oral examination in defense of the thesis must submit the thesis to the Office of Graduate and Postdoctoral Studies no later than six months from the date of the examination. If the thesis is not submitted by the end of the six-month period, the "pass" will be revoked and an additional oral defense will need to be scheduled. Applications for an extension without reexamination must be made by the candidate with the unanimous support of the thesis committee, endorsed by the school dean, and approved by the Office of Graduate and Postdoctoral Studies. Extensions of this six-month period for completion without reexamination will be granted only in rare circumstances. Approved petitions for extension without reexamination received after the 6 month time boundary expired will be charged a fee of $125 for reinstatement to good standing.

Students must have the original signatures of each member of their thesis committee on two title pages of their dissertation. Students submitting a dissertation for the PhD, DArch, or DMA must fill out a Survey of Earned Doctorates form. All students submitting theses, whether for master's or doctoral degrees, must complete a ProQuest/University Microfilms International (UMI) publishing contract. Students must pay their thesis submission fee before submitting the thesis to the Office of Graduate and Postdoctoral Studies for degree approval.

All theses are permanently preserved in Rice's Institutional Repository and are available via scholarship.rice.edu shortly after the final submission of the thesis. In limited cases, a student's advisor may request an embargo of six months, one year, or two years; this is subject to approval by the dean of graduate and postdoctoral studies or his/her designee.

Students have six months from the date of their defense to submit their thesis. However, in order to qualify for a given commencement, they must meet the submission deadline for that commencement per the Academic Calendar. This date falls on the last day of classes in the Fall and Spring semesters.

Last Revised : September 02, 2014

# Grades

*Jump to:*

See also Faculty Grading Guidelines and Syllabus Standards.

## Minimum GPA

Graduate students must maintain a grade point average above the 2.67 minimal institutional threshold and any department or program thresholds. The term GPA must be above the 2.33 institutional threshold and any department or program thresholds. See also Academic and Judicial Discipline.

## Pass/Fail Option

All degree-seeking graduate students may take course(s) pass/fail outside their department. They must designate a course as pass/fail no later than the end of the 10th week of classes; however, they may later convert a pass/fail to a graded course by submitting the proper online form with the Office of the Registrar by the end of the second week of the following semester. Students should be aware that while a grade of P does not affect their Grade Point Average, a grade of F is counted as a failure and is included in their GPA. Visiting Post Baccalaureates cannot take courses on a pass/fail grading basis. For more information, see The Pass/Fail Option.

## Satisfactory/Unsatisfactory

Satisfactory/unsatisfactory courses are those that do not use traditional grading procedures and instead assign a grade of S or U rather than a letter grade. With S/U courses, instructors report the S if the student successfully completes the course, or the U if they have not. Students should be aware that while a grade of S or U does not affect their grade point average, no credit will be awarded if a grade of U is received. Courses with a grade of S will count towards total credits earned. Visiting Post Baccalaureates cannot take courses on a satisfactory/unsatisfactory grading basis.

## Audit

Students have the option of auditing courses. For auditing students, instructors report either the AUD or the NC grade symbol, the AUD if the student met the audit requirements of the class, or the NC if they have not. There are no credit hours associated with audited courses, and auditing a course does not affect a student's GPA. Request to audit a class or to change from audit to credit or vice versa must be done by the end of the second week of the semester. (See Grade Designations AUD and NC below.)

## Grade Symbols

Instructors are required to report a grade for all students whose names appear on the class roster. They grade their students using the following conventional symbols: A+, A, A-, B+, B, B-, C+, C, C-, D+, D, D-, F.

## Grade Designations

Under certain circumstances, special designations accompany the student's grade. These designations do not affect the grade point average. The special designations include the following:

**AUD ("Audit")—**This designation is only used for people auditing the course, and specifically where the auditing student has met the audit requirements of the course. A grade designation of "NC" (No Credit) is given to students who do not

meet the audit requirements. There are no credit hours associated with an AUD grade designation. (See Audit above.)

**INC ("Incomplete")—**Instructors report this designation to the Office of the Registrar when a student fails to complete a course because of verified illness or other circumstances beyond the student's control that occur during the semester. For an INC received in the fall semester, students must complete the work by the end of the first week of the spring semester or an earlier date as defined by the instructor, and instructors must submit a revised grade by the end of the second week. For an INC received in the spring or summer semester, students must complete the work before the start of the fall semester or an earlier date as defined by the instructor, and instructors must submit a revised grade by the end of the first week. If a grade is not submitted by the appropriate deadline, the INC will be autmatically converted to a failing grade.

Students with an INC must be certain that tests, papers, and other materials affecting their grade or essential to completing a course requirement are delivered by hand to the appropriate professor or office according to the timeline previously stated, for the instructor to grade the documents and submit the final grade to the Office of the Registrar by the deadline. Loss or lateness because of mail service is not an acceptable excuse for failing to meet academic deadlines. A student who receives two or more INC in a semester may not enroll in the next semester for more than 14 semester hours. Students also should be aware that they may be placed on probation or suspension when the INC is changed to a grade, either by an instructor or by default.

**NC ("No Credit")—**This designation signals that no credit was granted for the course. It is used in situations where a person auditing a course has not met the audit requirements of the course as defined by the instructor.

**OT ("Other")—**Instructors report this designation to the Office of the Registrar when a student fails to appear for the final examination after completing all the other work for the course. Students must resolve the matter, and instructors must submit a revised grade, by the end of the first week of the spring semester or by the end of the fourth week after Commencement, whichever is applicable. An OT awarded during a summer semester must be resolved and the grade submitted by the start of orientation week. If a grade is not sumbitted by the appropriate deadline, the OT will be automatically converted to a failing grade. Students should be aware that they may be placed on probation or suspension when the OT is changed to a grade, either by an instructor or by default.

**W ("Official Withdrawal from University")—**Students who officially withdraw from the university after the designated drop deadline, the seventh week of classes, will receive a final grade of "W" for each course in which they were enrolled at the time of withdrawal.

Students who officially withdraw from the university before the drop deadline will not receive the grade of "W" for any courses in which they were enrolled for that semester. These courses will not be included on the official transcript.

**W ("Late Drop with Approval")—**A student who receives approval from the Office of Graduate and Postdoctoral Studies to drop a course after the designated drop deadline will receive a grade of "W" for that course. When requests for late drops are denied, the Office of the Registrar records the submitted grade.

If a student drops a class before the designated drop deadline for the semester, the course will not be included on his/her official transcript. Graduate students are reminded that the rule allowing new matriculants in their first semester at Rice to drop a class up until the last day of classes applies only to undergraduates.

**XII ("Article XII")—**This designation is used in various honor council or judicial cases when a student has opted to voluntarily withdraw from the university and forfeit credit for the course in question, with the understanding that the accusation will not otherwise be pursued.

## Grade Points

To compute grade point average, letter grades are assigned numeric values as follows:

| | | | |
|---|---|---|---|
| **A+** | 4.33* | **C** | 2.00 |
| **A** | 4.00 | **C-** | 1.67 |
| **A-** | 3.67 | **D+** | 1.33 |
| **B+** | 3.33 | **D** | 1.00 |
| **B** | 3.00 | **D-** | 0.67 |
| **B-** | 2.67 | **F** | 0.00 |
| **C+** | 2.33 | | |

* Effective in Fall 2018 semester, the grade A+ will be worth 4.0, not 4.33, in calculating the GPA.

**Grade Point Average Calculation**—For each course, the credit hours attempted and the points for the grade earned are multiplied. The points for each course are added together, and the sum is divided by the total credit hours attempted. Grade point averages are noted each semester on the student's official transcripts.

Last Revised : August 11, 2014

# Leaves, Interruptions of Study and Withdrawal

*Jump to:*

There are two types of interruptions in study: short-term releases and separations. Both releases and separations may be either voluntary or involuntary. Separations are periods of non-enrollment and require specific reinstatement or readmission processes.

## Short-Term Medical and Parental Release

There are two types of short-term releases: medical and parental. Short-term releases can be up to six weeks in length.

If a graduate student cannot fulfill the duties of his or her appointment due to a medical emergency or the adoption or birth of a child, the student may be temporarily released from their academic responsibilities.

Enrollment and stipend support may be continued for up to six weeks or until the appointment expires (whichever occurs first). A student may apply for short-term medical or parental release at any time during the semester. Complete guidelines for obtaining a medical or parental release are available at http://graduate.rice.edu/leaves. Students taking a voluntary short-term release should make arrangements with their advisor and instructors to complete their academic responsibilities in a timely way.

The university may also insist on a student's short-term medical release if, in the judgment of the dean of graduate and postdoctoral studies, or her/his designee, the student has a serious medical or psychological condition that the student cannot effectively address while enrolled or which is likely to be severely exacerbated by the Rice academic and/or living environment.

Students may not do degree work or work involving Rice faculty or facilities while on short-term medical release. Students returning from a short-term medical release will be required to provide documentation that they are able to return to their studies.

## Voluntary Separations

Voluntary separations include leaves of absence (generally one to two semesters in length) and withdrawals (medical and nonmedical). Students on a leave of absence are not required to petition for readmission. Withdrawn students are eligible to reapply.

**Leave of Absence**—A leave of absence allows a student to take time off from their studies and later resume study without having to petition for readmission to the university. Normally, students may take a leave of absence for no more than two consecutive semesters. The semesters that a student is on leave do not count against the time to candidacy or the time to defense. They do, however, count against time to degree.

A leave of absence is granted only by the Office of Graduate and Postdoctoral Studies on the recommendation of the department chair and only to graduate students in good standing with the university. Students must obtain approval for a leave before the beginning of the academic semester in which the leave is taken. Leave requests, endorsed by the department, must be received in the Office of Graduate and Postdoctoral Studies prior to the first day of classes. (see Leaves)

Students must pay a reinstatement fee of $125 on their return from an official leave.

**Nonmedical Withdrawal and Readmission**—Students who wish to withdraw from Rice during the semester, for any nonmedical reason, are to notify the chair of their academic department in writing (see Refund of Tuition and Fees). Failure to register before the end of the fourth week of classes without a leave of absence granted by the Office of Graduate and Postdoctoral Studies constitutes a de facto withdrawal.

Students who later wish to resume study after a voluntary or de facto withdrawal must petition for readmission to the university. The petition must include an academic plan devised in consultation with the student's advisor, advising committee, or director of graduate studies (depending upon the graduate program's advising structure). The semesters that a student is not enrolled do not count against the time to candidacy or the time to defense. They do, however, count against time to degree. Readmission requires the recommendation of the department chair and the approval of the dean of graduate and postdoctoral studies. Readmitted students must pay a readmission fee of $350.

**Medical Withdrawal and Readmission**—Graduate students may request a medical withdrawal from the university by applying in writing to the Office of Graduate and Postdoctoral Studies at any time during the semester, up until the last day of classes; the withdrawal does not take effect until approved in writing. Email communication is considered to be "in writing."

Graduate students who wish to seek readmission following a medical withdrawal must submit to the Office of Graduate and Postdoctoral Studies a written petition for readmission no later than June 1 for the fall semester and November 1 for the spring semester after the medical withdrawal. This petition must include documentation of treatment provided and demonstration of medical stability (usually six months); students may also be required to interview with the director of the Rice Counseling Center or Student Health Services or their designees. The petition also must include an academic plan devised in consultation with the student's advisor, advising committee, or director of graduate studies (depending upon the graduate program's advising structure) and approved by the department chair. Detailed petition requirements can be found on the Graduate and Postdoctoral Studies website.

Students who withdraw for psychological reasons within the last five weeks of either fall or spring semester will not be eligible to apply for immediate readmission. Students who withdraw for psychological reasons while enrolled during the summer session are not eligible to apply for immediate readmission in the fall.

The semesters that a student is not enrolled do not count against the time to candidacy or the time to defense. They do, however, count against the time to degree. Readmission requires the approval of the dean of graduate and postdoctoral studies, and readmitted students must pay a readmission fee of $350.

## Involuntary Separations

Sometimes, the university will require a student to withdraw, which requires a specific readmission process. An involuntary separation may result from a disciplinary and/or a medical reason.

The university may insist on a student's involuntary separation from the university if, in the judgment of the dean of graduate and postdoctoral studies or her/his designee, or, in the case of disciplinary action, of the assistant dean of student judicial programs, the student's behavior includes, but is not limited to, the following:

- Poses a threat to the safety or welfare of him/herself or other members of the Rice community;
- Has a serious medical or a psychological condition that the student cannot effectively address while enrolled or which is likely to be severely exacerbated by the Rice academic and/or living environment;
- Demonstrates behavior that seriously interferes with the education of other members of the Rice community; behavior that violates the Rice Code of Student Conduct, the Rice Honor Code, the Rice Sexual Harassment Policy, the Rice Weapons Policy; or other relevant policies, or behavior which otherwise requires disciplinary action;
- Is not able to continue functioning as a student.

An involuntary separation can be the result of an interim decision or a final decision. An interim decision is usually a summary process that may result in a temporary separation.

A final decision comes after a process that includes notification, opportunity to respond, and opportunity to appeal. It can result in a suspension (i.e. temporary separation) or in an expulsion (i.e. permanent separation), as well as other sanctions.

**Readmission following Involuntary Separations**—Following an involuntary separation, graduate students who wish to seek readmission must submit a written petition for readmission to the Office of Graduate and Postdoctoral Studies no later than June 1 for the fall semester and November 1 for the spring semester. Petitions for return following a medical withdrawal must include documentation of treatment provided, and students may be required to interview with the director of the Rice Counseling Center or Student Health Services or their designees. The petition also must include an academic plan devised in consultation with the student's advisor, advising committee, or director of graduate studies (depending upon the graduate program's advising structure) and approved by the department chair.

Students who are involuntarily separated from the university for psychological reasons within the last 5 weeks of either the fall or spring semester are not be eligible to apply for readmission for the following semester. Students who are withdrawn for psychological reasons while enrolled during the summer session are not eligible to apply for immediate readmission in the fall; they must wait to reapply for readmission for the spring semester.

Students involuntarily separated from the university for violations of the student code of conduct or other disciplinary reasons, including honor code violations, must submit a petition to the Office of Student Judicial Programs and receive approval prior to returning to the university or for the award of a degree (See Nonacademic Discipline).

The semesters that a student is not enrolled do not count against the time to candidacy or the time to defense. They do, however, count against the time to degree. Readmission requires the approval of the dean of graduate and postdoctoral studies, and readmitted students must pay a readmission fee of $350.

Further information is available by contacting the Office of Graduate and Postdoctoral Studies.

## Nonenrollment Restrictions

Students may not do degree work at Rice or work involving Rice faculty or facilities during any period of nonenrollment, except during the period following successful oral defense prior to submission of the final thesis.

All separated students must return their student ID to the Office of Graduate and Postdoctoral Studies. All university keys must be returned to the appropriate offices. Participation in student activities on and off campus and use of Rice facilities, including, but not limited to, the student center, the playing fields, the recreation center, and the computer labs, are limited to enrolled students.

Separated students are expected to be away from Rice during the term of the separation. If the student is employed by Rice at the time of separation, he or she must relinquish such employment or petition the Office of Graduate and Postdoctoral Studies for written permission to continue the on-campus employment. Noncompliance with these requirements may delay or prevent readmission.

*Back to top*

Last Revised : September 29, 2014

# Registration

*Jump to:*

See also Academic Regulations.

## Drop/Add

During the first two weeks of classes, students may change their registration, add or drop courses without penalty. After the second week, the following conditions apply for adds and drops. Graduate students:

- May not add courses after the second week of classes, except in extenuating circumstances and with the approval of the Office of Graduate and Postdoctoral Studies (a $75 penalty fee per course will be assessed). The student's request to add a course first must be supported and approved by the student's advisor along with the course instructor and then forwarded to the Dean of Graduate and Postdoctoral Studies for consideration.
- May drop courses through the seventh week without penalty.
- May not drop courses after the end of the seventh week of classes, except in extenuating circumstances and with the final approval of the Office of Graduate and Postdoctoral Studies (a $75 penalty fee per course will be assessed). The student's request to drop a course first must be supported and approved by the student's advisor, the course instructor, the appropriate department chair, and the school dean. Afterward, it should be forwarded to the Dean of Graduate and Postdoctoral Studies for consideration. Students who receive approval to drop a course after the designated drop deadline will receive a grade of "W" for that course.

Graduate students that drop a class after the second week should keep in mind that there is no refund of tuition, assuming the student continues to be enrolled in at least one other class.

## Course Registration

Currently enrolled students register in April for the fall semester and in November for the spring semester. Students are strongly encouraged to meet with their advisor to discuss their courses for the upcoming semester. Please see the Drop/Add section below for requirements for adding or dropping a course after the semester has begun.

## Course Numbering System

Courses numbered 100-499 are generally considered undergraduate level, with the 100-299 sequence classified as lower-level (freshman/sophomore) and the 300-499 sequence classified as upper-level (junior/senior). Courses numbered 500 and above are generally considered to be at the post-baccalaureate or graduate level. Graduate and undergraduate students may, with departmental approval, take certain courses outside their designated level.

## Coursework Taken While an Undergraduate at Rice

Departments may consider counting courses taken by a student while an undergraduate at Rice as credit toward a master's degree.

The following guidelines must be followed:

- The courses must be chosen from those that normally satisfy requirements for the advanced degree
- No course can be used simultaneously to satisfy both an undergraduate and a graduate degree requirement
- Coursework taken as an undergraduate will not be converted to indicate a graduate level in the student's academic history until after the bachelor's degree is awarded

- Coursework taken as an undergraduate does not indicate the student's matriculation term for the graduate program—the matriculation term will be the term the student officially enters the program as a graduate student after completing all undergraduate requirements
- Regardless of the number of graduate courses taken at the undergraduate level, a student must spend at least one semester (fall or spring) studying at Rice as a graduate student

## Final Examination In Graduate Courses

Graduate courses, especially those with significant undergraduate student enrollment, should follow the guidelines for undergraduate courses (see Final Examinations section) regarding scheduling of projects, papers, and finals during the last weeks of classes, reading periods, and final exam periods. However, instructors have the discretion to modify those guidelines as appropriate for their specific courses. Such modifications and the final schedule must be made clear at the beginning of the semester.

## Application for Degree

All students must complete and submit an Application for Degree Form available in ESTHER. This form is required for all students who plan to complete their degree requirements at the end of the fall or spring semester. A late fee will be assessed for applying after the deadline (please consult the semester-specific Academic Calendar for deadline).

*Back to top*

Last Revised : August 22, 2014

# Transfer Credit

Courses taken at another accredited college or university are not automatically approved for transfer credit. Transfer credit is only granted with the approval of the student's major department. Transfer credits are subject to the following restrictions:

- Courses must be from a regionally accredited U.S. institution or an international institution officially recognized by that country's Ministry of Education or equivalent.
- The course must be recorded on an official transcript sent directly from the original institution to Rice or hand-delivered by the student in an official sealed envelope.
- The minimum grade for transferred credits is a C- or equivalent. Some departments or programs may set a higher standard.
- The major department must approve the credits.
- Students seeking transfer credit must submit an approved Graduate Request for Transfer Credit form to the Office of the Registrar.

Please note that all transferable credits will be converted to semester hours. In no instance will a course transfer in with credit greater than the semester hour equivalent originally earned for the coursework.

Last Revised : July 20, 2011

 

# Veterans Information

Qualified veterans, dependents of deceased or disabled veterans whose death or disability is a direct result of their military service, or dependents in receipt of transferred benefits from a veteran may be eligible for VA educational benefits under one of the following programs while attending Rice University:

- Chapter 30: Montgomery G.I. Bill-Active Duty/Discharged
- Chapter 31: Vocational Rehabilitation
- Chapter 32: Veterans Educational ssistance Program (VEAP)
- Chapter 33: Post 9/11 G.I. Bill
- Chapter 35: Dependents Education Assistance
- Chapter 1606: Montgomery G.I.Bill-Selected Reserve
- Chapter 1607: Reserve Education Assistance Program (REAP)

At Rice University, veterans' benefits are managed through the Office of the Registrar. This office assists all veterans and their dependents who wish to receive Veterans Administration (VA) educational benefits

Please see http://registrar.rice.edu/students/veterans/ regarding the documentation required to obtain educational allowances from the VA.

Veterans who are planning to attend the university should contact Rice University's Veterans Affairs Representative at least two months before the date of entry. Such time is required to expedite the processing of paperwork for educational allowances from the VA.

For certification of benefits, students should have an enrollment of at least half time (4.5 credits for graduate students).

For additional information regarding other veterans' educational programs, contact the Office of the Registrar at 713-348-4999 or registrar@rice.edu.

Last Revised : August 12, 2013

# Clubs and Organizations

*Jump to:*

*Office of Student Activities*
*Center for Civic Leadership*
*Office of Fellowships and Undergraduate Research*
*Community Involvement Center*
*Rice Student Volunteer Program*
*Intercollegiate Speech and Debate*
*Office of Multicultural Affairs*

## Office of Student Activities

The Office of Student Activities, located in the Rice Memorial Center Cloisters, oversees the activities of various campus wide student organizations, student requests for facilities usage, and coordination of various leadership development programs.

In addition to managing the registration process, finances, and general advising for the 200 plus registered clubs at Rice University, Student Activities provides direct advising to the following organizations:

- Student Association (SA) - Undergraduate student government, including college presidents
- Graduate Student Association (GSA) - Graduate student government
- Impact Rice Retreat (IRR) - freshmen and sophomore leadership development retreat
- Leadership Summit - advanced leaders' retreat

The Rice University clubs are divided into six categories: Academic/Honorary, Cultural/International, Political, Recreational/Sport, Religious/Spiritual, Service, Social, and Special Interest. Additional information about the clubs can be found online at http://clubs.rice.edu. Student Activities also provides leadership development opportunities in the form of Lunch and Lead Programs, the Impact Rice Retreat, the Leadership Summit, and the Women LEAD program.

A large number of student organizations address special student interests, such as the Black Graduate Student Association, the Latin American Graduate Student Association, the Rice Chinese Students and Scholars, Rice Young Democrats, and Rice Conservative Forum. There also are numerous sport related clubs such as sailing, rugby, lacrosse, volleyball, and soccer. Some of the special-interest groups include the Rice MBA Consulting Club, the Rice Business Collaborative, KTRU Rice Radio, and Habitat for Humanity.

Many organizations are associated with academic and professional disciplines, such as foreign language clubs, honor societies, and various departmental graduate student associations.

Student Activities also recognizes a number of religious and spiritual organizations. These include, but are not limited to, Agape Christian Ministries, the Baptist Student Union, Canterbury Association, Catholic Student Association, Hillel Foundation, InterVarsity Christian Fellowship, the Muslim Student Association, and Rice Interfaith Dialogue Association. Many of these clubs are assisted by local clergy or staff, and form the Joint Campus Ministers.

The Clubs Office is located near Student Activities in the RMC Cloisters, and provides computers, workspace, and a color copier for club convenience. There is additional student organization workspace in the basement of the Rice Memorial Center that has office space, storage, and computers for student organization use.

## Center for Civic Leadership

The Center for Civic Leadership (CCL) identifies and cultivates opportunities for Rice students, faculty, and staff to engage the Houston community and the world through engaged scholarship, active service, and meaningful leadership. The CCL connects Rice faculty and students with each other and community partners.

The CCL supports three programs:  the Community Involvement Center, Office of Fellowships and Undergraduate

Research, and Leadership Rice. Further information can be found at http://ccl.rice.edu.

## Office of Fellowships and Undergraduate Research

The Office of Fellowships and Undergraduate Research (OFUR) helps Rice undergraduates, graduate students, and recent alumni find additional academic opportunities beyond the classroom. OFUR sponsors several research programs intended to foster undergraduate interest in pursuing a Ph.D and works with departments and programs on and off-campus to help students find faculty-mentored research opportunities. As part of the Center for Civic Leadership (CCL), the office promotes and develops opportunities for undergraduates to engage directly with the City of Houston through collaborative, community-based research and design. Through fellowships advising, the office enables students to build upon their academic, leadership, and service experiences to identify undergraduate and post-baccalaureate opportunities that best meet their future goals.

## Community Involvement Center

Housed in the Center for Civic Leadership suite of the Rice Memorial Center, the Community Involvement Center works to develop a culture of service within the university by functioning as an advocate for community service, social responsibility, and an increased awareness of social and community issues. The center acts as a clearinghouse for resources and referrals involving local, national, and international community agencies and service opportunities. By making educational programs and information available, the center fosters a lifelong commitment to service among students, faculty, and staff. It also organizes alternative semester break service trips, volunteer fairs, beach cleanups, and other activities. The Community Involvement Center advises a number of student service organizations, including Rice Habitat for Humanity, Amnesty International, and the Rice Student Volunteer Program. To learn more about the programs of the Community Involvement Center, visit http://cic.rice.edu.

## Rice Student Volunteer Program

By heightening student awareness of community needs and generally raising social consciousness, the Rice Student Volunteer Program (RSVP) has organized volunteer projects for Rice students, faculty, and staff since 1985. The largest event of each semester is Outreach Day, a Saturday when approximately 500 students volunteer with more than 30 nonprofit agencies throughout the Houston area, learning how to take thoughtful action to build a stronger, more just community. With an office in the cloisters of the Rice Memorial Center, RSVP invites each student's involvement as an officer, a college representative, a committee member, a project organizer, or an interested participant in any RSVP event. To learn more about the programs sponsored by the Rice Student Volunteer Program, visit http://www.rice.edu/rsvp.

## Intercollegiate Speech and Debate

Consistently ranked in the top 10 nationally, the George R. Brown Forensic Society sponsors competition in the categories of Individual Events, Lincoln–Douglas, and Parliamentary Debate. The society provides students with the chance to hone their public speaking skills and to qualify for competition both at the American Forensic Association National Individual Events Tournament and at the National Parliamentary Debate Championships. Recognizing the importance of developing strong communication skills, the society has an open admission policy, inviting students with little or no previous experience as well as those with extensive high school backgrounds to become members of one of the most successful teams at Rice. For more information on speech and debate, please go to:www.ruf.rice.edu/~forensic/.

## Office of Multicultural Affairs

The Office of Multicultural Affairs (OMA) has, as its primary mission, coordinating and implementing comprehensive educational, cultural and social programs designed to emphasize inclusiveness, while promoting intercultural dialogue, awareness and respect for diversity. Through advocacy, cultural programs and education, OMA also helps students understand and appreciate racial, ethnic, gender and other differences, while creating opportunities for students to challenge prejudice and expand their cultural knowledge and appreciation. OMA utilizes its programming and support systems to provide an optimum developmental environment where all members of the University community may develop to the highest level of their potential in an atmosphere free from harassment and bias, thereby ensuring Rice's standing as an intellectually and culturally vibrant community. Cultural student clubs, such as the Black Student Association, the Hispanic Association for Cultural Enrichment at Rice and the Rice Native American Student Association, meet regularly with OMA to discuss programming logistics and other issues. OMA also directly advises ADVANCE (advancing Diversity and the Need for Cultural Exchange), a student club that hosts a weekly discussion on a topical issue and organizes an annual cultural fair. Other programs for students under OMA include HARAMBE, (Swahili for "working together in unity" or "let's pull together") a group that seeks to create a unifying event for entering African-American students, allowing them to build social and academic connections with peers, faculty, and staff, and FRESH, a group dedicated to forming relationships through education, scholarship and heuristics at Rice. For more information about OMA, please visit this website.

# Disability Support Services

Located on the first floor of Allen Center, Disability Support Services coordinates campus services for individuals with documented disabilities. For academic accommodations, adaptive equipment, or disability-related housing needs, Disability Support Services is the campus resource for all students with disabilities. Information is maintained on scholarships, internships, and other programs specific to students with disabilities. For more information, see the Disability Support Services website at http://dss.rice.edu. Students can schedule an appointment with the director of Disability Support Services by calling 713-348-5841.

*Section 504/ADA Coordinator*—The director of affirmative action serves as the Section 504/ADA coordinator at Rice University. Concerns or complaints relative to disability issues should be directed to the Office of Affirmative Action 205 Allen Center, 713-348-4930.

Last Revised : August 23, 2013

 

# Financial Aid

*Jump to:*

## Fellowships, Scholarships, and Assistantships

A range of fellowships, scholarships, and assistantships are available at Rice. Most graduate students in degree programs requiring a thesis are supported by fellowships or research assistantships.

### Rice Graduate Fellowships

Doctoral students with high academic records and strong qualifications receive support through Rice fellowships. In most cases, these fellowships provide a stipend plus tuition for the nine-month academic period.

### Research and Teaching Assistantships

Usually funded from grants and contracts, research assistantships are available in many departments. Qualified students (usually second-year or later) receive these awards to provide assistance on faculty research projects, work that usually contributes to the student's own thesis. In some departments, a limited number of teaching assistantships may be available to advanced students. In most cases, these assistantships provide a stipend plus tuition.

Fellowship, scholarship, and assistantship recipients are selected by the individual departments, subject to the approval of the Office of Graduate and Postdoctoral Studies. Students should send their applications for such awards directly to the department involved.

To receive Rice fellowships, graduate tuition scholarships, or assistantship aid, students must be engaged in full-time graduate study; part-time students and students who are not enrolled are not eligible for such aid.

Students receiving stipends from fellowships or assistantships may not accept any regular paid employment on or off campus without the explicit permission of the department. Full-time students, whether receiving stipend support or not, may not accept paid employment in excess of 20 hours per week.

### Summer Assistance

Graduate students may register for summer research hours at no charge.

However, tuition is charged for any actual summer classes, which are offered through the Glasscock School of Continuing Studies. Tuition waivers are not available for summer classes, even for students who receive full tuition

waivers during the fall and spring semesters.

Graduate students are eligible to apply for private educational loans if they are registered during the summer term.

### Loans

In addition to fellowships, scholarships, and assistantships, the Office of Financial Aid offers assistance in the form of loans. Interested students must file a Free Application for Federal Student Aid (FAFSA). If selected for federal verification, students may also be required to submit copies of income tax transcripts and W-2's. The priority deadline to apply is May 15. (Loan assistance through Rice is not available to Master of Liberal Studies students.)

To be eligible to apply for loans, graduate students must maintain satisfactory academic progress as defined by their departments. Should a graduate student fail to make satisfactory academic progress, the student's aid eligibility will be terminated. Graduate students who enroll for less than 4.5 hours in a term will not be eligible for financial aid.

### Federal Student Loans

These are loans made to students attending the university at least half time. Federal Direct Unsubsidized Loans and PLUS Loans are available to all students regardless of need. Loan eligibility is subject to annual and lifetime borrowing limits; Federal Direct PLUS Loans require a satisfactory credit check.

### Loan Counseling

Students who are recipients of federal student loans will be required to complete online loan entrance counseling before funds will be credited to student accounts. Students also will be required to complete online exit counseling at the completion of a program of study at Rice. Failure to complete online exit counseling will result in a transcript hold.

### Private Loan Programs

Private loans are available to graduate and MBA students. These loans are not based on need but do require credit approval from the lender and cannot exceed the student's cost of education, as determined by Rice, minus other resources.

### Special Loan Programs

A Gulf Oil Corporation Foundation Loan Fund and the Benjamin S. Lindsey and Veola Noble Lindsey Memorial Loan Fund are available to help students working toward a degree meet their educational expenses; the funds are limited. Interested students may contact the Office of Financial Aid.

### The Mary Lyn and Niles Moseley Loan Fund and the Professor John A. S. Adams, Sr., Memorial Graduate Student Loan Fund

These funds provide financial assistance, in the form of loans, to graduate students at Rice University, with the exception of MBA and MLS students. Students wishing to apply for such a loan should obtain an application from the Office of Student Financial Services. Guidelines for the program are:

- Individual loans are made for an amount not to exceed $2,000.
- Loans are made for a period of up to one year and, upon request, may be renewable annually.
- The interest rate applicable to these loans is determined by the university.
- Graduate students must be enrolled on a full-time basis to be eligible to apply for a loan and must maintain full enrollment during the full term of the loan.
- Upon completion, applications are submitted to the Office of Graduate and Postdoctoral Studies for approval.
- Loans are available during the full course of the academic year.
- Loans must be repaid in full before graduation.
- Registration, transcripts, and diplomas will be held for students and former students who are in arrears on these loans.

For more information, visit http://graduate.rice.edu/mosleyadams.

### Emergency Loan Fund

Established through gifts from the Graduate Wives Club of 1972–73, the Graduate Student Association, and various faculty members, this fund makes available emergency loans to help graduate students at Rice with short-term needs. Loans are limited to $500 and must be repaid within 90 days. In lieu of interest, a charge of 2% of the principal loan is assessed to maintain the fund.

### Student On Campus Employment

Opportunities for employment are available to students during the academic year. Students are eligible to work under either the Federal Work-Study Program or the Rice University Work Program. Students interested in employment should access the Office of Financial Aid webpage.

## Deferred Payment Plan

Rice offers a deferred payment plan to enable families to finance students' educational costs. This plan divides each semester's charge over four installments. Details are available to eligible students each semester at the time of billing. Students arrange for deferred payment through the Cashier's Office.

## Satisfactory Academic Progress

Federal regulations (CRF § 668.34) require that graduate students demonstrate satisfactory academic progress toward completion of their degree to continue to receive federal and state financial aid. In addition to meeting the standard for receiving financial aid, students must also meet the academic standards of Rice University.

Satisfactory academic progress is comprised of three areas as required by federal regulations. A student must complete their degree within a specified period that does not exceed 150% of the published length of the program, demonstrate they are making progress towards the completion of their degree by successfully completing 66% percent of all attempted courses, and meet the minimum cumulative GPA requirement for the program in which they are enrolled. This regulation applies to each financial aid applicant, whether a previous recipient or not.

Credits counted in the maximum time are all attempted credits (even when not a financial aid recipient). Attempted credits include:

- Earned credits – Passed (A through D-), Satisfactory (S)
- Repeated courses
- Withdrawal
- Failures – Failed (F), Unsatisfactory (U)
- Incomplete
- All accepted transfer credits toward the degree program

If a student fails to meet the satisfactory academic progress standards by the end of the academic year, the student will be placed on Financial Aid Suspension and will not be eligible for aid until the satisfactory academic progress standards are met.

**Appeal**—Students are allowed to appeal their Financial Aid Suspension in cases of the death of a relative, an injury or illness of the student, or other special circumstances. Students must submit a letter discussing why the student failed to make satisfactory academic progress, and what has changed in the student's situation that will allow the student to demonstrate satisfactory academic progress at the next evaluation. Supporting documentation (doctor's letter or academic plan) must accompany the appeal letter and must be submitted to the Office of Financial Aid prior to the beginning of the subsequent term. The Appeals Committee will review appeals on a case-by-case basis.

If an appeal is approved by the Appeals Committee, the student will be placed on financial aid probation and may receive financial aid for one probationary semester. At the end of the probationary semester, the student must meet the satisfactory academic progress standards or meet the requirements of an approved academic plan developed by the student's department or program.

**Financial Aid after Academic Suspension**—Students who have been suspended by the university for academic reasons need to be aware that if they are readmitted, they may not be eligible for financial aid based on their prior academic performance. Students who are petitioning for readmission are advised to contact the Office of Financial Aid to determine their aid eligibility.

## Return of Title IV Funds

Students who receive federal funds as part of their aid packages and do not complete the academic term may be subject to returning a portion of those funds. Contact the Office of Financial Aid for information about policies and procedures regarding the return of Title IV funds.

## Other Fellowships, Honors, and Prizes

Provisions are made for a variety of fellowships, scholarships, and prizes available to graduates of this and other universities. Memorial fellowships that have been founded and endowed by gift or bequest on the part of friends of Rice University provide stipends enabling the holders to devote their time to study and research in their chosen fields. There also are several industrial fellowships maintained by companies interested in the development of technical fields and the training of competent scientists, engineers, and business executives.

Persons desiring consideration for appointment as fellows should consult with the department in which they wish to do research. However, not all fellowships are available every year.

# Graduate Student Life

## Graduate Student Association

All full-time students in the graduate program are members of the Graduate Student Association, which is the sole organization representing graduate students as a body. The governing body of this organization is the Graduate Student Association Council, consisting of a representative from each department offering graduate study and a president, vice president, secretary, and treasurer elected by the council. Graduate students also participate in university affairs through their representatives on many standing and ad hoc university committees, such as the Graduate Council, the Research Council, and various department committees.

One of the functions of the Graduate Student Association is to encourage social interaction among graduate students from different departments. To that end, the association organizes a variety of social activities open to all members of the graduate student body. For more information on the Graduate Student Association, see gsa.rice.edu.

## Housing for Graduate Students

Graduate students have three different housing facilities: Rice Graduate Apartments, Rice Village Apartments, and Morningside Square Apartments. All three properties are within walking distance from the campus, and also provide easy transportation to and from campus and all shopping needs on the weekend through a shuttle service. They also provide social activities and events to help students take a break from their studies. Each community is unique in its own way and provides a broad living environment. For all property information, please visit http://campushousing.rice.edu/graduate.

Rice Graduate Apartments is a garden style complex located just north of campus on Bissonnet. The community includes quick and easy access to campus, study rooms, laundry facilities, bike rooms, two courtyards, and recreational areas. Electronically controlled access gates for pedestrian and vehicular paths are provided. ADA accessible units are available to students requesting reasonable accommodations. Each apartment is furnished with a bed, desk, desk chair, night stand, chest of drawers, and a bookshelf. In addition, each unit includes basic cable, water, and Wi-Fi Internet. Housing is assigned through a lottery for incoming students and second year students. For further information, visit the website above, call 713-348-GRAD (4723), or email gradapts@rice.edu.

The Morningside Square Apartments is a two-story 1950's building located in a quiet neighborhood adjacent to Rice Village on Shakespeare Street at Morningside Drive. The community is a short walking distance to campus, restaurants, and shopping areas. The bedrooms are furnished with a bed, desk, desk chair, chest of drawers, and a nightstand. Basic cable TV is provided and on-site laundry is available. Controlled access gates for pedestrian and vehicular use are included. Apartments are assigned on space availability. Call 713-348-4050 or email msapts@rice.edu for further information.

The Rice Village Apartments is a four-story contemporary style community located on Shakespeare Street across from Morningside Square Apartments and within a short walk of the Village. It offers four ADA accessible units for students requesting reasonable accommodations, and also offers family housing. Each unit offers appliances equipped with Energy Star efficiency to conserve energy and protect the environment. In addition, it is furnished with a dresser, nightstand, desk, chair, and bed. Basic cable, Wi-Fi Internet, and water also are included. The laundry facility has a system that can email alert you when your laundry is done. Other amenities include common areas, study rooms, a recreational area, bike room, and a community herb garden. Controlled security access is provided by a keyless front door using either a biometric fingerprint or a key fob system. Housing is assigned through a lottery for incoming students and second year students. For more information, call 713-348-4050, or email rvapts@rice.edu.

# Health, Counseling and Wellbeing

*Jump to:*

## Student Health Fee

By paying an annual student health service fee, all students gain access to the Student Health Services, Rice Counseling Center and the Student Wellbeing Office. Detailed information on the care and services each provide is available from these centers. The student health service fee is a required fee for all enrolled students, except those in "away" status. See Away Status for more information.

## Student Health Services

Student Health Services, an outpatient medical clinic, is located in the Morton L. Rich Health Center. The clinic is staffed by primary care physicians, nurses, and ancillary support staff. More information can be found at health.rice.edu.

Clinic hours are from 8:00 a.m. to 5:00 p.m., Monday through Friday, during fall and spring semesters. For after-hours and weekend medical care, students may choose among a number of local clinics and hospitals (guidance on self-care as well as local healthcare options can be found on the website). Students must pay for all medical care outside the clinic's purview, including blood tests, x-rays, and outside physician consultations. Should such medical care be necessary, students are urged to review their insurance coverage and pick the best available option.

Care at the clinic is arranged through appointment at 713-348-4966. In emergencies, students should call the Rice University Police Department at 713-348-6000.

The clinic is open full time from the first day of Orientation Week until the day before commencement. It is closed during Thanksgiving and the winter break. The clinic also is open for reduced hours during the summer months.

The Student Health Service provides the following:

- Medical care for illness and injury with referrals to specialists when needed
- Maintenance of health records for all students
- Immunizations and other preventive services
- General information for all students
- Contraceptive counseling and routine Pap smears
- Allergy shots (students must provide serum after a specialist allergy workup)
- Physical examinations

### Confidentiality

The Student Health Service physician–patient relationship is a confidential one. Medical records will be released only on receipt of written authorization from the student or as required by law or when the patient poses a significant risk to herself or himself or another person.

## Health Insurance

All registered students are required to maintain health insurance through Rice University or provide proof of acceptable coverage. To ensure compliance with this university policy, all students are required to either enroll in the Rice plan or complete an online waiver application identifying the Affordable Care Act (ACA) compliant coverage that is in place. All students are automatically billed for Medical Insurance as a reminder to enroll or waive coverage. Charges will be removed after waiver applications are approved. The insurance application and waiver applications, as well as specific

dates for enrolling, can be found on the Rice Student Health website: www.studenthealthinsurance.rice.edu .

Students who do not complete either an enrollment or waiver application by August 15 for the fall semester or January 5 for the spring semester will be considered non-compliant and have an Insurance Hold put on their accounts. This prevents students from droppings or adding classes.

Fall semester students who do not complete either an enrollment or waiver application by September 5 will be automatically enrolled in the annual insurance plan. Please note the automatic enrollment process can take up to two weeks to complete. Spring semester students that are new or enrolled in a fall only plan who do not complete either an enrollment or waiver application by January 23 will automatically be enrolled in the spring only insurance plan. Please note the automatic enrollment process can take up to two weeks to complete.

For questions concerning the Rice plan please contact studentinsurance@rice.edu or call (713) 348-5544.

NOTE: If you waive coverage in the fall, you are still expected to have ACA compliant coverage for the spring.

International students should visit the OISS website (http://oiss.rice.edu) for detailed information concerning the approved alternative insurance option through Student Assurance Services (SAS). Application and rate information can also be found on this website.

## Rice Counseling Center

### General Information

Rice Counseling Center addresses students' psychological needs with various programs and services. The center is open year-round except for scheduled holidays and occasional all-day staff retreats. Office hours for counseling and consultations are 8:30 am to noon and 1:00 pm to 5:00 pm, Monday through Friday. Students can make appointments by calling 713-348-4867 or by visiting the center. There are no costs for Counseling Center services.

Typically, most students who use the counseling services bring with them very common concerns: roommate problems, breakup of a relationship, academic and/or interpersonal anxiety, family problems, difficulties adjusting to Rice, or confusion about personal goals, values, and identity. Counselors are equipped to handle a variety of issues, including substance abuse, eating disorders, sexual assault/abuse/date violence, depression, and the coming-out process. Rice Counseling Center offers both individual and group counseling, as well as educational workshops and programs.

When students need long term or specialized counseling or treatment, counselors refer them to an outside provider. The students, or their health insurance, must pick up these costs. All students who have paid the Health Service Fee are eligible for initial assessment sessions, consultations, crisis intervention, and educational programming. Individual or group counseling may also be available, if appropriate.

Students who have worked with a mental health professional prior to enrolling at Rice are encouraged to make contact with the Rice Counseling Center prior to coming to Rice. This will allow the student to make arrangements for a continued care plan. This plan may involve working with the Rice Counseling Center or working with the center to find a suitable off-campus provider.

The Rice Counseling Center provides the following services:

- Initial assessment
- Short-term individual and couples counseling
- Group therapy and support groups
- Medication consultations with the center's consulting psychiatrist for students in counseling at the center
- Other consultations (e.g., how to make a referral or how to respond to a friend in distress)
- Educational programming (e.g., various presentations on mental health issues)
- Crisis intervention on a walk-in emergency basis during regular office hours; students may call 713-348-4867 for assistance with emergencies after hours or on weekends.

### Confidentiality

Counseling services are confidential; information about a student is not released without that student's written permission. By state law, confidentiality does not extend to circumstances where (1) there is risk of imminent harm to the student or others; (2) the counselor has reason to believe that a child or an elderly or handicapped person is, or is in danger of, being abused or neglected; (3) a court order is issued to release information; (4) the student is involved in a criminal lawsuit; or (5) the counselor suspects that the student has been the victim of sexual exploitation by a former health provider during the course of treatment with that provider.

## Student Wellbeing Office

The Student Wellbeing Office supports students who have experienced wellbeing challenges that may be impacting their

personal and/or academic goals and overall success at Rice. The office works to connect students to university resources and procedural options to help students during their enrollment. When students decide to take time off to focus on their well-being needs, the office works with them and serves as a liaison to the medical readmission process when students are ready to return. The Student Wellbeing Office also coordinates with the Rice Counseling Center to provide mental health and wellbeing related education for the student body. The Student Wellbeing Office is located in the Barbara and David Gibbs Recreation and Wellness Center. For appointments or more information, contact the Student Wellbeing Office at 713-348-3311, wellbeing@rice.edu or at http://wellbeing.rice.edu.

Last Revised : August 11, 2014

# Tuition, Fees and Expenses

*Jump to:*

Tuition and fee charges for graduate students are billed to students each semester. Students may pay the charges in full by the due date or in installments over the course of the semester. Graduate student payments are due by August 15 for the fall semester and January 5 for the spring semester. Tuition and fees for all graduate students for academic year 2014-15 are:

| Tuition | Hour | Semester / Reduced* | Annual / Reduced* |
|---|---|---|---|
| **Graduate Programs** | | | |
| **Architecture** | $1,628 | $14,645 / $814* | $29,290 / $1,628* |
| **Shepherd School of Music** | $1,468 | $13,210 / $734* | $26,420 / $1,468* |
| **Professional Master's in Natural Science** | | | |
| Entering Fall '13 | $1,556 | $14,000 | $28,000 |
| Entering Fall '14 | $1,612 | $14,500 | $29,000 |
| **Professional Master's in Engineering** | $1,778 | $16,000 | $32,000 |
| **All other graduate students** | $2,216 | $19,940 / $1,108* | $39,880 / $2,216* |

| ***Required Fees*** | | |
| **Health Insurance - student premium only (unless waiver has been approved) | Fall: $805 Spring: $1,304 | $2,109 |

## Away Status

Graduate students pursuing their studies outside of the Houston area (graduate students on “away” status) must be registered and pay tuition. Humanities students in away status must pay the Humanities GSA fee. Students on away status must carry health insurance. With these exceptions, graduate students in away status are exempt from the other required fees listed above.

## * Reduced Tuition

After six semesters of full-time study in one degree program (excluding the summer semesters), continuing students are eligible for a reduced tuition rate. A semester of full-time study is defined as a fall or spring semester with at least nine hours of credit earned. The reduced rate, like the standard rate, varies by department/program. Students who are admitted with a relevant master's degree that counts toward a doctoral program at Rice may become eligible for

reduced tuition earlier than those entering a doctoral program without a relevant master's degree.

## ** Health Insurance

All students, full time or part time—including those on away status—must carry health insurance. For further information, visit the Health Insurance section.

## Other Fees

Unless students elect a special payment plan, they must pay all tuition, fees, and insurance for the fall semester by August 15 and for the spring semester by January 5. A late payment penalty of $155 will be assessed past these deadlines.

## Refund of Tuition and Fees

Students who withdraw during the first two weeks of the semester are not charged tuition or fees for that semester. Students who withdraw during the third week must pay fees and 30 percent of the semester's tuition, receiving a 70 percent refund. The amount of the refund drops by 10 percent at the beginning of each successive week that passes before withdrawal until the ninth week, after which no refund is made.

Fees and special charges are not refunded for students withdrawing after the second week of classes in a semester. Similarly, students withdrawing or taking leaves of absence in the spring semester do not receive any refund of fees paid for the full year.

## Part-Time Students

Students must receive approval from their department to enroll with a course load of fewer than nine hours. Approval must be received and the course schedule must be adjusted within the first two weeks of the semester. Students with part-time approval and a course load of fewer than nine hours will be charged at the per-hour rate plus a part-time registration fee. There are no refunds for part-time enrollment or for students whose course load drops below nine hours after the first two weeks of the semester.

## Delinquent Accounts

Students in arrears on their financial obligation to Rice as of the last day to add courses for any semester may be withdrawn. The university will not issue certificates of attendance, diplomas, or transcripts at any time for a student whose account is in arrears.

Students who have not made satisfactory arrangements with the Cashier for payment of current charges may be withdrawn from the university. Accounts not settled by the first day of classes incur a late payment penalty and are subject to a billing hold that prevents those students from dropping or adding classes.

## Special Fees

| | |
|---|---|
| Audit fee: Rice alumni (per course) | $433 |
| Audit fee: All others (per course) | $844 |
| Late registration I (see academic calendar ) | $75 |
| Late registration II (see academic calendar) | $125 |
| Part-time registration fee | $140 |
| Visiting Post Baccalaureate application fee | $100 |
| Visiting Post Baccalaureate registration fee | $90 |
| Visiting Post Baccalaureate late registration fee | $140 |
| Late payment penalty | $155 |
| Deferred payment plan late fee | $40 |
| Late application for graduation fee | $75 |
| Returned check fee | $30 |
| Summer Health Services*** | $134 |
| Diploma fee: parchment | $50 |
| Diploma mailing fee: domestic | $30 |
| Diploma mailing fee: air mail | $50 |
| Diploma fee: facsimile | $20 |

| | | | |
|---|---|---|---|
| Transcript fee | | | $5 |
| Letter of standing | | | $5 |
| Intramural fees | | | $20 |
| Readmission fee: graduate students | | | $350 |
| Readmission fee: graduate students - after withdrawal for non-payment | | | $350 |
| Reinstatement fee: graduate students - following leave of absence | | | $125 |
| Reinstatement fee: graduate students - after exceeding time boundaries to candidacy or defense | | | $125 |

# Access to Student Records

## Notification of Rights under the Family Educational Rights and Privacy Act (FERPA)

The Family Educational Rights and Privacy Act (FERPA) is a federal law designed to protect the privacy of, and limit access to, student education records. The law affords students the following rights with respect to their education records:

1. the right to inspect and review the student's education records within 45 days after the date Rice University ("Rice") receives a request for access;

2. the right to seek amendment of the student's education records that the student believes are inaccurate, misleading, or otherwise in violation of the student's privacy rights under FERPA;

3. the right to provide written consent to disclosures of personally identifiable information (PII, as defined by law) contained in the student's education records, except to the extent FERPA authorizes disclosure without consent;

4. the right to file a complaint with the U.S. Department of Education concerning alleged failures by Rice to comply with the requirements of FERPA. The name and address of the federal office that administers FERPA is: Family Policy Compliance Office, U.S. Department of Education, 400 Maryland Ave. S.W., Washington, DC 20202-8520.

**Inspect and review records**: A student should make written request to any offices that maintain student education records, identifying the record(s) the student wishes to inspect. Though not exhaustive, as a guide for students, this is a list of offices that maintain student education records: Office of the Registrar, Office of the Dean of Undergraduates, Office of Graduate and Postdoctoral Studies, Office of the Assistant Dean of Student Judicial Programs, Admissions Office, Office of Financial Aid, Center for Career Development, Office of Student Activities, Office of Academic Advising, Office of International Students and Scholars, Cashier's Office, and departmental offices. The appropriate Rice official will make arrangements for access and notify the student of the time and place where the records may be inspected. If the records are not maintained by the Rice official to whom the request is submitted, that Rice official will advise the student of the correct official to whom the request should be addressed.

**Amendment of records**: Any questions, problems, or written requests for amendment of records should be submitted to the Office of the Registrar. A student who wishes to ask Rice to amend a record should clearly identify the part of the record the student wants changed and specify why it should be changed. If Rice decides not to amend the record as requested, Rice will notify the student in writing of the decision and of the student's right to a hearing regarding the request for amendment. Additional information regarding the hearing procedures will be provided to the student when the student is notified of the right to a hearing.

**Disclosure of information**: As permitted by FERPA, Rice reserves the right to publish or release the following directory information without prior consent.

1. Name, local and permanent address, telephone and mobile number(s), campus email address(es), and instant messenger address(es)
2. Date and place of birth, and gender
3. Classification and major and minor fields of study
4. Participation in officially recognized activities and sports
5. Weight and height of members of athletic teams
6. Dates of attendance, degrees and awards received
7. The most recent previous educational agency or institution attended by the student
8. Photographic image

Students who would like Rice to withhold this directory information may do so by logging in to ESTHER, clicking Personal Information, clicking Release or Withhold Directory Information, and indicating that the information should be withheld; thereafter, Rice will withhold access to, or release of, the student's directory information until further written

instruction is received. For more information regarding FERPA, please visit the U.S. Department of Education's website.

FERPA permits the disclosure of PII from students' education records, without consent of the student, if the disclosure meets certain conditions found in §99.31 of the FERPA regulations. Except for disclosures to school officials, disclosures related to some judicial orders or lawfully issued subpoenas, disclosures of directory information, and disclosures to the student, §99.32 of FERPA regulations requires the institution to record the disclosure. Eligible students have a right to inspect and review the record of disclosures. A postsecondary institution may disclose PII from the education records without obtaining prior written consent of the student –

- To other school officials, within Rice whom Rice has determined have legitimate educational interests and require this information in order to perform instructional, supervisory, advisory, administrative, or other duties for Rice. These school officials include faculty, staff, trustees, or students serving on official committees (such as disciplinary or grievance committees) or assisting another school official. A school official has a legitimate educational interest if the official needs to review an educational record in order to fulfill his or her professional responsibility for Rice. This includes contractors, consultants, auditors, attorneys, collection agents, volunteers, or other parties to whom Rice has outsourced institutional services or functions, provided that the conditions listed in §99.31(a)(1)(i)(B)(1) - (a)(1)(i)(B)(2) are met. (§99.31(a)(1))

- To officials of another school where the student seeks or intends to enroll, or where the student is already enrolled if the disclosure is for purposes related to the student's enrollment or transfer, subject to the requirements of §99.34. (§99.31(a)(2)) Disclosures may be made and information forwarded by Rice without prior notification to the student.

- To authorized representatives of the U. S. Comptroller General, the U. S. Attorney General, the U.S. Secretary of Education, or State and local educational authorities, such as a State postsecondary authority that is responsible for supervising the university's State-supported education programs. Disclosures under this provision may be made, subject to the requirements of §99.35, in connection with an audit or evaluation of Federal- or State-supported education programs, or for the enforcement of or compliance with Federal legal requirements that relate to those programs. These entities may make further disclosures of PII to outside entities that are designated by them as their authorized representatives to conduct any audit, evaluation, or enforcement or compliance activity on their behalf. (§§99.31(a)(3) and 99.35)

- In connection with financial aid for which the student has applied or which the student has received, if the information is necessary to determine eligibility for the aid, determine the amount of the aid, determine the conditions of the aid, or enforce the terms and conditions of the aid. (§99.31(a)(4))

- To organizations conducting studies for, or on behalf of, the school, in order to: (a) develop, validate, or administer predictive tests; (b) administer student aid programs; or (c) improve instruction. (§99.31(a)(6))

- To accrediting organizations to carry out their accrediting functions. ((§99.31(a)(7))

- To parents of an eligible student if the student is a dependent for IRS tax purposes, though Rice limits such information to financial details of the student's enrollment. (§99.31(a)(8))

- To comply with a judicial order or lawfully issued subpoena. (§99.31(a)(9))

- To appropriate officials in connection with a health or safety emergency, subject to §99.36. (§99.31(a)(10))

- Information the school has designated as "directory information" above and pursuant to §99.37. (§99.31(a)(11))

- To a victim of an alleged perpetrator of a crime of violence or a non-forcible sex offense, subject to the requirements of §99.39. The disclosure may only include the final results of the disciplinary proceeding with respect to that alleged crime or offense, regardless of the finding. (§99.31(a)(13))

- To the general public, the final results of a disciplinary proceeding, subject to the requirements of §99.39, if the school determines the student is an alleged perpetrator of a crime of violence or non-forcible sex offense and the student has committed a violation of the school's rules or policies with respect to the allegation made against him or her. (§99.31(a)(14))

- To parents of a student regarding the student's violation of any Federal, State, or local law, or of any rule or policy of the school, governing the use or possession of alcohol or a controlled substance if the school determines the student committed a disciplinary violation and the student is under the age of 21. (§99.31(a)(15))

For further information regarding Rice's policy on student education records, please contact the Office of the Registrar.

# Code of Student Conduct

With regard to nonacademic disciplinary matters, the Office of Student Judicial Programs and the University Court—a court of student peers—enforce the Code of Student Conduct that governs the administration of student order and discipline. The Code of Student Conduct applies to all students, including undergraduate, graduate, and transfer students; those enrolled in professional and Continuing Studies programs; and visiting students, Visiting Post Baccalaureates, second degree students, and auditors from the time they arrive on campus for orientation until they have completed their studies or degrees and physically left campus. Organizations also are subject to this code. All enrolled students also are subject to Rice University policies, rules, and regulations. The Office of Student Judicial Programs oversees the judicial system.

The Code of Student Conduct and other related information and resources are located at: students.rice.edu/students/Conduct.asp.

After Rice's grievance process has been exhausted and documented, students may also pursue an external complaints process.

.

Last Revised : August 11, 2014

 

# Dispute Resolution

*Jump to:*

## Petitions and Appeals

Graduate students may petition for exceptions to academic requirements, regulations, and judgments. A course requirement is an example of an academic requirement. Allowed time to degree is an example of an academic regulation. Course grades and dismissals from programs are examples of academic judgments. If a petition is denied, one level of appeal is allowed.

### Petitions

In general, petitions will be handled at the lowest appropriate level. A petition regarding requirements, regulations, or judgments of a graduate program will be handled at that level, that is, by the program. Such petitions need to follow procedures established by these programs. A petition regarding University requirements, regulations, or judgment must be submitted to the Office of Graduate and Postdoctoral Studies; such a petition must be accompanied by a recommendation from the program. When the program's recommendation is negative, or when the petition requests a major exception—for example, an extension of allowed time to degree by more than 1/2 semester—the Office of Graduate and Postdoctoral Studies may also obtain the recommendation of the school overseeing the program (when relevant) and the Graduate Council with regard to such petitions.

Petitions for exceptions to academic requirements, regulations, and judgments should be viewed as unusual, rather than typical. Extensions of various time limits, such as time to candidacy or time to defense, will not be granted routinely. See Candidacy, Oral Examinations and Thesis. Students requesting such extensions have to document the unusual circumstances justifying their request, demonstrate their academic progress towards the goal, and provide a concrete plan for meeting the goal within the requested extension.

Petitions regarding academic decisions must be submitted in writing within 15 days from the time that the student knew or should reasonably have known of the decision being petitioned, or within 15 days after an informal effort to resolve the situation has not been successful. Petitions seeking exceptions to academic requirements or regulations should be submitted in writing at least 30 days before the requirement or regulation takes effect. For example, a petition to extend allowed time to degree should be submitted at least 30 days before the deadline in effect. Late petitions may be dismissed, except for unusual situations when a delay is found justifiable by the unit receiving the petition. Petitions must be acknowledged in writing immediately upon their receipt by the receiving unit. Email communication is considered to be "in writing."

### Appeals

If a petition is denied, a student (or other parties affected by the decision) is allowed only one level of appeal. In general, the appeal process will be resolved at the lowest level possible. When the petition is decided at the department level, the appeal must be submitted to the school. When the petition is decided at a school level, the appeal must be handled by the Office of Graduate and Postdoctoral Studies. When the petition is decided by the Office of Graduate and Postdoctoral Studies, the appellant may submit an appeal to the Provost. An appeal must be submitted within 15 days from receipt of the decision that is being appealed. Late appeals will be dismissed, except for unusual situations when a delay is justified. Appeals must be acknowledged in writing immediately upon their receipt by the receiving unit. Email communication is considered to be "in writing."

### Guidelines Regarding Petitions and Appeals

All petitions and appeals should indicate the requirement, regulation, or judgment that is the subject of the petition/appeal, the specific exception requested, and the grounds for the request. Additionally, an appeal must indicate why the decision involving the earlier petition was incorrectly decided. Grounds for a petition/appeal could be procedural errors by academic or administrative personnel or special circumstances found to be mitigating by the unit receiving the petition/appeal. Disagreement over evaluation of academic quality will not be considered as an appropriate basis for petitions/appeals unless the evaluation is found to be patently unreasonable by the unit receiving the petition/appeal. Petitions involving a violation of University policy or improper conduct by University personnel will be handled as grievances (see Grievances below).

Petitions and appeals should be resolved within 30 days of their submission. When such resolution cannot be achieved within 30 days, students will be informed of the delay before the 30 days are over. A resolution of the petition or appeal must be achieved within 60 days. A lack of resolution of a petition within 60 days is an acceptable cause for an appeal.

An academic program directly managing graduate students must establish a standing Petitions, Appeals, and Grievances Committee. A petition concerning a graduate program regulation by a student will be handled by a committee consisting of at least three faculty members. The committee must be independent of the cause for the petition. Members of a student's thesis committee must not participate in the handling of a petition by the student. (The department chair or dean may appoint ad-hoc members to the committee to ensure independence of the committee.) The committee will conduct an investigation of the circumstances and reach a decision regarding the petition. Their written report to the graduate director, and the chair (or dean) will describe the circumstances, the decision, and the rationale for the decision. The graduate director or chair (or dean) will convey the final decision to the student and include the committee report. (Redaction from the report is allowed to protect the privacy of other students.) In case of decisions by the faculty members of a graduate program acting as a committee of the whole, petitions will also be considered by the Petitions, Appeals, and Grievances Committee, which will reconsider the decision in view of the information provided in the petition. This committee may choose to bring the matter back for consideration by the faculty members of the academic program, acting as a committee of the whole. Petitions regarding University requirements, regulations or judgments submitted to the Office of Graduate and Postdoctoral Studies may be handled by the dean or her or his designee. The dean may, at her or his discretion, handle these in a similar manner by enlisting the assistance of a subcommittee of the Graduate Council, which will submit its report to the chair of the Council and to the dean of graduate and postdoctoral studies.

An appeal handled by a school may be handled by the school dean or by an associate dean. The handling officer may convene an ad-hoc faculty committee or establish a standing committee. An appeal handled by the Office of Graduate and Postdoctoral Studies may be referred to a subcommittee of the Graduate Council, composed of three faculty members (representing diverse disciplines within the university) and a graduate student. Such committees must be independent of the cause for the petition. In general, officers or committees handling the appeal should not try to substitute their judgment for that of the unit handling the petition. Rather, their task is to consider whether the petition was handled appropriately, whether all relevant circumstances have been considered, and whether University policy has been appropriately interpreted and applied. Nevertheless, a petition decision may be overturned if the officer or committee handling the appeal finds the petition decision to be patently unreasonable.

All time frames in this procedure refer to academic calendar days, and exclude mid-term, inter-term and summer recesses. This exclusion does not apply to a student who is enrolled during the summer. All petitions and appeals, as well as responses to petitions and appeals, must be in writing. Email communication is considered to be "in writing." Academic units should archive copies of all email communications pertaining to petitions and appeals.

## Grievances

Grievances are different from petitions and appeals. Petitions and appeals involve exceptions to academic requirements, regulations, and judgments. A grievance is a complaint regarding inappropriate conduct by other students, faculty members, or staff. Inappropriate conduct encompasses both inappropriate personal conduct, such as sexual harassment, as well as inappropriate official conduct, such as violation of University policies. Specific policies exist to address grievances based on discrimination or sexual harassment and these policies must be followed in situations involving these issues. Grievances against another student may be raised with the assistant dean of student judicial programs and addressed under the Code of Student Conduct. In other cases, a student may present a grievance in writing at the lowest appropriate level, typically the department or school. If a satisfactory resolution is not obtained at that level, the student may appeal the outcome of the grievance by presenting the problem at the next administrative level, such as the school, Office of Graduate and Postdoctoral Studies, provost, or president. Grievances against non-faculty staff members may also be brought to the employee relations director in Rice's Human Resources office.

The procedures for handling grievances are analogous to those for handling petitions and appeals. Students submitting grievances must so indicate in their submissions.

## Problem Resolution

During the course of graduate studies, problems that do not fall under the category of grievances, described above, may

arise in the relationship between a graduate student and his/her program or his/her advisor. Students should attempt to resolve such problems by informing the appropriate faculty members and working together to resolve the problem. When attempts to resolve the problem informally are unsuccessful, the following problem-resolution procedure will be used:

1. The student will submit the problem in writing to the graduate program chair, who will then attempt to resolve it.
2. If the student remains unsatisfied, the problem will be presented to a committee of the program for resolution. This committee will be a standing committee and not the student's own thesis/dissertation committee. Both the student and the program chair will submit a written record of their views to this committee.
3. If the student remains unsatisfied, the problem will be referred to a standing subcommittee of the Graduate Council and composed of three faculty members (representing diverse disciplines within the university) and a graduate student, with the dean of graduate and postdoctoral studies as an ex-officio member. A written report of proceedings at stage 2 will be presented to the chair of Graduate Council for forwarding to the subcommittee, along with all other written materials generated during the investigation. The decision of this subcommittee is considered final.

The time frame for handling problem resolution is similar to that for handling petitions, appeals, and grievances. Students may seek guidance on any of these procedures through discussions with the Office of Graduate and Postdoctoral Studies.

After Rice's grievance process has been exhausted and documented, students may also pursue an external complaints process.

# Honor System

The honor system, one of the oldest and proudest traditions at Rice, is administered by the Honor Council, whose student members are elected each year by the student body. Adopted by a student vote in 1916, the honor system has remained essentially the same since that time but for changes in the procedures and membership of the Honor Council.

Students take all written examinations and complete any specifically designated assignments under the honor system. By committing themselves to the honor system, all students accept responsibility for assuring the integrity of the examinations and assignments conducted under it. The Honor Council is responsible for investigating reported violations and for conducting a hearing when the facts warrant. The Office of Student Judicial Programs, which reviews the results of the investigations and hearings, considers the council's recommendations when issuing penalties.

The Honor Council conducts an ongoing program to acquaint new students and faculty with the honor system. The Honor Code and other related information and resources are located at the homepage of the Honor Council: http://honor.rice.edu/.

Last Revised : July 20, 2011

## Student Responsibility

The university expects all Rice students to exercise personal responsibility over their actions. Their behavior should reflect a respect for the law and for their contractual obligations, a consideration for the rights of others, and shared standards of considerate and ethical behavior.

Students are responsible for knowing and following all information, policies, and procedures listed in this General Announcements. Questions should be directed to the appropriate office or administrator.

Rice utilizes e-mail as an official form of communication and sends correspondence to a student's Rice email address. Students should frequently check and maintain their Rice email inbox. Failure to do so does not relieve students of the responsibility to act or respond in a timely manner to official notices sent via email.

Rice encourages self-discipline, recognizing that effective student government, including judicial processes, and the integrity of the honor system depend on the willingness of all students to meet community standards of conduct.

The university, however, reserves the right to insist on the withdrawal of any student whose conduct it judges to be clearly detrimental to the best interests of either the student or the university. The appropriate authorities take such action only after careful consideration.

No individual or group may use the name of the university or one of its colleges without prior approval of the university or the college.

Last Revised : August 11, 2014

# Auditors

Any interested person may audit one or more courses at Rice by securing permission of the instructor and by registering as an auditor with the Office of the Registrar. Upon completion, the audited course will appear on the student's transcript with a grade of either "AUD" or "NC" (No Credit). There are no credit hours associated with audited courses, and auditing a course does not affect a student's GPA.

Rice alumni are charged an audit fee of $433 per course per semester. All others are charged $844 per course per semester for the privilege of auditing. A request to audit a class, to change from audit to credit or vice versa must be made by the end of the second week of the semester.

More information about auditing courses for current students is available in the undergraduate and graduate sections.

*Please note that financial assistance is not available for auditing students.*

Last Revised : August 11, 2014

# Second Four-Year Bachelor's Degree for Rice Alumni

Rice alumni with a Rice bachelor's degree have the option of earning a *second* four-year bachelor's degree at Rice in a different discipline. In addition to being in a different discipline, the second degree must also be a different bachelor's degree from the one already held; for example, the holder of a BA degree may pursue course work leading to the BS or BMus degree.

Rice alumni with a Rice bachelor's degree desiring to earn a different four-year bachelor's degree must:

- Be accepted for the major by the major department
- Fulfill all requirements for the second degree
- Complete at least 30 additional semester hours at Rice (must include two full-time fall and/or spring semesters) upon their return to Rice and beyond their first bachelor's degree (these hours are applied to the second degree)

The entire undergraduate record for these students continues cumulatively. Those seeking admission to this program should complete the Second Four-Year Bachelor's Degree Application available on the Office of the Registrar website. This application should include a written statement specifying the proposed major and course program for the second degree, a supporting letter from the chair of the major department, and an explanation of the student's reasons for returning to Rice for a second degree. This letter of application and paperwork should be submitted to the Office of the Registrar no later than August 1 for the fall semester and November 1 for the spring semester.

Eligible students considering this option should note that coursework completed at Rice as visiting students can only be applied to the second degree with the approval of the major department for that degree. Additionally, coursework completed at Rice as Visiting Post Baccalaureates can only be applied to the second degree with the approval of the major department for that degree and the dean of graduate and postdoctoral studies.

## Financial Aid

Students seeking information about financial aid available to participants in the second four-year bachelor's degree program should contact the Office of Financial Aid.

## Second Four-Year Bachelor's Degree for Current Rice Undergraduates

Currently enrolled undergraduates who have not yet completed their first bachelor's degree and desire to concurrently earn a second four-year backelor's degree, also known as a *dual degree,* should reference the Dual-Degree Requirements on the undergraduate Graduation Requirements page.

Last Revised : August 12, 2013

# Summer School for College Students

Rice Summer School for College Students offers courses for credit to Rice students, visiting undergraduates, graduate students, and Visiting Post Baccalaureates. For a schedule of summer sessions, please refer to the Academic Calendar. Students can choose to take courses in combined summer sessions. Undergraduates taking 12 semester hours are considered full time. Graduate students taking nine semester hours are also considered full time.

Admission is automatic for any Rice undergraduate or graduate student in good standing. Students should follow the same registration procedures required for the regular academic year, observing the deadlines listed on the summer school website at http://registrar.rice.edu/students/summerschool/

Visiting students and Visiting Post Baccalaureates in good standing must apply for admission to the summer school program. The application form can be found at http://registrar.rice.edu/students/summerschool/. The completed application form must be sent to the Rice University Office of the Registrar (attn: Summer School) along with the application fee and tuition deposit. Applicants will be required to send one official transcript with fall grades upon application and one official transcript with spring grades to complete their admission file. Transcripts and a completed Dean of Students Recommendation form must be mailed directly from their universities and colleges to the Rice University Office of the Registrar (attn: Summer School). Applicants will be notified as soon as possible of acceptance or nonacceptance. The remaining tuition is due in full at registration before the beginning of classes. Acceptance in Rice Summer School for College Students carries no implications for regular admission to Rice.

Auditors of summer school courses, who are considered visiting students, must pay full tuition and fees and submit an application as well as a completed Dean of Students Recommendation form mailed directly from their universities and colleges to the Rice University Office of the Registrar (attn: Summer School). Applicants will be notified as soon as possible of acceptance or nonacceptance.

It is essential that students follow the deadlines listed on the summer school website at http://registrar.rice.edu/students/summerschool/. Students may apply after the deadline (but before the start of classes) by paying a late fee. Courses that do not generate enrollments sufficient to cover their costs may be canceled.

For more information, including tuition and registration information, students should contact the Office of the Registrar at 713-348-4999, via email at summercredit@rice.edu, or online at http://registrar.rice.edu/students/summerschool/.

Last Revised : September 09, 2014

# Visiting Post Baccalaureates

Students with this standing at Rice have an undergraduate or graduate degree from an accredited college or university and are taking courses at Rice for credit but not in a specific degree program. Students interested in taking courses not for credit should audit the courses. (See Auditors.)

Applicants must have a 3.00 (B) or better grade average in the previous undergraduate or graduate program. Registration requires the permission of the course instructor or department chair and approval by the dean of graduate and postdoctoral studies. Visiting Post Baccalaureates must register for at least three hours and cannot take courses on a pass/fail basis. Visiting Post Baccalaureates must receive at least a B for all classes taken or they will not be allowed to remain in the program.

Students may not use courses taken under this arrangement to fulfill the requirements for a Rice degree unless and until they have been accepted into a degree program by an academic department. Former Visiting Post Baccalaureate students may request that their department allow up to three courses taken as Visiting Post Baccalaureates to count toward their graduate degree. Once approved by the department, the student must also obtain the approval of the dean of graduate and postdoctoral studies.

## Applications for Visiting Post Baccalaureate Program

Applications are available from the Office of the Registrar upon request. Official transcripts from all colleges and universities the student has attended should be mailed directly by the institutions to the Office of Graduate and Postdoctoral Studies. Students who were previously Visiting Post Baccalaureates must complete a new application (without transcripts) for each such semester. All application materials are due by the workday nearest to July 15 for fall semester courses and November 15 for spring semester courses. No late applications are accepted.

Individuals applying as Visiting Post Baccalaureates for the summer term should apply to the Summer School for College Students.

## Tuition and Fees for Visiting Post Baccalaureate Program

The tuition for 2014–15 is $2,216 per semester hour, not to exceed $19,940. There is also a nonrefundable application fee of $100, due at time of application. Visiting Post Baccalaureate students also pay a $90 registration fee. Students registering for fewer than nine hours will also pay the part-time registration fee. All tuition and registration fees are per semester and are due at the time of registration. Students registering after the second week of class must pay a $140 late registration fee and may also be required to pay a late payment fee. If a class fills with degree students, instructors may drop Visiting Post Baccalaureates up to the end of the second week of class. In that case, the tuition (less the nonrefundable application fee) will be refunded. If a Visiting Post Baccalaureate withdraws, drops, or adds classes, the same rules regarding grades, refunds, and applicable fees apply as for degree seeking graduate students. There is no refund for dropping a class after the second week, as long as the student stays enrolled in at least one other class. Pro-rated refunds for withdrawals are according to the deadlines listed on the academic calendar. Please visit the Summer School for College Students section for information pertaining to summer school.

*Please note that financial assistance is not available for Visiting Post Baccalaureate students.*

Last Revised : August 11, 2014

# Visiting Undergraduate Students

Students who wish to spend a semester or a year at Rice taking courses for credit to be applied toward their undergraduate degree at another school may apply for admission as visiting students through the Office of Admission. The student's application should be accompanied by the $75 application fee, an official high school transcript, an official transcript of college work to date, an SAT or ACT Plus Writing score, and recommendations from the dean of students and a faculty member who has taught the student within the past academic year. Visiting student applications are available on the Admission website and should be submitted by March 15 for the fall semester.

Visiting students are assigned membership to one of the residential colleges during their stay and are charged the same fees as other undergraduates. In classes where enrollment is limited because of space or other considerations, candidates for Rice degrees have priority over visiting students for registration.

**Visiting students may apply to transfer to Rice only after having left Rice for at least one semester.**

*Please note that financial assistance is not available for visiting students.*

Last Revised : August 11, 2014

# Faculty Grading Guidelines

*Jump to:*
*Academic Progress Reviews for Graduate Students*

The Committee on Examinations and Standing has drawn up the following guidelines on grading. Additional information is available in both the undergraduate and graduate student sections under the heading of "Grades."

- The evaluation of the student's performance in a course and a decision on the appropriate grade is the responsibility of the designated instructor or instructors in the course.
- No student should be given an extension of time or opportunities to improve a grade that are not available to all members of the class, except for verified illness or justified absence from campus. No course assignments may be due between the last day of classes and the first day of the final examination period.
- Students in independent study courses are not to be allowed an extension beyond the time when grades are due. Faculty are to submit grades at the end of the semester for such students based on work completed during the semester. The instructor directing the independent study assumes responsibility with the student for ensuring that the work undertaken is appropriate to the span of a semester and for determining the degree credit to be received.
- The basis for grading and the expectations on all written assignments or tests should be clearly explained to the class in advance, preferably in writing at the beginning of the semester. The instructor should explain clearly which assignments or homework are covered by the honor system and which are not. To prevent allegations of plagiarism on written assignments, students should be warned that all direct and indirect quotations from other sources should be properly acknowledged. The instructor should explain the extent to which the student's paper is expected to be independent of the references and clearly distinguishable from them.
- Instructors should be willing to give any student an explanation of his or her grade as consistent with the grading for the rest of the class. For this reason, the committee urges the faculty to preserve all examinations and written material not returned to students, as well as grade records, for at least the following semester so that students may, if they wish, review with their instructor the basis for the grade received.
- Instructors may not change a semester grade after the grade has been submitted to the Office of the Registrar, except when there is a clerical error in calculating the grade. This is a long-standing university rule of which the faculty are reminded by the Office of the Registrar at the end of each semester. It is designed, in part, to protect the faculty from student pressure for grade changes. All other grade changes, including retroactive change to withdrawal, incomplete, or other, must be approved by the Committee on Examinations and Standing on the basis of a written petition from the student and on information from the instructor.
- There is no university requirement that a final examination be given in a course. It is university policy that final examinations that cover more than the material since the last examination, that are the only exam in the course, or that are comprehensive of the entire course may be given only during the final examination period. Such examinations may not, for example, be labeled "tests" and administered during the last week of classes. Final examinations normally are of three-hour duration. Faculty who, under exceptional circumstances, wish to give longer examinations may do so only if the exam is scheduled as take-home. Under no circumstances may final exams exceed five hours.
- First-year undergraduate students receive mid-semester grades around the eighth week of the fall and spring semesters so that they can, if advisable, seek academic assistance or drop a class for which they may not be prepared. Faculty who teach first-year students in any of their classes will be asked to submit grades of standing for these students during the seventh week of the semester and should schedule the grading of tests, quizzes, or homework assignments accordingly. These grades are not recorded on the student's transcript nor calculated in the grade point average, but they are important indicators for students and their faculty advisors.
- Departments using teaching associates, adjunct professors, or visiting faculty of any kind should make sure these teachers are familiar with Rice grading procedures. A regular faculty member who is well-versed in the grading guidelines should be assigned to assist such instructors.

The chair of the Committee on Examinations and Standing, the Office of the Dean of Undergraduates, or the Dean of Graduate and Postdoctoral Studies will be glad to advise any faculty member faced with exceptional circumstances that may justify special consideration. Students may petition the committee or, for graduate students, their department chair concerning the application of these guidelines. Suspected or possible violations of the honor system should be submitted to the Honor Council.

## Academic Progress Reviews for Graduate Students

Graduate programs must establish mechanisms for tracking, reviewing, and documenting academic progress of graduate students on an ongoing basis and must provide graduate students a written assessment of their academic progress at least annually. In some graduate programs this ongoing progress review is carried out by a student's thesis committee, while in others it is carried out by a standing faculty committee. Although a student's supervisor plays an important role in reviewing the student's academic progress, the responsibility for conducting the review process lies with the program and requires the involvement of additional faculty members in the program. For graduate students who are primarily engaged in coursework, for example, professional master's students, the transcript is an adequate form of written assessment.

*Back to top*

Last Revised : August 11, 2014

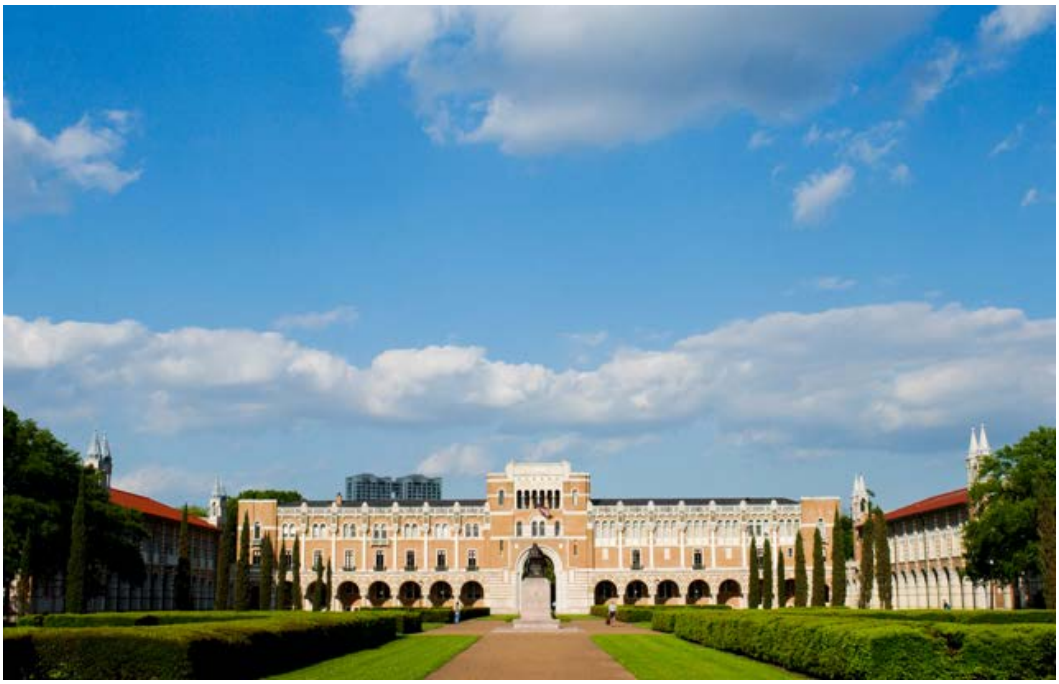
# Syllabus Standards

Faculty members and course instructors are required to provide a course syllabus to students on or before the first day of class. The syllabus should be uploaded into ESTHER, and may additionally be distributed in hard copy and/or on OWL-Space. For archiving purposes, updated versions of the course syllabus can be uploaded into ESTHER through the end of the semester. Each syllabus must include the following instructions:

1. Instructor's name, office number, and email address
2. Office hours or a statement of either an "open-door" policy or hours by appointment
3. Overall course objectives and expected learning outcomes
4. Grade policies
5. Absence policies
6. List of required texts
7. Special materials required for the class, if any
8. Number of required examinations and papers
9. Statement of expectations regarding course work and the Rice Honor Code
10. A statement encouraging any student with a disability that requires accommodation to contact both the course instructor and Disability Support Services
11. It is permissible to include a statement indicating that the information contained in the course syllabus, other than the absence policies, may be subject to change with reasonable advance notice, as deemed appropriate by the instructor.

Last Revised : August 11, 2014



## Programs of Study

The contents of Rice's curricular programs are the collective responsibility of the faculty acting through their representatives in the Faculty Senate. There are specific guidelines for the creation, elimination, and modification of undergraduate and graduate programs and certificates.

## Degrees Offered: BA, BArch, MArch, MA, MArch in Urban Design*, DArch*

The Rice School of Architecture (RSA) focuses on *speculative practice* -- that is, the teaching and research of architecture and urban design as speculations that will advance professional practice as well as the built environment. Intimate student-faculty interaction, academic freedom, and unrestricted institutional cooperation within and outside the university are distinctive qualities of the architecture degree programs at Rice.

Rice's undergraduate architecture programs maintain a balance between a design-focused study of architecture and a broad general education. In addition to formal coursework, students benefit from lectures and presentations from distinguished practitioners and scholars, symposia and other cultural events, and the unique Rice Preceptorship program, which places students in an outstanding professional office for a nine-month internship.

The School of Architecture's graduate programs offer a design education in combination with a thorough grounding in architectural history, theory, and technology. Rice's graduate program culminates in an independent design thesis, on the principle that an architectural education provides a complete exposure to architecture's breadth, from which the student establishes his or her depth, or expertise, through the independent thesis.

**The MArch in Urban Design and DArch programs are currently inactive and are not accepting applications.*

Last Revised : August 11, 2014

 

# Architecture

## The School of Architecture

For general university requirements, see Graduation Requirements. The conditions specified here for each major also satisfy the university distribution requirements. Further information on policies and procedures are detailed in the RSA student handbook, which is distributed as a pdf to every incoming student.

## Degree Requirements for BA in Architecture

The BA in Architecture leading to a BArch degree is the primary undergraduate architecture program at Rice. Students who apply and are accepted into the University and the School of Architecture enter directly into this program. The required courses for the Major of a BA in Architecture leading to a BArch consist of four integrated sequences in the following areas: Design Studios, History and Theory, Technology, and Practice. Courses in these sequences must be taken in the order and semesters specified by the School of Architecture.

The curriculum for this professional degree program sequence has three two-year long stages. The first stage provides a foundation sequence in design, history and theory, and technology taken in the first and second years. Students are also expected to fulfill the majority of University general distribution requirements. The curriculum is designed to provide an intensive focus on architecture, while allowing each student to receive a broad education and to pursue other interests.

At the end of the first stage, students apply for the approval of their Major in Architecture by the School of Architecture. Approval is based on academic performance and demonstrated aptitude.

The second intermediate stage occurs in the third and fourth years. Students complete the courses required for the major of a BA in Architecture, remaining university requirements, and take electives through which each student can develop his or her particular interests in the field and in other areas. In their fourth year, students pursue a design research sequence through a seminar in the fall that is linked to the spring studio. At the end of this stage, and with the completion of all Major and University requirements, students receive the degree of a Bachelor of Arts in Architecture.

The third and final stage consists of the Bachelor of Architecture (BArch) degree (see below) and includes the year of Preceptorship. The BArch is only open to students who have completed the first four years at the Rice School of Architecture and who apply for admission into this stage of the program during their fourth year. As with the approval for Major two years before, approval is based on academic performance and demonstrated aptitude.

In addition to these formal course requirements, students are expected to contribute to the intellectual culture of the RSA by attending public lectures and symposia and participating in the final reviews at the end of each semester where students across the school present their work.

**Required Courses for BA in Architecture:**

**1st Semester**
ARCH 101 Principles of Architecture I
ARCH 225 History and Theory I–Introduction

**2nd Semester**
ARCH 102 Principles of Architecture I

**3rd Semester**

ARCH 201 Principles of Architecture II
ARCH 207 Technology I–The Frame

**4th Semester**
ARCH 202 Principles of Architecture II
ARCH 345 History and Theory II–pre 1890
ARCH 309 Technology II–The Shell

**5th Semester**
ARCH 301 Principles of Architecture III
ARCH 346 History and Theory III–1890-1968
ARCH 314 Technology III–The Envelope

**6th Semester**
ARCH 302 Principles of Architecture III
ARCH 352 History and Theory IV–1968-Present
ARCH 316 Technology IV–The Environment

**7th Semester**
ARCH 401 Principles of Architecture IV
ARCH 403 Senior Research Seminar

**8th Semester**
ARCH 402 Principles of Architecture IV

**Notes for the BA in Architecture:**

1. All Courses above must be taken in the sequence and semester prescribed above.
2. Students must also fulfill all University Graduation Requirements.
3. Students who matriculated in 2010 or earlier must take one elective that satisfies content in the area of sustainability. A list of such classes is available from the School.
4. In accordance with the National Architectural Accrediting Board requirements and Rice graduation requirements, BA in Architecture majors should successfully complete at least 45 credit hours of course work outside the Major and the School of Architecture (that is, courses that are not listed as an ARCH courses and with non-architectural content). This course work can include courses specified by Rice University as fulfilling Distribution and other general graduation requirements (such as the First-Year Writing Intensive Seminars and Lifetime Physical Activity course requirements), except if such courses are also required for the BA in Architecture major or are listed as Architecture (ARCH) courses.

Total Credit Hours Required for a BA in Architecture: 130

## Degree Requirements for Bachelor of Architecture (BArch)

The Bachelor of Architecture program is open to students who have completed the undergraduate preprofessional architecture program (BA in Architecture) at Rice. The BArch degree requires the successful completion of the BA in Architecture, completion of the two-semester preceptorship, and completion of two graduate option studios and approved lecture or seminar courses. Upon admission, students are assigned a preceptorship, which takes place immediately after receipt of the Bachelor of Arts in Architecture degree. The preceptorship program balances academic learning with professional experience. Students are assigned to work for a minimum of nine months in the United States or abroad with leading architectural offices designated by the school as Preceptors.

The academic year immediately following preceptorship, students must return for their final year of study to the School of Architecture, taking graduate level studios and courses. In this year, students may apply to Rice School of Architecture in Paris to complete a semester abroad. The autumn studios feature the Totalization studio, in which the student's experience from preceptorship is integrated into academic research through a comprehensive design project.

**Required Courses for Bachelor of Architecture (BArch):**

**1st Semester**
ARCH 500 Preceptorship

**2nd Semester**
ARCH 500 Preceptorship

**3rd Semester**
ARCH 601 Architectural Problems

**4th Semester**
ARCH 602 Architectural Problems

ARCH 423/623 Professionalism and Management (See Note 2, below)

Electives: During the final year of study (semesters 3 and 4) students must complete at least 9 credit hours in elective courses at the 300 level or higher that have been approved by the School of Architecture.

**Notes for the BArch:**

1. All Courses above must be taken in the sequence and semester prescribed by the School of Architecture and completed with a grade of C or higher.
2. ARCH 423/623 can be taken anytime after the sixth semester of the BA in Architecture. If taken prior to the last year of the BArch, the student shall take an additional upper level elective in his/her final year of the BArch.
3. Students who began the BArch program in 2012 or earlier must take one elective that satisfies content in the area of sustainability either in their final year of study or in the BA in Architecture program. A list of such classes is available from the School.
4. By accepting a place in the BArch and Preceptorship, each student agrees to all the terms specified by Rice and/or the assigned preceptorship office, including: registration fees, start and end dates, work responsibilities, performance expectations, etc. Failure to meet these expectations will result in an unsatisfactory grade evaluation and may prevent further progress in the program. Students' concerns while on preceptorship should be brought to the attention of the Director of External programs as soon as possible.
5. While on preceptorship, a student remains a Rice student and is governed by applicable student codes of conduct, rights and responsibilities.
6. Students are expected to return for their final year of study in the fall semester immediately following the completion of the preceptorship. Leaves of absence at any time during the BArch must be requested in writing to both the Director of External Programs and the Director of Undergraduate Studies at the School of Architecture, as well as requested to Rice University. Students who take a leave without permission will be considered to have withdrawn from the BArch program. Due to curricular intent and administrative necessity, the School of Architecture will approve a leave from the program only in truly extraordinary circumstances, such as serious health issues.

Total Credit Hours Required for a BArch: 62

## Degree Requirements for BA in Architectural Studies

The BA in Architectural Studies degree provides a foundation in architectural ideas and design while allowing a broader pursuit of other fields as an undergraduate. Enrollment is restricted to students admitted into the architecture program who have completed the first two years of required courses. The curriculum provides a foundation for graduate level study of architecture and/or pursuit of other fields.

**Required Courses for BA in Architectural Studies:**

**Design Studios (24 Credit Hours)**
ARCH 101 Principles of Architecture I--Order
ARCH 102 Principles of Architecture II--Representation
ARCH 201 Principles of Architecture III--Organization
ARCH 202 Principles of Architecture IV--Effect

**History and Theory (6 Credit Hours)**
ARCH 225 History and Theory I--Introduction
ARCH 345 History and Theory II--pre-1890

**Technology (6 Credit Hours)**
ARCH 207 Technology I--The Frame
ARCH 309 Technology II--The Shell

**Electives**
A total of 12 credit hours of additional ARCH courses.
Total Credit Hours Required for a BA in Architectural Studies: 120

Last Revised : August 11, 2014

## The School of Architecture

Department Info | Undergraduate Requirements | Graduate Requirements | Course Listings

## Degree Requirements for Master of Architecture (MArch)

The Master of Architecture program understands architecture to be a generalist practice, while encouraging each student's freedom to pick and choose from changing realities in order to forge a specific trajectory within this generalist milieu. We prepare students to engage an ever more ambiguous world—one that can no longer simply be flattened by such binaries as local and global, quantity and quality, mind and nature, form and function, or standards and exceptions. The challenge we pose to our students is to transgress the obsolescence of opposing values and to navigate the tricky waters of a world no longer organized around presupposed notions of solidity, permanence, rootedness, centrality, protection, and identity. Our program is the very place where visions of the future are tested and where students are asked to understand the world's complexity in order to focus on the tangible, the legible, and the relevant.

Individuals who possess a Bachelor's degree in any discipline can apply to the Master of Architecture program. Our curriculum offers a set of core courses (in Design, History and Theory, Technology, and Practice) and many free electives, both in the School of Architecture and across campus. In studio courses, strong emphasis is given to the very means by which architecture is able to change the world through program, form, and technology. Such fundamental aspects to design can, when mobilized, produce a practice of architecture that is as speculative as it is realist. Every fall, optional "Totalization" studios are conducted in such a way as to have students rigorously weigh all aspects of building design while nonetheless biasing their engagement so as to produce highly specific architectural projects. In their final thesis semester, students are asked to face the world and engage it through architectural speculation and a precise understanding of historical, political, economic, and physical dimensions, which can together define a better future.

The Master of Architecture program is accredited by the National Architectural Accrediting Board (NAAB) and qualifies graduates to take the state professional licensing exams after completing the required internship in an architectural office.

**Programs of Study**—There are three program options at the Master of Architecture level: Options 1, 2, and 3. They differ according to the Bachelor's degree received prior to entering the graduate program.

### Option 1

Offered to individuals who hold a four-year undergraduate degree with a major in a field other than Architecture or a major in Architecture with fewer than five semesters of architectural design studio. Preference for admission is given to those who have completed a balanced education in the arts, sciences, and humanities. A minimum of two semesters of college-level courses in the history of art and/or architecture and one semester of college-level courses in mathematics or physics is recommended. Previous preparation in the visual arts is also desirable, as are courses in philosophy, literature, and economics. In order to graduate, students in this program must complete, in addition to 6 semesters of design studios, a curriculum of 46 credit hours with an additional free electives course load of 27 credit hours.

**1st Semester**
ARCH 501 Core Studio I
ARCH 525 History and Theory I–Introduction
ARCH 507 Technology I–The Frame
Elective

**2nd Semester**
ARCH 502 Core Studio II
ARCH 645 History and Theory II–pre 1890

**6th Semester**
ARCH 602 Option Studio
ARCH 702 Pre-Thesis Preparation
Elective
Elective

**7th Semester**
ARCH 703/706 Design Thesis/Written Thesis
Elective
Elective

## Option 2

Offered to individuals who hold a four-year undergraduate degree with a major in Architecture. Advanced placement into Option 2 is at the discretion of the admissions committee, but generally preference for admission is given to those who have successfully completed five semesters or more of undergraduate design studio as well as undergraduate courses that are analogous to those given in the first year of Option 1. A minimum of two semesters of college-level courses in the history of art and/or architecture and one semester of college-level courses in mathematics or physics is expected. In order to graduate, students in this program must complete, in addition to 4 semesters of design studios, a curriculum of 39 credit hours with an additional free electives course load of 15 hours.

**1st Semester**
ARCH 503 Core Studio III
ARCH 514 Technology III–The Envelope
ARCH 646 History and Theory III–1890-1968
Elective

**2nd Semester**

Elective

### MArch Thesis Requirement

Thesis is payback time—it is when students build upward and outward from what they've learned over the years, giving back to the school by providing new disciplinary fodder. More immediate than a crystal ball, some of the common threads underlying a Rice thesis might well reveal tomorrow's future. Despite working in the context of Texas's vast horizon, Rice thesis students do not envision an endless frontier. Rather than turning away from the discipline, our students have found new territories embedded within architectural and urban paradigms, breathing into them new life and vitality. All Master of Architecture candidates are required to do an independent thesis, articulating an ambition and envisioning its architectural specificity. Students develop their individual thesis proposals during their penultimate semester in a required, pre-thesis seminar. Thesis design evolves from the honing of that proposal and continues through the final semester, under the guidance of an individual advisor. In early January, thesis projects are reviewed publicly by a panel of eminent jurors in the RSA's Farish Gallery. In short, the school starts each new year with a batch of new visions.

### RSA Paris

MArch (Option 1 and Option 2) students may apply to RSAP to complete one semester in Paris: Option 1 students may do so in their fifth or sixth semester, Option 2 in their third or fourth semester. BArch students may apply to RSAP in their final year of study.

## Degree Requirements for MA in Architecture

Present Future is a concentrated undertaking culminating in a Master of Arts in Architecture degree. The program is structured around a two-semester-long exploration of a topic led by a Rice School of Architecture faculty member. A select group of students forms the core: a collective intelligence responsible for developing a discourse that synthesizes theoretical, historical, and design ambitions. Subjects will be of contemporary importance and will be framed by a 3-credit pro-seminar the first term and a 12-credit collective thesis in the second term. In addition to free electives, each semester will include additional required credits that are appropriate to the selected topic, bringing the total credit hours to 24. The program's student body will include those with backgrounds in architecture as well as other fields: individuals with B.A., B.S. equivalent, or more advanced degrees in architecture or other disciplines are invited to apply. Coursework will include offerings from the School of Architecture and other departments across Rice University.

## Degrees Offered: MBA, MAcc, MA, PhD

The Jesse H. Jones Graduate School of Business (JGSB) was established in 1974 through a gift from Houston Endowment, Inc. The JGSB offers a minor in business (BUSI) for undergraduate students, a master's of business administration (MBA) program for graduate students seeking to further their professional careers in business, and a PhD program for graduate students seeking academic careers at research universities. Beginning Fall 2016, JGSB will be offering a one-year master of accounting (MAcc) program for students completing a non-business undergraduate degree.

# Business

## The Jesse H. Jones Graduate School of Business

### Business Minor

The business minor consists of six integrated courses designed to provide a strong foundation in the essential disciplines of business and to develop students' critical thinking and communication skills. All courses in the minor are taught by JGSB faculty. Rick Schell (schell@rice.edu) is the program director and advisor.

### Course Requirements for Completing the Business Minor

Students must complete the following six courses:
BUSI 296 *Business Communications*
BUSI 305 *Financial Accounting*
BUSI 310 *Leading People in Organizations*
BUSI 343 *Financial Management*
BUSI 380 *Marketing*
BUSI 471 *Strategic Management*
Students may receive transfer credit for at most two of the six courses necessary to complete the minor. Students must earn a grade point average of at least 2.0 in the BUSI courses taken at Rice.

### Admission

BUSI courses are open to any undergraduate student who meets enrollment requirements, not just to students who have declared an intention to complete the minor, and to graduate students on a space-available basis. MBA-level courses (MGMT, MGMP, and MGMW) are not open to undergraduate students.

### Prerequisites

Enrollment in most BUSI courses requires completion of instruction in microeconomics and statistics. The statistics requirement can be fulfilled by receiving AP credit for STAT 280, completing STAT 280, or completing an approved alternative as listed on the Jones School web site (http://business.rice.edu/Business_Minor.aspx). The economics requirement can be fulfilled by completing ECON 301 (formerly 370) or ECON 201 (formerly 211) ***at Rice***. The Program Director will not approve requests to waive the prerequisites for BUSI 343 or BUSI 471.

**See the course descriptions for details on prerequisites.**

### Enrollment Lottery

Each section of BUSI 296 is capped at 50 students and each section of the other BUSI courses is capped at 65 students. All students who have fulfilled the relevant prerequisites may register for courses during the registration period.

If a given course is oversubscribed, the JGSB will conduct a weighted lottery to determine which students will be admitted to the course. The lottery will give greater preference to students who have successfully completed a greater number of BUSI courses and are closer to graduation.

### Declaration of the Business Minor

To declare the BUSI minor, students must bring a completed declaration form and unofficial transcript to the program

director for review and signature. The form is available on ESTHER (esther.rice.edu).

Last Revised : August 12, 2013

 

# Business

## The Jesse H. Jones Graduate School of Business

## Degree Requirements for MBA, MAcc, MA, and PhD in Business

### MBA Programs

The MBA degree can be obtained via the Full-Time MBA Program, the MBA for Professionals Program, or the MBA for Executives Program. The Executive and Professional MBA Programs are designed for executives and working professionals who do not wish to interrupt their careers while they pursue MBA degrees. The MBA for Professionals Program meets on an evening format or an alternating weekend format. The Executive MBA Program meets on alternating Friday and Saturdays and in a series of 5-day intensive executive forums.

A joint MBA/Master of Engineering Program is offered by the JGSB and the George R. Brown School of Engineering, in any of the departments of engineering. This program prepares students to become managers in organizations requiring a high level of technical expertise and management skills.

A joint MBA/Master of Science is offered by the JGSB and the Weiss School of Natural Sciences Professional Science Master's (PSM) Program. This program prepares students to become managers in organizations requiring specialized technical knowledge and general management skills.

A joint MBA/MD Program is offered by the JGSB and Baylor College of Medicine. This program prepares students to become both physicians and managers in institutions involved in the delivery of high-quality health care, as well as biotechnology-focused industries, health insurance/managed healthcare firms, and pharmaceutical and medical supply and equipment companies.

### MBA Admission Requirements

Applicants to the MBA Program must submit scores on the Graduate Management Admission Test (GMAT). The Graduate Record Examination (GRE) is not accepted. International applicants, who did not earn an undergraduate degree from an institution where the primary language of instruction was English must submit a valid score report from either TOEFL, PTE, or IELTS. Admission to the MBA Program is open to students regardless of their undergraduate major, but it is highly selective and limited to those who have performed with distinction in their previous academic work and on the GMAT.

**The MBA and MBA for Professionals Programs**—The MBA and MBA for Professionals Programs do not have specific prerequisite courses required for admission.

**MBA for Executives**—In addition to meeting the standards for admission to the other MBA programs, students admitted to the executive program typically have at least 10 years of relevant work experience.

**MBA/Master of Engineering Program**—To enter this dual degree program, applicants must be accepted by both the JGSB and the engineering department in which they wish to pursue graduate study. The program requires the JGSB application, two letters of recommendation and the GMAT. Some engineering departments require advanced tests as well.

**MBA/Master of Science (Natural Sciences—Professional Science Master's Program)**—To enter this dual degree program, applicants must be accepted by both the JGSB and one of the following Weiss School of Natural Sciences Professional Science Master's (PSM) programs: Subsurface Geoscience, Nanoscale Physics, or Environmental Analysis and Decision Making. The program requires the JGSB application, two letters of

recommendation and the GMAT.

**MBA/MD Program**—To enter this joint degree program, applicants must first be accepted by Baylor College of Medicine and apply separately to the JGSB. The MCAT is accepted rather than the GMAT, but the GMAT is required for scholarship consideration. Two years of medical school are required before starting MBA classes.

## Degree Requirements for the Full-Time MBA Program

The Full-Time MBA Program requires the completion of 60 credits of coursework over a two-year period. Students must register for 15 credits of course work in all four semesters of residence and are not allowed to take more than 18 credits in any semester. The first year of the program is primarily dedicated to core courses in the basic functional areas of business. Students have the option of taking two elective courses during the spring semester of the first year. During the second semester of the first year, students participate in a team-based Action Learning Project (ALP) in which they work at a company to solve a specific business problem. This project is the first-year capstone learning activity; it allows students to apply and integrate management principles learned throughout the first year of the program in a practical setting. The second year of the program is dedicated to elective course work.

All registration and elective selection via add/drop is completed online through ESTHER (esther.rice.edu), and it is the responsibility of the student to monitor and maintain his or her schedule and academic record.

**Waivers and Transfers of Credit**—At its sole discretion, the school may allow students to transfer up to a maximum of six credits. This does not necessarily reduce the residence requirement, but it does make additional elective courses available. Students otherwise must follow the prescribed curriculum of study and are not allowed to waive any core requirements.

**Areas of Interest**— Students have the option of selecting up to two functional or professional concentration options. Concentrations include: accounting, entrepreneurship, energy, finance, global business, healthcare, marketing, management consulting, mastering creativity and innovation, and real estate. Concentrations typically consist of nine to 12 credit hours of course work. If a student completes two concentrations, a maximum of three credits can be shared between the two concentrations. Similarly, a custom core course can be counted toward the completion of a concentration only if the student has taken two other custom core courses which can be counted toward the custom core requirement. Specific concentration requirements for the academic year are located in the resource section on the OWL-Space site.

## Degree Requirements for the MBA for Professionals Program

The MBA for Professionals Program is offered in two formats: an evening format and a weekend format. Both formats require the completion of 54 credits of course work over a two-year period. The program is a lock-step progression in which students take required courses in sequence; students must take at least 13.5 credits of elective courses in the second year in order to fulfill their graduation requirements. The Office of Student Services and individual faculty members offer students advice on course selection.

All registration and elective selection via drop/add is completed online through ESTHER (esther.rice.edu), and it is the responsibility of the student to monitor and maintain his or her schedule and academic record.

## Degree Requirements for the MBA for Executives Program

The MBA for Executives Program requires the completion of 54 credits of course work over a two-year period. The program is a lock-step progression in which students take required first-year courses in sequence; students must take at least nine credits of elective courses in the second year in order to fulfill their graduation requirements. The program includes four 5-day intensive executive forums that focus on leadership, strategy, critical decision-making and global management.

## Degree Requirements for the MBA/Master of Engineering Program

Students may earn this non-thesis engineering degree in the fields of chemical engineering, civil engineering, computational and applied mathematics, computer science, electrical and computer engineering, environmental science and engineering, mechanical engineering and materials science, and statistics. Ordinarily, the engineering degree takes one academic year to complete, whereas the MBA requires two. Joint-degree candidates, however, can fulfill requirements for both degrees in two academic years.

For the joint MBA/master of engineering degree, students must complete:

- At least two academic years in residence at Rice
- 69 semester hours in approved course work:

24 hours in an engineering discipline
45 hours in business

Students plan their course schedules in consultation with the engineering department in which they are enrolled and with the Office of Student Services.

### Degree Requirements for the MBA/Master of Science PSM Program

Students may earn a Master of Science degree from the Weiss School of Natural Science Professional Science Master's program in the following fields: (1) Environmental Analysis and Decision Making, (2) Subsurface Geoscience, and (3) Nanoscale Physics. Ordinarily, the PSM degree takes two academic years to complete, whereas the MBA requires two. Joint-degree candidates, however, can fulfill requirements for both degrees within three academic years.

For the joint MBA/Master of Science degree from the Professional Master's program, students must fulfill the following requirements:

- 75 credit hours of course work including at least 30 credits in an science discipline and 45 credits of business course work
- Satisfy all MBA core curriculum requirements
- Satisfy all Professional Masters MS track-specific requirements
- Summer internships are required
- All requirements can be fulfilled within three years

Course schedules will be planned in consultation with the PSM program director and with the JGSB assistant dean of degree programs.

### Degree Requirements for the MBA/MD Program

Students can earn both MBA and MD degrees in five years. They divide their time as follows:

- ***Years 1 and 2***—medical training at Baylor College of Medicine
- ***Year 3***—First-year MBA core courses at Rice, plus a three-credit healthcare management course in the spring semester. MBA/MD students are required to fulfill only one custom core class requirement.
- ***Year 4***—Second-year MBA elective courses, including a three-credit healthcare management course at Rice in the fall semester, and medical training at Baylor College of Medicine in the spring semester.

Students use the summer between the third and fourth years to perform healthcare research programs or externships. Students receive their MBA degree from Rice after they have completed 45 hours of approved business course work and after they have completed the requirements specified by Baylor College of Medicine.

## Academic and Professional Standards

Students must meet both academic and professional standards to continue academic work and to graduate. In accepting admission to the MBA Program, all students agree to be governed by the standards and procedures for dismissal or disciplinary action stated below.

**Academic Standards**—A minimum cumulative grade point average of 3.00 (B) is required for graduation. All courses taken for the MBA degree (including approved courses taken at the university but outside the JGSB) are counted in the cumulative grade point average calculation.
Students with a cumulative grade point average lower than 3.00 at the end of any semester will be notified of dismissal and may no longer register for courses. A student who has been notified of dismissal may appeal to the Academic Standards Committee of the JGSB. The committee will decide, based on the circumstances of the appeal, whether the student (1) may resume studies on probation, (2) is to be suspended for one semester or an academic year, or (3) is to be dismissed from the MBA Program.

Students proposing to return after a period of academic suspension must apply to the Academic Standards Committee and receive permission to be readmitted. If permitted to return, the student will pay the current rate of tuition, based upon the class of students s/he is joining.

Only grades of C and higher are counted for credit toward graduation. If students receive a grade lower than C in a course required for graduation, they must repeat the course. If students receive a grade lower than C in an elective course, they need not repeat the specific course, but they must make up the credits. If the required course is not offered again prior to graduation, the student will be permitted to take the course the following academic year, but

will be charged the current pro-rated rate for the program in which the additional course work is completed.

Students may retake a failed course only once and then only if their cumulative grade point average is 3.00 or higher or if they have received the permission of the Academic Standards Committee to do so. Students who fail a course twice will be notified of dismissal. (Students may not take any course for which the failed course is a prerequisite until they pass the prerequisite course.)

Students on academic probation cannot be candidates for student offices, cannot graduate or drop courses, and must complete all future courses with a grade of C or above. Students are removed from probation only upon achieving a cumulative grade point average of at least 3.00 at the end of the following semester of work.

Students who have completed the required number of hours for the MBA degree, the joint MBA/master of engineering degrees or the joint MBA/MD degree, but who have a cumulative grade point average lower than 3.00, are dismissed without graduation. If, in an appeal to the Academic Standards Committee, a student can substantiate a claim of extenuating circumstances, i.e., those beyond the student's control, the student will be permitted to take additional course work at the university within the next year to raise his or her grade point average to 3.00. Course work completed outside of a semester when full tuition is paid will instead be billed at the current pro-rated rate for the program in which the additional course work is completed.

JGSB students may not take courses pass/fail to count toward their degree requirements. JGSB students may audit courses with professor approval. The courses will not count toward the MBA, but will appear on the transcript.

**Professional Standards**—MBA students are held to the high standards of professional conduct expected of managers—standards substantially exceeding those expected of them simply as students. Students may be dismissed or suspended for failure to meet professional standards, as defined in the University Code of Conduct. The dean may place a student on disciplinary probation for unacceptable conduct, giving oral and written notice that future misconduct will lead to filing of specific charges. (This probationary notice, however, is not required as a precondition for filing specific charges.)

## Guidelines for Appealing Academic Dismissal

T**he Process**—A student who wishes to appeal a dismissal should address the following issues in a letter to the Academic Standards Committee. The student must send the letter to the chair of the Academic Standards Committee. The following questions should be answered in the appeal letter.

1. What circumstances led to your academic performance last semester and to what degree were those circumstances beyond your control?
2. If your performance in a particular course(s) last semester was below par, describe any circumstances specific to that course that explain your performance.
3. Do you expect the circumstances that created the problems for you last semester to change next semester? If so, how?

Students also may include any additional information that they deem relevant in the appeal letter.

**Timing**—The student must inform the assistant dean of degree programs (by email or written note) immediately of the intention to appeal. The appeal letter to the committee must then be filed within one week after receiving a dismissal letter. If a student plans to appeal, he/she should attend classes in the semester without registering. It is important to keep up in his/her studies during the appeal process. If his/her appeal is accepted, the student may register later with a letter from the Office of Student Services.

**Appeals**—Appeals beyond the Academic Standards Committee must go to the dean of the JGSB, who may seek guidance from other constituents of the school. All decisions rendered by the dean are final.

C**onfidentiality**—The Family Educational Rights and Privacy Act of 1974 and amendments govern the records of actions related to appeals.

## Grade Appeal Process

Once a course grade has been assigned by an instructor, it is generally considered final and is rarely changed for any reason other than calculation errors. The procedure below outlines the process by which a student may appeal a course grade.

1. The student should first pursue any grading question with the instructor following whatever formal or informal process the instructor has outlined for the course.

2. If the matter is not resolved in step 1 above, the student must file a written appeal to the instructor and send a copy to the assistant dean of degree programs. This written appeal must be filed no later than 45 days after the last day of finals for the term (mini-term) in which the course was offered.
3. The instructor must schedule a meeting with the student within two weeks of receiving the written appeal to further discuss the appeal with the student. Notice of the appeal time and date will be provided by the instructor to the assistant dean of degree programs.
4. If step 3 does not resolve the issue to the satisfaction of both parties, the student may appeal to the Academic Standards Committee by sending a written notice describing the grounds for the appeal within two weeks of the date of the scheduled meeting in step 3.
5. The Academic Standards Committee will seek out information on the appeal from the instructor and the student and, at its discretion, hold a hearing to further consider the matter. The decision of the Academic Standards Committee will be rendered within six weeks of receiving a written notice of appeal (step 4).
6. Appeals beyond the Academic Standards Committee must go to the dean of the JGSB, who may seek guidance from other constituents of the school. All decisions rendered by the dean are final.
7. In the event that the protested grade is necessary for the student to graduate, an accelerated schedule will be followed.
8. The Family Educational Rights and Privacy Act of 1974 and amendments govern records of these actions.

## MBA Elective Course Add/Drop Policy and Procedures

Due to the unique term schedule followed by the JGSB's MBA Programs, MBA students have special procedures they must follow to make schedule changes. The JGSB associate registrar administers an add/drop policy which allows students to add/drop elective courses at various times throughout the semester. Below are the procedures for adding or dropping a course.

For all elective courses:

1. A student may add/drop a course by the deadline for the appropriate term.
2. A student must attend the first class, and may not miss a class during the first week.
3. A student may not add or drop a course after the deadline.

## MBA Course Registration Policy for non-JGSB Rice University Students

Graduate students from outside the JGSB may register for elective courses in the full-time MBA Program and the MBA for Professionals Program. To be eligible for a specific course, a student must be in good academic standing (3.0 GPA or above), have permission from the student's department advisor, and have satisfied the specified course prerequisites. In order to register for the course, the student should verify eligibility with the JGSB associate registrar and then request approval from the course instructor. Non-JGSB students may not register for elective courses in the MBA for Executives Program or core (required) courses in any of the school's MBA Programs. Rice undergraduate students are not allowed to register for any MBA-level courses (MGMT, MGMP, or MGMW) offered at the JGSB.

## Independent Study

**Minimum Hours Requirement**—Each credit of independent study should contain approximately as much time content as a one-credit course at JGSB, which is 12 hours of class time, plus an average of at least 24–36 outside-class hours, for a minimum total of 36–48 hours of work. Independent study projects can be accommodated in increments of 1.0, 1.5, 2.0, or 3.0 unit independent study; 3.0 credit independent study projects will rarely be approved. Occasionally, a group independent study project may arise, though most independent studies will be undertaken by individual students.

The number of credits for an independent study should be negotiated at the beginning of a project. Increases to the number of project credit hours after the project overview has been filed with the JGSB associate registrar must be approved by the Academic Standards Committee. The committee will rely on input from sponsoring faculty in making its decision about ex post credit increases. Requests to increase the number of project credit hours must be made before the end of the second week of classes in the term in which the project begins, except when a student is in their last semester; in this case, such requests must be made before the end of the second week of the semester.

**Restrictions**—No student may take more than three credit hours of independent study during the course of the MBA Program without the approval of the Academic Standards Committee. If an independent study is proposed that would cause a student to exceed the three credit limit, the Academic Standards Committee will select two faculty members, other than the faculty member who will supervise the project, within the area most closely related to the study's academic content to review and approve the study. Independent study exceeding three credits in total should consider current policies restricting use of independent study as well as the incremental value of additional independent study in light of past independent studies. If the study does not align with any of the JGSB academic

groups, the Academic Standards Committee will perform the review and make the final approval decision.

Independent study projects are for academic credit, not for hire. Students may not earn credit for paid work.

**Faculty Sponsorship**—Independent study projects normally are sponsored only by full-time JGSB faculty; faculty typically sponsor projects only in their area of expertise. Students wanting sponsorship by a part-time faculty member must submit a project overview to the Academic Standards Committee and obtain the committee's approval before the term in which the project is to begin.

**Common Requirements**—The goal of independent study projects is to advance or deepen a student's knowledge or competency in a business discipline or activity.

To facilitate these goals, independent study projects generally fall into two broad categories: (1) directed reading and study resulting in a research paper or (2) an experiential or hands-on project resulting in an outcome such as an empirical analysis with an executive summary of the "deliverable."

While the content of individual independent study projects are at the discretion of a student and the sponsoring faculty member, the JGSB would like to ensure relatively equal workloads per unit of independent study credit and some common requirements between independent study projects. To that end, students and/or sponsoring faculty should:

1. Prepare and submit to the JGSB Associate Registrar an overview of the independent study project with number of project credits, anticipated final results, and a broad timeline of anticipated project milestones.
2. Meet to discuss the project, after the initial agreement on the project scope, at least once every two to three weeks.
3. Prepare a final paper (in the case of directed reading and research projects) or complete a concrete deliverable (for example, computer program, survey results, empirical analyses, etc.) together with an executive summary of the project (in the case of experiential projects).
4. File a copy of each student's final paper, or executive summary, with the JGSB Associate Registrar.

**Applications**—Independent study applications are available for interested students on OWL-Space. Completed independent study applications must be approved by the Associate Dean of Academic Affairs. Completed and approved applications are due to the JGSB associate registrar by the first week of the term in which the project will be completed. The student will be registered for MGMT 700/800 independent study for the appropriate credit amount, only when the appropriate permissions have been obtained.

## Class Attendance Policy

Students are expected to be in class on the first day of each term. The instructor reserves the right to exclude a student from their course who is absent on the first day. For special circumstances, students should see the instructor and/or the Office of Student Services or EMBA Program Office immediately.

## Withdrawal Policy

A JGSB student may voluntarily withdraw from school at any time. Rice University applies a sliding scale to tuition and fees.

## JGSB Informational Guide

Generally, the JGSB adheres to the academic regulations of Rice University. However, the JGSB's MBA Program has unique policies and procedures that vary from the Office of Graduate and Postdoctoral Studies regarding, but not limited to, leave of absence, withdrawals and readmission, add/drop, academic discipline, dismissal, procedures for resolution of problems, and appeal of academic regulations. A copy of the guide also may be obtained via OWL-Space.

## Financial Aid

JGSB scholarships are awarded at the point of admission and are based on the merit of the application. Financial assistance is generally awarded an academic year at a time. Continuation of assistance depends on Satisfactory Academic Progress (SAP) in accordance with Academic and Professional Standards of performance, professional behavior, and is subject to the availability of funds. Academic or disciplinary probation, suspension, or general failure to maintain academic pace will result in the removal of all forms of financial assistance (i.e. scholarship, employment, Federal/State student loans, etc.). Students have the right to appeal the suspension. All appeals will be reviewed by a committee.

## Master of Accounting (MAcc)

The Master of Accounting (MAcc) program, offered by the Jones Graduate School of Business, is designed to enable students with a top-tier non-business undergraduate education to complete the educational requirements for becoming a certified public accountant. Certified public accountants conduct independent audits and provide accounting, tax, and consulting services. The program prepares students to enter careers in public accounting, corporate accounting, management accounting, governmental accounting, financial analysis, and law enforcement. Graduates of the program will excel in analytics, critical thinking, ethics, judgment, and communications, built on outstanding technical accounting skills. An understanding of global capital markets and macroeconomic forces will complement graduates' accounting expertise, along with proficiency in corporate finance, risk and valuation.

### MAcc Admission Requirements

For general university requirements, see Graduate Degrees. Criteria for evaluating applicants include: completion of (or plans for completion of) required undergraduate prerequisite courses, academic and professional accomplishments, and, possibly, GMAT scores, interviews, or examinations. Students who meet the admissions requirements are expected to complete the graduate program in one full year.

**Rice undergraduates:** Students who are on track to fulfill the requirements of the Rice business minor prior to completing their undergraduate degree are eligible for admission to the program. Non-business minors are also eligible for admission if specific prerequisite courses will be completed before undergraduate graduation; the MAcc Program Director will consult prospective applicants to determine what prerequisite classes are needed. All MAcc applicants, regardless of being a business minor, need to have completed the first financial accounting course (BUSI 305), one advanced financial accounting course, and one auditing course prior to beginning the MAcc Program. Students potentially interested in the MAcc program are encouraged to take BUSI 305 in the spring of their freshman year. Rice undergraduates can apply and gain conditional admission to the MAcc program as early as the fall semester of their junior year and as late as the fall semester of their senior year. Conditionally admitted students who lack any of the prerequisite accounting courses must take appropriate classes to correct their deficiency.

**Non-Rice undergraduates:** Students should apply in the fall semester of their senior year. Admitted students who lack the prerequisite accounting coursework must take summer pre-term classes.

*The MAcc Program will launch in the Fall 2016 semester. However, students can apply and be admitted to the program as early as the Fall 2014 semester.

### Degree Requirements for the MAcc

The MAcc program requires the completion of at least 30 credit hours of coursework over one academic year. This coursework is comprised of both accounting and other business classes.

## PhD in Business

The Jones Graduate School of Business PhD program is designed for candidates with outstanding intellectual abilities and a strong commitment to research. The goal of the PhD program is to train students for academic careers focused on cutting-edge, rigorous research and teaching in a business school environment. Applicants to the PhD program must hold a four-year bachelor's degree from an accredited institution. A master's degree and work experience are not required for PhD admission.* The Jones Graduate School of Business does not have an MA program, although during the course of the PhD program a master's degree (MA) will be awarded after students have achieved doctoral candidacy and are in the process of completing the doctorate.

**Degree Requirements for PhD in Business**—For general university requirements, see Graduate Degrees. For program details, see the PhD Program Guide distributed by the JGSB. Admissions applications should include scores on the Graduate Management Admissions Test (GMAT) or the Graduate Record Examination (GRE). Full financial support will be provided to admitted doctoral students. Candidates for the PhD degree spend at least two years in full-time course work and at least two years writing the dissertation. Four to five years is a reasonable goal for completing the program. For the PhD, students must

- Complete a program of doctoral-level courses that is approved by the area faculty advisor. Students take courses from departments such as economics, psychology, statistics, and political science in addition to courses from JGSB.
- Complete and defend orally a doctoral dissertation setting forth in publishable form the results of original research.

** While advanced degrees (e.g. Masters) and prior work experience are taken into account in admission decisions, evidence of strong intellectual ability is of utmost importance.*

## Degree Offered: MLS

The part-time Master of Liberal Studies (MLS) is an interdisciplinary program that provides adults in the Houston area a unique opportunity to challenge themselves intellectually. Designed for those who love to learn new ideas and discuss them with others, the MLS program allows students to explore timeless and timely human questions within the humanities, social sciences, and natural sciences. Though exploring the liberal arts at a highly integrated level is not always possible in a career-focused undergraduate curriculum, it is both possible and well suited to a master's level program. Courses in the MLS program are taught by distinguished Rice faculty and invited visiting faculty who appreciate the opportunity to teach adults.

The program is designed for working adults and does not follow the traditional university schedule of fall and spring semesters. Classes meet one evening per week for 10–11 weeks, with one or two Saturday morning classes. Sessions are offered in the fall, winter, and spring.

Fall classes begin in September and end before Thanksgiving; winter classes begin in January and end in March; spring courses begin in April and end in early June. No classes are held in July or August.

Please refer to the MLS website for program information and academic policies.

# Liberal Studies

## The Susanne M. Glasscock School of Continuing Studies

Department Info | Undergraduate Requirements | Graduate Requirements | Course Listings

### Degree Requirements for MLS in Liberal Studies

For general university requirements for graduate study, see Graduate Degrees. The MLS program consists of 33 credit hours, which include three core courses, seven electives, and a capstone course. A student may take only one course in his or her entering session. The core courses—one in humanities, one in social sciences, and one in natural sciences—are designed to acquaint first-year students with the contrasting perspectives and methodological approaches that define academic inquiry in the three broad fields. Core courses must be completed before electives may be taken. Electives may focus on just one “track” (natural sciences, social sciences, or humanities) or may be chosen more broadly. All courses will require research papers; some may require tests or oral presentations.

The capstone course is designed to help students integrate their knowledge through writing an extended paper or completing a project to be presented to MLS faculty and students. A thesis is not part of the degree program. The program can be completed in approximately four years if one class is completed every session. Students are allowed to take up to seven years to complete the degree.

### Admission

Admission to graduate study is open to qualified students holding a bachelor’s degree (or equivalent) from an accredited university or college. A minimum GPA of 3.0 from the applicant’s undergraduate work is expected, though the admissions committee also gives consideration to applicants’ postgraduate experience and recent accomplishments.

Teacher Education courses are open to Rice students studying for careers in teaching and to Rice students interested in studying the complexities of the educational system and its role in society. Ideas and issues central to courses in education include education and democracy, global education, the organization of knowledge, and the nature of learning. Education, learning, and teaching are considered broadly, but the particular focus is on inquiry learning for diverse student populations.

## Degrees Offered: Secondary Teaching Certificate for Rice Undergraduate Students, MAT

The teacher education program engages, prepares, and supports its teacher leaders for student-centered classrooms in a diverse society. The program emphasizes the value of equity in education and the political and educational policies that should undergird that equity. Students acquire a strong foundation in assessment, classroom culture, instructional strategies, literacy across the curriculum and human developmental processes. All teachers will use culturally relevant content and pedagogy in working with English language and diverse learners as this program acknowledges the changing face of Houston and the nation.

Rice offers three teacher education plans:
(1) a secondary teaching certificate in combination with the undergraduate degree in the elected subject field(s),
(2) a Master of Arts in Teaching (MAT) that can be completed concurrently with a Rice bachelor's degree with generally one additional year of study, and
(3) a Master of Arts in Teaching (MAT) for experienced or new teachers.

The Rice teacher education program balances academic integrity with Texas Education Agency compliance. Students seeking additional information about the teacher education program are encouraged to meet with an advisor in Teacher Education.

**Texas Teaching Credential—**Rice is approved by the state of Texas to offer teacher preparation programs in the following fields: art, English language arts and reading, history, Latin, life sciences, mathematics, physical sciences,

physics/mathematics, science, social studies, and Spanish.

After satisfactory completion of the Rice teacher education program, which includes the state-mandated examinations for teachers, students are recommended for a Texas teaching credential. The Texas Education Agency then awards a Texas Standard Teaching Certificate (Grades 7–12).

## Higher Education Act Title II Reports

The Higher Education Act (HEA) of the U.S. Congress requires each institution of higher education with a teacher preparation program that enrolls students receiving federal assistance under this act to report annually "to the State and the general public" certain information. This information includes the pass rate of their program completers on assessments required by the state for teacher licensure or certification, the statewide pass rate on those assessments and other basic information on their teacher preparation program.

Rice University's Teacher Education Program is accredited by the state of Texas. The first year pass rate for program completers on assessments required by the state for 2012-13 was 100%, compared with 92% for the overall state pass rate. Nineteen students were enrolled in the program in 2012–13. Student teachers spent an average of 40 hours per week in supervised student teaching with a student/faculty ratio of 1.72-to-1. Rice teacher education program graduates are regularly recruited by school districts in Houston and the surrounding areas because of their innovative ideas, content knowledge, expertise, leadership abilities, and dedication to the teaching profession.

### Requirements for Secondary Teaching Certificate

**Admission**—Students may apply to Rice University Teacher Education for admission if they show:

- Attainment of sophomore standing at Rice University.
- Grades of C- or better in all semester hours for the teaching field and a grade point average of 2.5 or better, both in courses for the teaching field and overall.
- Evidence of adequate physical vigor and speech to perform as a teacher in a classroom.

A completed plan of study approved by a department advisor and the major field advisor is required before admission to the program is complete.

**Completion of Program—**To complete the program, students must:

- Be exempted from or pass the Texas Higher Education Assessment (THEA) exam prior to enrolling in any education courses to count for certification.
- Complete the content courses specified by the certification field advisor(s). Lists of courses for each subject are available online and in the Teacher Education office.
- Meet with an Education advisor to develop a course of study for the 36 required hours.
- Begin two-semester work in assigned school with a first semester curriculum development course and a second semester full-day practicum with a cooperating teacher (EDUC 421, EDUC 467).
- Complete three hours in the appropriate seminar(s) in teaching (EDUC 460-466);
- Complete 60 hours of field-based experience in local secondary schools, in conjunction with satisfactory results on background check with participating school districts.
- Complete all university and major requirements for a bachelor's degree.
- Make grades of C- or better in all teaching fields and education courses.
- Pass appropriate TExES exams.
- Apply for Texas State certification when all requirements are completed.

Last Revised : August 11, 2014

 

# Teacher Education

## The Susanne M. Glasscock School of Continuing Studies

Department Info | Undergraduate Requirements | Graduate Requirements | Course Listings

## Requirements for Master of Arts in Teaching (MAT)

**Admission—**Applicants must have a bachelor's degree, scholarly ability, and a commitment to teaching, and they must have taken the Graduate Record Examination (GRE) within 5 years. Specific requirements include:

- Completion of a bachelor's degree before admission to the program.
- Completion of 24 credit hours in a specified content area is required.
- Grades of B- or better in all semester hours attempted in the teaching field(s) and a grade point average of 3.0 or better, both in courses for the teaching field(s) and overall.
- Evidence of adequate physical vigor and speech to perform as a teacher in a classroom.

Education team members review each application. Limited tuition assistance is available. See Admission to Graduate Study. Admitted students must pass or be exempted from the Texas Higher Education Assessment (THEA) exam prior to enrolling in any education courses.

**Degree Requirements**—For general university requirements, see Graduate Degrees. The MAT is a nonthesis degree program for students who want to qualify for secondary school teaching following a bachelor's degree. Most candidates entering the program have had no professional education courses. By completing the program, candidates fulfill all requirements for a Texas Standard Teaching Certificate for grades 7–12. To earn the MAT degree, students must complete, with grades of B- or higher, at least 36 semester hours (the need to remove deficiencies may require additional courses for certification) at the graduate level.

- Begin two-semester work in assigned school with a first semester curriculum development course and a second semester full-day practicum with a cooperating teacher (EDUC 521, EDUC 567).
- Complete a two-semester supervised teaching internship by acquiring and fulfilling all professional responsibilities of a teaching position in a local accredited secondary school and completing a seminar course (EDUC 540).
- Complete 60 hours of field-based experience in local secondary schools, in conjunction with satisfactory results on background check with participating school districts.
- Make grades of B- or better in all teaching field and education courses.
- Pass appropriate TExES exams.
- Apply for Texas State certification when all requirements are completed.

The cooperating school districts pay a regular salary for internship teaching.

## Requirements for Master of Arts in Teaching (MAT) completed concurrently with a Rice bachelor's degree with one additional year of study

Rice undergraduate students can pursue both their undergraduate and graduate degrees concurrently, completing the MAT with generally one additional year of study beyond the bachelor's degree. Students seeking additional information about the 5-year MAT program are encouraged to meet with an advisor in Teacher Education.

## Degrees Offered: BSBE, MBE, MS, PhD

Graduate programs in bioengineering offer concentrations in areas such as biomedical imaging and diagnostics, cellular and biomolecular engineering, computational and theoretical bioengineering, biomaterials and drug delivery and biomaterials, systems and synthetic biology, and tissue engineering and biomechanics. Research areas include biomechanical engineering, biological systems modeling, bioinformatics, biomaterials, biomedical lasers, cellular and molecular engineering, controlled release technologies, metabolic engineering, spectroscopy, statistical mechanics, systems engineering and instrumentation, thrombosis, tissue engineering, and transport processes.

Last Revised : August 11, 2014

# Bioengineering

## George R. Brown School of Engineering

The overall goal of the BS degree in Bioengineering (BSBE) is to prepare graduates to succeed in professional careers by equipping them with the conceptual and technical expertise sought after by top graduate and medical schools, as well as by companies seeking technical skills in bioengineering. Recognizing that graduates may embark on a number of different educational and career paths, the Program Educational Objectives (PEO) that graduates are expected to exhibit or achieve with the BSBE from Rice University are:

1. Graduates demonstrate technical and/or professional skills, which may include engineering problem-solving, scientific inquiry, and/or engineering design, to solve challenging problems in bioengineering and related fields.
2. Graduates are accomplished at communicating and working collaboratively in diverse work environments.
3. Graduates seeking further education at graduate, professional or medical school find appropriate levels of success in admission to and progression through these programs. Graduates entering professional careers find appropriate career progression and success.

The BSBE degree is organized around a core of required courses and a selection of three technical elective courses. Because of the number of options, students should consult early with departmental advisors to plan a program that meets their needs.

## Degree Requirements for BS in Bioengineering

For general university requirements, see Graduation Requirements. The curriculum for a BS degree in bioengineering requires 94 credit hours, which count toward the total of 134 hours required to graduate. The program leading to the BSBE is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org.

**Preparation**—As freshmen, students considering a major in bioengineering should take MATH 101 and 102, CHEM 121 and 122, PHYS 101 or PHYS 125, PHYS 102 or PHYS 126, and CAAM 210. Sophomore students should take MATH 211 and 212, CHEM 211, BIOC 201 and ELEC 243. BIOE 252 should be taken in the 1st semester of the sophomore year. BIOE 391, BIOE 320, and BIOE 322 should be taken the second semester of the sophomore year.

Students majoring in bioengineering must complete the following courses.

**Core Courses**

***Bioengineering***
BIOE 252 *Bioengineering Fundamentals*
BIOE 320 *Systems Physiology Laboratory Module*
BIOE 322 *Fundamentals of Systems Physiology*
BIOE 330 *Bioreaction Engineering*
BIOE 332 *Bioengineering Thermodynamics*
BIOE 342 *Tissue Culture Laboratory*
BIOE 370 *Biomaterials*
BIOE 372 *Biomechanics*
BIOE 383 *Biomedical Engineering Instrumentation*
BIOE 385 *Biomedical Instrumentation Laboratory*
BIOE 391 *Numerical Methods*

BIOE 420 *Biosystems Transport and Reaction Processes*
BIOE 440 *Statistics for Bioengineering*
BIOE 442* *Tissue Engineering Laboratory Module*
BIOE 443* *Bioprocessing Laboratory Module*
BIOE 444* *Mechanical Testing Laboratory Module*
BIOE 445* *Advanced Instrumentation Laboratory*
BIOE 446* *Computational Modeling Laboratory*
BIOE 447* *Digital Design and Visualization Lab Module*
BIOE 449* Troubleshooting Workshop for Clinically-Relevant Biomedical Equipment
BIOE 451 *Bioengineering Design I*
BIOE 452 *Bioengineering Design II*

***Biosciences***
BIOC 201 *Introductory Biology*
BIOC 341 *Cell Biology*

***Chemistry***
CHEM 121 *General Chemistry I*
CHEM 122 *General Chemistry II*
CHEM 123 *General Chemistry Lab*
CHEM 124 *General Chemistry Lab*
CHEM 211 *Organic Chemistry I*

***Computational and Applied Mathematics***
CAAM 210 *Introduction to Engineering Computation*

***Electrical Engineering***
ELEC 243 *Electronic Measurement Systems*

***Math***
MATH 101 *Single Variable Calculus I*
MATH 102 *Single Variable Calculus II*
MATH 211 *ODEs and Linear Algebra*
MATH 212 *Multivariable Calculus*

***Mechanical Engineering***
MECH 211 *Engineering Mechanics*

***Physics***
PHYS 101, PHYS 111, or PHYS 125 *Mechanics*
PHYS 102, PHYS 112, or PHYS 126 *Electricity and Magnetism*

*Different advanced laboratory modules will be offered each year. Students must take two of the offered advanced laboratory modules: BIOE 442, 443, 444, 445, 446 (BIOE 447 and 449).

Three technical elective courses are required. All three elective courses must be engineering courses. A combination of technical electives must be selected that meets a minimum of six engineering points. The technical elective courses and their engineering points are announced during registration each semester.

**Undergraduate Minor**—The Department of Bioengineering collaborates with a number of departments to offer Rice undergraduate students a minor in global health technologies (GLHT) through the Beyond Traditional Borders (BTB) initiative—a unique, multidisciplinary program to educate and train students to reach beyond traditional disciplinary and geographic boundaries to understand, address, and solve global health disparities. With complementary contributions from the humanities, social sciences, policy, bioscience, and engineering programs at Rice, the GLHT minor prepares students to integrate diverse perspectives as they develop solutions to the complex problems of global health, using the formal approach of the engineering design process.

**See GLOBAL HEALTH TECHNOLOGIES in the Departments and Inter-disciplinary Programs section for minor requirements.**

## Degree Requirements for MBE and MS and PhD in Bioengineering

For general university requirements, see Graduate Degrees.

To make sure scores are available when admission decisions are made, applicants need to register to take the GRE and TOEFL at least three months before the application deadline. Applicants should also request transcripts at least two months in advance to give senders time to get the material to Rice University by the deadline. The application deadline for MBE students for spring admission the following year is October 30. The application deadline for MBE students for fall admission in the same year is April 30th. The application deadline for PhD students for fall admission of the following year is December 20. PhD students are not admitted in the spring semester. Application materials received after the deadline will not be considered. Once admitted, departmental policy requires full-time PhD students to be registered for at least 12 credit hours each semester. MBE students may register part-time with the permission of the department.

**Graduate Program**—To train the next generation of leaders in bioengineering, we have built an innovative teaching program that transcends boundaries between bioengineering, basic science, and clinical medicine, integrating the academic, industrial, and societal perspectives.

Our hands-on approach to education is supported by a long standing tradition of cross-disciplinary research and education. The Rice bioengineering program is a comprehensive training program that provides student with:

- A fundamental understanding of the life and medical sciences
- Advanced analytical and engineering capabilities
- Translational research capability for transferring biotechnical advances from bench to bedside

With this educational background, graduates will be well prepared to participate in independent or collaborative research and development endeavors in industry or academia.

**MBE Program**—The Master of Bioengineering degree is intended for those having a BA or BS degree in an engineering or science discipline. To obtain a Master of Bioengineering degree, the following requirements must be completed.

- Show evidence on their undergraduate transcript of completion of fundamentals of systems physiology, cell biology, and statistics. (If courses were not taken for an undergraduate degree, they must be completed at the beginning of the MBE program. Only one of these courses may be used as credit toward the 30 hours of required courses.)
- A total of 30 credit hours is required (courses must be above and beyond the requirement for the undergraduate degree). Of these 30 hours, at least 24 must be taken at Rice.
- At least 15 credit hours must be taken at the 500 level or above.
- Required courses include:
  - Fifteen (15) credit hours of graduate level BIOE courses
  - One three (3) credit hour (400 level or above) MATH, STAT, or CAAM course
  - Nine (9) credit hours of professional development electives
  - Three (3) credit hours of general electives
- Maintain an average GPA of 3.0 or higher.
- All classes counted toward the MBE degree must be taken for a letter grade

**MS Program**—Candidates for the MS degree must:

- Show evidence on their undergraduate transcript of completion of fundamentals of systems physiology, cell biology, and statistics. (If courses were not taken for an undergraduate degree, they must be completed at the beginning of the MS program. Only one of these courses may be used as credit toward the 30 hours of required courses.)
- Complete at least 18 approved semester hours of foundation, supporting, and advanced courses while maintaining a grade point average of 3.0
- A total of 30 credit hours are required. MS students must earn additional credits they need for graduation by registering for the master's research course BIOE 500 during the terms they are engaged in research.
- Fulfill a teaching requirement
- Submit an original research thesis
- Defend the thesis in a public oral examination

**PhD Program**—Candidates for the PhD degree must:

- Show evidence on their undergraduate transcript of completion of fundamentals of systems physiology, cell biology, and statistics. (If courses were not taken for an undergraduate degree, they must be completed at the beginning of the PhD program. Only one of these courses may be used as credit for the 30 required courses.)
- Complete at least 30 approved semester hours of foundation, supporting, and advanced courses with high standing while maintaining a grade point average of 3.2.
- A total of 90 credit hours is required. PhD students must earn additional credits they need for graduation by registering for the PhD research course, BIOE 500, during the terms they are engaged in research.
- Fulfill a teaching requirement. After their first semester in residence, students may be asked to spend the equivalent of six to 10 hours per week for a total of three semesters on teaching assignments.
- Submit a thesis proposal. PhD students must submit and successfully defend their thesis proposals by the end of their fourth semester in residence.
- Submit a thesis that provides evidence of their ability to carry out original research in a specialized area of bioengineering.
- Defend the thesis in a public oral examination.
- Graduate students take required courses and electives in the following areas:
  - Systems and Synthetic Biology
  - Biomaterials and Drug Delivery
  - Tissue Engineering and Biomechanics
  - Computational and Theoretical Bioengineering
  - Biomedical Imaging and Diagnostics
  - Cellular and Biomolecular Engineering

***Physics***
PHYS 101, PHYS 111, or PHYS 125 *Mechanics*
PHYS 102, PHYS 112, or PHYS 126 *Electricity and Magnetism*

*Different advanced laboratory modules will be offered each year. Students must take two of the offered advanced laboratory modules: BIOE 442, 443, 444, 445, 446 (BIOE 447 and 449).

Three technical elective courses are required. All three elective courses must be engineering courses. A combination of technical electives must be selected that meets a minimum of six engineering points. The technical elective courses and their engineering points are announced during registration each semester.

**Undergraduate Minor**—The Department of Bioengineering collaborates with a number of departments to offer Rice undergraduate students a minor in global health technologies (GLHT) through the Beyond Traditional Borders (BTB) initiative—a unique, multidisciplinary program to educate and train students to reach beyond traditional disciplinary and geographic boundaries to understand, address, and solve global health disparities. With complementary contributions from the humanities, social sciences, policy, bioscience, and engineering programs at Rice, the GLHT minor prepares students to integrate diverse perspectives as they develop solutions to the complex problems of global health, using the formal approach of the engineering design process.

**See GLOBAL HEALTH TECHNOLOGIES in the Departments and Inter-disciplinary Programs section for minor requirements.**

## Degree Requirements for MBE and MS and PhD in Bioengineering

For general university requirements, see Graduate Degrees.

To make sure scores are available when admission decisions are made, applicants need to register to take the GRE and TOEFL at least three months before the application deadline. Applicants should also request transcripts at least two months in advance to give senders time to get the material to Rice University by the deadline. The application deadline for MBE students for spring admission the following year is October 30. The application deadline for MBE students for fall admission in the same year is April 30th. The application deadline for PhD students for fall admission of the following year is December 20. PhD students are not admitted in the spring semester. Application materials received after the deadline will not be considered. Once admitted, departmental policy requires full-time PhD students to be registered for at least 12 credit hours each semester. MBE students may register part-time with the permission of the department.

**Graduate Program**—To train the next generation of leaders in bioengineering, we have built an innovative teaching program that transcends boundaries between bioengineering, basic science, and clinical medicine, integrating the academic, industrial, and societal perspectives.

Our hands-on approach to education is supported by a long standing tradition of cross-disciplinary research and education. The Rice bioengineering program is a comprehensive training program that provides student with:

- A fundamental understanding of the life and medical sciences
- Advanced analytical and engineering capabilities
- Translational research capability for transferring biotechnical advances from bench to bedside

With this educational background, graduates will be well prepared to participate in independent or collaborative research and development endeavors in industry or academia.

**MBE Program**—The Master of Bioengineering degree is intended for those having a BA or BS degree in an engineering or science discipline. To obtain a Master of Bioengineering degree, the following requirements must be completed.

- Show evidence on their undergraduate transcript of completion of fundamentals of systems physiology, cell biology, and statistics. (If courses were not taken for an undergraduate degree, they must be completed at the beginning of the MBE program. Only one of these courses may be used as credit toward the 30 hours of required courses.)
- A total of 30 credit hours is required (courses must be above and beyond the requirement for the undergraduate degree). Of these 30 hours, at least 24 must be taken at Rice.
- At least 15 credit hours must be taken at the 500 level or above.
- Required courses include:
  - Fifteen (15) credit hours of graduate level BIOE courses
  - One three (3) credit hour (400 level or above) MATH, STAT, or CAAM course
  - Nine (9) credit hours of professional development electives
  - Three (3) credit hours of general electives
- Maintain an average GPA of 3.0 or higher.
- All classes counted toward the MBE degree must be taken for a letter grade

**MS Program**—Candidates for the MS degree must:

- Show evidence on their undergraduate transcript of completion of fundamentals of systems physiology, cell biology, and statistics. (If courses were not taken for an undergraduate degree, they must be completed at the beginning of the MS program. Only one of these courses may be used as credit toward the 30 hours of required courses.)
- Complete at least 18 approved semester hours of foundation, supporting, and advanced courses while maintaining a grade point average of 3.0
- A total of 30 credit hours are required. MS students must earn additional credits they need for graduation by registering for the master's research course BIOE 500 during the terms they are engaged in research.
- Fulfill a teaching requirement
- Submit an original research thesis
- Defend the thesis in a public oral examination

**PhD Program**—Candidates for the PhD degree must:

- Show evidence on their undergraduate transcript of completion of fundamentals of systems physiology, cell biology, and statistics. (If courses were not taken for an undergraduate degree, they must be completed at the beginning of the PhD program. Only one of these courses may be used as credit for the 30 required courses.)
- Complete at least 30 approved semester hours of foundation, supporting, and advanced courses with high standing while maintaining a grade point average of 3.2.
- A total of 90 credit hours is required. PhD students must earn additional credits they need for graduation by registering for the PhD research course, BIOE 500, during the terms they are engaged in research.
- Fulfill a teaching requirement. After their first semester in residence, students may be asked to spend the equivalent of six to 10 hours per week for a total of three semesters on teaching assignments.
- Submit a thesis proposal. PhD students must submit and successfully defend their thesis proposals by the end of their fourth semester in residence.
- Submit a thesis that provides evidence of their ability to carry out original research in a specialized area of bioengineering.
- Defend the thesis in a public oral examination.
- Graduate students take required courses and electives in the following areas:
  - Systems and Synthetic Biology
  - Biomaterials and Drug Delivery
  - Tissue Engineering and Biomechanics
  - Computational and Theoretical Bioengineering
  - Biomedical Imaging and Diagnostics
  - Cellular and Biomolecular Engineering

## Degrees Offered: BA, BSChE, MChE, MS, PhD

This major gives undergraduates a sound scientific and technical grounding for further development in a variety of professional environments. Courses in mathematics, chemistry, physics, and computational engineering provide the background for the chemical engineering core, which introduces students to chemical process fundamentals, fluid mechanics, heat and mass transfer, thermodynamics, kinetics, reactor design, process control, product and process design. Course electives may be used to create a focus area in one of the following five disciplines: biotechnology/bioengineering, environmental engineering, materials science/engineering, sustainability and energy

engineering and computational engineering. Upon completing either the flexible BA requirements or the more scientific and professional BSChE requirements, students may apply for a fifth year of study leading to the nonthesis Master of Chemical Engineering (MChE) degree. A joint MBA/MChE degree also is available in conjunction with the Jesse H. Jones Graduate School of Management.

Students admitted for graduate studies leading to the MS or PhD degrees must complete a rigorous program combining advanced course work and original research that must be formalized in an approved thesis. Graduate research is possible in a number of areas, including catalysis and nanotechnology, thermodynamics and phase equilibria, interfacial phenomena, colloids, microemulsions, rheology and fluid mechanics, biosystems engineering, biocatalysis and metabolic engineering, cell population heterogeneity and biological pattern formation, cellular and tissue engineering, energy and sustainability, gas hydrates, enhanced oil recovery, reservoir characterization, and pollution control.

# Chemical and Biomolecular Engineering

## The George R. Brown School of Engineering

Department Info | Undergraduate Requirements | Graduate Requirements | Course Listings

## Degree Requirements for BS in Chemical Engineering

For general university requirements, see Graduation Requirements. The program leading to the BS degree in Chemical Engineering is accredited by the Engineering Accreditation Commission of ABET. Through careful selection of other engineering and science courses, a student can develop a focus (or concentration) area in any of the following five engineering disciplines: biotechnology/bioengineering, environmental engineering, materials science/engineering, sustainability and energy engineering and computational engineering. These elective programs can be completed within the framework of a BS in chemical engineering. Students majoring in chemical engineering must complete 95–100 hours in the courses specified below for a minimum of 132 hours at graduation.

The undergraduate curriculum is designed so that outstanding students interested in careers in research and teaching may enter graduate school after earning either bachelor's degree.

## Engineering Breadth and Focus Area Options

To complete their technical education, Rice students seeking a BS degree in chemical engineering take course electives in at least two other engineering disciplines to satisfy a "breadth" requirement.

Alternatively, students can use their electives to create a focus (or concentration) area in one of the following four disciplines:

- biotechnology/bioengineering
- computational engineering
- environmental engineering
- materials science/engineering
- sustainability and energy engineering

Consult our department web page for a detailed list of courses that can be used to satisfy the engineering breadth or focus area requirements.

## Degree Requirements for BSChE in Chemical Engineering

***Chemistry***
CHEM 121/122 or 151/152 *General Chemistry with Laboratory*
CHEM 211 *Organic Chemistry I*
CHEM 217 or 215 *Organic Chemistry Lab*
Any 2 of CHEM 212, CHEM 311 or CHEM 312

***Chemical and Biomolecular Engineering***
CHBE 301 *Chemical Engineering Fundamentals*
CHBE 303 *Computer Programming in Chemical Engineering*
CHBE 305 *Computational Methods for Chemical Engineers*
CHBE 310 *Introduction to Biomolecular Engineering*
CHBE 343 *Chemical Engineering Lab I*
CHBE 350 *Process Safety*
CHBE 390 *Kinetics and Reactor Design*
CHBE 401/402 *Transport Phenomena I and II*

CHBE 403 *Design Fundamentals*
CHBE 404 *Chemical Engineering Design*
CHBE 411/412 *Thermodynamics I and II*
CHBE 443 *Chemical Engineering Lab II*
CHBE 470 *Process Dynamics and Control*

***Mathematics***
MATH 101/102 *Single Variable Calculus I and II*
MATH 211 *Ordinary Differential Equations and Linear Alegbra*
MATH 212 *Multivariable Calculus or equivalent honors courses*
CAAM 336 *Differential Equations in Science and Engineering or*
MATH 381 *Introduction to Partial Differential Equations*

***Physics***
PHYS 101 or 111 *Mechanics*
PHYS 102 or 112 *Electricity and Magnetism*

**Prerequisites for Chemical Engineering Courses**—Before undergraduates may register for courses in chemical engineering at the 300-level and above, they must satisfy the following prerequisites.

***For CHBE 301***
MATH 101/102
CHEM 121/122 or CHEM 151/152
Corequisite: CHBE 303
***For CHBE 303***
Corequisite: CHBE 301
***For CHBE 305***
CHBE 301 and 303
***For CHBE 310***
CHBE 301, MATH 211
***For CHBE 343***
CHBE 390, 401, and 411
Corequisite: CHBE 350
**CHBE 350**
Corequisite CHBE 343
***For CHBE 390***
CHBE 301, and 305
MATH 211/212
***For CHBE 401***
CHBE 305
MATH 211/212
PHYS 101/102 or PHYS 111/112
***For CHBE 402***
CHBE 401, CHBE 411
Co/Prerequisites: CAAM 336 or MATH 381
***For CHBE 403***
CHBE 390, 402, and 412
***For CHBE 404***
CHBE 403
***For CHBE 411***
CHBE 301 and 303
***For CHBE 412***
CHBE 411
***For CHBE 443***
CHBE 343, 402, and 412
***For CHBE 470***
CHBE 390, 402, and 412

## Degree Requirements for BA in Chemical Engineering

The BA in chemical engineering is a flexible program and allows a student to pursue other areas of interest with or without a double major. This degree requires successful completion of at least 132 credit hours.

Students pursuing the BA degree in chemical engineering must meet all of the requirements for the BSChE degree with the following exceptions:

- CHBE 310, CHBE 404, CHBE 443 and CHBE 470 are not required.
- The requirements for engineering breadth or the focus area need not be satisfied

Free electives may be substituted for these requirements to reach at least 132 credit hours for graduation.

Last Revised : August 11, 2014

 

# Chemical and Biomolecular Engineering

## The George R. Brown School of Engineering

## Degree Requirements for MChE, MS, and PhD in Chemical Engineering

For general university requirements, see Graduate Degrees.

**MChE Program** – Candidates for the MChE degree must:

- Complete at least 30 hours of approved upper level (numbered 300 level or higher) courses beyond those counted for the student's undergraduate degree
- Take at least 24 hours of courses at Rice
- Complete at least six courses in chemical engineering and one approved math course
- Include process design (two semesters) and process control among the chemical engineering courses unless courses in these subjects were taken during the student's undergraduate studies
- Complete at least 15 hours of courses numbered at or above the 500 level
- Meet any university requirements as listed in the General Announcements

**MChE / MBA Program** – Candidates for the MChE degree in the MChE / MBA program must:

- Apply and be accepted by both programs
- Complete at least 24 hours of approved upper level (numbered 300 level or higher) courses beyond those counted for the student's undergraduate degree
- Take at least 24 hours of courses at Rice
- Complete at least six courses in chemical engineering and one approved math course
- Include process design (two semesters) and process control among the chemical engineering courses unless courses in these subjects were taken during the student's undergraduate studies
- Complete at least 15 hours of courses numbered at or above the 500 level
- Meet any university requirements as listed in the General Announcements

**MS Program**—Candidates for the MS degree must:

- Complete at least 18 approved semester hours with high standing
- Submit an original research thesis
- Defend the thesis in a public oral examination
- Complete a teaching requirement

**PhD Program**—Candidates for the PhD degree must:

- Satisfactorily complete 36 semester hours of advanced course work, including both general and specialized topics (students who already have an MS degree in chemical engineering can request departmental approval

for a reduction in the number of required courses)
- Pass qualifying examinations demonstrating a general understanding of reaction engineering, thermodynamics, transport phenomena, and applied mathematics
- Prepare and present a thesis proposal
- Complete a publishable thesis representing research that is an original and significant contribution to the field of chemical and biomolecular engineering
- Pass a public oral examination in defense of the thesis
- Fullfill a residency requirement
- Complete a teaching assignment

## Degrees Offered: BA, BS, MCEE, MS, PhD

Civil and Environmental Engineering (CEE) is a broad and diverse field of study that offers students an education with several degree options. The most flexible degree options are at the bachelor's level, where students can major in civil engineering and pursue a Bachelor of Science (BS) that has four areas of specialization or pursue a Bachelor of Arts (BA) that affords more flexibility, or complete a double major with any other Rice University major. One nonthesis graduate degree, the Master of Civil & Environmental Engineering (MCEE), is also available to students who desire additional education and specialization in the practice of civil engineering or environmental sciences and engineering.

Students admitted for graduate study leading to a Master of Science (MS) or Doctor of Philosophy (PhD) degree

must complete a rigorous course of study that combines advanced course work with scholarly research culminating in the public defense of a written thesis. Graduate research is carried out in a range of areas reflecting the interests of the department's faculty. Examples include environmental engineering, geotechnical engineering, structural engineering and mechanics, infrastructure reliability, hydrology, water resources and water quality management, air pollution and its control, and hazardous waste treatment.

Last Revised : August 12, 2013

# Civil and Environmental Engineering

## The George R. Brown School of Engineering

## BS Degree in Civil Engineering

CEE offers an innovative and challenging Bachelor of Science (BS) engineering curriculum that is designed to provide significant flexibility to the student. Specific details and typical course layouts by semester can be found at the departmental website: ceve.rice.edu. The program leading to the BS in Civil Engineering degree is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org.

The main features of the BS in Civil Engineering are as follows:

- Nine core courses and laboratories (24 hours) primarily aimed at introduction to civil and environmental engineering, followed by 10 courses (30 hours) that represent the four thrust areas within CEE, with at least four courses from one thrust area (12 credit hours for the focus area and 6 credit hours from each of the three remaining areas).
- The total required CEE courses are kept to a minimum level of 54 hours to provide flexibility to the student.
- The thrust areas include:
  - environmental engineering (air and water quality, transport theory, modeling, and energy)
  - hydrology and water resources (water resources and aquifer management, flood prediction, data analysis, GIS, and hydrologic modeling
  - structural engineering and mechanics (structural analysis, mechanics, design, dynamics, and matrix method)
  - urban infrastructure, reliability and management (transportation systems, complex urban systems, system reliability, soil mechanics, decision theory, engineering economics, and project management)
- Open/free electives (6 hours), and recommended electives (9 hours) to allow maximum flexibility for students to choose from an approved list of courses
- General science (39 hours) courses cover mathematics, statistics, physics, biology, chemistry, and earth sciences
- Distribution (24 hours) and LPAP (1 hour) courses - as per university requirements. A total of at least 132 hours are required for graduation with a BS in Civil Engineering (see detailed list below). Additional features of the BS curriculum include:
  - Courses that introduce fundamentals of CEE primarily targeted at students with diverse science, engineering, and humanities backgrounds (CEVE 101, 211, 310, 311, 312)
  - Special-topics courses to help attract the best students to perform undergraduate research in the department.
  - Engineers Without Borders (EWB) is an important component of the program. This exciting new endeavor allows undergraduates to have an experience in a developing country where they are able to design and build a project to help society. Students have been attracted to the program in large numbers. (See ceve.rice.edu)

**Course Requirements**

***General Math and Science Requirements (* or an equivalent approved course)***
CAAM 210 *Introduction to Engineering Comp* (3)
CAAM 335* *Matrix Analysis* (3) or MATH 354 or MATH 355
CHEM 121 *General Chemistry I with* CHEM 123 *General Chemistry Lab 1 (3/1 credits)*
CHEM 122 *General Chemistry II with* CHEM 124 *General Chemistry Lab II (3/1 credits)*

BIOC 201 (3) or ESCI 321 or ESCI 340 (3) or ESCI 435 (3) or EBIO 325 (3)
MATH 101 *Single Variable Calculus I* (3)
MATH 102 *Single Variable Calculus II* (3)
MATH 211 *Ordinary Differential Equations* (3)
MATH 212 *Multivariable Calculus* (3)

CEVE 310 (F) *Principles of Environmental Engineering* (3)
CEVE 311 (S) *Mechanics of Solids and Structures* (3)
CEVE 312 (S) *Strength of Materials Lab* (1)
CEVE 363 (F) *Fluid Mechanics* (3)
CEVE 401 (F) *Environmental Chemistry and Lab* (4)
CEVE 480 (S) *Senior Design Project* (3)
CEVE 481(F) *Introduction to Senior Design* (1)

***Area I Environmental Engineering (select six approved hours)***
CEVE 302 (F) *Sustainable Design* (3)
CEVE 307 (S) *Energy and the Environment* (3)
CEVE 308 (S) *Air Pollution Control* (3)*
CEVE 404 (S) *Atmospheric Particulate Matter* (3)*
CEVE 406 (S) *Environmental Law* (3)*
CEVE 411 (F) *Atmospheric Processes* (3)
CEVE 434/534 (F) *Fate and Transport of Contaminants in the Environment* (3)
Or any approved environmental course in CEE

***Area II Hydrology and Water Resources (select six approved hours)***
CEVE 412 (S) *Hydrology and Water Resources Engineering* (3)
CEVE 418 (F) *Quantitative Hydrogeology* (3)
CEVE 420 (F) *Environmental Remediation and Restoration* (3)
CEVE 514 (S) *Advanced Hydrology and Hydraulics* (3)
CEVE 518 (S) *Contaminant Hydrogeology (3)*
Or any approved hydrology or water resources course in CEE

***Area III Structural Engineering and Mechanics (select six approved hours)***
CEVE 304 (S) *Structural Analysis* (3)
CEVE 400 (S) *Advanced Mechanics of Materials* (3)
CEVE 405 (S) *Steel Design* (3)
CEVE 407 (F) *Reinforced Concrete Design* (3)
CEVE 408 (F) *Structures Lab* (1)
CEVE 427 (F) *Matrix Methods in Structural Mechanics* (3)
CEVE 476 (S) *Structural Dynamic Systems* (3)*
Or any approved structures/mechanics course in CEE/MECH

***Area IV Urban Infrastructure, Reliability and Management (select six approved hours)***
CEVE 313 (S) *Uncertainty and Risk Assessment* (3)
CEVE 322 (S) *Engineering Economics* (3)
CEVE 452 (S) *Urban Transportation Systems* (3)
CEVE 460/560 (F) *Bridge Engineering and Extreme Events** (3)*
CEVE 470 (F) *Basic Soil Mechanics* (4)
CEVE 479/505 (F) *Engineering Project Management and Economics* (3)
CEVE 492 (F) *Modeling and Analysis of Networked Systems* (3)*
Or any approved urban infrastructure, reliability and management course in CEE/MGMT/ECON/CAAM/STAT

***List of CEE Recommended Elective Courses (in addition to 500-Level CEVE courses, and select courses from MECH, CAAM, CHEM, ECON, STAT):***
CEVE 314, 320, 417, 424, 454, 490, 499
(details listed on website)

*Any core courses listed in a CEE track above can be taken as an elective when completed in addition to the 10 required to fulfill your track (Focus Area Courses (18 hrs) & Focus Area Engineering Electives (12 hrs).*

***Offered alternative years***

## BS Program Objectives

*(See website at cee.rice.edu/ for additional information.)*

1. Develop/demonstrate strong problem-solving and communication skills
2. Achieve leadership position in technical or managerial areas
3. Demonstrate initiative and innovative thinking in project work
4. Maintain a keen awareness of ethical, social, environmental, and global risk concerns
5. Remain engaged in continuing learning, including advanced degrees
6. Prepare for a Professional Engineering License

## BA Degree in Civil and Environmental Engineering

The Bachelor of Arts (BA) degree in Civil and Environmental Engineering is designed to provide access to students with interests across different disciplines at Rice University; with an emphasis on either Environmental (Track E) or Civil (Track C) Engineering. Each Track is to be tailored to the specific needs of each student by discussions with, and approval by, the CEE departmental advisor.

An advisor will be assigned by the CEE department chair, normally during the first year of study. Five core courses in one Track plus seven courses in a focused specialty area of study are required (see below for example areas); total CEE requirements equal approximately 37-38 hours (depending on the Track) plus the necessary math and science courses, including prerequisites for core courses. In addition, each student is responsible for satisfying the university distribution requirements (24 hours) and additional electives for a total of 120 hours (60 of them outside the major) for graduation with a BA in Civil and Environmental Engineering. **Although not required, students are encouraged to double major when pursuing the BA degree.**

The coherent and complete core curriculum is designed to give Rice undergraduate students a consistent technological literacy through the lens of Civil and Environmental Engineering and to prepare students for graduate school in engineering, various sciences (depending upon focus), economics, business MBA, political science, law, or medicine. Select students will be invited to finish an **accelerated MS/PhD degree** in the CEE Department (see your advisor or department chair for details). Those students who want to obtain an engineering degree from a program accredited by the Engineering Accreditation Commission (EAC) of ABET must follow one of the BS programs the EAC has accredited at Rice, like the BS in Civil Engineering.

A student must demonstrate proficiency in the basic concepts of mathematics, computation, chemistry, and physics. Generally, this will require that these subjects were studied previously, e.g., AP exams, or through concurrent enrollment with CEVE 101, 307, or 211. Typical requirements on math and science for BA degrees are specified in the departmental website

**BA Degree in Civil and Environmental Engineering**

***General Math and Science Requirements***

***Track C*: Civil Core Curriculum***
CEVE 101 *Fundamentals of Civil and Environmental Engineering* (3)
CEVE 211 *Engineering Mechanics* (3) (pre-reqs: PHYS 101 and MATH 101)
CEVE 310 *Principles of Environmental Engineering* (3)
CEVE 311+ 312 *Mechanics of Solids and Structures plus laboratory* (4) (pre-reqs: CEVE 211)
CEVE 363 *Applied Fluid Mechanics* (3) (pre-reqs: MATH 212 and PHYS 111)

Total Hours: 16

***Track E: Environmental Core Curriculum***
CEVE 101 *Fundamentals of Civil and Environmental Engineering* (3)
CEVE 307 *Energy and the Environment* (3) (pre-reqs: MATH 101 and PHYS 101)
CEVE 310 *Principles of Environmental Engineering* (3)
CEVE 401 *Chemistry for Environmental Engineering and Sciences* (4) (pre-reqs: freshman CHEM or equivalent freshman, Calculus or equivalent)
CEVE 412 *Hydrology and Water Resources Engineering* (3)

Total Hours: 16

Seven (7) courses from approved electives must include 4 courses from 1 specific focus area; 4 of these 7 courses must be 300 level or above, and 2 of these upper-division courses must be from the CEE curriculum.

Example focus specialty areas are suggested below; however students are encouraged to prepare their own specialty related to their career objectives in consultation with, and approval by, their CEE faculty advisor.

1. Environmental Science and Engineering
2. Civil Engineering
3. Biology
4. Chemical Engineering
5. Chemistry
6. Economics
7. Management

Engineers Without Borders (EWB) is an important component of the CEE program, and BA students with their flexible curriculum are also encouraged to participate. This exciting new endeavor allows undergraduates to have an experience in a developing country, where they are able to design and build a project to help society. Students have been attracted to the EWB program in large numbers and the local chapter is one of the most successful in the United States. Some CEE courses are EWB-related, providing the opportunity to also obtain credit hours.

## Degree Requirements for MCEE, MS, and PhD

*(Please visit Graduate Degrees and Graduate Academic Regulations for more information in relation to Rice policies.)*

**Admission**—Applicants pursuing graduate education in environmental engineering or hydrology should have a BS or BA in related areas of science and engineering and preparation in mathematics, science, and engineering or related courses. A BS degree in Engineering or a degree in natural science is preferred. Applicants pursuing graduate education in structural engineering, structural mechanics, and geotechnical engineering should have a BS in Civil Engineering with a significant emphasis on structural engineering, but students with other undergraduate degrees may apply if they have adequate preparation in mathematics, mechanics, and structural analysis and design. Successful applicants typically have at least a 3.00 (B) grade point average in undergraduate work and high Graduate Record Examination (GRE) scores. For general university requirements, see Graduate Degrees and Admission to Graduate Study.

**MS Program**—The Master of Science degree is offered in both civil engineering and environmental engineering. For general university requirements, see Graduate Degrees. To earn a MS degree, students must:

- Complete at least 24 semester hours of approved courses and 6 semester hours of thesis research. For students studying environmental engineering, this must include one course each in environmental chemistry, water treatment, hydrology, and air quality. For students studying civil, structural engineering, and mechanics, this must include one course each in structural engineering, mechanics, advanced mathematics, and dynamic systems (comparable course work completed previously may be substituted for the core courses).
- Select a thesis committee according to department requirements and conduct original research in consultation with the committee.
- Present and defend in oral examination an approved research thesis.

Students take the oral exam only after the committee determines the thesis to be in a written format acceptable for public defense. Normally, students take two academic years and the intervening summer to complete the degree.

Students intending to extend their studies into the PhD degree program should note that the department does not grant an automatic MS degree to candidates who have not written a satisfactory master's thesis.

**MCEE Program**—The Master of Civil and Environmental Engineering (MCEE) is a professional non-thesis degree requiring 30 semester hours of approved course work including a final project of 2 semester hours. Students who have a BS or BA degree in any field of engineering or related study may apply. Depending on their background, some students may need to fulfill prerequisites or take remedial engineering courses to earn the MCEE degree. Refer to our website, www.ceve.rice.edu. To earn a MCEE degree, students must:

- Complete at least 30 semester hours of upper-level courses (at the 300 level or higher).
- At least 24 semester hours must be at Rice University (no more than 6 hours of transfer credit), and at least 15 hours of course work must be at or above the 500 level.
- All courses must be in the relevant field.
- Fulfill the minimum residency, which is one fall or spring semester in full-time or part-time graduate study.

**PhD Program**—To earn a PhD degree, candidates must spend at least four semesters in full time study at Rice and successfully accomplish the following. (See candidacy, oral examinations, and the thesis in Graduate Students

section).

- Complete 90 semester hours of approved credits past BS (60 semester hours past MS) with high standing (See guidelines on our website, www.ceve.rice.edu).
- Pass a preliminary examination in civil and environmental engineering (see guidelines on our website, www.ceve.rice.edu).
- Pass a qualifying examination on course work, proposed research, and related topics
- Complete a dissertation indicating an ability to conduct original and scholarly research
- Pass a formal public oral examination on the thesis and related topics. PhD students in the EES track take the preliminary exam, administered by department faculty, after two semesters of course work. Civil engineering graduate students will be required to take their written preliminary exam on Friday before the classes of the spring semester, 1.5 years from the fall semester they enter into the program, and take the oral exam on Friday the first week of classes. Students who pass this exam then form a doctoral committee according to department requirements. The qualifying examination is administered by the doctoral committee after students develop a research proposal to demonstrate their preparation for the proposed research and identify any areas requiring additional course work or study. As part of the advanced degree training, we also may require students to assist the faculty in undergraduate courses and laboratory instructions.

## Degrees Offered: BA, MCAM, MA, PhD

Courses within this major can provide foundations applicable to the many fields of engineering, physical sciences, life sciences, behavioral and social sciences, and computer science. Undergraduate majors have considerable freedom to plan a course of study consistent with their particular interests.

The professional degree (MCAM), for persons interested in practicing within this field, emphasizes general applied mathematics, operations research optimization, and numerical analysis, while the MA and PhD programs concentrate on research. Faculty research interests fall in the four general areas of numerical analysis and computation; partial differential equations; operations research and optimization; and mathematical modeling in

physical, biological, or behavioral sciences.

A further advanced interdisciplinary degree program in computational science and engineering (CSE) addresses the current need for sophisticated computation in both engineering and the sciences. For more information, see Computational Science and Engineering.

A joint MBA/Master of Engineering degree also is available in conjunction with the Jesse H. Jones Graduate School of Management.

## Degree Requirements for BA in Computational and Applied Mathematics

For general university requirements, see Graduation Requirements. Students majoring in computational and applied mathematics are required to complete the 49-52 semester hours spelled out in the following program of study.

**Introductory Courses**: Typically completed during the first two years
CAAM 210 *Introduction to Engineering Computation*
CAAM 335 *Matrix Analysis*
MATH 101 *Single Variable Calculus I**
MATH 102 *Single Variable Calculus II*
MATH 212 *Multivariable Calculus*+

*Students with prior experience with calculus may replace MATH 101 with a 3-credit quantitative elective at the 200-level or above, as approved by a CAAM undergraduate advisor. (This quantitative elective is in addition to the four electives required below.)

+Students may substitute Honors Calculus sequence (MATH 221, 222) for MATH 212.

Entering students should enroll in the most advanced course commensurate with their background; advice is available from the CAAM department during Orientation Week.

**Intermediate Courses**: Typically completed by the end of the third year
CAAM 336 *Differential Equations in Science and Engineering*
CAAM 378 *Introduction to Operations Research and Optimization*
MATH 302 *Elements of Analysis* (or MATH 321 *Introduction to Analysis I*)*
STAT 310 *Probability and Statistics (or* STAT 331 *Applied Probability)*

*Students who plan to pursue graduate studies in Computational and Applied Mathematics should take MATH 321 and MATH 322

**Advanced Courses**: Typically completed during the fourth year
CAAM 453 *Numerical Analysis I*
and one of the following two courses:
CAAM 454 *Numerical Analysis II* or
CAAM 471 *Linear and Integer Programming*

**Design Project**: Typically completed during the fourth year
CAAM 495 *Senior Design Project I*
CAAM 496 *Senior Design Project II*

**Electives**: Four courses at 300 level or above; two of which must be at the 400-level or above (chosen in consultation with a CAAM undergraduate advisor).

**Highly Recommended Electives:**
MATH 322 *Introduction to Analysis II*
CAAM 415 *Theoretical Neuroscience*
CAAM 420 *Computational Science I*

CAAM 423 *Partial Differential Equations I*
CAAM 452 *Numerical Methods for Partial Differential Equations*
CAAM 470 *Introduction to Graph Theory*
CAAM 560 *Optimization Theory*
MATH 425 *Integration Theory*
MATH 427 *Complex Analysis*
STAT 431 *Overview of Mathematical Statistics*

## Course Requirements for a Minor in Computational and Applied Mathematics

A minor in computational and applied mathematics requires the completion of at least six classes (a minimum of 18 credit hours)

***Required classes:***
CAAM 210 Introduction to Engineering Computation
CAAM 335 Matrix Analysis

One of the following:
CAAM 336 Differential Equations in Science and Engineering
CAAM 378 Introduction to Operations Research and Optimization

***Elective classes:***
Three electives (3 credits each): CAAM courses at the 300 level or above, including at least two classes at the 400 level or above.

Last Revised : August 11, 2014

# Computational and Applied Mathematics

## Degree Requirements for MCAM, MA, and PhD in Computational and Applied Mathematics

**Admission**—Admission to graduate study in computational and applied mathematics is open to qualified students holding bachelor's or master's degrees (or their equivalent) in engineering; mathematics; or the physical, biological, mathematical, or behavioral sciences. Department faculty evaluate the previous academic record and credentials of each applicant individually. For general information, see Graduate Degrees and Admission to Graduate Study.

Applicants should be aware that it normally takes two years to obtain a master's degree and an additional two to four years for the doctoral degree.

**MCAM Program**—This professional degree program emphasizes the applied aspects of mathematics. The MCAM degree requires satisfactory completion of at least 30 semester hours of course work approved by the department.

**MA Program**—For an MA in computational and applied mathematics, students must:

- Complete at least 30 semester hours at the graduate level, including five courses in computational and applied mathematics, in addition to thesis work
- Produce an original thesis acceptable to the department
- Perform satisfactorily on a final public oral examination on the thesis

For students working toward the PhD, successful performance on the master's thesis may fulfill the PhD thesis proposal requirements upon approval by the thesis committee. Students working toward the PhD, who have completed a master's thesis prior to entering the PhD program, may earn the MA after obtaining approval of their candidacy for the PhD.

**PhD Program**—For a PhD in computational and applied mathematics, students must:

- Complete a course of study approved by the department to establish a broad foundation in applied mathematics
- Perform satisfactorily on qualifying examinations and reviews
- Produce an original thesis acceptable to the department
- Perform satisfactorily on a final public oral examination on the thesis

**Financial Assistance**—Graduate fellowships, research assistantships, and graduate scholarships are available and are awarded on the basis of merit to qualified students. Current practice in the department is for most doctoral students in good standing to receive some financial aid.

### Degrees Offered: MCSE, MA*, PhD

The advanced degree program in computational science and engineering (CSE) addresses the current need for sophisticated computation in both engineering and the sciences. Such computation requires an understanding of parallel and vector capabilities and a range of subjects including visualization, networking, and programming environments. An awareness of a variety of new algorithms and analytic techniques also is essential to maximizing the power of the new computational tools.

The professional degree (MCSE) is for persons interested in practicing within this field, while the PhD program concentrates on research. For additional information, go to the MCSE website.

*Students generally not admitted to this as a terminal program.

Department Info | Undergraduate Requirements | Graduate Requirements | Course Listings

### Degree Requirements for Master's in Computational Science and Engineering

The Master in Computational Science and Engineering (MCSE) is a non-thesis degree program offered jointly by the Department of Computational and Applied Mathematics, Computer Science and Statistics in the School of Engineering. The program is designed to provide training and expertise in modern computational techniques that will find application in a wide range of industries, and technical and managerial functions within them. The MCSE graduate degree will prepare students interested in positions such as Computational Scientist, Computational Engineer, Big Data Analyst, or who desire to specialize in specific areas of high-performance computing and software development techniques and scientific data analysis and visualization.

### Requirements

- BA or BS in an engineering or science discipline, with training in engineering mathematics, statistical foundations, and programming methodology.
- Requirements for Professional Degrees: See here.
- 30 hours of approved advanced study:
  -3 core courses (up to 10 credits), student to choose one out of each group:

**Group 1: Computational and Applied Mathematics**

CAAM 420 (3) Comp Science I
CAAM 452 (3) Numerical Methods for Partial Differential Equations
CAAM 453 (3) Numerical Analysis 1
CAAM 471 (3) Introduction to Linear and Integer Programming
CAAM 564 (3) Numerical Optimization

**Group 2: Computer Science**

COMP 322 (3) Principles of Parallel Programming
COMP 410 (4) Software Engineering Methodology – or: new course in the works
COMP 422 (4) Introduction to Parallel Computing
COMP 430 (3) Databases

**Group 3: Statistics**

STAT 310 (3) Intro to probability and mathematical statistics
STAT 312 (3) Probability & Statistics for Civil & Environmental Engineers
STAT 331 (3) Applied Probability
STAT 410 (3) Introduction to Regression and Statistical Computing
STAT 541 (3) Multivariate Analysis

-7 electives courses selected from list above or the extended list below. At least one must be from Communication, Leadership, Management and Ethics Group.

**Computational and Applied Math**

CAAM 335 (3) Matrix Analysis

CAAM 420 (3) Computational Science I
CAAM 436 (3) Partial Differential Equations of Mathematical Physics
CAAM 452 (3) Numerical Methods for Partial Differential Equations

…and others…

**Computer Science**

COMP 322 (3) Principles of Parallel Programming
COMP 360/560 (4) Introduction to Computer Graphics
COMP 410 (4) Software Engineering Methodology - or: new course in the works
COMP 422 (4) Introduction to Parallel Computing

…and others…

**Statistics**

STAT 405 (3) Statistical Computing and Graphics
STAT 410 (3) Introduction to Regression and Statistical Computing
STAT 411 (3) Statistical Data Analysis
STAT 502 Neural Machine Learning

…and others…

**Communication, Leadership, Management and Ethics**

ENGI 610 (3) Management for Science and Engineering
ENGI 510 (3) Technical and Managerial Communications
ENGI 529 (3) Ethics and Engineering Leadership

…and others…

Note: Only one of *COMP 422 or CAAM 520 can be counted towards a track*

## Focus Areas

If a student wants to prepare for the career paths listed below, faculty suggests that at least three of the above electives should be chosen as follows:

**High Performance Computing focus:**

CAAM 420 (3) Comp Science I
CAAM 520 (3) Computational Science II
COMP 322 (3) Principles of Parallel Programming
COMP 422 (3) Parallel Computing

..and others…

**Big-Data focus:**

COMP 410 (4) Software Engineering Methodology - or: new course in the works
COMP 430 (3) Databases
STAT 405 (3) Statistical Computing and Graphics
STAT 410 (3) Introduction to Regression and Statistical Computing
STAT 502 Neural Machine Learning I
CAAM 471 (3) Introduction to Linear and Integer Programming

…and others…

## Application deadlines

Fall admission—April 30
(You have to apply directly to the program)

For additional information go to the MCSE website.

## Degree Requirements for PhD in Computational Science and Engineering

**CSE Program Area**—Recognizing the increasing reliance of modern science and engineering on computation as an aid to research, development, and design, the Department of Computational and Applied Mathematics, in conjunction with the Departments of Biochemistry and Cell Biology, Earth Science, Computer Science, Chemical and Biomolecular Engineering, Electrical and Computer Engineering, Civil and Environmental Engineering, and Statistics, has established an advanced degree program in computational science and engineering (CSE). The program focuses on modern computational techniques and provides a resource for training and expertise in this area.

The program is administered by a faculty committee chosen by the deans of engineering and natural sciences. The Computational Science Committee (CSC) helps students design an appropriate course of study and sets the examination requirements.

Students may enter the CSE program either directly or indirectly through one of the participating departments (see list above). In all cases, however, students must fulfill the admissions requirements of their associated department. Students then meet the normal requirements for graduate study within that department in every way (including teaching and other duties), except that the curriculum and examination requirements are set by the CSC.

Study at the doctoral level seeks to advance the field through original research. For general university requirements, see Graduate Degrees. For the PhD in computational science and engineering, students must:

- Complete a course of study approved by the CSC, including at least two courses outside the major area
- Perform satisfactorily on preliminary and qualifying examinations and reviews
- Produce an original thesis acceptable to the CSC
- Perform satisfactorily on a final public oral examination on the thesis

## Degrees Offered: BA, BSCS, MCS, MS, PhD

Computer science is concerned with the study of computers and computing, focusing on algorithms, programs and programming, and computational systems. The main goal of the discipline is to build a systematic body of knowledge, theories, and models that explain the properties of computational systems and to show how this body of knowledge can be used to produce solutions to real-world computational problems. Computer science is the intellectual discipline underlying information technology, which is widely accepted now as the ascendant technology of the next century. Students in computer science at Rice benefit from the latest in equipment and ideas as well as the flexibility of the educational programs. The research interests of the faculty include algorithms and complexity, artificial intelligence and robotics, compilers, distributed and parallel computation, graphics and visualization, operating systems, and programming languages.

The department offers two undergraduate degrees: the Bachelor of Arts degree (BA) and the Bachelor of Science in Computer Science degree (BSCS). The department offers two master's degrees: the professional Master of Computer Science degree (MCS) and the research-oriented Master of Science degree (MS). The MS degree is a research degree requiring a thesis in additional to course work. The MS degree is mainly for students pursuing their Ph.D. Typically students are not admitted directly into the MS program. Students wishing to pursue a terminal Masters Degree should apply to the MCS program. Students wishing to pursue a Ph.D. should apply directly to the Ph.D. program, which the department also offers.

A joint MBA/Master of Engineering degree also is available in conjunction with the Jesse H. Jones Graduate School of Management.

Last Revised : August 11, 2014

# Computer Science

## The George R. Brown School of Engineering

## Degree Requirements for BA in Computer Science

For general university requirements, see Graduation Requirements. The undergraduate program in computer science has been designed to accommodate a wide range of student interests. The program is sufficiently flexible for a student to customize it to his or her interests. A student can develop a broad educational program that couples computer science education with a variety of other fields in engineering, natural sciences, the humanities, or social sciences. Alternatively, a program might be designed for a student preparing for graduate study in computer science or for a career in computing and information technology.

The undergraduate program consists of required math and science courses; computer science core courses, including introductory courses and upper-level courses ensuring knowledge in a broad range of areas; and computer science electives, which give students the freedom to explore specific interests. Students earning a BA in computer science must complete at least 60 semester hours of courses in the major and at least 120 semester hours in total.

***Math and Science Courses***

Five courses for a total of 15 hours, required for all majors, usually taken in the freshman and sophomore years.:
MATH 101 *Single Variable Calculus I*
MATH 102 *Single Variable Calculus II*
One of: MATH 211 *Ordinary Differential Equations and Linear Algebra*
or MATH 212 *Multivariable Calculus*
or MATH 221 *Honors Calculus III*
or MATH 222 *Honors Calculus IV*
One of: STAT 310 *Probability and Statistics*
or STAT 331 *Applied Probability*
or STAT 312 Probability for CEVE
One of: MATH 355 *Linear Algebra*
or MATH 354 *Honors Linear Algebra*
or CAAM 335 *Matrix Analysis*

***Computer Science Core Courses***
Ten courses for a total of 39 hours.
One of: COMP 140 *Computational Thinking* or COMP 160 *Introduction to Computer Gaming*
COMP 182 *Algorithmic Thinking*
COMP 215 *Introduction to Program Design in Java*
ELEC 220 *Fundamentals of Computer Engineering*
COMP 321 *Introduction to Computer Systems*
COMP 310 *Advanced Object-Oriented Programming*
COMP 322 *Principles of Parallel Programming*
COMP 382 *Reasoning about Algorithms*

One of: COMP 411 *Programming Languages*
or COMP 412 *Compiler Construction*
COMP 421 *Operating Systems and Concurrent Programming*

***Computer Science Electives***

Two courses for a total of at least six hours in computer science at the 300 level or higher. One of these may be an independent study project. Departmental approval is required to use a 600 level course as an elective.

## Degree Requirements for BS in Computer Science

The BS degree is designed for students who are interested in a more in-depth study of computer science to prepare themselves for a professional career in the computing industry. To receive a BS degree, you must complete all the previously described requirements of the BA degree, plus the following additions. Students earning a BS in computer science must complete at least 82 semester hours of courses in the major and at least 128 semester hours in total.

***Additional Math and Science Courses***

One of: PHYS 101 *Mechanics*
or PHYS 111 *Mechanics*
or PHYS 125 *General Physics*

One of: PHYS 102 *Electricity and Magnetism*
or PHYS 112 *Electricity and Magnetism*
or PHYS 126 *General Physics II*

***Capstone Sequence***

At least four courses for a total of at least 15 hours:

A coherent set of courses in some computer science specialization and including a design component (one of COMP 402 *Production Programming*, COMP 410 *Software Engineering Methodology*, COMP 460 *Advanced Computer Game Creation*). Students can adopt a preset cap or design their own, with advisor approval. Samples are listed on the department's website.

Last Revised : August 11, 2014

# Computer Science

## The George R. Brown School of Engineering

Department Info | Undergraduate Requirements | Graduate Requirements | Course Listings

## Degree Requirements for MCS and MS in Computer Science

For general university requirements, see Graduate Degrees. The professional MCS degree is a terminal degree for students intending to pursue a technical career in the computer industry. To earn the MCS degree, students must successfully complete 30 semester hours of course work approved by the department and following the plan formulated in consultation with the department advisor. (In general, the courses must be at the 400 level or above. At least 15 hours must be at the 500 level or above.) Areas of concentration for the MCS include algorithms and complexity, artificial intelligence, robotics, compiler construction, distributed and parallel computing, graphics and geometric modeling, operating systems, and programming languages. The professional program normally requires three semesters of study.

The MCS degree with a concentration in bioinformatics is for students intending to pursue a technical career in the biotechnology industry. Students learn to integrate mathematical and computational methods to analyze biological, biochemical, and biophysical data. This program requires prior background in computer science, biosciences, and mathematics. To earn this degree, students must successfully complete 40 hours of approved course work meeting departmental requirements. This program normally requires four semesters of study.

MCS students are expected to pay full tuition and all fees. No financial assistance will be given to MCS students.

The MS degree is a research degree requiring a thesis in addition to course work.

## Degree Requirements for PhD in Computer Science

The PhD degree is for students planning to pursue a career in computer science research and education. The doctoral program normally requires four to six years of study. To earn a PhD in computer science, students must:

- Meet departmental course requirements
- Complete a COMP 590 project by the end of the third semester
- Complete a master's thesis by the end of the fifth semester, if a previous master's thesis has not been approved by the graduate committee
- Pass a qualifying examination in an area of specialization within seven semesters after entering the PhD program
- Conduct original research, submit an acceptable PhD thesis proposal, and successfully defend the thesis proposal
- Submit an acceptable PhD thesis that reports research results and pass a final oral defense

Students who successfully meet the first three requirements are awarded the Master of Science degree. Students successfully meeting all requirements, plus any departmental and university requirements, are awarded the PhD degree.

**Financial Assistance**—Fellowships and research assistantships are available to students in the PhD program. Both provide a monthly stipend for the academic year and cover all tuition expenses. More substantial monthly stipends may be available during the summer for students working on departmental research projects. In all cases, continued support is contingent on satisfactory progress in the program. PhD students also are expected to assist in the teaching and administration of undergraduate and graduate courses.

**Additional Information**—For further information and application materials, write the Department of Computer

Science–MS 132, Rice University, P.O. Box 1892, Houston, Texas 77251-1892.

## Degrees Offered: BA, BSEE, MEE, MS, PhD

Provide high-quality degree programs that emphasize fundamental principles, respond to the changing demands and opportunities of new technology, challenge the exceptional abilities of Rice students, and prepare students for roles of leadership in their chosen careers. Undergraduate and graduate programs in ECE offer concentrations in the areas of Computer Engineering, Neuroengineering, Photonics and Nanoengineering and Systems. Computer Engineering topics include: computer architecture, high performance application specific systems, mobile and embedded systems, integrated circuits and antennas for medical imaging and bio-sensing, and parallel I/O for large-scale network storage systems. Neuroengineering topics include: neural signal processing, brain-computer interfaces at the device, circuit and systems levels. Photonics and Nanoengineering topics include: nanophotonics/nanospectroscopy, molecular electronics, biophotonics, ultrafast optics and optoelectronics, materials for energy, semiconductor optics and devices, multispectral imaging and terahertz imaging, and condensed matter physics/materials science. Systems topics include: communications systems, dynamical systems and computation, networks, signal and image processing, wireless networking, pattern recognition, scalable personal healthcare, and computational neuroscience and neuroengineering. The latest information on the department's faculty, research areas, and degree programs and requirements can be found on the ECE website.

## The George R. Brown School of Engineering

## Undergraduate Degree Programs

The department offers two undergraduate degrees: the bachelor of arts (BA) and the bachelor of science in electrical engineering (BSEE). The BA degree provides a basic foundation in electrical and computer engineering that the student can build on to construct a custom program. Because of its flexibility and large number of free electives, the BA can be combined easily with courses from other departments to create an interdisciplinary program. This may be particularly appropriate for students planning further study in law, business, or medicine. The program leading to the BA Degree is not accredited by the Engineering Accreditation Commission of ABET.

The program leading to the BSEE degree is accredited by the Engineering Accreditation Commission (EAC) of ABET, (ABET, Inc. 111 Market Place, Suite 1050, Baltimore, MD 21202-4012, Phone: 410-347-7700, Email: eac@abet.org, Website: www.abet.org). The BSEE degree is the usual degree taken by those students planning a career of engineering practice. The program for the BSEE requires more hours and greater depth than the BA degree, however it still provides considerable flexibility and can reduce the time required to become a licensed professional engineer. In the final year, BSEE students undertake a capstone design project. Both degrees are organized around a core of required courses and a selection of elective courses from four Specialization Areas: Computer Engineering; Neuroengineering; Photonics and Nanoengineering; and Systems: control, communication, and signal processing. Each student's program must contain a course sequence that provides depth in one area and courses from at least two areas to provide breadth. The specialization electives provide the flexibility to create a focus that crosses traditional areas. Because of the number of options, students should consult early with departmental advisors to plan a program that meets their needs.

Students considering a major in Electrical and Computer Engineering should take physics (PHYS 101, 102) and calculus (MATH 101, 102) in their Freshman year, and also CHEM 121, or COMP 140 depending on their area of interest. The first core courses in the department, ELEC 220, ELEC 241, and ELEC 261 are usually taken during the Sophomore year, along with more math and science. Students entering with advanced placement have more scheduling options and may take some of these core courses in Freshman year. Student should consult with one of the department's undergraduate advisors.

## Degree Requirements for BS in Electrical Engineering

A BSEE program must have a total of at least 134 semester hours and include the following courses. A course can satisfy only one program requirement. Students who place out of required courses without transcript credit must substitute other approved courses in the same area. See Undergraduate Degrees and Graduation Requirements for general degree requirements. Current degree requirements and planning sheets can be found on the ECE website.

***Mathematics and Science Courses***
CHEM 121 *General Chemistry*
ELEC 261 *Electronic Materials and Quantum Devices*
ELEC 303 *Random Signals*
MATH 101 *Single Variable Calculus I*
MATH 102 *Single Variable Calculus II*
MATH 212 *Multivariable Calculus*
MATH 355 *Linear Algebra* or CAAM 335 *Matrix Analysis*
PHYS 101 *Mechanics*
PHYS 102 *Electricity and Magnetism*

Additional approved mathematics and science courses to bring the total to 32 hours.

***ECE Core Courses***
ELEC 220 *Fundamentals of Computer Engineering*
ELEC 241 *Fundamentals of Electrical Engineering I*
ELEC 242 *Fundamentals of Electrical Engineering II*
ELEC 301 *Introduction to Signals*
ELEC 305 *Introduction to Physical Electronics*
ELEC 326 *Digital Logic Design*

***Computation Course****:*
COMP 140 Computational Thinking

***Design***
ELEC 494 Senior Design

***Design Laboratory:*** *Students choose one of the approved design laboratory courses typically based on their Specialization Area:*
ELEC 327 *Implementation of Digital Systems*
ELEC 332 *Electronic Systems: Principles and Practice*
ELEC 364 *Photonic Measurements: Principles and Practice*
*Note: The required design laboratory does not count as specialization*

## Design Requirements for BS in Electrical Engineering

All BSEE degree candidates must complete a design sequence of courses taken during the junior and senior years. There are several related components to the BSEE Senior Design sequence: a design laboratory course, and the actual design project. In the Junior year, students choose one of the approved Design Laboratory courses based on their Specialization Area:
a) ELEC 327: Implementation of Digital Systems for Computer Engineering Area
b) ELEC 332: Electronic Systems Principles and Practice for Systems Area
c) ELEC 327 or ELEC 332 for Neuroengineering
d) ELEC 364: Photonic Measurements: Principles and Practice for Photonics and Nanoengineering Area

Within the senior design sequence, professional issues and project management for Electrical Engineers provides instruction in professional engineering topics and the nontechnical aspects of the design process, including ethics, design methodology, project planning, technical presentations, and documentation. NOTE: The required Design Laboratory does not count as specialization.

Both semesters of the senior year are devoted to the team design project using the resources of the Oshman Engineering Design Kitchen through the ELEC 494 Senior Design course. In the fall semester of the senior year, students finalize their project topics in coordination with the faculty and begin the design project. In the spring semester, students continue in the laboratory to complete their design project. Several presentations and design contests within the ECE department and the School of Engineering occur in the spring in which to showcase the projects.

## Specialization Area Courses for BS in Electrical Engineering

ECE undergraduate degrees are organized around a core of required courses and a selection of elective courses from four Specialization Areas: Computer Engineering; Neuroengineering; Photonics and Nanoengineering; and Systems: control, communication, and signal processing. The Computer Engineering area provides a broad background in computer systems engineering, including computer architecture, digital hardware engineering, software engineering, and computer systems performance analysis. Neural engineering is an emerging discipline that exploits engineering techniques to understand, repair, manipulate, or treat the diseases of human neural systems and networks. The Photonics and Nanoengineering area encompasses studies of electronic materials, including nanomaterials, semiconductor and optoelectronic devices, lasers and their applications. The Systems area focuses on wireless communication systems, digital signal processing, image processing and networking. The specialization electives provide the flexibility to create a focus that crosses traditional areas.

In addition to the Design Lab choice of ELEC 327, 332, or 364, the BSEE requires six specialization courses from at least two areas, including at least three courses in one area. Also, ELEC graduate courses in the 500 level series and equivalent courses from other departments may be used to satisfy specialization area requirements with permission. Consult departmental Advisors and the ECE website for the latest information.

***Note:***

- *ELEC 301 is a required course for the BSEE degree; however ELEC 301 can count as a specialization course for the BA degree.*
- *If the Design Laboratory requirement (ELEC 327, 332, or 364) is satisfied with the lab in their chosen Major Specialization Area, then the student takes 3 of 6 courses in their chosen Major Specialization Area. However, if the Design Laboratory requirement is satisfied with the lab in their Minor Area, then it is recommended that the student takes 4 of 6 courses in their chosen Major Specialization Area. It is important to consult a departmental advisor in this situation or if interested in taking a second Design Laboratory course.*

### Computer engineering:

ELEC 323+, 342, 345, 419, 420+, 421+, 424, 425, 427, 429+ and 446+ and COMP 321+ and 430+

***Note:*** *The courses marked above with a plus (+). ELEC 323/COMP 322, ELEC 420/COMP 482, ELEC 421/COMP 421, ELEC 429/COMP 429, ELEC 446/COMP 446, COMP 321 and COMP 430 are courses listed or crosslisted with Computer Science.*

*The sequence of COMP 140 , COMP 182, COMP 215 is recommended in addition for the Computer Engineering Area as these courses are pre-requisites for the cross-listed Computer Science courses.*

### Neuroengineering:

ELEC 342, 345, 381, 431, 480, 481, 482, 485, 486, 488 and 489

### Photonics and nanoengineering:

ELEC 262, 306, 342, 361, 365, 462 and PHYS 302 and 311

### Systems: Communications, Control, Networks and Signal Processing:

ELEC 302, 306, 345, 430, 431, 433, 434, 435, 436, 437, 438, 439 and 498

## BSEE Unrestricted Electives

Additional courses to provide the BSEE minimum requirement of at least 134 semester hours.

## Degree Requirements for BA

The BA degree provides a basic foundation in Electrical and Computer Engineering that is highly flexible, permitting a student to tailor the program to his or her interests be they broad or highly focused. Because of its flexibility and large number of free electives, the BA can be combined easily with courses from other departments to create an interdisciplinary program. This may be particularly appropriate for students planning further study in law, business, or medicine. The Program leading to the BA Degree is not accredited by the Engineering Accreditation Commission of ABET. A BA program must have a total of at least 121 semester hours and include the following courses. A course can satisfy only one program requirement. Students who place out of required courses without transcript credit must substitute other approved courses in the same area. See Undergraduate Degrees and Graduation Requirements for the general degree requirements. Current degree requirements and planning sheets may be found on the ECE website.

***Mathematics and Science Courses***
ELEC 261 *Electronic Materials and Quantum Devices*
ELEC 303 *Random Signals (Note*: ELEC 303 *is required for the BA and must have instructor's approval)*
MATH 101 *Single Variable Calculus I*
MATH 102 *Single Variable Calculus II*
MATH 212 *Multivariable Calculus*
MATH 355 *Linear Algebra* or CAAM 335 *Matrix Analysis*
PHYS 101 *Mechanics*
PHYS 102 *Electricity and Magnetism*

***ECE Core Courses***
ELEC 220 *Fundamentals of Computer Engineering*
ELEC 241 *Fundamentals of Electrical Engineering I*
ELEC 242 *Fundamentals of Electrical Engineering II*
ELEC 305 *Introduction to Physical Electronics*

ELEC 326 *Digital Logic Design*

***Computation Course:***
COMP 140 *Computational Thinking*

***Design Laboratory:*** *Students choose one of the approved design laboratory courses typically based on their Specialization Area:*
ELEC 327 *Implementation of Digital Systems*
ELEC 332 *Electronic Systems: Principles and Practice*
ELEC 364 *Photonic Measurements: Principles and Practice*
*Note: The required Design Laboratory does not count as specialization.*

## Specialization Area Courses for BA in Electrical Engineering

The BA program requires four courses, including at least two courses in one area, and courses from at least two areas. In addition, ELEC graduate courses in the 500 level series and equivalent courses from other departments may be used to satisfy specialization area requirements with permission. Consult departmental advisors and the ECE website for the latest information.

***Note:***

- *ELEC 301 is required course for the BSEE degree; however ELEC 301 can count as a specialization course for the BA degree*.
- *If the Design Laboratory requirement (ELEC 327, 332, or 364) is satisfied with the lab in their chosen Major Specialization Area, then the student takes 2 of 4 courses in their chosen Major Specialization Area. However, if the Design Laboratory requirement is satisfied with the lab in their Minor Area, then it is recommended that the student takes 3 of 4 courses in their chosen Major Specialization Area. It is important to consult a departmental advisor in this situation or if interested in taking a second Design Laboratory course.*

### Computer Engineering:

ELEC 323+, 342, -345, 419, 420+, 421+, 424, 425, 427, 429+, 446+ and COMP 321+ and 430+

***Note:*** *The courses marked above with a plus (+). ELEC 323/COMP 322, ELEC 420/COMP 482, ELEC 421/COMP 421, ELEC 429/COMP 429, ELEC 446/COMP 446, COMP 321 and COMP 430 are courses listed or crosslisted with Computer Science.*

*The sequence of COMP 140, COMP 281, COMP 215 is recommended in addition for the Computer Engineering Area as these courses are pre-requisites for the cross-listed Computer Science courses.*

### Neuroengineering:

ELEC 342, 345, 381, 431, 480, 481, 482, 485, 486, 488 and 489

### Photonics and nanoengineering:

ELEC 262, 306, 342, 361, 365, 462 and PHYS 302 and 311

### Systems: Communications, Control, Networks and Signal Processing:

ELEC 302, 306, 345, 430, 431, 433, 434, 435, 436, 437, 438 and 439

## BA Unrestricted Electives

Additional courses to provide the BA minimum requirement of at least 121 semester hours.

Last Revised : August 11, 2014

 

# Electrical and Computer Engineering

## The George R. Brown School of Engineering

## Graduate Degree Programs

The ECE department offers two graduate degree programs. The master of electrical engineering (MEE) degree is a course-based program designed to increase a student's mastery of advanced subjects; no thesis is required. The MEE prepares a student to succeed and advance rapidly in today's competitive technical marketplace. A joint MBA/MEE degree is offered in conjunction with the Jesse H. Jones Graduate School of Management. The doctor of philosophy (PhD) program prepares students for a research career in academia or industry. The PhD program consists of formal courses and original research conducted under the guidance of a faculty advisor, leading to a dissertation. Students in the PhD program complete a master of science (MS) degree as part of their program; the ECE department does not admit students for a terminal MS degree.

Information on admission to graduate programs is available from the ECE Graduate Committee and on the ECE website. Students must achieve at least a B (3.0) average in the courses counted toward a graduate degree. In addition, no course in which the student earned a grade lower than a C may count toward a graduate degree.

## Degree Requirements for MEE in Electrical Engineering

Students are admitted to the MEE program in both fall and spring semesters. MEE students must prepare a degree plan and have it approved by their ECE faculty advisor. The plan must include at least 30 semester hours comprised of 10 courses of at least 3 credit hours each. At least 15 semester hours and 5 courses must be at the 500 level or higher. The program should include a major area of specialization (18 semester hours), a minor area (six semester hours), plus free electives. At least seven of the major and minor area courses must be at the 400 level and above, and at least five must be at the 500 level or above. ELEC 590 or ELEC 599 may not count as major area courses; no more than three semester hours can be transfer credit from another university, and at most one 1-hour seminar course may be included in the plan. A MEE degree planning form and current requirements may be found on the ECE website.

## Degree Requirements for PhD

Students are admitted to the PhD program only in the fall semester. ECE PhD students move through the program in stages, starting as first-year student, advancing to MS candidate, PhD-qualified student, and PhD candidate; each advancement requires the approval of the ECE graduate committee. Students entering with previous graduate work may follow a hybrid program developed in consultation with the faculty and the graduate committee. The first academic year concentrates on foundation coursework and developing a research area. Each student must successfully complete a project, ELEC 599, in his or her chosen area of research in lieu of an oral or written qualifying exam. In addition to enabling the faculty to evaluate the student's research potential, the project encourages timely completion of the MS degree. The student must complete a master's thesis and successfully defend it in an oral examination. Students who have already acquired a master's degree elsewhere must also complete the ELEC 599 project, after which acceptance of their previous master's degree will be determined by the Graduate Committee.

A candidate for the PhD degree must demonstrate independent, original research in electrical and computer engineering. After successful completion of all coursework, a student is eligible for PhD candidacy. The student then engages in full-time research, culminating in presentation of the PhD research proposal and then the completion and public defense of the PhD dissertation. Details of the PhD program requirements, the phases of study, and a timetable may be found on the ECE website.

## Degrees Offered: None

The Civil and Environmental Engineering Department in collaboration with several other Rice University departments offers undergraduate students the opportunity to select a minor in energy and water sustainability (EWSU). Sustainable development is a societal goal that challenges traditional ways of thinking and requires alternative approaches and solutions to balance environmental, economic, and social interests. Carbon management strategies and renewable resources will be key elements of energy policy for the coming decades. Similarly, the long-term viability of existing water use and human settlement patterns must be reconsidered given the effect of climate change in freshwater availability, as well as increasing competing demands for this limited resource. More generally, the dedication of materials, energy, and ecological resources will become more important in economic decision-making, while more and more members of society will demand equity in decision-making processes.

Students choosing this minor will gain knowledge of both the science and policy issues associated with the evaluation of sustainable energy and water strategies that will form a cornerstone of 21st century social systems. Students completing this minor will be better prepared for a global society that is attempting to understand and address the challenge of meeting basic human needs today and in the future while maintaining a functional natural system and social order.

# Energy and Water Sustainability

## The George R. Brown School of Engineering

Department Info | Undergraduate Requirements | Graduate Requirements | Course Listings

## Course Requirements for the Interdisciplinary Minor in Energy and Water Sustainability

Students must complete seven courses, comprising three required core courses, a design practicum and three elective courses that focus on energy, water, or sustainability. To promote educational breadth, no more than two of these electives should be used to meet a student's major requirements.

### Required Courses

- CEVE 302/ENGI 302 Sustainable Design
- CEVE 307/ENST 307/ESCI307 Energy and the Environment
- CEVE 322/ENGI 303 Engineering Economics or ECON 480/ENST 480 Environmental Economics
- CEVE 499 1 Hour Practicum

### Elective Courses

Students must choose three electives (at least three credits each), with no more than two drawn from any one of three different defined areas of specialization. No more than two of these electives can be used also to fulfill major requirements, and at least one elective course must be taken from a different school than the one hosting the student's major. A complete list of the approved elective courses may be found on the CEVE website.

### Design Practicum

Students are required to enroll in a 1-credit (integrative) independent study for one semester, typically fall of the senior year. Students in engineering and architecture who must take a senior design course will typically fulfill this requirement by preparing a report that describes the incorporation of sustainability concepts into their design effort, in consultation with the senior (capstone) design course instructor. Students not engaged in a suitable design project will either consult with an extant design group or pursue a project related to their own area of study in consultation with the advisors for this interdisciplinary minor.

# Materials Science and NanoEngineering

## The George R. Brown School of Engineering

## Degree Requirements for BA, BS in Materials Science and NanoEngineering

For general university requirements, see Graduation Requirements. The BA program in materials science and nanoengineering is highly flexible, involves less technical content than the BS, and allows students greater freedom to pursue areas of interest outside of engineering.

**BA with a Major in Materials Science and NanoEngineering Program—**Students seeking the BA degree with a major in materials science and nanoengineering must complete at least 51 hours in courses specified by the department plus additional hours for a total of 121 hours at graduation.

**BSMSNE Program—**Students seeking the BSMSNE must complete at least 94 semester hours in general math and science, core, and technical elective courses within the total requirements of 134 hours.

**Basic departmental course requirements for the BSMSNE are as follows:**
CHEM 121–122 *General Chemistry I and II or* CHEM 151-152 *Honors Chemistry I and II*
MATH 101 and 102 *Single Variable Calculus I and II*
MATH 211 *Ordinary Differential Equations and Linear Algebra*
MATH 212 *Multivariable Calculus*
PHYS 101 *Mechanics w/lab or* PHYS 111
PHYS 102 *Electricity and Magnetism or* PHYS 112

***Specific requirements:***
CAAM 210 *Introduction to Engineering Computation*
CAAM 335 *Matrix Analysis*
ELEC 241 *Fundamentals of Electrical Engineering I* (or ELEC 243 *Introduction to Electronics*)
MECH 211 *Engineering Mechanics*
MSNE 201 *Introduction to NanoEngineering*
MSNE 301 *Introduction to Materials Science*
MSNE 303 *Materials Science Junior Lab*
MSNE 311 *Materials Selection and Design*
MSNE 401 *Thermodynamics and Transport Phenomena in Materials Science*
MSNE 402 *Mechanical Properties of Materials*
MSNE 406 *Physical Properties of Solids*
MSNE 407 *Capstone Design Project I*
MSNE 408 *Capstone Design Project II*
MSNE 411 *Metallography and Phase Relations*
MSNE 415 *Ceramics and Glasses*
MSNE 435 *Crystallography and Diffraction*
MSNE 500 and 501 *Materials Science Seminar*
MSNE 537 *Crystallography and Diffraction Lab*
MSNE 594 *Properties of Polymers* or MSNE 560 *Colloid and Interfacial Phenomena*

***One course from the following:***
PHYS 201 *Waves and Optics*
CHEM 211 *Organic Chemistry*
CHEM 311 *Physical Chemistry*

***Electives:***

One approved science elective (at the 200 level or higher)

One approved engineering elective (not MSNE)

One approved technical elective in science, engineering (including MSNE) or math at the 200 level or higher

Last Revised : September 17, 2014

 

# Materials Science and NanoEngineering

## The George R. Brown School of Engineering

## Degree Requirements for MMSNE, MS, and PhD in Materials Science and NanoEngineering

**Professional Degree Programs—**The Professional Master's of Material Science and NanoEngineering (MMSNE) is open to students who have shown academic excellence in their undergraduate studies. These non-thesis degree options are designed for engineers who have attained a bachelor's degree and are looking to further their careers in industry. They combine engineering coursework with professional development and communications. For general university requirements, see Graduate Degrees. For the MMSNE degree, students must complete 30 semester hours of course work, at least 24 must be taken at Rice. Lists of required and suggested courses are available from the department. Students should develop a specific plan of study based on their particular interests and discussions with their advisor.

**Research Degree Programs—**The programs leading to the MS and PhD degrees are open to students who have demonstrated outstanding performance in their undergraduate studies. The granting of a graduate research degree presupposes academic work of superior quality and a demonstrated ability to do original research.

For general university requirements, see Graduate Degrees. Course requirements for the research degrees vary depending on the extent of individual undergraduate preparation as well as each student's performance in graduate courses and on qualifying examinations. For both the MS and PhD degrees, students must present a thesis that comprises an original contribution to knowledge and defend it in a public oral examination.

Each graduate student is expected to render research and/or instructional assistance to the department not to exceed 10 hours per week. Graduate student work assignments will be made by the department chair at the beginning of each semester.

All graduate students (except professional master's students, MMSNE) must attend at least 75 percent of the MSNE seminars. For details, please see the degree requirements on the MSNE website.

### I. Requirements for the Professional Master's Degree (MMSNE)

Students are expected to complete 30 semester hours of courses approved by the department (a one-semester course is usually three semester hours credit), at least 24 must be taken at Rice. At least 15 semester hours must be at or above the 500 level. Requirements and specific courses to be taken depend on each student's field of study. Students must discuss their individual degree plans and programs of study with their advisors. For details, please see the degree requirements on the on the MSNE website.

| Degree at Entrance | 4-year BS | 4-year BA |
|---|---|---|
| Minimum graduate level semester hours required (course work) | 30 | 30 |

See Graduation Requirements, for total semester hours required by Rice University.

### II. Requirements for the MS Degree

Full-time students seeking the MS degree are expected to complete all the requirements for the degree within two calendar years following entrance into the program. Continuation in the program beyond this time limit will require special approval of the department.

All entering graduate students pursuing a thesis degree program will be subject to a preliminary evaluation of their candidacy for the highest degree program they intend to pursue. The evaluation will be conducted by the end of the second semester of enrollment in the graduate program in the MSNE department.

Each candidate for the MS degree must complete a thesis demonstrating ability in research of a fundamental nature (analytical or experimental). It is expected that the research will be of sufficient importance and quality that positive results would lead to publication. The examination will be conducted by a committee consisting of at least three members. Two, including the committee chair, must be members of the department.

The minimum semester hours of course work (a one-semester course is usually three semester hours credit) required for the MS degree are tabulated below as a function of the degree held on entrance into the program. Research and thesis hours, as well as seminar hours, do not count towards these course requirements. In all cases, a student's specific course of study is formulated in consultation with the departmental advisor (thesis director) and must be approved by the department.

| Degree at Entrance | 5-year | 4-year BS | 4-year BA |
|---|---|---|---|
| Minimum graduate level semester hours required (course work) | 12 | 24 | 30 |

For details, please see the degree requirements on the MSNE website.

## III. Requirements for the PhD Degree

Full-time students seeking the PhD degree are expected to complete all the requirements for the degree within five calendar years following entrance into the program. Continuation in the program beyond this time limit will require special approval of the department.

All entering graduate students pursuing a thesis degree program will be subject to a preliminary evaluation of their candidacy for the highest degree program they intend to pursue. The evaluation will be conducted by the end of the second semester of enrollment in the graduate program in the MSNE department.

By the end of the fifth semester of enrollment in the graduate program in the MSNE department, the student must pass an oral qualifying examination.

Each candidate for the PhD must complete a thesis that constitutes an original contribution to scientific knowledge (analytical or experimental). It is expected that the research will be of sufficient importance and quality that positive results would lead to publication. On completion of the thesis, each candidate for the PhD degree must pass a final public oral examination. The examination will be conducted by a committee consisting of at least three members. Two, including the committee chair, must be members of the department. One member must be from another department within the university.

The minimum semester hours of course work (a one-semester course is usually three semester hours credit) required are tabulated below as a function of the degree held on entrance into the program. In all cases, a student's course of study is formulated in consultation with the thesis director and must be approved by the department.

| Degree at Entrance | MS | 5-year | BS | BA |
|---|---|---|---|---|
| Minimum graduate level semester hours required (course work) | 18 | 24 | 30 | 36 |

For details, please see the degree requirements on the MSNE website.

Renato Zanetti

## Degrees Offered: BA, BSME, MME, MS, and PhD

Undergraduate studies in mechanical engineering can lead to specialization in one or more of a diverse set of areas, including aerospace engineering, biomedical systems, computational fluid dynamics, computational mechanics, fluids-thermal science, mechanical design, mechanics, robotics, systems dynamics and controls.

The graduate program offers professional degrees in mechanical engineering, which permits specialization in the areas previously mentioned. Graduate students also may pursue research degrees. Faculty research areas are indicated in the previous paragraph. A joint MBA/Master of Engineering degree is available in conjunction with the Jesse H. Jones Graduate School of Business. Also, a combined MD and advanced research degree for research careers in medicine is available with Baylor College of Medicine.

The graduate program, in its comprehensive educational and research activities, collaborates with other departments at Rice and other institutions in Houston, including those in the Texas Medical Center. Collaborations also are extended to universities in the United States, Europe, Japan, Mexico, and South America. International collaborations include joint research activities and faculty and student visitor exchanges.

# Mechanical Engineering

## The George R. Brown School of Engineering

## Degree Requirements for BA and BS in Mechanical Engineering

The BS program prepares students for the professional practice of engineering. During their senior year, mechanical engineering students in the BS program take courses in design application while completing a major design project. The program's goals and objectives are available on the departmental website. For general university requirements, see Graduation Requirements.

The BA program in mechanical engineering is highly flexible, involves less technical content than the BS, and allows students greater freedom to pursue areas of interest outside of engineering. The BA degree is not accredited by the Engineering Accreditation Commission of ABET. For general university requirements, see Graduate Requirements.

**BS in Mechanical Engineering Program—**The Bachelor of Science in Mechanical Engineering (BSME) program is accredited by the Engineering Accreditation Commission (EAC) of ABET, www.abet.org. Lists of representative undergraduate courses and the usual order in which they are taken are available from the department. The BSME degree contains a core of required courses and selected electives from one of five specialization areas. The requirements (for a total of 132 hours) are:

***Basic Mathematics and Science (30 hours)***
CHEM 121*General Chemistry I*
CHEM 122 *General Chemistry II*
MATH 101 *Single Variable Calculus I*
MATH 102 *Single Variable Calculus II*
MATH 211 *Ordinary Differential Equations and Linear Algebra*
MATH 212 *Multivariable Calculus*
MSNE 301 *Materials Science*
PHYS 101 *Mechanics*
PHYS 102 *Electricity and Magnetism*

***Computational and Applied Mathematics (nine hours)***
CAAM 210 *Engineering Computation*
CAAM 335 *Matrix Analysis*
CAAM 336 *Differential Equations in Science and Engineering*

***Senior Design (seven hours)***
MECH 407 *Mechanical Design Project I*
MECH 408 *Mechanical Design Project II*

***Labs (four hours)***
MECH 331 *Mechanics Lab*
MECH 332 *Thermo/Fluids Lab*
MECH 340 *Industrial Process Lab*
MECH 431 *Senior Lab*

***Mechanical Engineering (31 hours)***
MECH 200 *Classical Thermodynamics*
MECH 211 *Engineering Mechanics*
MECH 311 *Mechanics-Deformable Solids*

MECH 343 *Modeling of Dynamic Systems*
MECH 371 *Fluid Mechanics I*
MECH 401 *Machine Design*
MECH 412 *Vibrations*
MECH 420 *Fundamentals of Control Systems*
MECH 472 *Thermal Systems Design*
MECH 481 *Heat Transfer*

***Limited Electives: (three hours)***
STAT 305, 310, or 331

***Technical Electives (nine hours)***

***Distribution Electives (24 hours)***

***Free Electives (15 hours)***

**Technical Electives—**Students are required to take a total of three technical electives. A minimum of two of these courses must come from Group A. The remaining course can come from Group A or B. Group A courses are fundamental courses in the following focus areas: aerospace engineering (AE), computational engineering (CompE), fluid mechanics and thermal science (FT), solid mechanics and materials (SMM), and system dynamics and control (SDC). Group B courses are additional technical electives that complement the focus areas listed above.

**Group A**

- MECH 400 *Advanced Mechanics of Materials* (SMM)
- MECH 403 *Computer Aided Design* (CompE, SMM)
- MECH 411 *Dyn and Control of Mech Sys* (SDC)
- MECH 417 *Finite Element Analysis* (CompE)
- MECH 454 *Computational Fluid Mechanics* (AE, CompE, FT)
- MECH 594 *Introduction to Aerodynamics* (AE,FT)
- MSNE 402 *Mech Properties of Materials* (SMM)
- MECH 474 *Advanced Computational Mechanics* or
- MECH 555 *Computational Fluid-Structure Interaction* (FT, CompE)
- MECH 488 *Design of Mechatronic Systems* (SDC)
- MECH 498 *Introduction to Robotics* (SDC)

**Group B—**Any 300+ course offered by any department within the School of Engineering, or any 300+ course offered by the School of Engineering (ENGI courses)

**BA with a Major in Mechanical Engineering Program—**Students seeking the BA degree with a major in mechanical engineering must complete 120 hours with at least 67 semester hours in courses specified by the department, along with 24 hours of university distribution electives and 29 hours of free electives. Lists of courses, including general university requirements and the usual order in which students take them, are available from the department. The BA program mirrors the BSME program in the freshman and sophomore years, with the exceptions that MECH 331 and MECH 340 are not required. Specific major requirements are completed in the junior and senior years, along with electives. A summary appears below:

**Freshman Year**
Same as BS with 24 major and nine elective hours for 33 hours.

**Sophomore Year**
Same as BS (except MECH 331 and 340 are not required), with 18 major and 15 elective hours for 33 hours.

**Junior and Senior Years**
25 major and 29 electives for 54 hours. The following courses are required in junior and senior years:
CAAM 335 *Matrix Analysis (3)*
CAAM 336 *Differential Equations in Science and Engineering (3)*
MECH 343 *Modeling of Dynamic Systems (4)*
MECH 371 *Fluid Mechanics I (3)*
MECH 401 *Machine Design (3)*
MECH 412 *Vibrations (3)*
MECH 420 *Fundamentals of Control Systems (3)*
MECH 481 *Heat Transfer (3)*

Degree Requirements for MME, MS, and PhD in Mechanical Engineering

**Professional Degree Program**—The professional master's degree in Mechanical Engineering (MME) is a non-thesis degree program intended for students who have completed a 4-year bachelor's program in engineering and wish to enter industry as practicing professionals, rather than pursuing a research oriented or academic career. It offers preparation in advanced engineering topics and facilitates specialization in order to enhance an engineer's technical qualifications and increases competitiveness in the job market. The specializations cover diverse areas of modern mechanical practice: thermal, fluid, mechanics, biomedical, design, dynamics and controls, high performance computing, and aerospace engineering. The MME program is open to students who have shown academic excellence in their undergraduate studies. Students who have a BS or BA degree in any field of engineering or related study may apply, although some may need to fulfill prerequisites or take remedial courses to earn the MME degree. Students may enroll on a full or part-time basis.

For general university requirements, see Graduate Degrees. For the MME, degree students must complete 30 semester hours of course work. Lists of required and suggested courses are available from the department. Students should develop a specific plan of study based on their particular interests and discussions with their advisor.

**Research Degree Programs—**The programs leading to the Master of Science (MS) and Doctor of Philosoophy (PhD) degrees are open to students who have demonstrated outstanding performance in their undergraduate studies. The granting of a graduate research degree presupposes academic work of superior quality and a demonstrated ability to do original research.

For general university requirements, see Graduate Degrees. Course requirements for the research degrees vary depending on the extent of individual undergraduate preparation as well as each student's performance in graduate courses and on qualifying examinations. For both the MS and PhD degrees, students must present a thesis that comprises an original contribution to knowledge and defend it in a public oral examination.

As part of their degree requirements, graduate students are expected to provide instructional assistance to the department not to exceed 10 hours per week. Graduate student work assignments will be made by the department chair at the beginning of each semester.

All graduate students (except professional master's students, MME) must attend at least 75 percent of the Mechanical Engineering seminars. For details, please see the degree requirements on the mech.rice.edu.

## I. Requirements for the Professional Master's Degrees (MME)

Students must complete 30 semester hours of approved coursework. At least 15 hours must be taken at the 500 level and above, and at least 24 hours must be taken at Rice University. Admitted students develop individual degree plans based on their particular interests in consultation with their advisors. Lists of required and suggested courses are available from the department.

| Degree at Entrance | 4-year BS | 4-year BA |
|---|---|---|
| Minimum graduate level semester hours required (course work) | 30 | 30 |

See Graduation Requirements, for total semester hours required by Rice University. Students must complete their

degree within 5 years of beginning the program. Most full time students complete the program in three semesters.

## II. Requirements for the MS Degree

Students seeking the MS degree are expected to complete all the requirements for the degree within two calendar years following entrance into the program. Continuation in the program beyond this time limit will require special approval of the department.

All entering graduate students pursuing a thesis degree program will be subject to a preliminary candidacy evaluation for the highest degree program they intend to pursue. The evaluation will be conducted by the end of the second semester of enrollment in the graduate program in the Mechanical Engineering department.

Each candidate for the MS degree must complete a thesis demonstrating ability in research of a fundamental nature (analytical, numerical, or experimental). It is expected that the research will be of sufficient importance and quality that positive results would lead to publications. A committee consisting of at least three members will conduct the examination. Two, including the committee chair, must be members of the department.

The minimum semester hours of course work (a one-semester course is usually three semester hours credit) required for the MS degree is tabulated below as a function of the degree held on entrance into the program. Research and thesis hours, as well as seminar hours, do not count towards these course requirements. In all cases, a student's specific course of study is formulated in consultation with the departmental advisor (thesis director) and must be approved by the department.

| Degree at Entrance | 5-year | 4-year BS | 4-year BA |
|---|---|---|---|
| Minimum graduate level semester hours required (course work) | 12 | 18 | 24 |

For details, please see the degree requirements on the Mechanical Engineering website.

## III. Requirements for the PhD Degree

Students seeking the PhD degree are expected to complete all the requirements for the degree within five calendar years following entrance into the program. Continuation in the program beyond this time limit will require special approval of the department.

All entering graduate students pursuing a thesis degree program will be subject to a preliminary evaluation of their candidacy for the highest degree program they intend to pursue. The evaluation will be conducted by the end of the second semester of enrollment in the graduate program in the Mechanical Engineering department.

By the end of the third year of enrollment in the graduate program in the Mechanical Engineering department, the student must pass an oral qualifying examination.

Each candidate for the PhD must complete a thesis that constitutes an original contribution to scientific knowledge (analytical, numerical or experimental). It is expected that the research will be of sufficient importance and quality that positive results would lead to publications. On completion of the thesis, each candidate for the PhD degree must pass a final public oral examination. The examination will be conducted by a committee consisting of at least three members. Two, including the committee chair, must be members of the department. One member must be from another department within the university.

The minimum semester hours of course work (a one-semester course is usually three semester hours credit) required are tabulated below as a function of the degree held on entrance into the program. In all cases, a student's course of study is formulated in consultation with the thesis director and must be approved by the department.

| Degree at Entrance | MS | 5-year | BS | BA |
|---|---|---|---|---|
| Minimum graduate level semester hours required (course work) | 18 | 30 | 36 | 42 |

For details, please see the degree requirements on the Mechanical Engineering website.

## Degrees Offered: BA, MSTAT, MA, PhD

Course work in statistics acquaints students with the role played in the modern world by probabilistic and statistical

ideas and methods. Students grow familiar with both the theory and the application of techniques in common use as they are trained in statistical research. The flexibility of the undergraduate program allows students to concentrate on theoretical or applied training, or they may link their studies in statistics to work in other related departments. Graduate study has concentrations in applied probability, Bayesian methodology, bioinformatics, biomathematics, biostatistics, computational finance, epidemiology, large and complex data, machine and statistical learning, quality control, statistical computing, spatial and, stochastic processes, and time series analysis. A joint MBA/professional master of statistics degree also is available in conjunction with the Jesse H. Jones Graduate School of Management.

Last Revised : August 12, 2013

 

# Statistics

## The George R. Brown School of Engineering

## Degree Requirements for BA in Statistics

For general university requirements, see Graduation Requirements. The degree requirements in statistics are:

Eight core courses

- MATH 101 *Calculus I*
- MATH 102 *Calculus II*
- MATH 212 *Multivariable Calculus*
- CAAM 335 *Matrix Analysis or* MATH 355 *Linear Algebra or* CAAM 336 *Differential Equations for Science and Engineering*
- STAT 310 *Probability and Statistics or* STAT 312 *Probability and Statistics for Civil and Environmental Engineers*
- STAT 405 *Statistical Computing and Graphics*
- STAT 410 *Introduction to Statistical Computing and Regression*
- STAT 450 *Statistical Design in Practice*

Six electives at the 300 level or higher

- Group S, statistics: At least 4 of the 6 electives must be from the statistics department (STAT) or cross-listed with statistics
- Group O, other: no more than 2 of the 6 electives may be from departments other than statistics
  - They must have a significant statistical, mathematical and/or computer science component and advisor approval is required
- A 3-hour Group O elective may be constructed by combining three 1-hour courses, such as STAT 490 (Independent Study) and STAT 601 (Statistics Colloquium). Only one such course may be applied toward the degree
- STAT 305 and STAT 385 do not count as electives

The department offers a minor in statistics and a collaborative minor in computational finance jointly with the economics department (see Financial Computation and Modeling minor).

## Course Requirements for a Minor in Statistics

There are two options available to those wishing to minor in statistics. Track A is designed for mathematically sophisticated students who wish to understand not only how statistical methods are used, but also how they are developed. Track B is designed to help students develop a working knowledge of statistics and the wide range of possibilities for the use and misuse of statistical methods.

Students must complete at least six courses (a minimum of 18 credit hours).

Required classes:

**Track A:**

*Three core courses*

- STAT 310 *Probability and Statistics*
- STAT 405 *Statistical Computing and Graphics*
- STAT 410 *Introduction to Regression*

*Three electives in statistics at the 300 level or higher*

Suggested electives: STAT 313, 411, 421, 422, 423, 431, 449, 453. STAT 305 and 385 do not count as electives for Track A.

**Track B:**

*Two core courses*

- STAT 280 *Elementary Applied Statistics* or STAT 305 *Intro to Statistics for the Biosciences*
- STAT 385 *Methods for Data Analysis and System Optimization*
- STAT 405 *Statistical Computing and Graphics*

*Three electives at the 300 level or higher with at least two in Statistics. With advisor approval one elective may be from departments other than Statistics.*

Suggested electives: 100, 405, 440, 482, 484, 485, 486. STAT 280 and 305 do not count as electives for Track B.

No more than three courses can apply from study abroad or transfer credits.

Last Revised : March 26, 2014

### Degree Requirements for MSTAT, MA, and PhD in Statistics

For general university requirements, see Graduate Degrees. Admission applications should include scores on the Graduate Record Examination (GRE) in the quantitative, verbal, and analytical tests. Financial support is available for well-qualified doctoral students. Course work for all degree programs should be at the 400 level or above, although two approved 300-level courses may be accepted.

**Master's Programs -** Candidates for the non-thesis MStat degree must complete 30 semester hours of approved course work. Courses comprising the 30 base hour requirement shall not be taken pass/fail. To comply with University requirements, at least 15 hours of course work must be at or above the 500 level. Candidates for the MA degree in statistics must complete 30 semester hours of approved course work as well as one of the following: (1) complete an original thesis and defend it in a public oral examination; or (2) perform satisfactorily on the second-year PhD comprehensive examinations, and complete a major project.

- A candidacy MA is awarded to statistics PhD students through option (2) where the major project corresponds to the doctoral thesis proposal.
- An MA is available to PhD students in the Departments of Economics and Political Science through option (1) where the original doctoral thesis and defense was related to the MA in statistics. The degree awarded in statistics is a non-thesis master's.

**PhD Program -** Candidates for the PhD degree in statistics must complete at least 90 semester hours of approved course work beyond the bachelor's degree and a minimum of 60 hours beyond a master's degree, perform satisfactorily on preliminary and qualifying examinations, and complete an original thesis with a public oral defense. All STAT graduate students are assigned a limited amount of teaching and other departmental service as part of their graduate education. The assignment usually entails less than 10 hours per week, averaged over the semester. Students completing the PhD degree in four years will be assigned no more than six semesters of service.

## Degrees Offered: None

African Studies is a broad-ranging field that is committed to an interdisciplinary approach to the study of African peoples and their complex histories, cultures, and languages. Drawn from the Schools of Social Science and Humanities, African Studies at Rice University has strengths in archaeological and anthropological research, historical studies, African religions and theology, African arts, and global health technologies. These foci provide a unique opportunity for students broadly interested in historical, cultural, African diaspora studies, and contemporary issues and will attract students preparing for career fields related to their interest in Africa, including academia (potential applicants to graduate school, Fulbright, or other competitive scholarships), development, diplomacy, business and finance, governance, global health, law, and others.

The African Studies minor at Rice will benefit undergraduate students by providing a course of study to explore the richness and complexity of the continent and its place in issues of wider global concern and import. The interdisciplinary course will allow students to traverse departments and schools, creating links between diverse intellectual trajectories. Through study in the African Studies minor, students also can begin to appreciate the relationship contemporary Africa has with the large African Diaspora. Finally, the minor will help students to understand not only the place of Africa in global histories and networks, but the crucial role that it has played in them.

### Course Requirements for the Interdisciplinary Minor in African Studies

The following requirements apply to the minor in African Studies:

- Students must complete at least six courses (18 credit hours).
- Students must take at least one the following core courses: RELI 111 *Introduction to African Religions;* HIST 231 *Introduction to African History: North, Western and Central Africa, Early Times to the Present;* HIST 232 *Introduction to African History: East, Central and Southern Africa, Early Times to the Present;* ANTH 312 *African Prehistory.*
- A list of noncore courses is available from AFST undergraduate advisors.
- At least three courses must be at the 300 level or higher.
- Students must take at least four courses with 100% African content; the remaining two courses must have at least 25% African content.
- No more than three courses can apply from transfer credits.
- Up to two courses of transfer credit in African languages may be applied to the minor; this may include courses on African languages or other individualized study in African languages with advisor approval. 'African languages' does not include the languages of European colonial powers or Arabic. Other languages spoken on the continent, including Afrikaans, will be accepted.
- Together, all African language courses count toward one of the three required departments for the minor. They are considered to have 100% African content.
- Courses must be taken over at least three different departments.

## Degree Offered: BA

This interdisciplinary major in the cultures of ancient Greece and Rome, Judaism, early Christianity, and early Islam, as well as their antecedents, explores these traditions both for their intrinsic interest and for the contributions each has made to contemporary Western society. Our combined focus on ancient cultural history in its broadest sense and on perspectives offered by cultural criticism enables students to examine the beginnings of the civilization in which they now participate.

Courses for this major address common questions about the transmission and transformation of cultures in the ancient Mediterranean world. Students examine sources, such as texts, artifacts, and institutions, that illuminate the process. They study how shifting cultural centers and frontiers in this world are delineated, and they explore the general integration and disintegration of specific ancient cultures. This major also offers opportunities for archaeological fieldwork and study abroad.

Rice is a sponsor of the American School of Classical Studies at Athens, the American School of Oriental Research, the American Research Center in Sofia, and the Intercollegiate Center for Classical Studies in Rome. Students majoring in Ancient Mediterranean Civilizations are encouraged to study in these programs as well as in the College Year in Athens program.

## Degree Requirements for BA in Ancient Mediterranean Civilizations

Students must take one course from three of the five following categories: 1) Graeco-Roman Civilization, 2) Islamic Civilization, 3) Jewish Civilization, 4) Christian Civilization, and 5) Archaeological Methods & Theory. In addition, students must take one course that addresses the creation, transmission, and reception of traditions in the Mediterranean world. Courses that meet this requirement are designated as “Themes Across Time.”

Students also must fulfill a comparative requirement by taking either one course that, in and of itself, treats two different cultural traditions (designated “Comparative”) or two separate courses on similar themes but from different cultures (e.g. Women in Greece & Rome, Women in the Islamic World). Although not required, courses in ancient languages are recommended. A minimum of five courses must be taken at the 300-level or above.

For general university requirements, see Graduation Requirements. Majors in Ancient Mediterranean Civilizations must complete at least 30 semester hours (10 courses). Students may select from the following courses to fulfill their requirements for the major.

Please note that not all courses listed below will be offered during the academic year. For a current list of AMC courses, please visit the AMC website at amc.rice.edu.

**Graeco-Roman Civilization**

ANTH 321 *Text as Property, Property as Text: Across the Ages*

## Degrees Offered: BA, MA, PhD

The Department of Art History offers a wide range of courses in European, American, Asian, and Middle Eastern/Islamic art history. The major in art history is structured to expose students to the chronological, geographical, and methodological breadth of the field of scholarship.

Last Revised : June 22, 2012

 

# Art History

## The School of Humanities

## Degree Requirements for BA in Art History

For general university requirements, see Graduation Requirements.

The Department of Art History offers three tracks within the major.

The tracks are as follows:

**Regular Art History Major**
Ten courses required for both double and single majors

- at least one course (200–400 level) ancient–medieval (pre-modern)
- at least one course (200–400 level) Renaissance–18th century (early modern)
- at least one course (200–400 level) 19th century to the present (modern through contemporary)
- of the ten courses, at least two must be seminars
- of the courses listed above, at least two must be outside the European and American traditions

**Art History Major—History of Architecture Track**
Ten courses required for both double and single majors

- at least six of the courses must focus on the history of architecture
- of the ten courses, at least one course (200–400 level) must fall in two of the following three areas: ancient–medieval (pre-modern); Renaissance–18th century (early modern); or 19th century to the present (modern through contemporary)
- of the 10 courses, at least two must be seminars
- of the courses listed above, at least one must be outside the European and American traditions

## Honors Program in Art History

This track is reserved for those accepted into the Art History Honors Program. Students apply (via the undergraduate art history advisor) no earlier than spring of the sophomore year and no later than spring of the junior year, and once accepted, they will be assigned to a faculty mentor. Financial assistance is available for honors students to conduct research between their junior and senior years.

To remain in the Honors Program, students must maintain an overall grade point average of 3.3 or higher and receive an A or A- in both semesters of the Senior Thesis. Students who maintain a grade point average of 3.7 or higher and who receive an A in both semesters of the Senior Thesis may be awarded high honors by vote of the department. If students are not able to maintain the requirements of the honors track, they can still graduate with the regular art history major or the track in architectural history.

Twelve courses required whether single or double major

- at least two courses (200–400 level) ancient-medieval (pre-modern)
- at least two courses (200–400 level) Renaissance–18th century (early modern)
- at least two courses (200–400 level) 19th century–present (modern to contemporary)
- at least six courses must be at the 300–400 level
- of the twelve courses, at least three courses must be seminars

- two-semester senior thesis (six credits total)
- of the courses listed above, at least two must be outside the European and American traditions

It is strongly recommended that majors in art history acquire a proficiency in at least one foreign language. In addition, art history majors are encouraged to take advantage of the opportunities provided by museum internships, study abroad programs, and travel fellowships.

## Transfer Credit

With approval from the departmental undergraduate advisor, a maximum of four courses may be taken outside of the department and applied to the major as transfer credits or study abroad course credits. No advanced placement credits may be used to satisfy major requirements.

Last Revised : May 09, 2012

 

# Art History

## The School of Humanities

## Degree Requirements for MA and PhD in Art History

For general university requirements, see Graduate Degrees.

Only applicants who intend to receive a PhD will be accepted into the program. The Department of Art History does not have an MA program, although during the course of the program a master's degree (MA) will be awarded after students have achieved candidacy and are in the process of completing the doctorate (see Schedule, below).

Entering students will each be assigned a faculty advisor, as appropriate for the intended field of study. (That faculty member will remain the advisor unless the student later chooses someone else as the principal dissertation advisor.)

The advisor will play the key role in working with the student from beginning to end on course selection, master's essay topic, topics for qualifying exams, and the dissertation subject and will be in charge of monitoring the student's progress before and after advancement to candidacy. The director of graduate studies also will be available to offer advice to students in the program.

Beyond the courses to be offered by these regular and affiliated faculty of the Department of Art History, students will be encouraged, when appropriate, to take other graduate courses at Rice that are important for their field of research. Of the courses listed in the year-by-year schedule below, up to three may be taken in graduate courses outside the department, as approved by the student's advisor.

**A summary of the program requirements:**

**Courses**—Satisfactory completion of at least 30 hours of graduate coursework (500 level). One of the courses will include HART 590 Methods in Art History, to be taken in the fall of the first year. At least two of the courses taken must be in areas judged by the faculty advisor to be outside the student's main field of interest, and at least half of the classes taken must be seminars. Because jobs in the field often call for teaching expertise in more than one area, students are encouraged to acquire breadth of knowledge in both their coursework and the topics covered in the qualifying exams.

**Substantial research paper**—In the second year, one course each semester is required (HART 690 and HART 691) towards a substantial research paper. This paper may be an exploration of a possible dissertation topic or area.

**Reading knowledge of foreign languages**—Reading knowledge of one foreign language must be demonstrated before the beginning of the second term, and a second demonstrated before the beginning of the third year. For those studying American or European topics, French and German are required, or a language necessary for the student's doctoral work (e.g., Spanish or Italian) and then knowledge of French or German. For those studying a non-Western topic, knowledge of a language in the primary area of study is necessary, plus French or German. Reading knowledge of one language must be demonstrated by the end of the first semester, and knowledge of the second language must be demonstrated by the end of the second year. Students will be able to take advantage of the regular foreign language courses at Rice, and we will work with the director of the Center for the Study of Languages to ensure that students are aware of the language courses at Rice offered specifically for graduate students. The two language examinations will be administered as follows. The student's advisor will select a book or set of articles in the target language that is close to the student's interest. The student will have one hour with a dictionary to complete the translation. The exam will be graded by the appropriate language department.

**Teaching and research opportunities**—In order to strengthen the job prospects of our students, there will be an

opportunity to serve as teaching assistant or tutorial instructor, or for team-teaching or teaching classes. For those not engaged in classroom teaching, there also will be a chance to serve as research assistants for professors. As part of the program, all students will be expected to be a teaching assistant, tutorial leader, teacher, or research assistant for at least two semesters, and for as many as four semesters as an option. This will typically happen during the third or fourth year.

**Qualifying exams, with a written and oral component**—The qualifying exams will be taken at the end of the fall semester of the third year and cover topics in student's major field of study and secondary fields, as agreed upon with the student's advisor and based on the student's interests and intended area of study for the doctoral dissertation. Passing the qualifying exams is necessary for continuation in the program into the dissertation phase. The exams will consist of two three-hour written exams and two one-hour oral exams to follow up on the material tested on the written part. The examining committee will consist of three persons: the principal field examiner and two other field examiners.

**Doctoral thesis and defense**—After a student has passed the qualifying examination, the student will work with a dissertation thesis committee composed of three members, approved by the department's graduate committee; the chair of this committee will be the student's departmental advisor, who must be part of the art history faculty; the second reader also comes from within the department; and the third reader must be from outside the department. As soon as the thesis committee approves the student's dissertation prospectus, the student must file a petition for approval of candidacy for the PhD with the Graduate Office. The term "PhD candidate" refers only to persons so certified by the Graduate Office. The university requires that students pursuing the PhD must be approved for candidacy before the beginning of the ninth semester of their residency at Rice.

PhD candidates must present an original piece of scholarly work in the form of a dissertation, equivalent to a publishable book, as the final step in completing the degree. Dissertations may be written on any subject that falls within the supervisory competence of a permanent member of the department, and the prospectus is approved by the student's advisor and a vote of the student's committee. After such a vote, the advisor will sign the student's application for admission to candidacy.

**Schedule**—The program is designed to be completed in five years. However, certain fields in which the acquisition of foreign languages typically presents a hurdle (e.g., the study of non-Western art) might necessitate the expectation of a sixth year in the program.

Schedule for a student in the program would be:

**Year 1**: Six courses (three each semester), one to include the theory and methods seminar in the fall of the first year. The student must pass one language exam in the fall semester.

**Year 2:** Four courses (two in the fall semester, two in the spring) and an independent study course each semester for preparing a substantial research paper, to be completed by the end the spring semester and read by the student's advisor and one other faculty member or affiliated faculty, chosen by the advisor. Students must pass the second language exam by the end of the spring semester.

**Year 3:** Independent study in the fall in preparation for the written and oral qualifying exams, taken in December.

In the spring semester, the student will prepare a prospectus for the doctoral dissertation; the advisor and the rest of the thesis committee will review the prospectus and approve the topic by mid-April. At that point, the student will advance to candidacy. The MA will be awarded at that time.

During the third year, students will have the option of serving as teaching assistant, tutorial instructor, teacher, or research assistant.
Students in the third and fourth years are encouraged to apply for outside funding that will assist them with travel costs and other aspects of their thesis research.

**Year 4:** Dissertation research and writing. During the fourth year, students will have the option of serving as teaching assistant, tutorial instructor, teacher, or research assistant, unless this has happened in the third year.

**Year 5**: Dissertation research and writing. There will be a public thesis defense at the end of the fifth year (or later, if necessary).

For updated information, please go to www.arthistory.rice.edu.

## Exhibitions, Lectures, and Arts Programs at Rice and in Houston

Houston is fortunate to have some of the best art collections in the United States. The department enjoys a strong and ongoing relationship with the local museums, in particular the Menil Collection and the Museum of Fine Arts, Houston. The department offers opportunities for students to study with local museums, galleries, and alternative art spaces by way of internship courses (HART 400, HART 401, HART 500, HART 501), summer internship working opportunities, fellowships, or collaborative events. The collections and special exhibitions of local museums are often the focus of class lectures and research papers in art history.

The department sponsors the Katherine Brown Distinguished Lectures in Art History, which bring leading scholars to Rice to speak on a wide variety of topics. The department also hosts occasional symposia and lectures in collaboration with other departments, presenting the ideas of top scholars, critics, and artists.

The Department of Art History houses the Visual Resources Center, which currently holds a broad and extensive collection of slides and digital images related to the arts for teaching and research, serving both the department and the university at large.

Exhibitions and related activities organized by the Rice University Art Gallery enrich the university and the Houston community. The Department of Visual and Dramatic Arts mounts several art and photography exhibitions each year and sponsors Rice Cinema, a public alternative film program.

## Degree Offered: BA

Asian Studies is an interdisciplinary major that explores the national, regional, and local cultures of Asia, past and present, with a particular emphasis on the way that these diverse cultures interact with one another and with the rest of the world. The major is built around courses in the humanities and social sciences divisions as well as two team taught interdisciplinary core courses, Introduction to Asian Civilizations and Perspectives on Modern Asia. Some residential college courses may qualify for Asian Studies credit.

Last Revised : February 19, 2012

# Asian Studies

## The School of Humanities and The School of Social Sciences

## Degree Requirements for BA in Asian Studies

For general university requirements, see Graduation Requirements in this publication. The undergraduate Asian Studies major consists of 30 hours or more of course work. There are three basic requirements:

1. One foundational course: either ASIA 211/HART 211/HIST 206 Introduction to Asian Civilizations or ASIA 212/ANTH 212 Perspectives on Modern Asia.

2. Nine additional courses are drawn from at least three of the departments offering courses with predominantly Asian content. In the case of cross-listed courses, any one of the departments or programs appearing in the cross-listing can be used to satisfy this particular requirement.

- At least four of the courses must be non-language courses at the 300 level or above.
- Up to four of the courses required for the major may be language courses.

3. Asian Studies majors must have the equivalent of at least five semesters of coursework in a single Asian language. (This may include an Asian language other than those offered by Rice.)

- Students who have placed into the second semester of third year or higher of an Asian language will have satisfied our proficiency requirement for the major. If such students continue with the same language (or decide to take another Asian language), they, too, can count up to four courses toward the 10-course Asian Studies major requirement.

One or more independent reading courses (ASIA 401 for the fall, ASIA 402 for the spring) taught by Asian Studies faculty may be counted towards the major, subject to approval by the director of Asian Studies.

The following courses, not all of which are taught every year, may be used to satisfy the major requirements. Note that a number of these courses are cross-listed.

**Anthropology**
ANTH 209 Identity in South Asia (also offered as ASIA 209 and LING 209)
ANTH 212 Perspectives on Modern Asia (also offered as ASIA 212)
ANTH 280 Anthropology of the Middle East
ANTH 304 Third World Urbanization (also offered as ANTH 304)
ANTH 307 Crime and the City (also offered as ASIA 312)
ANTH 310 Contemporary China (also offered as HIST 310)

The Center for Languages and Intercultural Communication (CLIC) was founded in 1997 to promote and enhance the study of languages at Rice University and is responsible for teaching 12 languages through the third year of instruction. The role of the center is to establish innovative approaches to language acquisition, expand opportunities for language learning across the curriculum, and increase Rice students' participation in study and work abroad.

## Degrees Offered: None

The Center for Languages and Intercultural Communication does not offer degree programs itself, but students are able to pursue language degrees from language departments. Some of those degrees include: BA in Asian Studies (Asian Studies); BA in Classical Studies (Classical Studies); BA, MA, and PhD in French Studies (French Studies);

BA in German Studies (German Studies); and BA in Spanish (Spanish and Portuguese). See each department for degree requirements.

## Placement Testing

Students who have some background in the language they intend to study are required to take a placement test to ensure that they are placed in the appropriate course. Placement tests are administered online prior to O-Week and for one week in the spring semester. Detailed information regarding language placement exams can be found at http://clic.rice.edu/placement_test.aspx

## Certificate of Language and Cultural Proficiency

The Center for Languages and Intercultural Communication offer a Certificate of Language and Cultural Proficiency in each of the twelve languages taught through the Center.

**Requirements**

At a minimum, students will have completed two semesters of third-year language study and devoted four weeks to study, volunteering, or work abroad in the second language and culture. Upon successful completion, students will receive a certificate preceding graduation. All Rice University students are eligible to earn this certificate. Detailed information on the certificate and requirements can be found at http://clic.rice.edu/Certificate_Requirements.aspx

## Transfer Credits

The Center for Languages and Intercultural Communication will determine equivalency for foreign language classes taken at other colleges or universities and approve them for transfer credit. University transfer credit guidelines (see Transfer Credit) as well as requirements of the degree-granting department still apply. Students who study abroad should have their transfer credits approved, when possible, before they commit to a study-abroad program. When requesting Rice equivalent credit for foreign language acquisition courses, students must submit no less than the following to CLIC for approval: 1) the appropriate transfer request form from the Office of the Registrar, 2) a program description for courses taken abroad or catalog description for courses taken in the United States, and 3) a syllabus for the course they wish to take or have taken, or a web address to the program if one is available. Students should be aware that the approval process takes about one week and should plan accordingly.

## Scholarships

The Center for Languages and Intercultural Communication invests in students participating in CLIC-sponsored study abroad programs by offering scholarships to off-set the cost of tuition, fees, and in some cases, airfare. The scholarships are offered in the spring semester for study abroad programs taking place the following summer. Detailed information on the scholarship and the CLIC-sponsored programs can be found at http://clic.rice.edu/content.aspx

## Degree Offered: BA

The Department of Classical Studies offers instruction in the Greek and Latin languages, in Greek and Roman literature (studied in the original and in translation), in the classical civilizations surveyed as a whole, and in particular themes, genres, and periods of classical culture and its influence through subsequent ages.

We recognize that students come to the study of ancient Greece and Rome with a whole spectrum of different kinds of interest. Some will want to concentrate on learning the ancient languages and reading the classical texts in the original Greek or Latin. Others will desire a broader introduction to the cultures of Greece and Rome and their legacy. With this in mind, the Department of Classical Studies provides maximum flexibility without sacrifice of focus. We cater to students who wish to prepare for graduate school in classics and also to students who are interested in Greek and Roman culture for other reasons and wish to take a less specialized approach. Students will be able to explore ancient Greece and Rome from a variety of different angles and with whatever emphasis best suits their individual needs and goals.

The Department of Classical Studies offers two tracks to satisfy the requirements for a BA (specific information below): the classical languages track emphasizes the ancient languages and reading classical texts in the original; the classical civilizations track allows students to interpret ancient Greek and Roman culture from a broad range of perspectives and does not include a language requirement.

Classical studies majors, in either track, will, if they wish, have the opportunity to engage in research. In the final year of study, a student may enroll in CLAS 493 and CLAS 494, in which the student writes a senior thesis on a topic of the student's choice in consultation with a faculty member.

The Department of Classical Studies also offers a program in the Classical Legacy. Using courses in translation, this program makes classical antiquity accessible to a wide range of students and offers those students basic knowledge of major trends in Western intellectual and cultural history. Courses offer grounding in classical literature, art, thought, and history and relate classical culture to later attempts in postclassical and contemporary cultures to assimilate, emulate, and recreate classical models. A highlight of the Classical Legacy program is CLAS 321, a two-week study-trip to Rome at the end of the spring semester, organized and run by Rice professors for Rice students. For current information on the Classical Legacy program and the study-trip to Rome, consult the website:

classicallegacy.rice.edu.

Further information on the department, its courses, its faculty members, and its events is available on the Web: classics.rice.edu.

Policy on Advanced Placement credit: For the exam on “Latin Literature,” new matriculants who score 4 receive three hours credit for LATI 104 and new matriculants who score 5 receive three hours credit for LATI 204 and D1 distribution credit. For the exam on “Latin: Virgil,” new matriculants who score 4 receive three hours credit for LATI 104 and new matriculants who score 5 receive three hours credit for LATI 202 and D1 distribution credit.

## Degree Requirements for BA in Classical Studies

For general university requirements, see Graduation Requirements.

Students majoring in classical studies may complete either of two tracks.

For the Classical Languages track, students must complete 30 semester hours (10 courses) listed under Greek, Latin, or Classics, including at least two of the following three courses:

- CLAS 107 Greek Civilization and Its Legacy
- CLAS 108 Roman Civilization and Its Legacy
- CLAS 235 Classical Mythology: Interpretation, Origins, and Influence
- and at least:
  a) one course in Greek at the 200 level or higher
  b) one course in Latin at the 200 level or higher
  c) two courses in Greek or Latin at the 300 level or higher
  Any course that satisfies c) also satisfies a) or b).

For the Classical Civilizations track, students must complete 30 semester hours (10 courses) listed under Greek, Latin, or Classics, including at least two of the following three courses:

- CLAS 107 Greek Civilization and Its Legacy
- CLAS 108 Roman Civilization and Its Legacy
- CLAS 235 Classical Mythology: Interpretation, Origins, and Influence

Some courses in ancient philosophy, history, art history, and religion offered by the departments of Philosophy, History, Art History, and Religion also satisfy requirements for either track of the classical studies major. For advice about which courses do this, consult the undergraduate advisor.

## Degrees Offered: BA, MA, PhD

The undergraduate program offers a broad spectrum of courses, including British and American literature, creative writing, women and gender studies, cultural studies, literary theory, media studies, and film. Beyond gaining a critical appreciation of literature, students also will sharpen their written communication and analytical skills. The graduate program in English offers concentrations in all fields of British and American literature and literary theory. Although students are not normally admitted for an MA, graduate students may earn the MA after obtaining approval of their candidacy for the PhD.

## Courses

Detailed information on requirements for the major and current semester course offerings can be found at www.english.rice.edu. Please note that undergraduate level courses range numerically from ENGL 100 through ENGL 499, and graduate courses begin with ENGL 500.

## The School of Humanities

### Degree Requirements for BA in English

For general university requirements, see Graduation Requirements. Students majoring in English must complete 36 semester hours in English with at least 24 hours in courses at the 300 level or above. A double major requires 30 hours in English, with at least 18 hours in the upper-level courses. All courses with the ENGL prefix and HUMA 101 and 102 may be counted toward the English major. AP credit does not count toward the major.

All English majors must take the following:

- ENGL 200 *Critical Reading and Writing*
- ENGL 300 *Practices in Literary Study*
- A 400-level departmental capstone seminar which is not a creative writing course
- Nine hours at the 300 level or above in periods before 1900; six of the nine hours must be in periods before 1800; but only one may be a Shakespearean course
- Three hours at the 200 level or above in a course that focuses on noncanonical traditions, such as courses in gender and sexuality studies, African American, Chicano/a, Asian American, ethnic, global, and diasporic writers

The department recommends that all English majors take courses in British and American history and, if they plan to do graduate work, at least six hours of upper-level courses in a foreign language.

## Degree Requirements for MA and PhD in English

For general university requirements, see Graduate Degrees. As part of their training, graduate students participate in both the teaching and research activities of the department. Upon entering, students will be assigned a Program Advisory Committee (PAC), consisting of two faculty members. In consultation with their PAC, students will design their own individualized program structured by the minimal requirements listed below. For more detailed information, please ask for a copy of the department's program outline.

**PhD Program—**To gain admission to PhD candidacy, students must satisfy the first six of the following requirements, and they must receive approval for their dissertation prospectus from the department's graduate committee. To earn a PhD in English, candidates also must complete the last two requirements. Students must:

1. Satisfactorily complete a minimum of 12 graduate courses, of which at least 10 must be graduate seminars. With the approval of the PAC, students may enroll in ENGL 621 *Directed Reading*, either as a traditional directed reading course or as a 400-level English course to which a graduate component has been added. ENGL 621 counts toward the 12 required graduate courses but does not count as a graduate seminar. Students also are encouraged to take graduate courses in other departments related to their areas of interest. These will count toward the 12-course requirement but not usually for distribution.
2. Satisfactorily complete the following two required courses: ENGL 600 *Topics in Literary Theory* and ENGL 605 *Third-Year Writing Workshop*. These count toward the 12-course requirement.
3. Satisfactorily complete the distribution requirement, which consists of two courses before 1800 and two after 1800. These count toward the 12-course requirement.
4. Satisfactorily complete the teaching requirement by serving twice as a teaching assistant, completing ENGL 510/511 *Pedagogy*, and teaching at least one lower-level course designed in conjunction with the instructor of ENGL 510. ENGL 510 does count toward the 12-course requirement.
5. Pass a qualifying exam that consists of two qualifying papers, and pass an oral exam. Refer to english.rice.edu for further details.
6. Complete a dissertation prospectus that defines the topic of the dissertation, the particular thesis that the dissertation hopes to develop about the topic, and the relevance and importance of the dissertation's thesis for the contribution it will make to the student's chosen field. The dissertation prospectus and a satisfactory draft of a chapter must be approved for the student to advance to candidacy. Refer to english.rice.edu for further details.
7. Complete a dissertation that demonstrates a capacity for independent and original work of high quality.
8. Pass an oral exam on the dissertation and related fields of study.

**MA Degree—**The English department does not have a terminal MA program, but offers the MA degree to those PhD students who have achieved candidacy and are in the process of completing the doctorate and to qualified PhD students who leave the program before completing the doctorate. To receive an MA students must:

- Satisfactorily complete at least 30 hours of graduate work in English at Rice University. Courses must be those that count towards the PhD in English. Students must satisfactorily complete ENGL 600 and distribution requirements for the PhD (see above).
- Satisfactorily complete two teaching assistantships (ENGL 601/602) and two research assistantships. These do not count toward the 30-hour requirement.

**Financial Support—**Financial support depends upon satisfactory progress towards the degree.

## Degrees Offered: BA, MA, PhD

Courses in this department hone language skills in French while placing a diverse, generalized knowledge of French literature within a broad spectrum of cultural, historical, philosophical, and theoretical concerns. Students also are urged to take courses in fields closely related to French studies, including European and English history, literature, and philosophy. The department encourages students to spend time studying in a francophone country, and to that end the French Studies Department and Office of Academic Advising will help students select an appropriate program.

## The School of Humanities

Department Info | Undergraduate Requirements | Graduate Requirements | Course Listings

## Degree Requirements for BA in French Studies

For general university requirements, see Graduation Requirements. Students majoring in French studies must complete at least 30 semester hours in upper-level courses (at the 300 or 400 level). A double major or an area major must complete 24 hours in upper-level courses.

***Required Courses***

***Two of the Three Following Courses:***
FREN 311 *Major Literary Works and Artifacts of Pre-Revolutionary France*
FREN 312 *Major Literary Works and Artifacts of Post-Revolutionary France: The Romantic Legacy*
FREN 313 *Major Literary Works and Artifacts of the Francophone World*
**Plus** FREN 302 *Writing Workshop*

***Electives***
Seven additional courses (for single majors)—at least three courses at the 400 level
Five additional courses (for double majors)—at least two courses at the 400 level

As many as two French courses taught in English may count toward a major in French studies. Students who have taken 300- and 400-level French courses (except those taught in English) cannot enroll simultaneously or afterward in 200-level French courses for credit. More than half of the courses for the major must be taken at Rice University. The department normally requires that the basic courses for the major (FREN 311, 312, 313, and 336) be taken at Rice. It is strongly suggested that these courses be taken as early as possible. Students are required, with rare exception, to take two of their 400-level courses in the department.

Students with diplomas from French-speaking institutions must consult with the department before enrolling in courses, and all majors and prospective majors must have their programs of study approved by an undergraduate advisor. Students wishing to complete the honors program in French studies also should consult one of the advisors.

**Honors Program—**The Honors Program in French Studies is meant to recognize outstanding French majors and to offer an opportunity to complete a senior thesis in close collaboration with a French Studies faculty member. Students who have successfully completed the Honors Program will receive an Honors distinction on their transcript.

Students completing an Honors thesis of extraordinary quality may in turn be considered for the Rice University Distinction in Research and Creative Works. *Distinction in Research and Creative Works is a university award for select undergraduates, granted at commencement, which appears on the transcript and diploma. Applicants must be in good academic standing and have a cumulative GPA of at least 3.30 in courses completed at Rice.*

**Campus Activities—**To acquaint students with French language and culture, the department sponsors a weekly French table that meets at lunch in a college. The Club Chouette also organizes outings to French movies and sponsors guest lectures. Students who maintain at least a B average in two or more advanced French courses and have a GPA of at least 3.0, are invited to join the Theta chapter of the honorary Pi Delta Phi.

**Travel Abroad—**The department encourages majors to spend time living and studying in a francophone country. The Clyde Ferguson Bull Traveling Fellowship is awarded each year to an undergraduate to spend a semester or a year studying in France with a program approved by the department. Candidates must have taken at least one 300-

level course in the department and have a GPA of at least 3.0. Information about study abroad is available from the department faculty and in the Office of International Programs. The Alliance Française of Houston offers a summer scholarship of $3,500 each year to a qualified sophomore or junior for six weeks of study in France.

## Degree Requirements for MA and PhD in French Studies

**The French Studies Department is no longer accepting new students into the graduate program.**

Admission to graduate study in French, granted each year to a limited number of qualified students, requires a distinguished undergraduate record in the study of French literature or a related field and a capacity for independent work. All candidates should have a near-native command of the French language. For general university requirements, see Graduate Degrees.

**MA Program—**In most cases, students take two years to complete work for the MA degree in French studies. While graduate students normally take 500-level courses, as many as two courses at the 400 level may count toward fulfillment of the following course requirements. MA candidates must:

- Complete with satisfactory standing 27 semester hours (in addition to BA course work) of upper-level courses, plus six hours of independent study in the preparation of three advanced research papers to be defended before their MA committee. The selection of the paper topics must receive preliminary approval from the examination committee.
- Perform satisfactorily on a reading examination in 1 department-approved language other than French or English.
- Perform satisfactorily on preliminary written and oral examinations conducted in French on works specified on the department reading list.

**PhD Program—**Candidates normally take 500-level courses, but students entering with a BA may count toward their PhD degree as many as three courses at the 400 level; those entering with an MA may count two such courses. Graduate student enrollment in a course listed only at the 400 level, however, is subject to the instructor's approval. Candidates for the PhD degree must meet the following criteria, ensuring that they complete the language requirement and their preliminary exams one year before they submit a dissertation:

- In a program approved by the department, complete with high standing at least 57 semester hours of course work, plus 36 thesis hours (for those already holding an MA degree, the requirement is 39 hours of course work, plus 36 thesis hours). Six of these units may be fulfilled with a 600-level independent study course.
- Satisfactorily complete one course at the 300 level or above in a language other than French or English. With the permission of the graduate committee, this requirement also may be met through satisfactory performance on a written language examination or by such other means as the graduate committee may direct.
- Perform satisfactorily on preliminary written and oral examinations based on readings comprising both required and individually selected texts, including readings in French literature from all major periods and readings in philosophy and theory; history, cultural studies, and film; and postcolonial and gender studies. The oral exam can be taken only after successful completion of the written exam.
- Complete a dissertation, approved by the department, that represents an original contribution to the field of French studies.
- Perform satisfactorily on a final oral examination on the dissertation.

## Degrees Offered: BA

German Studies at Rice is a research-centered and undergraduate-focused department with internationally renowned faculty. Courses are offered in both German and English. The department covers German history, literature, and culture, from the seventeenth century to the present, with a strong emphasis on Germany's role in a wider European and transatlantic context. Particular departmental strengths are in the areas of modern intellectual history, 18th- to 20th-century literature and philosophy, film and media studies, as well as political theory and public policy. The close connection between research and teaching lies at the core of the curriculum.

Reinforcing and expanding language skills is an integral part of the department's advanced courses taught in German. To achieve fluency in the German language and to experience German culture first hand, the department provides a number of endowed fellowships to allow students to participate in our study abroad option in Leipzig, Germany.

The department also offers a wide range of freshman seminars and advanced seminars in English on topics of general interest in German history, literature, film studies, and politics.

For the department's current course offerings, news, announcements, upcoming talks and events see the GERM website.

## Degree Requirements for BA in German Studies

For general university requirements, see Graduation Requirements. Students who have German as their only major must complete at least 30 semester hours at or above the 300 level, as follows:

- GERM 301 Advanced German I
- GERM 302 Advanced German II
- (Both GERM 301 and 302 may be replaced by an eight-week intensive summer language course at the University of Leipzig, Germany).
- GERM 305 Enlightenment and Romanticism, 1750-1850
- GERM 306 Realism to Modernity, 1850-Present
- Three GERM 300-level courses (up to two may be from the department's offerings in English)
- Three GERM 400-level courses

Students who have German as a double major must complete at least 24 semester hours at or above the 300 level, as follows:

- GERM 301 Advanced German I
- GERM 302 Advanced German II
- (Both GERM 301 and 302 may be replaced by an eight-week intensive summer language course at the University of Leipzig, Germany).
- GERM 305 Enlightenment and Romanticism, 1750-1850
- GERM 306 Realism to Modernity, 1850-Present
- Two GERM 300-level courses (one may be from the department's offerings in English)
- Two GERM 400-level courses

**Note:** For single majors, a maximum of four transfer courses can count toward the major. For double majors, a maximum of three transfer courses can count toward the major. Request for exceptions to these rules will be considered by the Director of Undergraduate Studies.

**Honors—**The department offers an honors program for majors excelling in their studies. Honors work consists of independent research under faculty supervision on a topic proposed by the student leading to a substantial essay (GERM 493 in fall, GERM 494 in spring). Outstanding students are presented annually with the Max Freund Prize.

## Degrees Offered: BA, MA, PhD

The undergraduate program offers courses in U.S. history; ancient and medieval history; intellectual history; and the history of science; and the early modern and modern history of Europe, Latin America, the Middle East, East and South Asia, Africa, and the Caribbean. Faculty interests range from the Byzantine Empire to colonial Brazil and modern Mexico, from Qing and 20th-century China to colonial Indonesia, and from Kant to nanotechnology. Within U.S. history, the department's particular strengths are Atlantic migrations, slavery, the Old and New South, religion, race, and the Presidency. Within European history, Germany, Britain, and France are strengths. The department has a strong overall emphasis on colonialism across regions and time periods. The department encourages its majors to acquaint themselves with other disciplines in the humanities and social sciences, especially literature, philosophy, fine arts, anthropology, sociology, and political science. Foreign language study is also important for students of history.

The graduate program, which trains a limited number of carefully selected students, offers these fields: United States (including colonial America and the U.S. South), United States and the World, Latin America and the Caribbean, the Atlantic World, and transnational Asia and the Middle East. PhD students may concurrently pursue a graduate

certificate through the Center for the Study of Women, Gender and Sexuality, or the Center for Critical and Cultural Theory.

Through a reciprocal agreement with the Universidade Estadual de Campinas (UNICAMP) the department offers qualified students the opportunity to earn a second PhD at a top-ranked university in Brazil. Students in the dual degree program study in Brazil and write a dissertation that is co-supervised by faculty at Rice and UNICAMP.

# History

## The School of Humanities

## Degree Requirements for BA in History

For general university requirements, see Graduation Requirements. Students majoring in history must complete a minimum of 30 semester hours (10 courses) in history. No fewer than 18 hours (six courses) must be taken at Rice. Transfer credit, foreign or domestic, cannot count for more than 12 hours (four courses). AP/IB credit may not be used to satisfy any requirements for the history major (even though a student may be able to use AP/IB credit toward general university requirements). At least 18 hours (six courses) are required on the 300 or 400 level. Two courses must be chosen from a departmental list of 400-level seminars. In addition, majors must distribute their 10 courses over at least four of the following five fields:

Premodern—one course minimum
Europe—one course minimum
United States—one course minimum
Africa, Asia, Latin America, Middle East—one course minimum
Transnational, Comparative, World—one course minimum

Some foreign language proficiency is desirable and the department highly recommends that students contemplating graduate work in history study at least one foreign language in some depth.

**Transfer Credit—**The Department of History grants transfer credit on a case-by-case basis to enrolled undergraduates (the Office of the Registrar determines the credit hours). Courses taken at another institution must be the equivalent in required reading, writing, and testing of a Rice history course. Regarding content, however, there does not have to be an equivalent course in the Rice history offerings. For the current procedures and to request transfer credit, see history.rice.edu. Rice students planning to study at a foreign university must also obtain approval from the Study Abroad Office.

**Honors Program—**Qualified undergraduates may enroll for six semester hours of directed honors research and writing, completing an honors thesis in their senior year (these six hours are in addition to the 30 hours required for the major). Application to the program is required. For current procedures, see history.rice.edu. Financial assistance is available to conduct related research during the summer between the junior and senior year for all students accepted into the Honors Program.

**International Studies Track -** To guide and recognize the work of history majors who desire to devote a part of their studies to an international studies track. In addition to the ordinary degree requirements, students following this track are required to complete a significant study abroad experience and to demonstrate research competence in a language other than English. For more information, see history.rice.edu.

Last Revised : August 11, 2014

 

# History

## The School of Humanities

## Degree Requirements for MA and PhD in History

The Rice University graduate program in history is primarily a PhD program. Students who have a BA in history (or its equivalent) are eligible to apply to the PhD program. Although many successful candidates to the PhD program have an MA or other advanced degree, advanced study is not a requirement for admission. Graduate study is offered in U.S. and other areas of history. Further information is available at history.rice.edu. For general university requirements, see Graduate Degrees.

The department awards graduate tuition waivers and fellowship stipends, within the limits of available funds, to qualified PhD candidates with demonstrated ability. University funding is not available for master's program study only. All graduate students in the history department are expected to participate in the professional activities of the department as part of their training. These include, but are not limited to, assisting with the *Journal of Southern History* or the *Papers of Jefferson Davis* or serving as research assistants or teaching assistants for department members. As far as possible, these assignments are kept consistent with the areas of interests of the students.

**MA Program—**The department gives priority to applicants for the PhD. Completion of the MA degree usually takes two years; no more than three years may elapse between graduate admission and the completion of the degree unless the department graduate committee approves an extension. MA degrees are awarded in three ways: (1) completion of one year of course work (24 credit hours) and a thesis written and defended in an oral examination during the second year; (2) completion of two years of course work (48 credit hours), normally including at least two seminar research papers, and (3) for students continuing to the PhD, completion of all requirements for candidacy, including written and oral examinations.

**PhD Program—**Doctoral candidates must prepare themselves in three fields of history: two in their major area of concentration, whether U.S. or other history, and a third in an area not included in the first two fields. Students who wish to pursue a third field in an area outside the department should petition the graduate committee by the end of their second semester.

The requirements for completing the degree will be administered as flexibly as possible within the bounds of the general university regulations. These requirements state that the PhD degree will be awarded after successful completion of at least 90 semester hours of advanced study and an original investigation reported in an approved thesis. The student may apply for formal admission to candidacy for the PhD degree after passing the qualifying exam.

For the PhD, candidates must:

- Prepare themselves thoroughly in three examination fields.
- Take eight graduate seminars, including Introduction to Doctoral Studies.
- Pass an examination in the principal language of research and in one additional language. If the principal language of research is English, candidates must pass an examination in one other language.
- Perform satisfactorily on written and oral examinations.
- Complete a dissertation presenting the results of original research.
- Defend the thesis in a public oral examination.

**Dual PhD with Universidade Estadual de Campinas (UNICAMP) in Brazil -** Rice will award a PhD to UNICAMP students who have successfully completed the following requirements:

1. Passed their comprehensive examinations and been admitted to candidacy at UNICAMP.
2. Completed 6 graduate-level courses at Rice, of which one must be HIST 575, “Introduction to Doctoral Studies,” one must be a History research seminar, and one must be a History reading seminar. Students must be enrolled in at least 9 credit hours per semester while at Rice University.
3. Written a dissertation in the language of their home institution and a summary in English that is equivalent in style, scholarship and length to an academic journal article.
4. Successfully presented the dissertation and the summary in English to a faculty panel at Rice.
5. Successfully defended the dissertation at UNICAMP.

UNICAMP will award the Doutor em História to Rice students who have successfully completed the following requirements:

1. Passed their comprehensive examinations and been admitted to candidacy at Rice.
2. Completed 6 graduate-level courses at UNICAMP, of which must include HH172, “Tópicos em Teoria da História,” two research seminars, two topical seminars and one elective seminar.
3. Written a dissertation in the language of their home institution and a summary in Portuguese that is equivalent in style, scholarship and length to an academic journal article.
4. Successfully presented the dissertation, and the summary, in Portuguese to a faculty panel at UNICAMP.
5. Successfully defended the dissertation at Rice.

The Humanities Research Center fosters scholarly research and intellectual community in the humanities broadly understood, facilitates scholarly work between the School of Humanities and other areas of Rice University, and leads institutional change by partnering with other foundations, centers, research institutions, and universities. The Center strives to bring a dynamic element to research and teaching by developing “intellectual liquidity” within and between the humanities and the sciences, information and communications technologies, and the professions. Furthermore, the Center serves as the nucleus within the university where the disciplinary changes that will shape its future can be profitably reflected on and anticipated. For a university the size of Rice, these collaborations-both within the university and beyond it-are crucial to stimulating innovation and new research. In short, the Center is an agent of intellectual integration, within and beyond the School of Humanities.

In addition to its support of faculty research through external faculty fellowships, Rice faculty fellowships, postdoctoral fellowships, and numerous conferences and workshops, the HRC offers courses, fellowships, and funding opportunities for undergraduate and graduate students. The competitive two-semester Andrew W. Mellon Seminars promote innovative and interdisciplinary research and pedagogical models for graduate students and faculty engaged in humanistic study. Undergraduate research internships provide stipends for students who work closely with faculty on research projects during the summer. Lastly, the Rice Seminars bring together faculty (Rice and non-Rice) and graduate students to study a common theme from several disciplinary perspectives.

The Humanities Research Center engages with students in non-traditional ways as well, offering panels and workshops on career development and special events focused on the needs and interests of students that are not readily addressed by departments.

## Degrees Offered: None

Jewish Studies is an interdisciplinary field that encompasses the texts, history, languages, philosophy, and culture of Jews and Judaism as they have endured over three millennia and throughout the world. Spread across the humanities and social sciences, Jewish Studies broadly examines topics including the Hebrew Bible and its history of interpretation, the nature of Jewish identities in religious and secular contexts, aesthetic representations of otherness, the relations of history and memory, religion and art, philosophical discussions of God, and others. Investigating the foundations and development of these various topics as well as their interaction with and influence on other traditions provides an opportunity to explore the continuities and diversity of Jewish life and thought over three millennia.

Undergraduate students will benefit from a course of studying Judaism because of the interdisciplinary status of JWST which crosses boundaries between departments and even schools; the substantive contribution to human knowledge of a people and culture that has remarkably proceeded from one of humanity's oldest traditions into an entirely contemporary one; and the intersection between academic study and engagement with local institutions and public discussions of some urgency.

## The School of Humanities

### Course Requirements for the Interdisciplinary Minor in Jewish Studies

JWST minor courses are open to all students at Rice from all backgrounds. Our classes meet student interests in Jewish experience and its importance for history, literature, art, politics, law, and philosophy. The following requirements apply to the JWST minor.

- Students must complete at least six courses (18 credit hours).
- Students must take at least one of the following core courses: HIST 186 *History of Jewish Civilization*; HIST 374 *Jewish History, 1500-1948*; RELI 122 *The Bible and Its Interpreters*; or RELI 209 *Introduction to Judaism*.
- Students must take at least one course in each of the following categories: (1) language and literature; (2) history and culture; and (3) thought, philosophy, and ethics. If a course is listed in more than one category, students can elect a category for which the course counts, yet each course can apply to only one category. For a list of approved elective courses, please review jewishstudies.rice.edu and/or speak with the minor advisors.
- No more than two Hebrew (HEBR) and two Religious Studies (RELI) courses will count towards the JWST minor.
- At least three courses must be at the 300-level or higher.
- No more than three courses can apply from study abroad or transfer credits.

## Degrees Offered: BA

Latin American Studies is an interdisciplinary major designed to further understanding of the cultures, histories, and politics of Latin America as viewed from regional and global perspectives. The major draws from courses and faculty from a wide range of departments, including Anthropology, Architecture, Art History, English, French Studies, History, Spanish and Portuguese, and Political Science. This major provides a challenging context for students to develop core skills in interdisciplinarity, language, communication (written and oral), theory, research methodologies, and geography.

Last Revised : August 12, 2013

 

# Latin American Studies

## Humanities

Department Info | Undergraduate Requirements | Graduate Requirements | Course Listings

## Degree Requirements For BA in Latin American Studies

For general university requirements, see Graduation Requirements. For the BA degree, students majoring in Latin American Studies will take courses with appropriate Latin American content at Rice or at an approved program abroad for a total of 10 courses (30 semester hours). No fewer than 6 courses (18 semester hours) should be taken at Rice. Each major will focus on a specific region, area, or country in Latin America. This area focus will shape each student's proposed course of study. Each course of study and an area focus must be approved by the advisor to the major. At least two of the courses must be in the humanities and two in the social sciences.

Other additional requirements include:

**1. One foundation course, LASR 158 Introduction to Latin American Studies**, is required of all majors. This course will both introduce and structure the major. This course will be taught in English, with discussion sections available in Spanish or Portuguese pending student interest. The course could also be team-taught by professors from different departments or even different schools.

**2. A Required Semester Abroad**: Rice LASR Majors will be required to spend at least one semester studying at a Rice-approved, semester-abroad program in which the primary language of instruction is Spanish, Portuguese, or under special circumstances French. Courses taken abroad may count toward completing the LAS major and toward meeting the distribution requirements in the major. Study abroad courses cannot count for more than 4 courses (12 semester hours) toward the major. While the semester abroad is ideal, under very special circumstances, the advisor to the major can approve a 12-week summer program as the equivalent of a semester, provided the program allows students to complete at least 3 three-credit courses.

**3. A Required Capstone Research Colloquium, LASR 491**: After completing the semester abroad, students will enroll in a research colloquium directed by a faculty member from either Humanities or Social Sciences. As directed by this faculty member, the colloquium director, students will write a research paper on a Latin American topic of their choice. During the course, students will be exposed to different research methodologies, theories appropriate to their field of study, and instruction on how best to incorporate research and sources that emerged from their study abroad. Interdisciplinary modes of research and writing will be a major feature of this colloquium. Students will be expected to highlight the interdisciplinary nature of their research in their completed paper. In addition, students in the colloquium will be expected to workshop their writing at different times during the semester. The completed research paper will be evaluated by the colloquium director and one other professor appropriate to the topic. With the approval of the colloquium director, this research paper may be written in English.

**4. Required Language Competence**: Rice LASR majors will be expected to demonstrate language competence at three different stages of the major:

- Prior to going abroad, students will be examined by Center for Study of Languages (CSL) faculty trained in proficiency testing to ensure that the students have adequate language competence for studying abroad—adequate at this stage meaning at least Intermediate-High according to proficiency standards set by the American Council on the Teaching of Foreign Languages (ACTFL).
- After returning from the semester abroad, students will be tested for proficiency at the Advanced-Low level, according to ACTFL Guidelines. Proficiency at the Advanced-Low level is desirable, but not required.
- In writing the research paper mentioned above, students must demonstrate to the satisfaction of the colloquium

director their ability to do research in a foreign language.

For a complete listing of all courses offered each semester in Latin American Studies, as well as more information about the LASR major, please visit the website for the Department of Spanish and Portuguese.

## Degree Offered: BA

This interdisciplinary major enables students to study medieval and early modern cultures in the period between 500 and 1700 A.D.. The program combines a broad background in various aspects of medieval and early modern culture with more specialized study in a selected field. These fields of emphasis include medieval and early modern art history, history, literature (Arabic, Chinese, English, French, or Latin), music, philosophy, or religion.

## Degree Requirements for BA in Medieval and Early Modern Studies

For general university requirements, see Graduation Requirements. Students majoring in medieval and early modern studies must complete at least 30 semester hours (10 courses); the minimum for double majors is 24 hours. All majors must complete five of these medieval studies courses at the 300 or 400 level.

Required and recommended courses include the following:

A minimum of 30 semester hours (10 semester courses), of which at least five courses must be at the 300/400 level. Double majors must complete a minimum of 24 semester hours.

Frequently taught courses ( i.e., at least every two years):

***Literature***

- MDEM 316 *Chaucer*
- MDEM 370 *Introduction to Traditional Chinese Poetry*
- MDEM 375 *Introduction to Classical Chinese Novels*
- MDEM 379 *Women in Chinese Literature*
- MDEM 404 *Beginnings in the Language and Literature of France*
- MEMT 425 *Courtly Love in Medieval France*

***Anthropology***

- MDEM 311 *African Prehistory*

***Art History***

- MDEM 111 *Introduction to the History of Art I*
- MDEM 330 *Early Medieval Art*
- MDEM 331 *Gothic Art and Architecture in Northern Europe, 1140–1300*
- MDEM 332 *Art of the Courts*

***Humanities***

- MDEM 478 *Medieval Studies*

***Music***

- MDEM 222 *Medieval and Renaissance Eras*
- MDEM 429 *Music of the Middle Ages*

***History***

- MDEM 281/381 *The Middle East from the Prophet Mohammand to Sulayman the Magnificent*

***Philosophy***

- MDEM 201 *History of Philosophy I*

***Religion***

- MDEM 105 *Medieval Christian Thought*

It is *recommended,* but not required, that students take two semesters at the college level in an appropriate language (or languages). Three courses (at least two at the 300 or 400 level) in the student's chosen field of emphasis—one of these may be a directed reading course.

For single majors, three additional courses in the medieval or early modern periods, one of which may be a senior thesis (one semester) on a topic in the student's field of emphasis; for double majors, one additional course in the medieval and early modern periods.

Students work out their programs of study in consultation with the program director. Those contemplating graduate work in medieval and early modern studies should study at least one foreign language in some depth (as most graduate schools require a reading knowledge of French and German for the PhD).

Students may select from among the following to fulfill the course requirements for the major in medieval and early modern studies.

Please note that not all courses listed below will be offered during the academic year. For a current list of courses that will be offered, please visit the Medieval and Early Modern Studies website at medieval.rice.edu.

***Anthropology***
MDEM 311: *African Prehistory*

***Asian Studies***
MDEM 370 *Introduction to Traditional Chinese Poetry*
MDEM 375 *Introduction to Chinese Literature*
MDEM 379 *Women in Chinese Literature*
MDEM 395 *Classical Chinese Novels*

***Classical Studies***
MDEM 101 *Elementary Latin I*
MDEM 102 *Elementary Latin II*
MDEM 211 *Intermediate Latin I*
MDEM 212 *Intermediate Latin II*

***English***
MDEM 310 *Dante*
MDEM 312 *Topics in Old English*
MDEM 313 *Beowulf*
MDEM 315 *Medieval Cultures Through Film*
MDEM 316 *Chaucer*
MDEM 317 *Arthurian Literature*
MDEM 318 *JRR Tolkien and the Middle Ages*
MDEM 319 *Medieval Romance*
MDEM 368 *Mythologies*
MDEM 412 *Introduction to Old English Language*
MDEM 413 *Beowolf in Old English*

***French Studies***
MDEM 404 *Beginnings of Language and Literature of France*
MDEM 411 *The Literary and Historical Image of the Medieval Woman*
MDEM 425 *Courtly Love in Medieval France*
MDEM 433 *Bayeux Tapestry*
MDEM 436 *Literature and Culture of the Middle Ages*

***German Studies***
MDEM 126 *Freshman Seminar: The Legend of King Arthur in the Middle Ages*
MDEM 402 *Middle High German*

***History of Art***
MDEM 108 *Art in Context: Late Medieval and Renaissance Culture*
MDEM 111 *Introduction to the History of Western Art I: Prehistoric to Gothic*
MDEM 330 *Early Medieval Art*
MDEM 331 *Gothic Art and Architecture in Northern Europe, 1140–1300*
MDEM 332 *Art of the Courts*
MDEM 340 *Northern Renaissance Art*
MDEM 343 *Masters of the Baroque Era*
MDEM 363 *Capitalism and Art, 1300-1700*
MDEM 373 *Chinese Art and Visual Culture*
MDEM 376 *East & West: Medieval Visual Culture in China & Northern Europe*
MDEM 378 *Age of Rembrant*
MDEM 431 *Architecture of the Gothic Cathedral from the Middle Ages to the 20th Century*
MDEM 433 *Bayeux Tapestry*
MDEM 434 *Seeing Sex in European Art 1400-1700*
MDEM 435 *Multicultural Europe, 1400-1700*

***History***
MDEM 281 *The Middle East from the Prophet Muhammad to Sulayman the Magnificent*
MDEM 308 *The World of Late Antiquity*
MDEM 324 *Coexistence in Medieval Spain*
MDEM 327 *European Frontier Societies*
MDEM 345 *Renaissance Europe*
MDEM 357 *Jews and Christians in Medieval Europe*
MDEM 364 *Central Asian Conquest Empires*
MDEM 369 *Medieval Frontiers*

***Humanities***
MDEM 478 *Medieval Studies*

***Medieval and Early Modern Studies***
MDEM 320 Directed Readings

***Music***
MDEM 222 *Medieval and Renaissance Eras*
MDEM 427 *Topics in Early Music*
MDEM 429 *Music of the Middle Ages*
MDEM 456 *Collegium*

***Philosophy***
MDEM 201 *History of Philosophy I*
MDEM 301 *Ancient and Medieval Philosophy*
MDEM 481 *Seminar in Ancient and Medieval Philosophy*

***Religion***
MDEM 100 *Romancing Religion: Narratives of the Sacred*
MDEM 103 *Introduction to Jewish Mysticism*
MDEM 254 *Medieval Latin Saints Lives*
MDEM 271 *Medieval Popular Christianity*
MDEM 305 *Ecstasy and Embodiment in Religious Experience*
MDEM 314 *Divine Sex: Gender and Divinity in the Middle Ages*
MDEM 391 *The Reformation*
MDEM 462 *English Spirituality after Henry VIII*

## Degrees Offered: BA, MA, PhD

Philosophy is best described as the attempt to think clearly and deeply about the fundamental questions that arise for us as human beings. What is the nature of knowledge (epistemology)? How are we to distinguish between what really is and what only seems to be (metaphysics)? What is the right thing to do (ethics)? Is there any meaning to existence? To study the history of philosophy is to study the best, most enduring answers that have been given to these questions in the past. Because every other field of study adopts some stance toward these questions, though often implicitly, philosophical issues arise in the natural and social sciences, history, linguistics, literature, art, and so on. Special courses in philosophy deal with each of these. Characteristic of philosophy are commitments to the construction and evaluation of arguments, to expressing thoughts clearly and precisely, and to defending one's ideas and evaluating the ideas of others. The study of philosophy thus provides resources for critical participation in all realms of human endeavor.

The graduate program trains students to teach and pursue research in the main areas of department concentration: ethics (especially bioethics) and social and political philosophy, core portions of analytic philosophy (especially philosophy of mind), history of philosophy, continental philosophy, and core portions of analytic philosophy.

Last Revised : August 12, 2013

 

# Philosophy

## The School of Humanities

## Degree Requirements for BA in Philosophy

For general university requirements, see Graduation Requirements. Students majoring in philosophy must complete 30 semester hours (10 three-hour departmental courses); at least 18 hours (six courses) must be at the 300 level or above. A double major must complete 27 hours (nine three-hour departmental courses) with all other requirements remaining the same.

Majors must take the following courses:

- PHIL 201 *History of Philosophy I*
- PHIL 202 *History of Philosophy II*
- Either PHIL 106 *Logic* or PHIL 305 *Mathematical Logic*

In addition, majors must take at least one course from each of the following area lists:

***History***
PHIL 301 *Ancient and Medieval Philosophy*
PHIL 302 *Modern Philosophy*
PHIL 308 *Continental Philosophy*
PHIL 321 *Kant and 19th Century Philosophy*

***Core Analytic***
PHIL 303 *Theory of Knowledge*
PHIL 304 *Metaphysics*
PHIL 312 *Philosophy of Mind*
PHIL 313 *Philosophy of Science*
PHIL 353 *Philosophy of Language*

***Value Theory***
PHIL 306 *Ethics*
PHIL 307 *Social and Political Philosophy*
PHIL 316 *Philosophy of Law*
PHIL 326 *History of Ethics*
PHIL 327 *History of Social and Political Philosophy*

## Senior Thesis and Honors in Philosophy:

Qualified majors may apply before their senior year for directed research leading to a senior thesis, carried out during both semesters of the senior year. Each semester will require three credit hours; these six hours are in addition to the course hours required for the major.

To qualify for the program, students wil be required to have an approved research proposal and the agreement of a faculty member to serve as advisor for that project. Applicants will normally be required to have a GPA of 3.75 in philosophy courses and to have completed at least two upper-level courses in the distribution area of the proposed research. (See the major requirements for the definition of the distribution areas.) Applications should be submitted to the undergraduate advisor (UGA) and will be evaluated by the department.

Students who are considering applying to write a senior thesis should consult the UGA and potential advisors as early as possible. Normally students will apply before preregistration in the second semester of their junior year and will spend time during the following summer reading from a list they have developed with their advisor. The thesis normally will be between 7,500 and 15,000 words (approximately 30–60 pages) in length. Students will enroll in PHIL 411 and 412. Students accepted into the Rice University Scholars Program should enroll in HONS 470 and 471 and will be awarded departmental honors for their work in that program if they meet the requirements in this statement. Note that acceptance into the departmental honors program is a separate process from acceptance in RUSP, as is the evaluation for departmental honors.

To be considered for honors, the senior thesis must be completed by April 1. The thesis will be read and evaluated by the advisor and a second reader chosen by the department, and the final decision on honors will be made by the entire faculty. A student will receive honors if he or she receives a grade of A+, A, or A- in PHIL 412. Completion of the major with at least a 3.5 GPA in all philosophy courses is required for departmental honors. Students who miss the April 1 deadline for thesis submission but meet the university deadline for the semester will receive a grade and credit for completed work but will not be considered for honors. Students whose thesis is not awarded honors will receive a grade and credit for completed work.

Last Revised : August 12, 2013

## Degree Requirements for MA and PhD in Philosophy

For general university requirements, see Graduate Degrees. Students have the additional option of applying for a doctoral program specializing in bioethics (see below).

For the non-thesis MA, candidates must satisfy the following requirements:

- Complete at least two semesters in residence at Rice University
- Complete 42 hours of courses approved for graduate credit in philosophy at Rice University with B- or better
- Accumulate an overall GPA of at least 3.0
- Complete at least 30 hours in philosophy at the 500 level
- Satisfy the departmental logic requirement (Philosophy 505 or examination)
- Complete at least 5 courses in an area of concentration
- Satisfactorily complete departmental duties
- File a petition for certification of the non-thesis master's degree. This petition can be obtained from the graduate program coordinator and must be approved and signed by the department chair and submitted to the Office of Graduate and Postdoctoral Studies according to the deadlines posted in the Academic Calendar.

For the thesis MA in philosophy, candidates must:

- Complete with high standing at least 30 semester hours in advanced courses approved by the department
- Complete a written thesis on a subject approved by the department
- Perform satisfactorily on a final oral examination (not limited to the student's special field of study)

For the PhD in philosophy, candidates must:

- Complete with high standing 42 hours of course work approved by the department (including logic)
- Demonstrate competence in logic
- Pass a qualifying examination
- Perform satisfactorily on an oral defense of their thesis proposal
- Complete a written thesis on a subject approved by the department (at least one year of thesis research must be spent in residence)
- Perform satisfactorily on a final oral examination (not limited to the student's special field of study)

**Bioethics Program—**The PhD in philosophy with a specialization in medical ethics is offered in cooperation with the Center for Medical Ethics and Health Policy at Baylor College of Medicine. Applicants to this special program must have enough background in philosophy to complete two and a half years of strong general training in philosophy at the graduate level. After completing their general training, students receive instruction in clinical bioethics at Baylor College of Medicine and then write a dissertation drawing on their philosophical and clinical training. Further information about this program is available from the Department of Philosophy.

## Degrees Offered: BA, MA, and PhD

The undergraduate major is built to be as flexible as possible so that students may pursue individual interests and interdisciplinary goals. The major provides students with the opportunity to explore mainline religious traditions and marginal/repressed religious currents within multicultural and transnational contexts. Students will gain religious literacy while studying the historical, social, cultural, psychological, philosophical, and cognitive dynamics of religion and religious experience. For research degrees in the graduate program, see the Graduate Requirements tab.

Last Revised : August 11, 2014

 

# Religion

## The School of Humanities

## Degree Requirements for BA in Religious Studies

For general university requirements, see Graduation Requirements. In addition, students also must satisfy the distribution requirements and complete no fewer than 60 semester hours outside the departmental requirements for a program totaling at least 120 semester hours. See Distribution Requirements and Majors.

Students majoring or double-majoring in religious studies must complete:

- 30 hours for majors
- 24 hours for double majors
- 18 hours must be selected at 300-level or above
- No more than two courses (six hours) may be transferred from outside the department

The 30 hours for majors or 24 hours for double majors must include the following requirements:

- RELI 101: Introduction to Religion
- 2 courses in religious traditions
  - 1 course- Judaism/Christianity/Islam/African-American Religions
  - 1 course- Indigenous African Religions/American Religions/Buddhism/Hinduism
- Senior Project- 1 400-level course, either seminar or independent study with required research paper

Election of courses should be worked out programmatically with a faculty member advisor so that at least 3 courses form a concentrated area of study.

## Honors Program

Qualified undergraduates may choose the option of writing a senior thesis and submitting it to the department for consideration to receive Distinction in Research and Creative Works. For details about the submission process and this honors award, visit the department's website. To complete the thesis, the student elects RELI 400 "Senior Thesis." Students must have a minimum 3.2 GPA in Religion courses prior to enrolling in RELI 400, a Religion faculty supervisor, and the permission of the Undergraduate Director. Further details are available upon consultation with the Undergraduate Director.

Last Revised : August 11, 2014

 

# Religion

## The School of Humanities

## Degree Requirements for MA and PhD in Religious Studies

The graduate program accepts a limited number of qualified students. A distinguished undergraduate record and high scores on the Graduate Record Examination (GRE) are essential, and an advanced degree in the humanities is desirable. For general university requirements, see Graduate Degrees. Students admitted into the program normally will receive financial assistance in the form of a tuition waiver and a stipend. As part of their training and in return for their stipends, students are expected to perform a minimum amount of services in return for their stipend by assisting the department as needed.

Although students are not normally admitted to study for an MA, graduate students may earn the MA after obtaining approval of their candidacy for the PhD.

The PhD in religious studies is a 5-8 year program. Course requirements for students without a relevant MA or MDiv (based on three courses per semester):

- 18 courses (54 hours required); 36 hours for students with a relevant MA or MDiv
- Two department seminars to be taken in each of the first two years
- Successful completion of the second-year review
- Passing grades on reading examinations in two secondary research languages approved by the faculty before taking qualifying exams.
- Passing grades in four qualifying examinations
- Oral discussion of dissertation proposal
- Satisfactory completion of dissertation and oral defense

**Reading Lists**—Reading lists are available for all Qualifying Exams. Students are expected to familiarize themselves with this material enough that they draw on it on their exams and the dissertation itself. The graduate seminar is, in part, an introduction to areas of the reading list and to the techniques for engaging in deep, independent reading.

## Professional Development

Opportunities are available to teach undergraduate courses in the department. Students are encouraged to pursue teaching opportunities at colleges and universities. Limited funds also are available for students to attend conferences to present their research. The department encourages these and other efforts to prepare students for academic careers.

## Degrees Offered: BA

The department offers courses on the literatures and cultures of the Portuguese and Spanish-speaking nations of the world and on Spanish and Portuguese linguistics. The department stresses linguistic competence, interdisciplinary study, and a transnational perspective on Spanish, Latin America and Brazilian literature and culture. In addition to courses on the novel, poetry, and the essay, the department also offers the opportunity to study film, art, cultural theory, translation, and gender. Qualified students may undertake independent work.

Last Revised : August 12, 2013

 

# Spanish and Portuguese

## The School of Humanities

## Degree Requirements for BA in Spanish and Portuguese

For general university requirements, see Graduation Requirements. Both single and double majors must take at least one course in Hispanic linguistics, one course in Spanish literature and/or culture, and one course in Latin American literature and/or culture. No more than two courses taught in English may count toward the major in Spanish and Portuguese. More than half of the courses for the major must be taken at Rice University.

**Single Majors—**Students majoring in Spanish and Portuguese must complete at least 30 semester hours in upper-level courses (SPAN 330 and above) as follows:

- One course between SPAN 330 and SPAN 359
- Four courses between SPAN 360 and SPAN 399
- Four courses at the 400 level
- One elective course

**Double Majors—**Students double majoring in Spanish and Portuguese must complete at least 24 semester hours in upper-level courses (SPAN 330 and above) as follows:

- One course between SPAN 330 and SPAN 359
- Three courses between SPAN 360 and SPAN 399
- Three courses at the 400 level
- One elective course

For a list of recommended elective courses, please see the department coordinator.

**Honors—**Every year, the department presents the Cervantes Award for Outstanding Seniors to its top students. The department also offers to outstanding majors the opportunity to do honors work during their final year of study. Honors work consists of an independent research project leading to a thesis and is undertaken under the direction of a departmental faculty member. Students wishing to do honors work must submit a thesis proposal to be approved by the department before the end of the semester prior to the semester in which they will register for the honors thesis (SPAN 495).

## Degrees Offered: BA and Graduate Certificate

The undergraduate major, honors track undergraduate major, and the graduate certificate program take an interdisciplinary approach in their exploration of women's experiences and the role that ideas about sexual differences have played in human societies. Areas of inquiry include women's participation in social and cultural production; the construction of gender roles and sexuality; the relationship between ideas about gender and concepts inherent in other social, political, and legal structures; and the implications of feminist theory for philosophical and epistemological traditions. Students acquire an understanding of how adopting gender as a significant category of analysis challenges existing disciplines. They also gain proficiency in the methods used to study and compare cultural constructions of gender and sexuality, and they become familiar with the ongoing

fundamental debates in women's, gender, and sexuality studies.

Last Revised : February 20, 2012

 

# Study of Women, Gender and Sexuality

Department Info | Undergraduate Requirements | Graduate Requirements | Course Listings

## Degree Requirements for BA in the Study of Women, Gender, and Sexuality

For general university requirements, see Graduation Requirements. Students majoring in the study of women, gender, and sexuality must complete:

- 36 semester hours of departmental course work (30 hours if this is a second major)
- SWGS 101 Introduction to the Study of Women, Gender, and Sexuality, or SWGS 201 Introduction to Lesbian, Gay, Bisexual, and Transgender Studies
- SWGS 345 History of Feminism or at least one approved theory course
- SWGS 494 Pre-Seminar in Engaged Research, SWGS 496 Engaged Research Practicum and SWGS 497 Engaged Research Seminar
- At least one approved non-Western studies course
- At least one approved critical race studies course

For students who pursue the Honors Program, the following two courses must be taken in place of SWGS 494, SWGS 496 and SWGS 497, in addition to all other requirements listed above:

- SWGS 498 Honors Research in the Study of Women, Gender, and Sexuality (F)
- SWGS 499 Honors Research in the Study of Women, Gender, and Sexuality (S)

Of the remaining required courses, no more than four courses may be from a single department. All students must work out their individual courses of study with their faculty advisors. Each student's course of study must be approved by the SWGS advisor. Course requirement tracking forms are available in the SWGS office for declared SWGS majors.

The *Engaged Research Practicum* and *Seminar* are open to nonmajors. Permission of the instructor is required as well as some background in the study of women, gender or sexuality.

## The SWGS Honors Track

Students wishing to pursue the Honors Program will complete a thesis. The process of preparing the thesis begins in the late spring of the junior year.

In that spring semester, the student chooses an advisor from the SWGS faculty, and with that advisor, produces a proposal for a research project. The proposal must be approved by the SWGS major advisor by the last day of the exam period in the spring of the junior year.

In the fall of the senior year, students enroll in SWGS 498, for directed research supervised by a CSWGS faculty affiliate and are in regular consultation with their advisors.

In the spring of the senior year, students enroll in SWGS 499 and work closely with their advisors as they complete the thesis. Honors students present their projects in a public event at the end of the semester.

## SWGS Courses

The following courses are among those that can be used to fulfill requirements for the major. As course offerings may vary from year to year, students are urged to consult with their faculty advisors or with the director at the beginning of each semester. Please note that not all courses listed below will be offered every academic year. For a current

list of courses, please visit the CSWGS website at cswgs.rice.edu.

**I. Courses that Satisfy the Core Requirements**

SWGS 101 *Introduction to the Study of Women, Gender, and Sexuality*
SWGS 201 *Introduction to Lesbian, Gay, Bisexual, and Transgender Studies*
SWGS 494 *Pre-Seminar in Engaged Research*
SWGS 496 *Engaged Research Practicum*
SWGS 497 *Engaged Research Seminar*
SWGS 498 *Honors Research in the Study of Women, Gender, and Sexuality* (F)
SWGS 499 *Honors Research in the Study of Women, Gender, and Sexuality* (S)

**II. Courses that Satisfy the Non-Western Studies Requirement**

SWGS 240 *Gender and Politicized Religion*
SWGS 250 *International Political Economy of Gender*
SWGS 283 *Women in the Modern Islamic World*
SWGS 302 *Globalization, Gender, and Migration*
SWGS 315 *Gender and Islam*
SWGS 322 *Human Development in Global and Local Communities*
SWGS 340 *Gender and Politicized Religion (enriched version)*
SWGS 373 *Women's Social Movements in Latin American and the Caribbean*
SWGS 384 *Modern Girl and Asia in the World*
SWGS 399 *Women in Chinese Literature*
SWGS 422 *Gender and Global Economic Justice*
SWGS 449 *Cultures of Sexuality*
SWGS 455 *Women, Gender and Sexuality in Medieval Islamic Societies*
SWGS 492 *Gender Histories of Modern China*

**III. Courses that Satisfy the Critical Race Studies Requirement**

SWGS 234 *U.S. Women's History I: Colonial Beginnings to the Civil War*
SWGS 235 *U.S. Women's History II: Civil War to the Present*
SWGS 329 *The American West and Its Others*
SWGS 338 *19th Century Women's Narratives*
SWGS 354 *Chicano/a Literature*
SWGS 370 *Survey of African American Literature*
SWGS 374 *Feminist and Queer Theory in the African Diaspora*
SWGS 375 *Latina and African American Women's Activism in the Urban Metropolis*
SWGS 376 *The Chicana and Latina Experience*
SWGS 377 *Race, Power, and the Politics of Place*
SWGS 387 *Cultural Studies*
SWGS 415 *Sociolinguistics*
SWGS 453 *Topics in African American Literature: Black Women Writers*
SWGS 466 *Latin American Women's Culture*

**IV. Courses that Satisfy the Theory Requirement**

SWGS 345 *History of Feminism*
SWGS 374 *Feminist and Queer Theory in the African Diaspora*
SWGS 380 *Feminist Theory North and South*
SWGS 383 *Feminist Social Thought*
SWGS 391 *Producing Feminist Knowledge: Methodology and Visual Culture*
SWGS 395 *Feminist Knowledges*
SWGS 407 *Studies in Feminist Literary Theory*

SWGS 485 *Gender and Hollywood Cinema in the 1950s*
SWGS 495 *Independent Study*

## Concentration in Poverty, Social Justice, and Human Capabilities in the SWGS Major

Within the major in the Study of Women, Gender, and Sexuality, students can pursue a concentration in Poverty, Social Justice, and Human Capabilities (PJHC). The concentration allows students to focus their course of study on the relation of gender and sexuality to poverty and human well-being and to develop an analytic framework for addressing these issues.

The concentration consists of three courses (of the 10 or 12 required in the SWGS major):

- HUMA/SOCI 280 Introduction to Poverty, Justice, Capabilities
- and two approved electives with substantive gender focus chosen from the PJC course offerings. These elective courses also may
  be approved to fulfill SWGS requirements for critical race and non-Western studies.

Last Revised : August 11, 2014

 

# Study of Women, Gender and Sexuality

## Requirements for Graduate Certificate in the Study of Women, Gender, and Sexuality

The graduate certificate program in the study of women, gender, and sexuality is designed to provide interdisciplinary training in women, gender, and sexuality studies to students pursuing a PhD degree at Rice University. Students who have been admitted into a PhD program are eligible to apply to the SWGS graduate certificate program. The SWGS graduate certificate is not a free-standing degree program; in addition to fulfilling the SWGS requirements outlined below, candidates will be required to successfully complete the PhD program in which they have been admitted in order to receive the graduate certificate in SWGS. Further information is available on request from the SWGS office. For PhD requirements, see the relevant department. For general university requirements, see Graduate Degrees in this publication.

The program awards graduate fellowship stipends, within the limits of available funds, to enrolled certificate students during the prospectus-writing semester. Although timelines vary depending on the student's home department, this semester normally occurs during the semester following the completion of all required coursework (within the student's home department as well as CSWGS) and after achieving candidacy in the Ph.D. program. Graduate students who enroll in the certificate program in fall 2008 and in subsequent semesters will be asked to submit a dissertation proposal (or a 500-word statement with a proposal to follow later) that includes some indication of the ways women, gender, and/or sexuality feature in their project in order for a stipend to be disbursed during the "prospectus semester." CSWGS will ask for this proposal or statement after the student completes qualifying exams. Graduate certificate students are eligible to work as teaching assistants for an SWGS undergraduate core or cross-listed course, or in some cases, to teach a course of their own upon approval of the steering committee.

For the graduate certificate in SWGS, candidates must:

- Complete nine credit hours of courses in SWGS, including two core courses (SWGS 501 and SWGS 502) and one cross-listed elective course (see list of approved courses below)
- Complete three noncredit hours for participation in annual colloquium
- Completed a dissertation that in some way features the study of women, gender, and/or sexuality

SWGS certificate students are strongly encouraged to include a member of the CSWGS faculty on their dissertation committee and to consult regularly with the faculty member as they pursue their dissertation work.

The following courses are those that can be used to fulfill requirements for the graduate certificate. In most cases, students will be able to complete these requirements within the normal time limits for coursework in their PhD programs. All students must work out their individual courses of study with the CSWGS director and the graduate advisor in their home departments. Each student's course of study must be approved by the CSWGS director. Please note that not all courses listed below will be offered every academic year. For a current list of courses, please visit the CSWGS website at cswgs.rice.edu.

**I. Courses that Satisfy the Core Requirements**
SWGS 501 *Feminist Debates*
SWGS 502 *Gender, the Disciplines, and Interdisciplinarity*

**II. Courses that Satisfy the Cross-listed Elective Course Requirement**
SWGS 503 *Directed Reading*
SWGS 517 *Medieval Women Writers*
SWGS 520 *Shakespeare and Difference*

SWGS 522 *Feminist Economics*
SWGS 525 *Self, Sex, and Society in Ancient Greece*
SWGS 534 *Seeing Sex in European Art, 1400–1700*
SWGS 542 *Victorian Fiction*
SWGS 545 *Women and Gender: Europe and Beyond*
SWGS 546 *20th-Century British Literature*
SWGS 556 *Seminar in Language Variation*
SWGS 577 *Buddhism, Gender, Society*
SWGS 580 *Sex, Sanctity, and Psychoanalysis*
SWGS 581 *Cultural Studies*
SWGS 583 *Reading Material*
SWGS 584 *Thinking Sex Under Neoliberalism*
SWGS 585 *Postcolonialism and Beyond*

**III. Annual Colloquium Requirement**

Graduate certificate students will participate in a colloquium involving a series of speakers over the course of a year, to be offered annually at Rice and organized by the Center for the Study of Women, Gender, and Sexuality (CSWGS). Colloquium attendance by graduate certificate students constitutes an official requirement for the certificate. Normally, students are expected to attend colloquia over a minimum of four semesters, and attendance beyond that is highly encouraged. Colloquium topics will be determined by the CSWGS steering committee with a view to highlighting emerging knowledge in gender, sexuality, and women's studies. The colloquium provides graduate students with the opportunity to engage in sustained intellectual exchange with leading scholars and to participate in producing cutting-edge work in the field.

## Degrees Offered: BA

Department of Visual and Dramatic Arts majors are students who concentrate their focus of study in the visual and dramatic arts, with emphasis in the studio arts, film and photography, or theatre tracks. Each student should discuss with their faculty advisor the selection of courses and any other matters of concern in the student's academic life such as study and travel abroad, scholarships and internships, career goals or options, etc.

## Degree Requirements for BA in Visual and Dramatic Arts

(For general university requirements, see Graduation Requirements)

***Bachelor of Arts in Visual and Dramatic Arts***

***Studio Art Track***
***Single Major***
***(13 courses required)***

- ARTS 225 *Basic Drawing* (ARTS 101 and ARTS 103 accepted as equivalent)
- ARTS 301 *Painting Studio*
- ARTS 311 *Printmaking Studio*
- ARTS 325 *Life Drawing* or ARTS 323 *Drawing Studio*
- ARTS 365 *Sculpture I*
- ARTS 388 *Critical Studies for Studio Practice*
- Two history of art (HART) electives
- Three studio arts (ARTS), photography (FOTO), film (FILM) or theatre (THEA) electives
- ARTS 294 *Special Problems: Junior Field Trip*
- ARTS 499 *Senior Studio* (3 credit hours fall; 3 credit hours spring.) Students must enroll in ARTS 499 in both the fall and spring semesters of their senior year.

***Studio Art Track***
***Double Major***
***(12 courses required)***

- ARTS 225 *Basic Drawing* (ARTS 101 and ARTS 103 accepted as equivalent)
- ARTS 301 Painting Studio
- ARTS 311 Printmaking Studio
- ARTS 325 *Life Drawing* or ARTS 323 *Drawing Studio*
- ARTS 365 *Sculpture I*
- ARTS 388 *Critical Studies for Studio Practice*
- Two history of art (HART) electives
- Two studio arts (ARTS), photography (FOTO), film (FILM), or theatre (THEA) electives
- ARTS 499 *Senior Studio* (3 credit hours fall; 3 credit hours spring.) Students must enroll in ARTS 499 in both the fall and spring semesters of their senior year.

Visual and Dramatic Arts majors are strongly encouraged to explore arts-related courses offered in other departments that may enrich the studio major such as: philosophy, anthropology, science, history, cultural studies, language, writing, comparative studies, etc. Students should speak with their faculty advisor prior to enrolling.

The junior year field trip will be designed to help visual arts majors focus on the upcoming senior year of intensive studio work, and to get to know the Visual and Dramatic Arts faculty and staff. Trips may include local Houston alternative art, theatre, and film venues; museums; artist studios; and exhibitions as well as travel to destinations within the United States to visit significant arts sites and works.

***Film and Photography Track***

***Single Major***
***(13 courses required)***

- FILM 225 *Introduction to Filmmaking & Editing*
- FOTO 205 *Introduction to Black & White Photography* or FOTO 210 *Beginning Digital Photography*
- FILM 327 *Documentary Production* & FILM 328 *Filmmaking I* or any two of FOTO 295 *Special Problems in Photography*; FOTO 310 *Intermediate Digital Photography*; FOTO 383 *Photography Bookmaking*; FOTO 385 *Photography Seminar*; FOTO 390, *Visualizing Nature*
- FILM 420 *Film Studio* or FOTO 482 *Advanced Digital Photography*
- FILM 280 *History and Aesthetics of Film* or FILM 284 *Non-Fiction Film* or FILM 383 *Global Cinema* or FILM 432 *Film Genre: The Western* or FILM 435 *Film Authorship* or ARTS 388 *Critical Studies for Studio Practice*
- Three (3) elective courses in studio arts (ARTS), film (FILM), theater (THEA), or photography (FOTO)
- One (1) elective courses in theory/criticism of studio arts (ARTS), theatre (THEA), or film/media studies (offered in the departments of Anthropology, English, French Studies, History, etc.). NOTE: Open selections qualified by course prerequisites. Elective courses should be selected in consultation with a Visual and Dramatic Arts faculty advisor.
- ARTS 294 *Special Problems: Junior Field Trip* (recommended)

***Film and Photography Track***
***Double Major***
***(11 courses required)***

- FILM 225 *Introduction to Filmmaking & Editing*
- FOTO 205 *Introduction to Black & White Photography* or FOTO 210 *Beginning Digital Photography*
- FILM 327 *Documentary Production* & FILM 328 *Filmmaking I* or any two of FOTO 295 *Special Problems in Photography*; FOTO 310 *Intermediate Digital Photography*; FOTO 383 *Photography Bookmaking*; FOTO 385 *Photography Seminar*; FOTO 390, *Visualizing Nature*
- FILM 420 *Film Studio* or FOTO 482 *Advanced Digital Photography*
- FILM 280 *History and Aesthetics of Film* or FILM 284 *Non-Fiction Film* or FILM 383 *Global Cinema* or FILM 432 *Film Genre: The Western* or FILM 435 *Film Authorship* or ARTS 388 *Critical Studies for Studio Practice*
- Four (4) elective courses in studio arts (ARTS), film (FILM), theater (THEA), or photography (FOTO)
- Two (2) elective courses in theory/criticism of studio arts (ARTS), theatre (THEA), or film/media studies (offered in the departments of Anthropology, English, French Studies, History, etc.). NOTE: Open selections qualified by course prerequisites. Elective courses should be selected in consultation with a Visual and Dramatic Arts faculty advisor.
- ARTS 294 *Special Problems: Junior Field Trip* (recommended)

Film and photography track majors are strongly encouraged to explore film-related courses offered in other departments that may enrich the Film and Photography major, such as philosophy, anthropology, science, history, cultural studies, language, writing, comparative studies, etc. Students should speak with their faculty advisor prior to enrolling.

The junior year field trip will be designed to help visual arts majors focus on the upcoming senior year of intensive studio work, and to get to know the Visual and Dramatic Arts faculty and staff. Trips may include local Houston alternative art, theatre, and film venues; museums; artist studios; and exhibitions as well as travel to destinations within the United States to visit significant arts sites and works.

***Theatre Track***
***Single Major***
***(13 courses required)***

- THEA 100 *Stage Craft,* or THEA 101 *Costume Construction,* or THEA 103 *Theatre Technology*
- THEA 300 *Introduction to Theatre Design* or THEA 301 *Acting I*
- THEA 303 *Introduction to Theatre* or THEA 315 *Introduction to Theatre History*
- THEA 331 *Theatre Production-Crew*
- Six (6) elective courses in theatre (THEA), studio arts practice (ARTS), theory, or criticism, photography (FOTO), or film (FILM). May not include more than three (3) studio arts practice (ARTS) or film (FILM).
- Three (3) elective courses in dramatic or film theory or criticism, dramatic literature, or art history. NOTE: Open selections qualified by course prerequisites. Elective courses should be selected in consultation with the theatre faculty advisor.
- ARTS 294 *Special Problems: Junior Field Trip* (recommended)

***Theatre Track***
***Double Major***
***(11 courses required)***

- THEA 100 *Stage Craft,* or THEA 101 *Costume Construction,* or THEA 103 *Theatre Technology*
- THEA 300 *Introduction to Theatre Design* or THEA 301 *Acting I*
- THEA 303 *Introduction to Theatre* or THEA 315 *Introduction to Theatre History*
- THEA 331 *Theatre Production-Crew*
- Four (4) elective courses in theatre (THEA), studio arts practice (ARTS), theory, or criticism. May not include more than two (2) studio arts practice (ARTS) or film (FILM).
- Three (3) elective courses in dramatic or film theory or criticism, dramatic literature, or art history. NOTE: Open selections qualified by course prerequisites. Elective courses should be selected in consultation with the theatre faculty advisor.
- ARTS 294 *Special Problems: Junior Field Trip* (recommended)

Theatre track majors are strongly encouraged to explore theatre-related courses offered in other departments that may enrich the theatre major, such as: philosophy, anthropology, science, history, cultural studies, language, writing, comparative studies, etc. Students should speak with their faculty advisor prior to enrolling.

Theatre track majors are encouraged to take Lifetime Physical Activity Program (LPAP) courses to supplement and enhance their studies in theatre. Courses include but are not limited to: LPAP 130 *Contact Improvisation*, LPAP 133 *Capoeira*, LPAP 148 *Dance Choreography*, LPAP 151 *The Alexander Technique*, LPAP 155 *Introduction to Ballet* and LPAP 157 *Jazz Dance/Hip Hop.* Students should receive departmental approval and have already satisfied the LPAP graduation requirements before enrolling. Students may not take more than 4 LPAP courses for credit.

The junior year field trip will be designed to help all visual arts majors focus on the upcoming senior year of intensive studio work, and to get to know the Visual and Dramatic Arts faculty and staff. Trips may include local Houston alternative art, theatre, and film venues; museums; artist studios; and exhibitions as well as travel to destinations within the United States to visit significant arts sites and works.

## Distinction in Research and Creative Works

Distinction in Research and Creative Works is a university award for select undergraduates, granted at commencement, which appears on the transcript and diploma. Students must apply within their department or program to be considered for the award and a letter from a faculty member must support the application.

Eligibility for the award extends widely to include a variety of research, design, and other creative projects, as well as persistent dedication to research. Projects completed in part or entirely at other institutions or with community partners will be eligible for consideration.

Applicants must be in good academic standing and have a cumulative GPA of at least 3.30 in courses completed at Rice.

Also, of further note: The award will be granted only to projects that produce a concrete outcome – e.g. an essay, invention, design, art exhibition, project or performance, or musical composition – and demonstrate commitment and/or achievement above and beyond the norm. Students who complete senior theses, senior design projects or other required senior capstone projects shall not qualify automatically for consideration for this university distinction.

Department of Visual and Dramatic Arts Application must include: 1) application form; including portfolio; 2) overall GPA of 3.30; 3) a written artist statement; 4) letter of support from a Visual and Dramatic Arts faculty member; 5) public exhibition, screening, publication or performance that includes a lecture or artist talk component by applicant; 6) two-page description of how the project meets the requirements of Distinction.

The department requires exceptional evidence of success, as defined by completion of a project (body of artwork, film, theatrical design work, etc.). Support through the application process will be available through the department--e.g. workshops, seminars and individual meetings with faculty mentors.

Contact the department or look online for deadline dates. No electronic submissions accepted. Please note that your project does not have to be completed to apply for Distinction (all final materials will be due on April 17, 2015). The department will select a very limited number of students for Distinction.

## Transfer Credit

No more than two courses may be transferred for the single or double major to satisfy degree requirements for BA in Visual and Dramatic Arts degree. The two transfer credit courses must be studio, film, photography, or theatre practice courses required for all majors. Advanced placement credit may not be used by Visual and Dramatic Arts majors to fulfill department degree requirements.

Entering transfer students who are transferring coursework from another accredited college or university will be allowed to transfer their undergraduate art courses. Students must speak with the department chairman immediately upon transferring to Rice.

The Department of Visual and Dramatic Arts will accept academic work completed in the Spring at NYU program as well as the National Theater Institute program, Eugene O'Neill Theater Center, as transfer credit to fulfill major requirements (following university transfer credit guidelines).

See also Transfer Credit.

## Rice Theatre Program

Rice Theatre Program curriculum offers a solid foundation in all aspects of theatrical production from acting and directing to technology and design for students who wish to pursue a professional career in theatre or continue on to a graduate program. Theatre courses also are open to nonmajors who want to gain a greater appreciation for the art of theatre.

There are two main-stage productions (one fall and one spring) and the possibility of two student showcases offered each year in Hamman Hall—a 500-seat proscenium theatre facility. The department invites distinguished guest artists each semester to direct and produce the two main-stage productions. Participation in productions is open to all students.

Theatre Program faculty are actively involved in professional theatre and film locally, nationally, and internationally and actively pursue opportunities to involve advanced students in that work. In addition, advanced students are encouraged to apply for internship positions whenever possible. Rice students have been accepted in competitive internships such as The Alley Theatre, Berkeley Repertory Theatre, Williamstown Theatre Festival, and The Peter Hall Company. In addition, students are encouraged to study theatre abroad and transfer course credit back to Rice. Approval for transfer credit must be sought prior to enrollment in a study-abroad program by contacting the director of the Theatre Program.

In even number years, the Theatre Program, sponsored by the Alan and Shirley Grob Endowment for Shakespeare in Performance, hosts the Actors From the London Stage—one of the oldest established touring Shakespeare theater companies in the world—for a week-long residency of workshops, performances, and lectures. Each tour presents a full-length play by Shakespeare performed by five classically trained actors who come from such prestigious companies as the Royal Shakespeare Company, the Royal National Theatre of Great Britain, and Shakespeare's Globe Theatre.

## National Theater Institute

The National Theater Institute is the educational arm of the renowned Eugene O'Neill Theater Center. The program is designed to complement a liberal arts education with three distinct study-away programs, all offering rigorous, risk-taking theater exploration. The semester long program at the O'Neill Center in Connecticut, the NTI Moscow Art Theater semester, and the seven-week Theatermakers summer program confront the serious theater student with opportunities to discover new creative possibilities.

The National Theater Institute offers an extensive conservatory-based training program for the dedicated student. Distinguished master teaching artists guide the classes in courses in acting, directing, design, playwriting, stage combat, voice, and movement. The Department of Visual and Dramatic Arts will accept academic work completed at the National Theater Institute as transfer credit to fulfill major requirements (following university transfer credit guidelines).

## Rice Film Program

Our film program works in concert with the Department of Visual and Dramatic Arts' academic mission to enrich our students' undergraduate experience. Our film and media studies students are provided state-of-the-art screening facilities to examine and study the historical and methodological aspects of movies from around the world in 16, 35, or 70 millimeter with Dolby Digital Sound. Film production students can showcase their work during the academic year on our new silver screen in recently renovated projection facilities.

Each year, we screen films from around the world—foreign features, shorts, documentaries, and animation—as part of our ongoing partnership with the diverse cultural communities of the City of Houston. Film at Rice reaches beyond the university's hedges to create, engage, and encourage scholarly thought and dialog on the many issues that impact our world. Among the internationally known filmmakers who have appeared on our campus over the years include Werner Herzog, Rakhshan Banietemad, Atom Egoyan, Shirin Neshat, Martin Scorsese, Andy Warhol, George Lucas, and Dennis Hopper.

## Exhibitions, Lectures, and Arts Programs at Rice

The Department of Visual and Dramatic Arts mounts several art and photography exhibitions and stage productions each year. In addition, exhibitions and related activities organized by the Rice University Art Gallery enrich the teaching program of the Department of Visual Arts as well as the larger university and Houston communities.

The department enjoys an ongoing close relationship with local theatres, museums, and galleries. The department offers opportunities for students to work and study with local art venues and alternative art spaces by way collaborative events and programs. The collections and exhibitions of local museums are often the subject of course lectures.

Lectures, symposia, and talks are sponsored by the department and are designed to bring local, national, and international scholars, actors, directors, critics, and studio artists to campus to speak on a broad range of topics and current interests.

## Museum of Fine Arts, Houston Glassell School of Art Core Fellows

The Department of Visual and Dramatic Arts, in partnership with the Museum of Fine Arts, Houston Glassell School of Art, supports up to seven Glassell Core Fellowship recipients each year to teach studio practice and critical theory courses. These Core Fellowship recipients, selected by the MFAH from the highly competitive and prestigious Glassell School of Art Core Fellowship Residency Program, are post-graduate artists and art educators.

## Degrees Offered: BA, BMus, BMus/MMus, MMus, AD, DMA

At the undergraduate level, The Shepherd School of Music offers both professional training and a broad liberal arts curriculum. Degree programs include a BA degree in music and a BMus degree in performance, composition, music history, and music theory. Acceptance into a five-year honors program leads to the simultaneous awarding of the BMus and MMus degrees.

At the graduate level, the school offers professional music training for qualified students who concentrate in music composition, performance, or research that is supported by lab or performing ensembles. This training includes theory and history seminars. Advanced degree programs include a MMus degree in composition, choral and instrumental conducting, historical musicology, performance, and music theory; and a post-master's Artist Diploma (AD) in instrumental conducting and performance; and a DMA degree in composition and selected areas of performance.

## Requirements for All Music Majors

For general university requirements, see Graduation Requirements. All students majoring in music must participate in core music, applied music, and other required music courses as well as in chamber music and large ensembles, plus electives. They are entitled to one hour of private lessons each week of each semester they are enrolled as a music major; private or group lessons beyond this may result in additional fees. Students in the BA program who wish to continue taking private lessons beyond the required four semesters of instrumental or vocal study must obtain permission from the dean of the Shepherd School.

**Examinations—**At the end of each semester, a jury examination in applied music may be given over the material studied during the semester. All degree candidates except BA students must demonstrate keyboard proficiency by examination. If students have little or no knowledge of the keyboard, they should enroll in secondary piano at the beginning of their first semester and continue study until they can meet the examination requirements.

**Performance—**Students are expected to perform frequently during their residence at Rice. Performance majors must present at least two full recitals. Composition and conducting students should present recitals as specified by their degree programs. Students are expected to attend both faculty and student recitals. In addition, all music majors must participate in the school’s conducted ensembles as assigned.

Last Revised : June 22, 2012

# Music

## The Shepherd School of Music

## Degree Requirements for BA in Music, BMus, and BMus/MMus

**Admission—**An audition, either in person or recorded, is required of each undergraduate applicant. The Shepherd School faculty and the university's Committee on Admission jointly determine admission, the latter basing its evaluation on successful academic achievement and other standards of college admission. Transfer applicants from other colleges, conservatories, and universities also must provide an audition, personal or recorded, and take placement exams in both music history and music theory. Once admitted, their prior preparation in music is assessed, which may reduce the required period of study at Rice.

**BA and BMus Program—**For general university requirements, see Graduation Requirements.

For either bachelor's degree, students majoring in music must have a total of at least 120 semester hours at graduation. The complete curriculum for each major in music is available on the Shepherd School website or in the undergraduate music office on the second floor of Alice Pratt Brown Hall. While the number of required hours vary according to major area, all music students must take the following core courses (those in the BA program are not required to take MUSI 331, 332, and 431).

- *Music Theory:* MUSI 211, 212, 311, 312, and a theory elective chosen from MUSI 416, 512, 513, or 613.
- *Music History:* MUSI 222, 321, 322, and 421.
- *Aural Skills and Performance Techniques:* MUSI 231, 232, 331, 332, and 431.

**BMus/MMus Honors Program—**The same general university requirements apply, but students seeking the combined BMus/MMus degree must complete a total of at least 150 semester hours by graduation. The number of required hours varies according to major area.

The first five semesters of course work in this program parallel the core curriculum of the bachelor's degrees. The sixth semester is a transitional semester during which students qualify for admission to the combined program. For further information, including application procedures, see the *Shepherd School Student Handbook*.

## Academic Standards

**Curriculum and Degree Requirements—**Further information on curricular requirements for all majors and degree programs is available from the Shepherd School of Music.

**Grading Policy—**A minimum grade of "B-" is expected of all music students in their major applied area. A grade of "C+" or lower is considered unsatisfactory and will be evaluated in the following manner:

A music major who receives a grade of "C+" or lower in their major applied area will be placed on music probation. Music probation signifies that the student's work has been sufficiently unsatisfactory to preclude graduation unless marked improvement is achieved promptly. A student on music probation may be absent from class only for extraordinary reasons and may not represent the school in any public function not directly a part of a degree program.

If a student receives a second semester of "C+" or lower in their major applied area, whether for consecutive semesters or not, the student will be discontinued as a music performance major and merit scholarship from the Shepherd School will be discontinued.

NOTE: For music history and musicology majors a grade of “C+” or lower in any music history course is considered unsatisfactory and will be evaluated as above.

**Leaves of Absence and Voluntary Withdrawal—**Music majors must obtain permission in writing from the dean of the Shepherd School before requesting a leave of absence from the university. Requests must be in the dean’s office before the first day of classes in the semester for which leave is requested.

Music majors taking voluntary withdrawal from the university are not guaranteed readmission into the Shepherd School and may be asked to reapply/reaudition. Students should explain the reasons for their withdrawal to the dean before leaving campus.

## Other Musical Opportunities

**For Nonmajors—**Students who are not music majors may take the following courses designed for the general student (other music courses require the permission of the instructor and the approval of the dean of the Shepherd School).

- MUSI 117/118 *Fundamentals of Music I and II*
- MUSI 141–197 for individual instruction in all instruments
- MUSI 317/318 *Theory for Nonmajors I and II*
- MUSI 327/328 *Music Literature for Nonmajors I and II*
- MUSI 334/335 *Campanile Orchestra and Rice Chorale*
- MUSI 340 *Concert Band*
- MUSI 342 *Jazz Ensemble*
- MUSI 345 *Jazz Improvisation*
- MUSI 415 *Band Arranging*

**Lectures and Performances—**A visiting lecturer series, a professional concert series, and numerous distinguished visiting musicians contribute to the Shepherd School environment. The Houston Symphony Orchestra, Symphony Chorus, Houston Grand Opera, Texas Opera Theater, Houston Ballet, Houston Masterworks Chorus, Da Camera, Context, and Chamber Music Houston, as well as the activities of other institutions of higher learning in the area, also provide exceptional opportunities for students to enjoy a wide spectrum of music.

# Music

## The Shepherd School of Music

Department Info | Undergraduate Requirements | Graduate Requirements | Course Listings

## Degree Requirements for MMus, AD and DMA in Music

**Admission—**For instrumental, voice, and conducting applicants, an audition is required. Composition majors must submit portfolios, and musicology and theory majors must provide samples of their written work. The Graduate Record Examination (GRE) is required of graduate applicants in musicology and theory. Musicology applicants also must complete the advanced music tests.

**Requirements—**For general university requirements, see Graduate Degrees. For the MMus degree, candidates must complete at least four semesters of full–time study at Rice. Semester hour minimums for the MMus degree vary according to major area. For the post-master's Artist Diploma, students must complete a two-year residency at Rice and a minimum of 41 semester hours. For the DMA, candidates must complete a total of 90 hours beyond the bachelor's degree, attending Rice full time for at least four semesters after receiving their MMus degree.

**Thesis—**A thesis is required of both music history and music theory majors. In lieu of a thesis, composition majors must produce an original work of extended scope.

## Academic Standards

**Curriculum and Degree Requirements—**Further information on curricular requirements for all majors and degree programs is available from the Shepherd School of Music.

**Grading Policy—**A minimum grade of "B-" is expected of all music students in their major applied area. A grade of "C+" or lower is considered unsatisfactory and will be evaluated in the following manner:

A music major who receives a grade of "C+" or lower in their major applied area will be placed on music probation. Music probation signifies that the student's work has been sufficiently unsatisfactory to preclude graduation unless marked improvement is achieved promptly. A student on music probation may be absent from class only for extraordinary reasons and may not represent the school in any public function not directly a part of a degree program.

If a student receives a second semester of "C+" or lower in their major applied area, whether for consecutive semesters or not, the student will be discontinued as a music performance major and merit scholarship from the Shepherd School will be discontinued.

NOTE: For music history and musicology majors a grade of "C+" or lower in any music history course is considered unsatisfactory and will be evaluated as above.

**Graduate degree requirement: a grade point average of 2.67 is necessary for graduation.**

**Leaves of Absence and Voluntary Withdrawal—**Music majors must obtain permission in writing from the dean of the Shepherd School before requesting a leave of absence from the university. Requests must be in the dean's office before the first day of classes in the semester for which leave is requested.

Music majors taking voluntary withdrawal from the university are not guaranteed readmission into the Shepherd School and may be asked to reapply/reaudition. Students should explain the reasons for their withdrawal to the dean before leaving campus.

## Other Musical Opportunities

**For Nonmajors—**Students who are not music majors may take the following courses designed for the general student (other music courses require the permission of the instructor and the approval of the dean of the Shepherd School).

- MUSI 117/118 *Fundamentals of Music I and II*
- MUSI 141–197 for individual instruction in all instruments
- MUSI 317/318 *Theory for Nonmajors I and II*
- MUSI 327/328 *Music Literature for Nonmajors I and II*

## Degrees Offered: MSBHP

Rice University offered this degree for the first time in 2011. This degree is geared to train students in bioscience and health policy with the intent of creating new options for science students interested in working in government as well as governmental relations positions in non-profit organizations, industry and academic institutions. As an interdisciplinary program it aims to equip students with advanced bioscience skills; to teach quantitative skills and data analysis; to equip students with communication and research skills to conduct independent studies enabling them to understand, and formulate public policy recommendations; and to train students how to integrate their science knowledge into creating better policies and practices.

This degree is one of five tracks in the professional master's program at Rice housed in the Wiess School of Natural Sciences. These master's degrees are designed for students seeking to gain further scientific core expertise coupled with enhanced management and communication skills. These degrees instill a level of scholastic proficiency that exceeds that of the bachelor's level, and they create the cross-functional aptitudes needed in modern industry and government. This program will give students an advanced background in science complemented by courses in sociology, economics and policy studies to foster their understanding of the role of science in policy making and the role of public policy in science. Their coursework will provide them with research and study skills enabling them to develop specific policy recommendations, and they will also receive the tool-set to become knowledgeable in the formulation and execution of public policy. Their direct access to the Baker Institute will allow them to work closely with policy scholars as well as meet with many of the leaders in science and technology policy.

Students receiving the MS in Bioscience and Health Policy degree will be able to enter into governmental positions, work in non-governmental agencies, medical and pharmaceutical companies, and serve as governmental relations officers for companies or universities with a vested science interest.

A joint MBA/MSBHP degree is offered in conjunction with the Jesse H. Jones Graduate School of Business.

# Bioscience and Health Policy

## The Wiess of School of Natural Sciences

Department Info | Undergraduate Requirements | Graduate Requirements | Course Listings

## Degree Requirements for MS in Bioscience and Health Policy

In addition to the core science courses, students are required to complete a three to six month internship and take a set of cohort courses focusing on business, management, ethics, policy, and communication. At the conclusion of their internship, students must present a summary of their internship project in both oral and written form as part of the professional master's seminar.

Part-time students who already work in their area of study may fulfill the internship requirements by working on an approved project with their current employer. For general university requirements for graduate study, see Academic Regulation, and also see Professional Degrees.

## Admission

Admission to graduate study in Bioscience and Health Policy is open to qualified students holding a bachelor's degree in biology or a related field that includes completed course work in biology, chemistry, calculus and statistics. Scores from the general Graduate Record Examination (GRE), good critical thinking and communication skills and completed course work in introductory economics is preferred. Department faculty evaluate the previous academic record and credentials of each applicant individually and make admission decisions.

## Required Courses

**Science Core Courses**

**Four Bioscience Courses:**
These courses give in-depth instruction in specialized areas of Bioscience and are required to obtain a broad understanding of diverse areas of cutting edge Bioscience research. *Courses marked with asterisks are offered as 300-level courses that will include graduate level writing and analysis to qualify as a 500-level graduate course.

BIOC 450 *Viruses and Infectious Diseases*
BIOC 524* *Microbiology and Biotechnology*
BIOC 525 *Plant Molecular Genetics and Development*
BIOC 540 *Metabolic Engineering*
BIOC 544 *Development Biology*
BIOC 545 *Advanced Molecular Biology and Genetics*
BIOC 547 *Biology and Medicine*
BIOC 560 *Cancer Biology*
BIOC 563* *Endocrinology*
BIOC 564 *Pediatric Global Health*
BIOC 572* *Immunology*
BIOC 580 *Protein Engineering*
BIOC 585* *Fundamentals of Cellular, Molecular, and Integrative Neuroscience*
BIOC 598 BioMEMS and Biomedical Microdevices

Other Science Course options accepted as marked * in electives below

**Cohort Courses:**
NSCI 501 Professional Master's Seminar (F,S) (required for two semesters, 1 credit hour each)

NSCI 511 Science Policy and Ethics (S) (3 credit hours)
NSCI 512 Internship Project (1 credit hour)
NSCI 610 Management in Science and Engineering (F) (3 credit hours)

**Four Statistics, Economics, and Policy Courses:**
The analytical competency requirement provides career-enhancing, marketable skills in policy analysis, economics and statistics. Students will take courses from groups A, B and C as indicated below:

***A–One Statistics Course***
STAT 385 *Methods of Data Analysis*
STAT 453 *Biostatistics*
STAT 684 *Environmental Risk Assessment and Human Health*

***B–One Course related to Finance or Economics***
ECON 446 *Applied Econometrics (requires pre-requisites)*
ECON 450 *World Economy and Social Development (requires pre-requisites)*
ECON 481 *Health Economics*
MGMT 679 Cost and Quality in Health Care
PH 3910* *Introduction to Health Economics*

***C–Two Policy Courses***
POST 430 *Shaping of Health Policy*
HEAL 407 *Epidemiology*
HEAL 498 *Disparities in Health in America*
SOSC 420 *Healthcare: Competition and Managed Care*

## Three to Six Month Internship

Practical experience is offered via a three to six month work immersion. The internship will be under the guidance of a host company, government agency, or non-profit organization. A summary of the internship project is required in both oral and written form as part of the Professional Master's Seminar.

**Two Elective Courses:** The electives reflect individual academic interests and career goals. Any course from the above list of Bioscience courses can be taken as an elective, provided it was not taken as a required course. In addition, the following classes qualify as elective classes:

ANTH 381 *Medical Anthropology*
ECON 450 *World Economy and Social Development*
GHLT 462 *Global Health Design Challenges*
HEAL 407 *Epidemiology*
HI 5324* *Nanomedicine in Healthcare*
MGMT 678 *U.S. Healthcare Management*
MGMT 961 *Business Law*
SOSC 420 *Health Care: Competition and Managed Care*
STAT 684 *Environmental Risk Assessment and Human Health*
GS 120254* *Cell and Systems Physiology*
GS 120043* *Principles of Pathology*

And others

* *Students can choose up to two electives from UT Graduate School of Biomedical Science (GS), Informatics (HI) and/or Health Science Center (PH)*

**Note:** *Some of the listed courses are not offered every year, and some may also have prerequisites or require instructor permission.*

**Professional Science Master's 5th Year Degree Option for Rice Undergraduates**

Rice students have an option to achieve the MS in bioscience and health policy by adding an additional fifth year to the four undergraduate years of science studies. Advanced Rice students in good standing apply during their junior year, then start taking required core courses of the bioscience and health policy program during their senior year. A plan of study based on their particular focus area will need to be approved by the track director and the PSM director.

## Degrees Offered: BA, BS, MA, PhD

Rice University is pleased to announce that on July 1, 2014, the departments of Biochemistry and Cell Biology (BCB) and Ecology and Evolutionary Biology (EEB) merged to form the Department of BioSciences. This merger unites faculty engaged in research and teaching in a wide range of disciplines within the life sciences, creating a vibrant and diverse community of scholars housed within a single department. Relevant degree requirements, BIOC and EBIO course offerings, advisors, and research opportunities will not be affected by the merger, which will have little to no impact on undergraduate students.

Last Revised : August 11, 2014

 

# BioSciences

## The Wiess School of Natural Sciences

Department Info | Undergraduate Requirements | Graduate Requirements | Course Listings

The Department of BioSciences offers a broad range of introductory and advanced courses. Students may pursue a BA or BS in Biochemistry and Cell Biology or Ecology and Evolutionary Biology, a BA in Biological Sciences, or a Minor in Biochemistry and Cell Biology or Ecology and Evolutionary Biology. All five major degree paths will prepare students for graduate, medical, or other professional schools and a wide range of careers in the life sciences. In addition, qualified students may apply to the Biochemistry and Cell Biology BA-MA-PhD program track. Additional information on departmental programs, courses and advising is available at the BioSciences website ( http://biosciences.rice.edu).

**Advising**

Students pursuing an EEB degree path (BA, BS or minor) should contact one of the EEB program advisors. Those electing a BA in Biological Sciences may opt for advising within the program (BCB or EEB) that most closely corresponds to their interests; students are welcome to switch the program through which they are advised at any time. BCB program advisors are assigned by first letter of the student's last name. A current list of advisors in both programs can be found in the Undergraduate section of the BioSciences website.

## Degree Requirements for BS and BA in Biochemistry and Cell Biology

These paths emphasize a broad understanding of cell biology and biochemistry, provide room for exploration anywhere in the Natural Sciences or Engineering, and culminate in one (BA) or two (BS) required 400-level capstone courses incorporating primary scientific literature, presentations, and writing. Students in Biochemistry and Cell Biology are strongly encouraged to pursue their research interests through independent research experiences. The BS offers greater coverage and depth while the BA offers greater flexibility with two fewer required courses as detailed below.

All of the following requirements must be completed for a BS in Biochemistry & Cell Biology. Students pursuing a BA may omit one of the following courses: BIOC 302, BIOC 344 or BIOC 352, and are only required to take one BIOC 400 level course.

Permissible Substitutions: MATH 111/112 may be substituted for MATH 101; CHEM 151 and 152 and corresponding labs may be substituted for CHEM 121 and 122 and corresponding labs; PHYS 101 and 102 or PHYS 111 and 112 may be substituted for PHYS 125 and 126; CHEM 310 or CHEM 311/312 may substitute for BIOC 352.

***Non-Biology Courses***

- MATH 101/102 *Single Variable Calculus I and II*
- MATH 211 *Ordinary Differential Equations*
- PHYS 125/126 *General Physics I and II*
- CHEM 121/122/123/124 *General Chemistry I and II and General Chemistry Labs I and II*
- CHEM 211/212/215 *Organic Chemistry I and II and Organic Chemistry Lab*

***Core Lecture Courses***

- BIOC 201 *Introductory Biology*
- BIOC 301 *Biochemistry I*
- BIOC 302 *Biochemistry II*
- BIOC 341 *Cell Biology*

- BIOC 344 *Molecular Biology and Genetics*
- BIOC 352 *Physical Chemistry for the Biosciences*

***Core Laboratory Courses***

- BIOC 211 *Intermediate Experimental Biosciences*
- BIOC 311 *Advanced Experimental Biosciences*

***Advanced Laboratory Courses***

Two additional advanced labs (300 level or higher), chosen from the following list:

- BIOC 313 *Introductory Synthetic Biology*
- BIOC 318 *Lab in Applied Microbiology*
- BIOC 320/BIOE 342 *Lab in Tissue Culture*
- BIOC 413 *Experimental Molecular Biology*
- BIOC 415 *Experimental Physiology*
- BIOC 530 NMR *Spectroscopy and Molecular Modeling*
- BIOC 535 *Practical X-Ray Crystallography*
- One independent research experience (described below) *

*All Biochemistry and Cell Biology (BCB) majors must take at least one of the listed additional advanced laboratory courses. If desired, the second additional advanced laboratory requirement may be satisfied by taking the following independent research courses: (i) BIOC 310 if taken for at least 3 credits; or (ii) HONS 470/471, if the research supervisor is from one of the biosciences departments or if the research is biological in nature and pre-approved by the student's major advisor; or (iii) honors research (BIOC 401/402/4012). This substitution may be used only once regardless of the number of semesters of independent research taken.

***Capstone Courses***

- Two BIOC 400 level courses (3 credit hours or more per course)

Only BIOC 400 level courses, which are literature based and explicitly designed for the BCB major, can be used to satisfy this requirement. The combined courses BIOC 401/402/412 are considered a single BIOC 400 level course and, provided the independent research substitution has not been used previously, a single lab at 300 level or higher. To count toward the major all three courses must be completed.

***Natural Sciences/Engineering Electives***

- Two Natural Sciences or Engineering 300-level or higher courses (3 credit hours or more)

Courses in Natural Sciences/Engineering include any 300-level or greater course of at least 3 credit hours from any department in the Wiess School of Natural Sciences (including BioSciences) or George R. Brown School of Engineering, except independent research courses such as BIOC 310 or BIOE 400/401, which cannot be used to fulfill this requirement. A maximum of 3 credits of BIOC 390 (transfer credit in Biochemistry and Cell Biology) may be applied to this requirement.

## Degree Requirements for BS and BA in Ecology and Evolutionary Biology

These paths are intended for students pursuing a wide range of careers in the life sciences. Students graduating from either degree path typically go on to graduate or professional school or enter the workforce with the BS as their terminal degree. Course work emphasizes a broad understanding of basic biology together with in-depth knowledge of ecology and evolutionary biology that culminates in a required capstone 400-level course incorporating primary scientific literature, presentations, and writing in an advanced topic. The BA degree is well suited for students with an additional major outside of the sciences. Students pursuing a BS in Ecology and Evolutionary Biology are required to conduct independent research under the supervision or co-supervision of an EEB faculty member (though the research can take place in other locations or institutions such as the Texas Medical Center or at field sites throughout the world). Students in both degree paths are strongly encouraged to take advantage of study abroad opportunities.

***Non-Biology courses:***

- MATH 101/102 *Single Variable Calculus I* and *II*
- STAT course (at least 3 credits) or EBIO 338 *Design and Analysis of Biological Experiments*
- CHEM 121/123 *General Chemistry* (with lab)

- PHYS 125 *General Physics I*
- One natural sciences or engineering course at the 300 level or above (cannot be EBIO or BIOC)

Permissible Substitutions: MATH 111/112 may be substituted for MATH 101; CHEM 151 and 152 and corresponding labs may be substituted for CHEM 121 and 122 and corresponding labs; PHYS 101 and 102 or PHYS 111 and 112 may be substituted for PHYS 125 and 126.

***Biology Lecture Courses:***

- BIOC 201 / EBIO 202 *Introductory Biology I* and *II*
- EBIO 325 *Ecology*
- EBIO 334 *Evolution*
- Two 300 or 400 level EBIO lecture courses
- One 300 or 400 level BIOC lecture course (cannot be cross-listed with EBIO)

***Biology Laboratory Courses:***

- BIOC 211 *Intermediate Experimental Biosciences*
- EBIO 213 *Introductory Lab in Ecology and Evolutionary Biology*
- One 300 or 400 level lab in EBIO
- One 300 or 400 level lab in EBIO or BIOC

B.A.'s ONLY: One of the advanced laboratory course requirements may be satisfied by taking EBIO 306 if taken for at least two credit hours.

***Senior Scientific Communication Course:***

- EBIO 412 Scientific Communication in the Biosciences

In addition to the requirements for the BA in Ecology and Evolutionary Biology, the BS degree path requires the following courses:

***Independent Research Courses (B.S. ONLY):***

- EBIO 306 *Independent Research* (for at least 2 credits, participation in RURS)
- EBIO 403/404 *Senior Research*

## Degree Requirements for BA in Biological Sciences

This degree incorporates elements of the Ecology and Evolutionary Biology and the Biochemistry and Cell Biology Programs.

***Non-Biology Courses***

- MATH 101/102 *Single Variable Calculus I* and *II*
- MATH 211, STAT 305, or EBIO 338 *Differential Equations, Biological Statistics,* or *Design and Analysis of Biological Experiments*
- CHEM 121/122/123/124 *General Chemistry I* and *II* and *General Chemistry Labs I* and *II*
- CHEM 211/212/215 *Organic Chemistry I* and *II* and *Organic Chemistry Lab*
- PHYS 125/126 *General Physics I* and *II*

Permissible Substitutions: MATH 111/112 may be substituted for MATH 101; CHEM 151 and 152 and corresponding labs may be substituted for CHEM 121 and 122 and corresponding labs; PHYS 101 and 102 or PHYS 111 and 112 may be substituted for PHYS 125 and 126.

***Introductory Biology***

- BIOC 201 *Introductory Biology*
- EBIO 202 *Introductory Biology II*

***Introductory Biology Labs***

- BIOC 211 *Intermediate Experimental Biosciences*

EBIO 213 *Introductory Lab in Ecology* and *Evolutionary Biology*

***Advanced Biology Labs***

Three biology labs from the following list:

- BIOC 311 *Advanced Experimental Biosciences*
- BIOC 313 *Introductory Synthetic Biology*
- BIOC 318 *Lab in Applied Microbiology*
- BIOC 320/BIOE 342 *Lab in Tissue Culture*
- BIOC 413 *Experimental Molecular Biology*
- BIOC 415 *Experimental Physiology*
- BIOC 530 *NMR Spectroscopy and Molecular Modeling*
- BIOC 532 *Lab in Optical Spectroscopy and Kinetics*
- BIOC 533 *Bioinformatics and Computational Biology*
- BIOC 535 *Practical X-Ray Crystallography*
- EBIO 316 *Lab in Ecology*
- EBIO 317 *Lab in Behavior*
- EBIO 319 *Tropical Field Biology*
- EBIO 327 *Biological Diversity Lab*
- EBIO 330 *Insect Biology Lab*
- EBIO 335 *Evolutionary Bioinformatics Lab*
- EBIO 337 *Field Bird Biology Lab*

- One independent research experience (described below) *

* Only one of the advanced laboratory course requirements can be satisfied by taking any of the following: (i) BIOC 310 or EBIO 306 if taken for at least 2 credits; or (ii) HONS 470/471, if the research supervisor is from the BioSciences department or if the research is biological in nature and pre-approved by the student's major advisor; (iii) BIOC 401/402/412 or EBIO 403/404 (iv) BIOC/EBIO 393 (laboratory transfer credit). This substitution may be used only once regardless of the number of semesters of independent research or transfer credit.

***Upper level Biology courses***

- BIOC 301 *Biochemistry I*
- Three EBIO 300 or 400 level lecture courses
- One BIOC 300 or 400 level lecture course
- BIOC 302, 341, 344, or 352
- One BIOC or EBIO 300 or 400 level lecture course

A maximum of 3 credits of BIOC 390 and 3 credits of EBIO 391 can apply to this major. CHEM 310 or CHEM 311/312 may substitute for BIOC 352.

## Course Requirements for Minor in Biochemistry and Cell Biology

The Minor in Biochemistry and Cell Biology is intended for those with an interest in the life sciences but who may be majoring in other areas. This minor incorporates many of the life science core courses required for the health professions.

- MATH 101/102 Single Variable Calculus I and II
- PHYS 125/126 General Physics I and II
- CHEM 121/122/123/124 General Chemistry I and II and General Chemistry Labs I and II
- CHEM 211/212/215 Organic Chemistry I and II and Organic Chemistry Lab
- BIOC 201 Introductory Biology
- BIOC 211 Intermediate Experimental Biosciences
- BIOC 301 Biochemistry
- BIOC 341 Cell Biology
- 1 BIOC ≥ 300-level lecture course (≥ 3 credit hours)

Permissible Substitutions: MATH 111/112 may be substituted for MATH 101; CHEM 151 and 152 and corresponding labs may be substituted for CHEM 121 and 122 and corresponding labs; PHYS 101 and 102 or PHYS 111 and 112 may be substituted for PHYS 125 and 126.

## Course Requirements for Minor in Ecology and Evolutionary Biology

The Ecology and Evolutionary Biology minor is intended for the numerous Rice students with an avid interest in ecology and evolutionary biology but whose major interests are in other departments.

- BIOC 201 / EBIO 202 *Introductory Biology I* and *II*
- EBIO 213 *Introductory Lab in Ecology and Evolutionary Biology*
- Four EBIO lecture courses at the 300 or 400 level

## Degree Requirements for BA-MA-PhD Track in Biochemistry & Cell Biology

Qualified Rice University undergraduate students can apply to enroll in the Biochemistry and Cell Biology BA-MA-PhD program track in the spring of their sophomore year. Course requirements for graduate studies are pursued at the same time as the upper-level undergraduate degree requirements. Laboratory research performed in 300, 400, and 800-level research courses is presented as the MA thesis in the summer following graduation and can serve as the initial phases of the PhD thesis work. As a result, the graduate careers of these students will be accelerated by an anticipated 1-2 years, and such students may be able to obtain their PhD degrees approximately 3 years after obtaining their BA and MA degrees. Criteria for selection include academic performance (GPA ≥ 3.5), motivation, previous research experience, and personal qualities. Detailed information on this track may be found in the Graduate section of these General Announcements.

## Research in the BioSciences

Research is highly encouraged for all students at Rice University and is an essential job skill for those planning to continue in graduate programs in the sciences or seeking employment in research fields. Rice students in the biosciences have the opportunity to participate in a wide variety of research projects both on- and off-campus. Students may receive BioSciences credit for such research through the courses EBIO 306 or BIOC 310 and the advanced research series BIOC 401/402/412 or EBIO 403/404. Please consult the Department of Biosciences Undergraduate web pages for more information on finding a research project and participating in research for credit. Those interested in receiving regular biosciences research opportunity postings should join the BioSciences Opportunities group on Owl-Space.

Last Revised : September 23, 2014

# BioSciences

## The Wiess School of Natural Sciences

Department Info | Undergraduate Requirements | Graduate Requirements | Course Listings

The Department of BioSciences at Rice University administers graduate programs in Biochemistry and Cell Biology (BCB) and in Ecology and Evolutionary Biology (EEB), described below. In addition, some BioSciences faculty members participate in the Systems, Synthetic, and Physical Biology (SSPB) PhD program administered by the Institute of Biosciences and Bioengineering (ibb.rice.edu).

## Degree Requirements for MA and PhD in Biochemistry and Cell Biology

**Admission:**

Applicants for graduate study in the Department of Biochemistry and Cell Biology must have:

- BA or BS degree in biochemistry, biology, chemistry, chemical engineering, physics, or some equivalent
- High levels of intellectual strength and motivation, as indicated by academic record, Graduate Record Examination (GRE) scores, and recommendations

Although the department offers an MA degree in biochemistry and cell biology, the department admits students who intend to pursue the Ph.D. program. The department provides a program guide titled “Biochemistry and Cell Biology Graduate Program Handbook” that is updated annually. For general university requirements, see Graduate Degrees.

**Course Requirements:**

Most of the formal course studies will be completed in the first year of residence to allow the students to commence thesis research at the end of their second semester at Rice. During the first year, the BCB Graduate Advisory Committee will advise all graduate students. This committee will determine the formal course program to be taken during the first year in residence. Students are required to have training in biochemistry and cell biology; training in genetics and physical chemistry or biophysics is also beneficial. Students lacking formal training in biochemistry or cell biology are required to take the equivalent background courses during their first year.

**The following Rice Courses must be taken if students lack these prerequisites in their undergraduate transcript:**

- BIOC 301 *Biochemistry*
- BIOC 341 *Cell Biology*

**All PhD students are required to take the following graduate-level courses:**

- BIOC 575 *Introduction to Research*
- BIOC 581/582 *Graduate Research Seminar (required in all years of residency)*
- BIOC 583 *Molecular Interactions*
- BIOC 587 *Graduate Seminar for 1st Year Graduate Students: Research Design, Proposal Writing, and Professional Development*
- BIOC 588 *Cellular Interactions*
- UNIV 594 *Training in the Responsible Conduct of Research*
- BIOC 599 *Graduate Teaching (two semesters)*
- BIOC 701/702 *Graduate Research Rotations (first year research course)*
- BIOC 800 *Graduate Research (theses lab research after rotations are complete)*

**Students also must take six credit hours from the following set of advanced courses:**

- BIOC 525 *Plant Molecular Genetics and Development (3 hr)*
- BIOC 530/535 *Graduate Laboratory Modules in Molecular Biophysics (2 hr each)*
- BIOC 540 *Metabolic Engineering (3 hr)*
- BIOC 544 *Developmental Biology (3 hr)*
- BIOC 545 *Advanced Molecular Biology and Genetics (3 hr)*
- BIOC 547 *Experimental Biology and the Future of Medicine (3 hr)*
- BIOC 550 *Viruses and Infectious Diseases (3 hr)*
- BIOC 551 *Molecular Biophysics (3 hr)*
- BIOC 552 *Structural Biology (3 hr)*
- BIOC 555 *Computational Synthetic Biology (3 hr)*
- BIOC 560 *Cancer Biology (3 hr)*
- BIOC 571 *Bioinformatics: Sequence Analysis (3 hr)*
- BIOC 572 *Bioinformatics: Network Analysis (3 hr)*
- BIOC 580 *Protein Engineering (3 hr)*

Graduate students are required to attend BIOC 581 and 582 during all years of residency. Students generally complete BIOC 583, BIOC 587, and BIOC 588 in their first year, and will be responsible for the content of these courses in their admission to candidacy examination. Students gain teaching experience by serving as discussion leaders and graders in two undergraduate courses during their second year (BIOC 599); additional teaching experiences are available on an optional basis.

**Evaluation of Progress in Graduate Study:**

The BCB Graduate Advising Committee evaluates each student's undergraduate record and recommends course work based on the requirements. Thesis advisors may require additional courses.

At the end of each semester, the department chair, in consultation with the faculty, reviews student performance in the formal course work. Students must maintain at least a B average (GPA ≥ 3.0), perform satisfactorily in BIOC 701/702, and demonstrate outstanding motivation and potential for research. Thesis lab assignments are made based on student and faculty preferences following research rotations.

Evaluation after the first year includes:

- Ongoing review of research progress by the thesis advisor; satisfactory research progress will be indicated by a grade of "S" in BIOC 800 each semester
- A yearly research progress assessment by the student's Research Progress Review Committee
- Presentation of research progress at least once a year in seminar format (BIOC 581/582) starting in the fourth semester and continuing until submission of the doctoral thesis
- Completion of a written and oral admission to candidacy examination before the start of the fifth semester
- Defense of the PhD thesis research and text in a final public seminar presentation and oral examination attended by the student's Thesis Committee

**MA Program:**

All the above requirements and evaluation procedures apply to MA candidates, with the following exceptions. The research progress review examination held during the MA student's second year replaces the admission to candidacy examination; no other preliminary examination is required before the final oral defense of the master's thesis. MA students do not have to complete two semesters of BIOC 599 Graduate Teaching and do not require an outside committee member on their Thesis Committee. MA candidates must maintain a GPA ≥ 2.67, complete a thesis, and successfully complete a public oral defense of their research work to their Thesis Committee and other interested parties.

## Degree Requirements for BA-MA-PhD Degree Track in Biochemistry and Cell Biology

**Admission:**

Qualified Rice University undergraduates can apply to enroll in the Biochemistry and Cell Biology BA-MA-PhD program track in the spring of their sophomore year. Some course requirements for graduate studies are completed at the same time as the upper-level undergraduate degree requirements. Laboratory research performed in undergraduate and graduate research courses is presented as the MA thesis in the summer following graduation and can serve as the initial phase of the PhD thesis work. As a result, the graduate careers of these students will be accelerated by an anticipated 1-2 years, and such students may be able to obtain their PhD degrees approximately 3 years after obtaining their BA-MA degree. If circumstances require, students may stop at the BA or MA level if they meet all the requirements for the respective degrees.

Criteria for selection include academic performance (GPA ≥ 3.5), motivation, previous research experience, and personal qualities. Enrollment is limited, and the BCB BA-MA-PhD Track Committee will select applicants for admission.

**BA in Biochemistry and Cell Biology Requirements:**

All of the requirements for a BA in Biochemistry & Cell Biology are required for the BA-MA-PhD track.

**MA in Biochemistry and Cell Biology Requirements:**

The BA-MA-PhD Track Committee will advise students pursuing the BA-MA completion and will approve the formal course program of students during their final two years in the BA-MA program.
Students who wish to pursue the BA-MA track must select the MA thesis advisor by the end of the sophomore year when they declare their major to provide the opportunity to begin a project that will form the basis of the MA thesis.

For the MA, the following courses must be completed or evidence provided of successful completion of courses that covered the same material with a B- average (GPA ≥ 2.67):

- BIOC 581/582 *Graduate Research Seminar (4 semesters attendance, 1 presentation)*
- BIOC 583 *Molecular Interactions*
- BIOC 587 *Graduate Seminar for 1st Year Graduate Students: Research Design, Proposal Writing, and Professional Development*
- BIOC 588 *Cellular Interactions*
- UNIV 594 *Training in the Responsible Conduct of Research*
- BIOC 800 *Graduate Research*

In addition, students must take 6 credit hours from the following set of advanced courses:

- BIOC 525 *Plant Molecular Genetics and Development (3 hr)*
- BIOC 530/535 *Graduate Laboratory Modules in Molecular Biophysics (2 hr each)*
- BIOC 540 *Metabolic Engineering (3 hr)*
- BIOC 544 *Developmental Biology (3 hr)*
- BIOC 545 *Advanced Molecular Biology and Genetics (3 hr)*
- BIOC 547 *Experimental Biology and the Future of Medicine (3 hr)*
- BIOC 550 *Viruses and Infectious Diseases (3 hr)*
- BIOC 551 *Molecular Biophysics (3 hr)*
- BIOC 552 *Structural Biology (3 hr)*
- BIOC 555 *Computational Synthetic Biology (3 hr)*
- BIOC 560 *Cancer Biology (3 hr)*
- BIOC 571 *Bioinformatics: Sequence Analysis (3 hr)*
- BIOC 572 *Bioinformatics: Network Analysis (3 hr)*
- BIOC 580 *Protein Engineering (3 hr)*

Students in the BA-MA track are required to register for and participate in BIOC 581/582 both semesters during their junior and senior years and present their research at least once. Students generally enroll in BIOC 800 during the summer between the sophomore and junior year, BIOC 587 and BIOC 800 during the summer between the junior and senior years, and BIOC 583 and BIOC 588 in their senior year.

Students will be responsible for the content of these courses in their MA defense (which also serves as the Admission to PhD Candidacy examination).

Progress reviews with the MA thesis committee occur at the end of the junior year and the early spring of the senior year. The MA thesis will be submitted and public oral defense will occur in the summer following graduation at the end of the senior year with completion of the BA requirements. MA candidates continuing to the PhD must maintain a GPA ≥ 3.0, complete a thesis, and make a public oral defense that includes a private examination by their MA

thesis committee. Students who complete the MA requirements with a GPA ≥ 2.67 but less than 3.0 must defend their thesis to complete the MA degree, but will not be admitted to the PhD program.

**PhD in Biochemistry and Cell Biology:**

The following are required for admission to the PhD portion of the BA-MA-PhD track: Successful completion of the MA thesis and oral defense, which will serve as the admission to candidacy exam for all PhD candidates, a cumulative GPA ≥ 3.0 for the BA-MA degree courses, and a GRE Quantitative test score ≥ 80th percentile. Students who are in good standing in the BA-MA track and have passed their MA final oral exam may begin their doctoral studies the summer following graduation with the approval of their PhD mentor and the Department Chair.

Course requirements for the first year of PhD study include:

- BIOC 581/582 *Graduate Research Seminar (required in all years of residency)*
- BIOC 599 *Graduate Teaching (two semesters)*
- BIOC 800 *Graduate Research*

**Evaluation of Progress in the PhD Phase of the BA-MA-PhD Program:**

The Graduate Advisory Committee evaluates each student's record and recommends any further course work based on the requirements and on the interests of the student. Thesis advisors may require additional courses. At the end of each semester, the department chair, in consultation with the faculty, reviews student performance in the formal course work. Students must maintain at least a B average (GPA ≥ 3.0), perform satisfactorily in their research efforts, and demonstrate outstanding motivation and potential for research. Evaluation during the PhD phase of the program includes:

- The MA thesis and its oral defense constitute the admission to candidacy examination
- Ongoing review of research progress by the thesis advisor; satisfactory research progress will be indicated by a grade of "S" in BIOC 800 each semester
- A yearly research progress assessment by the student's Research Progress Review Committee
- Presentation of research progress at least once a year in seminar format (BIOC 581/582) starting in the first year of PhD study and continuing until submission of the doctoral thesis
- Defense of the PhD thesis research and text in a final public seminar presentation and oral examination attended by the student's Thesis Committee

## Degree Requirements for MA, MS (at candidacy) and PhD in Ecology and Evolutionary Biology

**Admission:**

Applicants for graduate study in the Ecology and Evolutionary Biology (EEB) Program must have:

- BA or BS degree or equivalent that provides a strong background in biology
- Strong ability and motivation, as indicated by academic record, Graduate Record Examination (GRE) scores, and recommendations
- Scores from the GRE biology subject exam are optional but can be helpful, particularly for student with nontraditional backgrounds in biology

These requirements do not preclude admission of qualified applicants who have majored in areas other than biology. Although the department offers MA and MS degrees, only on rare occasions are students who do not intend to pursue the PhD admitted to the graduate program. The department provides an "Ecology and Evolutionary Biology Graduate Program Handbook" that is updated annually. For general university requirements, see Graduate Degrees.

**Course Requirements:**

Most of the formal course studies will be completed in the first year of residence to allow the students to begin thesis research at the end of their second semester at Rice. Entering students will meet with a faculty advisor to form a course of study of the first year. Students should have completed coursework in ecology, evolution (or equivalent), mathematics (including calculus), and statistics prior to admission. Deficiencies in these subject areas should be made up during the first year of residence; some may be waived at the discretion of the EEB Graduate Advising Committee and the EEB Graduate Program Director.

**The following Rice courses must be taken if students lack course work in ecology or evolution in their undergraduate transcript:**

- EBIO 325 *Ecology*
- EBIO 334 *Evolution*

**All PhD students are required to take the following graduate-level courses:**

- EBIO 569 *Core course in Ecology and Evolutionary Biology (required in first year)*
- EBIO 561/562/563/568 *Topics in Evolution/Behavioral Biology/Ecology/Biological Diversity (two semesters of any combination of EBIO "Topics" courses)*
- EBIO 585/586 *Graduate Research Seminar in Ecology and Evolutionary Biology (required in all years of residency)*
- EBIO 591 *Graduate Teaching (two semesters)*
- EBIO 800 *Graduate Research (required after the first year of residency)*

All students are required to take EBIO 569 in their first semester. Students must enroll in EBIO 585/586 during all years of residency. Students must complete at least six credit hours in a "Topics" course of their choice (EBIO 561/562/563/668) before defending their proposal, and students are strongly encouraged to take at least one topics course per semester during all years of residency. Students must complete two semesters of EBIO 591 during their first four semesters to gain teaching experience; additional teaching experiences are available on an optional basis.

**Evaluation of Progress in Graduate Study:**

Students must maintain a minimum grade average of B in courses taken in the department and satisfactory grades in courses taken outside the department. Students must demonstrate satisfactory progress in their degree program in annual reviews by the EEB Graduate Advising Committee. The review process requires that each student:

• presents a public seminar on their research on Graduate Science Day

• prepares a written report on their progress

**First-year students must also participate in an interview with the EEB Graduate Advising Committee.**

**MS Program:**

Although students are not normally admitted to study for an MS, graduate students may earn the MS after obtaining approval of their candidacy for the PhD. In addition to the general university requirements and those listed above, the Master of Science in ecology and evolutionary biology requires at least 10 hours of research credit.

**MA Program:**

In addition to the general university requirements and those listed above, the Master of Arts in ecology and evolutionary biology requires the completion and public defense of a thesis embodying the results of an original investigation.

**PhD Program:**

In addition to the general university requirements and those listed above, the PhD degree in ecology and evolutionary biology requires:

- Passing the admission to candidacy examination given by the Graduate Thesis Committee. (The committee will be composed of at least four members. At least three must be members of the EEB graduate program faculty and one member has to be outside the EEB graduate program.)
- Complete an original investigation and a doctoral thesis with at least three chapters with the potential to produce publications in reputable, peer-reviewed scientific journals
- Present a departmental seminar on the research
- Publicly defend the doctoral thesis

## Degree Requirements for BS in Chemical Physics

The chemical physics major leading to a BS degree is offered jointly by the Chemistry Department and the Department of Physics and Astronomy. Students take upper-level courses in both chemistry and physics, focusing on the applications of physics to chemical systems. Students may obtain credit for some courses by advanced placement, and the department's undergraduate committee can modify requirements to meet the needs of students with special backgrounds.

CHEM 121 and 122 *General Chemistry I and II* (with lab) or CHEM 151 and 152 *Honors Chemistry I* and *II* (with lab)
CHEM 211 *Organic Chemistry*
CHEM 215 *Organic Chemistry Lab*
CHEM 311 *Physical Chemistry I*
CHEM 312 *Physical Chemistry II*
PHYS 101 or 111 *Mechanics* (with lab)
PHYS 102 or 112 *Electricity and Magnetism* (with lab)
PHYS 201 *Waves and Optics*
PHYS 202 *Modern Physics*
PHYS 231 *Elementary Physics Laboratory II*
PHYS 301 *Intermediate Mechanics*
PHYS 302 *Intermediate Electrodynamics*
MATH 101 and 102 *Single Variable Calculus I* and *II*
MATH 211 *Ordinary Differential Equations and Linear Algebra or* MATH 221 *Honors Calculus III*
MATH 212 *Multivariable Calculus or* MATH 222 *Honors Calculus IV*

***Nine credit hours from:***
PHYS 311 *Introduction to Quantum Physics I*
PHYS 312 *Introduction to Quantum Physics II, or* CHEM 430 *Quantum Chemistry*
CHEM 360 *Inorganic Chemistry*
CHEM 415 *Chemical Kinetics and Dynamics*
CHEM 420 *Classical and Statistical Thermodynamics*, or PHYS 425 *Statistical and Thermal Physics*

***Four credit hours from:***
CHEM 365 *Organic Chemistry Lab*
CHEM 366 *Inorganic Chemistry Lab*
CHEM 367 *Materials Chemistry Lab*
CHEM 368 *Chemical Measurement Lab*
PHYS 331 *Junior Physics Laboratory I*
PHYS 332 *Junior Physics Laboratory II*
Up to two hours of CHEM 491 *Research for Undergraduates* or PHYS 461/PHYS 462
Independent Research may be counted toward this requirement

***Six credit hours of:***
MATH or CAAM courses at or above 300 level

Last Revised : August 11, 2014

## Degrees Offered: BA, BS, MA, PhD

The Department of Chemistry offers undergraduate chemistry majors leading to both the bachelor of science degree and the bachelor of arts degree. The BS program rigorously prepares students for advanced work in chemistry or a related discipline, and the degree requirements are consistent with the guidelines for certification by the American Chemical Society. This curriculum provides a broad and comprehensive introduction to core areas of chemistry while promoting depth of understanding in one or more specific fields. BS students complete a series of foundation courses in general chemistry, analytical chemistry, biological chemistry, inorganic chemistry, organic chemistry, and physical chemistry. Students then complete one or more specializations, or “tracks”, consisting of in-depth courses both in and out of the specialization. The BA degree is a more flexible program that provides a comprehensive overview of all areas of chemistry, including laboratory experiences, but can be coupled more easily with other majors or professional career paths. Both degree programs offer students a solid background in the fundamental principles of chemistry, the properties and reactions of chemical compounds, and their uses.

Graduate studies emphasize individual research together with a fundamental understanding of chemistry beyond the students’ specific interests. Faculty research interests include the synthesis and biosynthesis of organic natural products; supramolecular chemistry, molecular recognition and biological catalysis; bioinorganic and organometallic chemistry; main group element and transition metal chemistry; the design of nanophase solids; molecular photochemistry and photophysics; infrared kinetic spectroscopy, laser, and NMR spectroscopy; studies of electron transfer in crossed beams; theoretical and computational chemistry; the study of fullerene molecules, carbon nanotubes, and their derivatives; polymer synthesis and characterization; molecular electronics; molecular machines; and chemical-based nanotechnology.

# Chemistry

## The Wiess School of Natural Sciences

## Degree Requirements for the BS in Chemistry

For general university requirements, see Graduation Requirements. Every student wishing to complete the BS in Chemistry degree must complete the "General Requirements for BS in Chemistry" and complete the requirements for "Advanced Work: Specialization."

## General Requirements for BS in Chemistry

Courses required for all students pursuing the BS in Chemistry:

***General Chemistry***
CHEM 151 *Honors Chemistry I*
CHEM 152 *Honors Chemistry II*
CHEM 153 *Honors Chemistry Laboratory I*
CHEM 154 *Honors Chemistry Laboratory II*

(The CHEM 121/122/123/124 General Chemistry sequence is an acceptable substitute.)

***Chemistry Foundation Courses***
CHEM 211 *Organic Chemistry I*
CHEM 311 *Physical Chemistry I*
CHEM 312 *Physical Chemistry II*
CHEM 330 *Analytical Chemistry*
CHEM 360 *Inorganic Chemistry*
BIOC 301 *Biochemistry I*

***Mathematics***
MATH 101 *Single Variable Calculus I*
MATH 102 *Single Variable Calculus II*
MATH 212 *Multivariable Calculus*
(MATH 221 & 222 *Honors Calculus III* and *IV* may substitute for MATH 212)
(MATH 211 Ordinary Differential Equations and Linear Algebra is encouraged for students interested in graduate study.)

The Department of Mathematics may, after consultation with a student concerning his/her previous math preparation, recommend that a student be placed into a higher level math course than that for which the student has received official credit. The Department of Chemistry will accept this waiver of the math classes upon a written confirmation of the waiver from the Department of Mathematics and upon the student's successful completion of the higher level math course.

***Physics***
PHYS 101 or 111 *Mechanics* (with lab) or PHYS 125 *General Physics* (with lab)
PHYS 102 or 112 *Electricity and Magnetism* (with lab) or PHYS 126 *General Physics II* (with lab)

## Advanced Laboratories

Each major must complete at least three (3) advanced laboratories chosen from the list below.

CHEM 365 *Organic Chemistry Laboratory*
CHEM 366 *Inorganic Chemistry Laboratory*
CHEM 367 *Materials Chemistry Laboratory*
CHEM 368 *Chemical Measurement Laboratory*
BIOC 311 *Advanced Experimental Biosciences*

## Research

CHEM 391 *Research for Undergraduates*, taken for at least 3 credits. Enrollment in CHEM 391 requires permission of the course instructor. **Students are expected to complete CHEM 391 before the end of their junior year; permission will not normally be granted for students in their final year of undergraduate study.**

Additional independent research or laboratory coursework in chemistry to total eight (8) credit hours (including CHEM 391). This requirement may be satisfied by taking one or more of the following: (i) independent research as CHEM 491, (ii) honors research: CHEM 492 and 493, and (iii) additional laboratory course(s) in chemistry at the 300-level or above. Up to two (2) credits of CHEM 700 may be used toward completion of this requirement.

## Advanced Work: Specialization

In addition to the General Requirements, each student must complete advanced work that satisfies the requirements of one specialization. A student may, working with his or her chemistry major advisor and with the approval of the Director of the Undergraduate Program, propose a track in another specialization. Such proposed tracks must have course and laboratory experiences comparable to those of the tracks listed below. A double specialization can be earned by completing the requirements for two specialties. For double specialization, only two advanced lecture courses may count towards both specializations. The remaining two advanced courses in each specialization must be unique (i.e., double specialization requires six advanced lecture courses, and triple specialization require eight). A nanochemistry specialization can be added to any of the standard tracks by adding two nanoscience courses.

For purposes of this requirement, “advanced coursework” includes chemistry courses at the 400-level or higher. CHEM 212 or CHEM 320 or BIOC 302 counts as “advanced coursework” for purposes of this requirement. Courses in other departments at the 400-level or higher with substantial chemistry content may count toward this requirement with approval of the Director of the Undergraduate Program.

## Specialization in Biological and Medicinal Chemistry

CHEM 212 Organic Chemistry II or CHEM 320 Organic Chemistry II
BIOC 302 Biochemistry II
Six (6) credit hours of additional advanced coursework in chemistry

## Specialization in Inorganic Chemistry and Inorganic Materials

CHEM 475 Physical Methods in Inorganic Chemistry
CHEM 495 Transition Metal Chemistry
Six (6) credit hours of additional advanced coursework in chemistry

## Specialization in Organic Chemistry

CHEM 212 Organic Chemistry II or CHEM 320 Organic Chemistry II
CHEM 401 Advanced Organic Chemistry
Six (6) credit hours of additional advanced coursework in chemistry

## Specialization in Physical and Theoretical Chemistry

CHEM 430 Quantum Chemistry
CHEM 420 Classical and Statistical Thermodynamics
One additional three-credit advanced course in physical chemistry (CHEM 415, CHEM 450, CHEM 531, or CHEM 559)
Three (3) credit hours of additional advanced coursework in physics or mathematics.

## Honors Research

The Chemistry Honors Research Program is a suite of courses (CHEM 492/493) offering the opportunity for a rigorous two-semester “capstone” individual research project in Chemistry. This immersive program is intended to give students a first-hand experience of a career in research. Students interested in graduate school are strongly

encouraged to apply. Students having completed previous independent research (as CHEM 391 and/or Chem 491) in an off-campus laboratory in the Texas Medical Center are eligible to apply to perform honors research in that laboratory. The honors research courses (CHEM 492 and CHEM 493) function as a pair and must all be taken in the same academic year. Registration for CHEM 492 requires a commitment to register for CHEM 493.

Students who complete the Chemistry Honors Research Program are given primary consideration for "Distinction in Research and Creative Work," a university award for select undergraduates, chosen by the department and granted at commencement, which appears on the transcript and diploma.

***Chemistry Honors Research Program components:***
CHEM 492 *Undergraduate Honors Research*. Fall semester, 5 credit hours. For approved students only, requires a formal application and recommendation of a faculty research advisor. Requirements include at least 15 hours of laboratory research per week and regular written and/or oral progress reports.

CHEM 493 *Undergraduate Honors Research.* Spring semester, 5 credit hours. Requirements include at least 15 hours of laboratory research per week and a formal thesis.

Applications may be submitted to the course instructor, February 1–August 1. Students are encouraged to apply early.

## Degree Requirements for the BA in Chemistry

For general university requirements, see Graduation Requirements.

**General Chemistry**
CHEM 151 *Honors Chemistry I*
CHEM 152 *Honors Chemistry II*
CHEM 153 *Honors Chemistry Laboratory I*
CHEM 154 *Honors Chemistry Laboratory II*
(The CHEM 121/122/123/124 General Chemistry sequence is an acceptable substitute.)

**Chemistry Foundation Courses**
CHEM 211 *Organic Chemistry I*
CHEM 330 *Analytical Chemistry*
CHEM 360 *Inorganic Chemistry*
BIOC 301 *Biochemistry I*
Two courses in physical chemistry (typically chosen from among CHEM 311, CHEM 312, BIOC 352)

**Mathematics**
MATH 101 *Single Variable Calculus I*
MATH 102 *Single Variable Calculus II*
MATH 212 *Multivariable Calculus*
(MATH 221 & 222 *Honors Calculus III* and *IV* may substitute for MATH 212.)
(MATH 211 *Ordinary Differential Equations* and *Linear Algebra* is encouraged for students interested in graduate study.)

The Department of Mathematics may, after consultation with a student concerning his/her previous math preparation, recommend that a student be placed into a higher level math course than that for which the student has received official credit. The Department of Chemistry will accept this waiver of the math classes upon a written confirmation of the waiver from the Department of Mathematics and upon the student's successful completion of the higher level math course.

**Physics**
PHYS 101 or 111 *Mechanics* (with lab) or PHYS 125 *General Physics* (with lab)
PHYS 102 or 112 *Electricity and Magnetism* (with lab) or PHYS 126 *General Physics II* (with lab)

**Advanced Laboratories**
Each major must complete at least three (3) advanced laboratories chosen from the list below.

CHEM 365 *Organic Chemistry Laboratory*
CHEM 366 *Inorganic Chemistry Laboratory*
CHEM 367 *Materials Chemistry Laboratory*
CHEM 368 *Chemical Measurement Laboratory*
BIOC 311 *Advanced Experimental Biosciences*

**Advanced coursework**

Six (6) credit hours of additional advanced coursework in chemistry. For purposes of this requirement, “advanced coursework” includes chemistry courses at the 400-level or higher. CHEM 212 or CHEM 320 or BIOC 302 counts as “advanced coursework” for purposes of this requirement. Courses in other departments with substantial chemistry content may count toward this requirement with approval of the Director of the Undergraduate Program.

## Degree Requirements for the BS in Chemical Physics

This degree is jointly managed by the Department of Chemistry and the Department of Physics and Astronomy. For more information, see Chemical Physics.

Last Revised : August 11, 2014

 

# Chemistry

## The Wiess School of Natural Sciences

Department Info | Undergraduate Requirements | Graduate Requirements | Course Listings

## Degree Requirements for MA and PhD in Chemistry

For general university requirements, see Graduate Degrees. Students who have completed course work equivalent to that required for a BA or BS in chemistry may apply for admission to the PhD program. For more information, see Admission to Graduate Study. Students are not normally admitted to study for an MA degree.

## Requirements for the PhD in Chemistry

**Research**—The PhD in chemistry is awarded for original research in chemistry. During the first semester of residence, students select a research advisor from among the members of the faculty. In some cases, students may choose research advisors outside of the department. Approval of the department chair is required to formalize these advising relationships. The research advisor will guide the student in the choice of an appropriate research topic and in the detailed training required to complete that project. Students must successfully complete CHEM 800 *Graduate Research* and CHEM 600 *Graduate Seminar* every semester of residence. Candidates earn a PhD after successfully completing at least 90 semester hours of advanced study in chemistry and related fields, culminating in a thesis that describes an original and significant investigation in chemistry. The thesis must be satisfactorily defended in a public oral examination. The student must pass the thesis defense before the end of the 16th semester of residency.

**Coursework**—Within the first two years, the student must complete six 3-semester-hour graduate-level lecture courses at Rice University, or their approved equivalent. In order to satisfy this requirement, each of these courses must satisfy the following criteria:

- They must be approved by the department's graduate advising committee.
- Chemistry graduate courses must be at the 500 level or higher. Certain 300- and 400-level courses in other departments may be acceptable with prior approval by the department's graduate advising committee, but a maximum of three lower-level courses in other departments can count towards the six-class requirement, and these do not count towards the university-wide requirement of 90 credits at the 500 level. Courses must be in technical subjects in science or engineering. Courses in teaching, presentation, or management will not be counted toward the six-class requirement.
- Each course must be passed with a grade of B- or higher. It is possible to repeat or replace a course, upon approval of the department's graduate advising committee. A maximum of two courses can be repeated/replaced.
- Students who pursue both the BS and the PhD at Rice need not duplicate course work for the two degrees. However, teaching as an undergraduate does not substitute for the teaching requirements in the PhD program.

**Responsible Conduct of Research** —Each graduate student must successfully complete the ethics course UNIV 594.

**Teaching**—Each graduate student must participate in teaching (CHEM 700) for the equivalent of three semesters. Assignments are determined by departmental needs.

**Qualifying Examination**—The qualifying exam has written and oral components, and the expectations for these are available in the department office. The examination committee will be composed of three faculty members, excluding the research advisor. The written document must be submitted to the committee at least one week before the date of the oral examination. The examination must be taken by the last day of class at the end of the student's fourth semester in residency. Any follow-up work required by the committee must be completed by the assigned date, and

the exam must be passed by the end of the sixth semester.

**Advancement to Candidacy for the PhD**—After completing the required coursework, teaching, and qualifying examination, a student must petition to be advanced to candidacy for the PhD degree. Upon advancement to candidacy, a student chooses a thesis committee of at least three faculty members with the guidance and approval of the research advisor and department chair. The thesis committee must include one faculty member whose primary appointment is outside of the chemistry department.

## Satisfactory Performance

To remain in good standing, a student must maintain a GPA of 3.00 (B) or higher in all lecture courses, a GPA of 3.00 (B) or higher in all semesters of CHEM 700, and a grade of B or higher in every semester of CHEM 600 and CHEM 800. Failure to maintain satisfactory grades and sufficient progress in research will result in probation and possible dismissal. The student must be enrolled full time in a departmentally approved research group beginning the second semester, and every semester thereafter. All graduate students are evaluated annually to ensure that they are making appropriate progress towards the degree. The student, advisor, or department may request a meeting between the student and a faculty committee at any time to evaluate progress or to determine a course of action. If progress is unsatisfactory, the committee may recommend a semester of probation, which could result in dismissal from the program if progress remains unsatisfactory in the probationary semester.

## Requirements for the MA in Chemistry

**MA Program**—Although students are not normally admitted to study for an MA, graduate students may earn the MA after obtaining approval of their candidacy for the PhD. The MA degree may also be earned by students who do not achieve PhD candidacy by:

- Completing the six one-semester courses required for PhD candidacy
- Producing a master's thesis that presents the results of a program of research approved by the department
- Passing a final master's thesis defense and submitting the thesis to the Office of Graduate and Postdoctoral Studies.

## Appeal

Students may petition the Chemistry Department Graduate Advising Committee for variances on these academic regulations.

## Degrees Offered: BA, BS, MS, PhD

All undergraduate majors in earth science take a five-course core sequence, typically in the sophomore and junior

years, on earth processes, materials, observations, and history. Majors also take a course in geological field techniques and introductory courses in mathematics, chemistry, and in many cases, physics and biology.

The selection of upper-division courses and additional science courses depends on which major, BA or BS, and, for the BS major, which of five tracks are chosen by the student: geology, geochemistry, geophysics, environmental earth science, or a track designed by the student subject to the approval of the department undergraduate advisor. The program of study typically includes experience with analytical equipment, computer systems, and fieldwork.

The BS in earth science degree should be chosen by students planning a career or further study in earth science or a related field. The BA in earth science degree has fewer requirements and might be a good choice for students planning a career or further study to which earth science is incidental.

Last Revised : August 11, 2014

# Earth Science

## The Wiess School of Natural Sciences

## Degree Requirements for BS in Earth Science

For general university requirements, see Graduation Requirements.

BS majors also must complete the “Additional Requirements” for one track (described below).

***The following courses are required for all tracks:***
MATH 101/102 *Single Variable Calculus I and II*
CHEM 121/122 or 151/152 *General Chemistry I and II* with lab
PHYS 101/102 or 111/112 *Introductory Physics I and II* with lab
ESCI 301 *Introduction to the Earth*
ESCI 321 *Earth System Evolution and Cycles*
ESCI 322 *Earth Chemistry and Materials*
ESCI 323 *Earth Structure and Deformation*
ESCI 324 *Earth’s Interior*
ESCI 334 *Geological Techniques*

## Additional Requirements for the Geology Track

***The following courses are required:***
MATH 211 *Ordinary Differential Equations and Linear Algebra*
ESCI 390 *Geology Field Camp (at least 3 hours)*
ESCI 442 *Exploration Geophysics*
ESCI 427 *Sequence Stratigraphy*

***Choose one of the following courses:***
COMP 110 *Computation in Natural Science*
CAAM 210 *Introduction to Engineering Computation*

***Choose one of the following courses:***
ESCI 412 *Advanced Petrology*
ESCI 430 *Principles of Trace-Element and Isotope Geochemistry*

***Choose one of the following courses:***
ESCI 504 *Siliciclastic Depositional Systems*
ESCI 506 *Carbonate Depositional Systems*
ESCI 421 *Paleoceanography*
ESCI 431 *Advanced Geomorphology*
ESCI 432 *Marine Geology Systems*
ESCI 435 *Mechanics of Sediment Transport*

***Choose one of the following courses:***
ESCI 410 *Optical Mineralogy and Petrography*
ESCI 418 *Quantitative Hydrogeology*
ESCI 426 *Interpretation of Regional 2D Seimic Data*
ESCI 429 *Volcanic Processes*
ESCI 463 *Tectonic Systems*

ESCI 464 *Global Tectonics*

## Additional Requirements for the Geochemistry Track

***The following courses are required:***
BIOC 201 *Introductory Biology*
ESCI 390 *Geology Field Camp or* ESCI 391 *Earth Science Field Experience (at least 3 hours)*

***Choose 12 hours from the following, including at least two courses in ESCI:***
ESCI 340 *Global Biogeochemical Cycles*
ESCI 410 *Optical Mineralogy and Petrography*
ESCI 412 *Advanced Petrology*
ESCI 419 *Materials Characterization*
ESCI 421 *Paleoceanography*
ESCI 425 *Organic Geochemistry*
ESCI 426 *Interpretation of Regional 2D Seimic Data*
ESCI 429 *Volcanic Processes*
ESCI 458 *Thermodynamics/Kinetics for Geoscientists*
ESCI 203 *Biogeochemistry*
ESCI 430 *Principles of Trace-Element and Isotope Geochemistry*

***Choose nine hours from the following:***
All upper division ESCI courses
CEVE 401 *Introduction to Environmental Chemistry*
CEVE 434 *Fate and Transport of Contaminants of the Environment*
CEVE 534 *Fate and Transport of Contaminants of the Environment*
CEVE 550 *Environmental Organic Chemistry*
EBIO 202 *Introductory Biology*
BIOC 211 *Introductory Lab Module in Biological Science*
CHEM 211/212 *Organic Chemistry*
CHEM 310 *Physical Chemistry*
CHEM 415 *Chemical Kinetics and Dynamics*
CHEM 495 *Transition Metal Chemistry*
MATH 211 *Ordinary Differential Equations and Linear Algebra*
MATH 212 *Multivariable Calculus*
COMP 110 *Computation Science and Engineering*
CAAM 210 *Introduction to Engineering Computation*

## Additional Requirements for the Geophysics Track

***The following courses are required:***
MATH 211 *Ordinary Differential Equations and Linear Algebra*
MATH 212 *Multivariable Calculus*
PHYS 201 *Waves and Optics*
PHYS 231 *Elementary Physics Lab II*
ESCI 390 *Geology Field Camp or* ESCI 391 *Earth Science Field Experience* (*at least 3 hours)*

**Choose one of the following courses:**
COMP 110 *Computation in Natural Science*
CAAM 210 *Introduction to Engineering Computation*

***Choose six hours from the following:***
ESCI 418 *Quantitative Hydrogeology*
ESCI 440 *Geophysical Data Analysis: Digital Signal Processing*
ESCI 441 *Geophysical Data Analysis: Inverse Theory*
ESCI 442 *Exploration Geophysics*
ESCI 444 *Seismic Reflection Data Processing*
ESCI 450 *Remote Sensing*
ESCI 452 *GIS for Scientists*
ESCI 461 *Seismology I*
ESCI 462 *Tectonophysics*
ESCI 463 *Tectonic Systems*
ESCI 464 *Global Tectonics*
ESCI 542 *Seismology II*

***Choose six hours from the immediately preceding or following lists:***
Any three- or four-hour course in ESCI with a number between 410 and 475, except for research and special studies
Any 300- or 400-level MATH, CAAM, or PHYS class
CHEM 311 *Physical Chemistry*

## Additional Requirements for the Environmental Earth Science Track

***The following courses are required:***
MATH 211 *Ordinary Differential Equations and Linear Algebra*
BIOC 201 *Introductory Biology*
ESCI 390 *Geology Field Camp* or ESCI 391 *Earth Science Field Experience (at least 3 hours)*
STAT 280 *Elementary Applied Statistics*

***Choose one of the following courses:***
COMP 110 *Computation in Natural Science*
CAAM 210 *Introduction to Engineering Computation*

***Choose 11 hours from the following, including at least two courses in ESCI:***
ESCI 340 *Global Biogeochemical Cycles*
ESCI 410 *Optical Mineralogy and Petrography*
ESCI 414 *Physics and Chemistry of the Atmosphere*
ESCI 418 *Quantitative Hydrogeology*
ESCI 419 *Materials Characterization*
ESCI 421 *Paleoceanography*
ESCI 425 *Organic Geochemistry*
ESCI 426 *Interpretation of Regional 2d Seismic Data*
ESCI 429 *Volcanic Processes*
ESCI 431 *Advanced Geomorphology*
ESCI 432 *Marine Geology Systems*
ESCI 435 *Mechanics of Sediment Transport*
ESCI 442 *Exploration Geophysics*
ESCI 452 *GIS for Scientists*
ESCI 458 *Thermodynamics/Kinetics for Earth Scientists*
ESCI 463 *Tectonic Systems*
ESCI 467 *Geomechanics*
ESCI 504 *Siliciclastic Depositional Systems*
ESCI 506 *Carbonate Depositional Systems*
CEVE 401 *Environmental Chemistry*
CEVE 406 *Introduction to Environmental Law*
CEVE 412 *Hydrogeology and Watershed Analysis*
CEVE 434 *Fate and Transport of Contaminants in the Environment*
CHEM 211 *Organic Chemistry*
CHEM 310 *Physical Chemistry*
CHEM 360 *Inorganic Chemistry*
PHYS 201 *Waves and Optics*
PHYS 231 *Elementary Physics Lab II*
EBIO 202 *Introductory Biology*

## Additional Requirements for the Self-Designed Track

The department recognizes the interdisciplinary nature of modern earth science and the opportunity for students to specialize in nontraditional and emerging fields. Therefore, students can design their own specialty track, normally in close consultation with one faculty member and followed by approval from the department's undergraduate advisor. In addition to required earth science courses and related courses, these tracks will generally comprise 18 additional hours that target a coherent theme from an approved list of 300- or higher-level courses, from inside or outside the department. Interested students are expected to submit a statement of rationale by the beginning of their third year.

***Choose one of the following courses:***
ESCI 390 *Geology Field Camp (at least 3 hours)*
ESCI 391 *Earth Science Field Experience (at least 3 hours)*

***Choose six hours from the following:***
BIOC 201 *Introductory Biology*
COMP 110 *Computation in Natural Science*
CAAM 210 *Introduction to Engineering Computation*

CHEM 311/312 *Physical Chemistry I and II*
MATH 211 *Ordinary Differential Equations and Linear Algebra*
MATH 212 *Multivariable Calculus*
PHYS 201 *Waves and Optics*

***Choose 18 hours of additional courses numbered 300 or higher targeting a coherent theme selected with approval of the department undergraduate advisor.***

## Degree Requirements for BA in Earth Science

For general university requirements, see Graduation Requirements.

***The following courses are required:***
MATH 101/102 *Single Variable Calculus I and II*
CHEM 121/122 or 151/152 *General Chemistry I and II* with lab
ESCI 301 *Introduction to the Earth*
ESCI 321 *Earth System Evolution and Cycles*
ESCI 322 *Earth Chemistry and Materials*
ESCI 323 *Earth Structure and Deformation*
ESCI 324 *Earth's Interior*
ESCI 334 *Geological Techniques*

***Choose six hours from the following:***
BIOC 201 and EBIO 202 *Introductory Biology*
BIOC 211 and EBIO 213 *Biology Lab Modules*
MATH 211 *Differential Equations*
PHYS 101/102 or 125/126 *Introductory Physics*
COMP 110 *Computation in Natural Science* or CAAM 210 *Introduction to Engineering Computation*

***Choose four upper division ESCI courses, approved by the department undergraduate advisor.***

C***hoose six hours in science and engineering (including ESCI) courses at the 200 level or above approved by the department undergraduate advisor.***

## Undergraduate Independent Research

The department encourages, but does not require, Earth Science undergraduate majors to pursue independent supervised research in ESCI 481 Research in Earth Science. This can also be carried out as part of the Earth Science Honors Thesis Program.

## Honors Research

Undergraduates are encouraged to embark on an undergraduate honors thesis. The purpose of the honors thesis is for students to develop and demonstrate their creative and independent research potential. Students are recommended to begin in the fall of their junior year to provide ample time for research projects to be developed, executed and written. Students are expected to enroll in at least three semesters of the course ESCI 481 Undergraduate Research in Earth Science, beginning no later than the spring semester of their junior year. In each of the three semesters, students should sign up for ESCI 481 for at least 3 credits.

***Criteria for participating in undergraduate honors thesis research***

• Strong performance in ESCI courses, in particular, ESCI 321, 322, 323, 324, and 334
• A grade of A- or better in ESCI 481 Undergraduate Research in Earth Science
• Letter of recommendation of a faculty research mentor
• Research proposal

***Requirements for completing an undergraduate honors thesis***

Spring semester of junior year:

Each honors thesis candidate should choose a research topic, identify a faculty research adviser, and initiate independent research. The student should select a thesis committee, consisting of a faculty advisor, one member of the honors thesis committee, and one other faculty member of their choosing. Candidate is expected to turn in a written proposal at the end of the semester, accompanied by a formal application, both of which will be evaluated by the honors thesis committee for consideration of acceptance into the honors thesis program in the senior year.

Required courses:

• ESCI 481 Undergraduate Research in Earth Science (3 credit hours)
• ESCI 404 Seminar: Department Research (1 credit hour)

Fall semester of senior year:

Students accepted into the honors thesis program continue to develop and refine their proposed research in concert with their research adviser and thesis committee. Students participate in meetings with other honors thesis candidates to discuss basic research protocols and philosophies, and meet independently with their chosen scientific adviser, and generate data, experiments or models. Students will give oral presentations of their research proposals in public by mid-semester, in the presence of their examining committee. At the end of the semester, students must submit final versions of their proposals, describing motivation, hypothesis, methodology, and preliminary results. The honors thesis committee will evaluate the proposals, and if approved, students can continue in the honors thesis program. Required courses:

• ESCI 481 Undergraduate Research in Earth Science (3 credit hours)
• ESCI 403 Seminar: Department Research (1 credit hour)

Spring semester of senior year:

Students continue and complete their research. A mid-semester progress report must be submitted to the thesis committee for feedback. At the end of the spring semester, students submit their final theses, and give public oral exit talks. To complete the honors thesis program, student theses must be approved by the honors thesis committee. Required courses:

• ESCI 481 Undergraduate Research in Earth Science (3 credit hours)
• ESCI 403 Seminar: Department Research (1 credit hour)

Further details about the program, and expectations and criteria for the thesis proposal and final thesis can be found on the Department of Earth Science website (earthscience.rice.edu).

***Application Process***

Students must apply and be accepted to participate in the senior honors research program. The application form can be downloaded from Department of Earth Science website (earthscience.rice.edu), and should be submitted along with a ~two page thesis proposal at the end of the spring semester of the junior year. Students will be informed of their acceptance into the honors thesis program before the start of the following fall semester.

***Other points of consideration***

1. For students who expect to graduate by the end of Spring 2015, an exception can be made for them to take two instead of three independent ESCI 481 courses, i.e., in Fall 2014 and Spring 2015. The students who will be seniors starting Fall 2014, however, should also sign up for ESCI 404 in Spring 2015, where they will have to defend their thesis with an oral presentation.

2. Students who are accepted into the 'RUSP: Rice Undergraduate Scholars Program' can substitute ESCI 481 courses for semesters 2 and 3 with HONS 470 and HONS 471. However, the students will have to meet all other requirements of the honors thesis set by the department.

Other expectations, conditions, and opportunities related to carrying out an Earth Science Honors Thesis can be found on the Department of Earth Science website.

Last Revised : August 11, 2014

# Earth Science

## The Wiess School of Natural Sciences

Department Info | Undergraduate Requirements | Graduate Requirements | Course Listings

### Degree Requirements for MS and PhD in Earth Science

All incoming students should have a strong background in physics, chemistry, and mathematics and should have, or should acquire, a broad grounding in fundamental earth science. The department encourages applications from well-qualified students with degrees in the other sciences, mathematics, or engineering. For general university requirements, see Graduate Degrees. The requirements for the MS and PhD in earth science are similar, but the PhD demands a significantly higher level of knowledge, research skills, and scholarly independence. Most students need at least two years beyond the bachelor's degree to complete the MS or four to complete the PhD.

Candidates determine, with their major professor and thesis committee, a course of study following the Guidelines for Advanced Degrees in the Department of Earth Science distributed to all incoming students. For both degrees, candidates must:

- Complete 20 semester hours of course work at the 400 level and above (or other approved courses), not including research hours
- Pass a written preliminary exam
- Maintain a grade point average of 3.00 (B) or better
- Prepare a written thesis comprised of peer-reviewed publication(s) that represent an original contribution to science
- Defend the research and conclusions of the thesis in an oral examination

Students with a bachelor's degree and department approval may work directly toward the PhD, in which case the course of study is equivalent to that required for both degrees; performance on the examinations and the thesis, however, should be at the level required for the PhD. Because the graduate programs require full-time study and close interaction with faculty and fellow students, the department discourages students from holding full (or nearly full) time jobs outside the university. Outside employment must be approved by the chair.

## Degrees Offered: MSEADM

Rice University introduced the professional master's degree in environmental analysis and decision making in fall 2002. This degree is geared to teach students rigorous methods that are needed by industrial and governmental organizations to deal with environmental issues. As an interdisciplinary program, it aims to give students the ability to predict environmental problems, not just solve them. It emphasizes core quantitative topics such as statistics, remote sensing, data analysis, and modeling. In addition, it teaches laboratory and computer skills and allows students to focus their education by taking electives in relevant fields.

The environmental analysis and decision making degree is part of five tracks in the professional master's program at Rice housed in the Wiess School of Natural Sciences. These master's degrees are designed for students seeking to gain further scientific core expertise coupled with enhanced management and communications skills. These degrees instill a level of scholastic proficiency that exceeds that of the bachelor's level, and they create the cross-functional aptitudes needed in modern industry. Skills acquired in this program will allow students to move more easily into management careers in consulting or research and development, design, and marketing of new science-based products.

A joint MBA/MSEADM degree is offered in conjunction with the Jesse H. Jones Graduate School of Business.

# Environmental Analysis and Decision Making

## The Wiess School of Natural Sciences

Department Info | Undergraduate Requirements | Graduate Requirements | Course Listings

## Degree Requirements for MS in Environmental Analysis and Decision Making

In addition to the core science courses, students are required to complete a three to six month internship and take a set of cohort courses focusing on business and communications. At the conclusion of the internship, students must present a summary of their internship project in both oral and written form as part of the professional master's seminar.

Part-time students who already work in their area of study may fulfill the internship requirements by working on an approved project with their current employer. For general university requirements for graduate study, see Academic Regulations, and also see Professional Degrees under Graduate Degrees.

## Admission

Admission to graduate study in environmental anyalysis and desision making is open to qualified students holding a bachelor's degree in a related field that includes general biology, chemistry, calculus, differential equations, and linear algebra. Department faculty evaluate the previous academic record and credentials of each applicant individually.

***Required science core courses***
EBIO 570 *Ecosystem Management and Conservation*
CEVE 510 *Principles of Environmental Engineering* or CEVE 501 *Chemistry for Environmental Engineering and Science*
STAT 685 *Quantitative Environmental Decision Making*

***Required Cohort courses***
NSCI 501 *Master's Seminar (two semesters required)*
NSCI 511 *Science Policy and Ethics*
NSCI 512 *Professional Master's Project*
NSCI 610 *Management in Science and Engineering - cross-list: ENGI 610*

## Elective Courses

Students will choose 21 credit hours elective courses from the following three focus areas and satisfying the following requirements:

- one course (3 credits) from each of EBIO, CEVE, and STAT,
- one course (3 credits) from the Management and Policy focus area,
- three courses (9 credits) from one focus area
- remaining two courses (6 credits)

Recommended courses include, but are not limited to, the following:

***Environmental Sustainability***
CEVE 307 *Energy and the Environment*
CEVE 401 *Chemistry for Environmental Engineering and Science*
CEVE 412 *Hydrology and Watershed Analysis*

CEVE 415 *Water Resources Engineering and Planning*
CEVE 502 *Sustainable Design - For CEVE 302, cross-list: ENGI 302*
CEVE 511 *Atmospheric Processes*
CEVE 512 *Hydrologic Design Lab*
CEVE 534 *Fate and Transport of Contaminants in the Environment*
CEVE 536 *Environmental Biotechnology and Bioremediation*
CEVE 550 *Environmental Organic Chemistry*
EBIO 323 *Conservation Biology - cross-list: ENST 323*
EBIO 325 *Ecology*
EBIO 336 *Plant Diversity*
EBIO 563 *Current topics in Ecology*
EBIO 568 *Current topics in Conservation Biology*
EBIO 569 *Core course in Ecology and Evolutionary Biology*
ESCI 340 *Global Biogeochemical Cycles - cross-list: EBIO 340, ENST 340*
ESCI 424 *Earth Science and the Environment*
ESCI 450 *Remote Sensing - cross-list: CEVE 450*
ESCI 454 *Geographic Information Science - cross-list: CEVE 453*
POST 411 *Sustainable Development - cross-list: GLHT 411*
STAT 684 *Environmental Risk Assessment and Human Health* - cross-list: STAT/CEVE 684 (Graduate/Undergraduate Equivalency: CEVE 484)

***Management and Policy***

**Only one of these two courses may be counted toward the degree.*

**Professional Science Master's 5th Year Degree Option for Rice Undergraduates**
Rice students have an option to achieve the MS in environmental analysis and decision making by adding an additional fifth year to the four undergraduate years of science studies. Advanced Rice students in good standing apply during their junior year, then start taking required core courses of the environmental analysis and decision making program during their senior year. A plan of study based on their particular focus area will need to be approved by the track director and the PSM director.

## Degrees Offered: BA

The Environmental Studies Program offers several interdisciplinary courses for students interested in broadening their understanding of environmental issues. These courses often are team-taught by faculty from various areas of study.

Students wishing to major in an environmental program have three options: environmental science, environmental engineering sciences (see civil and environmental engineering), or environmental policy (see policy studies). In addition, chemical and biomolecular engineering majors may create a focus area in environmental engineering (see chemical and biomolecular engineering) and earth science majors may follow an environmental earth science track (see earth science).

Students seeking advice regarding environmental programs may contact Andre Droxler (andre@rice.edu), or the coordinator of the Center for the Study of Environment and Society (cses@rice.edu).

## Degree Requirements for BA in Environmental Science

Environmental science is an interdisciplinary program that addresses environmental issues in the context of what we know about earth, ecology, and society. In addition to its science core, the major also seeks to provide students with some appreciation of social, cultural, and policy dimensions of environmental issues, as well as exposure to the technologies of pollution control. The double major is designed to accommodate:

- Students wishing to obtain a solid preparation for later graduate study in environmental science or other careers as environmental professionals (e.g., environmental economics or environmental law)
- Students pursuing other careers (e.g., historians, lawyers, mechanical engineers, chemists) who hope to contribute to solutions to one of the major global issues of the 21st century.

Students may take environmental science only as a second major. The 67-semester-hour (minimum) double major may be taken in conjunction with any stand-alone major offered in any school of the university.

The key components of the double major include:

- Foundation course work in mathematics, physics, chemistry, and biology.
- A set of five undergraduate core courses, required of all double majors, that acquaint undergraduates with a range of environmental problems encountered by scientists, engineers, managers, and policy makers. Core courses stress the components of the global environment and their interactions.
- 24 semester hours of environmental electives from four categories: 1) social sciences and economics, 2) humanities and architecture, 3) natural sciences, and 4) engineering. Students may petition to have electives, in addition to those currently listed, apply toward the double major.

Major tracking forms are available in the Center for the Study of Environment and Society (CSES) office for declared environmental science majors.

Specific course requirements for a double major (BA) in environmental science include:

***General Prerequisites***
EBIO 201 *Introductory Biology*
EBIO 202 *Introductory Biology*
CHEM 121 or 151 *General Chemistry with Laboratory*
CHEM 122 or 152 *General Chemistry with Laboratory*
MATH 101 or 111 *Single Variable Calculus I*
MATH 102 or 112 *Single Variable Calculus II*
PHYS 101 or 125 or 111 *Mechanics*
PHYS 102 or 126 or 112 *Electricity and Magnetism*

***Core Courses***
EBIO 325 *Ecology*
ESCI 321 *Earth System Evolution and Cycles*

***One of the following two courses***
CEVE 411 *Atmospheric Processes*
ESCI 414 *Physics and Chemistry of the Atmosphere*

***Two of the following three courses***
CEVE 401 *Introduction to Environmental Chemistry*
CEVE 412 *Hydrology and Watershed Analysis*
ESCI 454/CEVE 453 *Geographic Information Science*

***Advanced Electives (24 hours; at least six semester hours from each category)***

***Category A—Social Sciences and Economics***
CEVE 306 *Global Environmental Law and Sustainable Development*

## Degree Offered: BA

The department was one of the first of its kind in the nation to institute an academic program structure that allows students to concentrate their efforts on a specific subdiscipline. Academic programs include sports medicine and health sciences. Detailed requirements of each program can be obtained on the KINE website.

Last Revised : August 12, 2013

 

# Kinesiology

## The Wiess School of Natural Sciences

## Degree Requirements for the BA in Kinesiology

For general university requirements, see Graduation Requirements. A minimum of 120 semester hours is required for a bachelor of arts degree in kinesiology. Because of the interdisciplinary and diverse nature of the field of kinesiology, each student is required to specify an academic program concentration within the major.

### Sports Medicine Program

*Advisors: Bruce Etnyre and Augusto Rodriguez*

Students who choose the sports medicine program typically continue their education at the graduate level or plan on attending medical school or other medically related professional schools, such as physical therapy. Graduates also may be directly employed in medical and corporate settings, which include both preventative and rehabilitative programs. Graduates who choose not to seek postbaccalaureate education generally are encouraged to obtain certification for exercise testing, physical fitness evaluation, or exercise prescription through the American College of Sports Medicine website.

The sports medicine curriculum intends to provide a strong natural science foundation and interface this foundation with application to the human body. Prerequisite courses in chemistry and physics, elective courses in biology and biochemistry, as well as an array of required and elective courses offered within the department provide this foundation. The sports medicine program is the only academic specialization on campus that provides detailed exposure to human anatomy and human physiology. In addition, students receive a solid measurement and statistics, exercise physiology, and sports medicine. Practical experience is afforded through several academic labs. Other elective courses include epidemiology, case studies in human performance, motor control, advanced exercise physiology and preventive medicine, research methods, and muscle physiology and plasticity. During advising sessions, students are encouraged to select from these electives according to their respective career goals. Students in the sports medicine program are expected to develop a strong scientific knowledge base as well as adept critical reading, writing, and oral communication skills.

Qualified students of the sports medicine program will be encouraged to participate in an independent study. This independent study allows integral involvement in basic or applied research directed by a faculty advisor. The application (proposal) process for independent studies is outlined on the KINE website. Qualified students also are encouraged to apply for any highly competitive internship. The internships generally provide students with an opportunity to experience the application of preventive and rehabilitative sports medicine concepts and practice in a healthcare or corporate setting.

### Health Sciences Program

*Advisors: Nicholas K. Iammarino and Heidi Perkins*

The goal of the health sciences program is to provide students with a fundamental background in health promotion and disease prevention. This background will enable them to understand the complexities of maintaining an optimal level of personal health while also considering the role that health promotion plays in society and the mechanisms that affect community health. The health science program is viewed as an excellent option for undergraduate students who are preparing to enter graduate school in health education, health promotion, or public health, as well as other health-related graduate or professional programs such as medicine or dentistry.

Students must complete a total of 45 semester hours in addition to the general university requirements (see Graduation Requirements). Seven courses constitute a total of 21 required hours. These required courses include an introductory course designed to acquaint students with the fundamental concepts of health and models of health promotion (Concepts of Health Sciences), understanding and assessing community health needs (Principles of Community Health), methods of understanding the disease process (Epidemiology), a course that introduces statistics and measurement (Measurement and Statistics), a professional preparation course that introduces students to the profession (Foundations of Health Promotion/Health Education), theories and models commonly used in health promotion research and practice (Theories and Models of Health Behavior), and an application course in which students plan a health promotion program (Planning and Evaluation in Health Promotion/Education).

The remaining 24 semester hours are drawn from elective courses that are both within the Department of Kinesiology and, at present, more than 20 courses from other academic departments. In keeping with the university's interest in an interdisciplinary approach to undergraduate education, this allows students to choose health-related courses within the natural sciences, social sciences, and humanities divisions.

## Degrees Offered: BA, BS, MA, PhD

Mathematics lies at the foundation of many disciplines in the sciences, engineering fields, and the social sciences, and this influence is growing as these subjects become increasingly quantitative. Recognizing this important role in the wide variety of directions available to our degree recipients, the program in mathematics provides undergraduates with a spectrum of choices. These range from nontheoretical treatments of calculus and courses in combinatorics, elementary number theory, and projective geometry to a broad variety of sophisticated mathematics, including real and complex analysis, differential geometry, abstract algebra, algebraic and geometric topology, algebraic geometry, dynamics, and partial differential equations.

Faculty research interests range from differential geometry, ergodic theory, group representations, partial differential

equations, and probability to real analysis, mathematical physics, complex variables, algebraic geometry, number theory, combinatorics, geometric topology, algebraic topology, and dynamics.

Last Revised : August 11, 2014

 

# Mathematics

## The Wiess School of Natural Sciences

## Degree Requirements for BA in Mathematics

For general university requirements, see Graduation Requirements. Students majoring in mathematics may choose between the regular math major and the double major. Regular math majors must complete:

- MATH 101 and 102 *Single Variable Calculus I and II*
- MATH 211 *Ordinary Differential Equations and Linear Algebra* and MATH 212 *Multivariable Calculus;* or MATH 221 and 222 *Honors Calculus III and IV*
- At least 24 semester hours (eight courses) in departmental courses at the 300 level or above (in many instances, the math department will waive the 100- and 200-level courses for a math major)

The requirements for the double major are the same except that students may substitute approved mathematics-related courses for up to nine of the 24 hours required at the 300 level or above.

Students receive advanced placement credit for MATH 101 by achieving a score of four or five on the AP AB-level test and for MATH 101 and 102 by achieving a score of four or five on the BC-level test. Students who have had calculus but have not taken the AP test may petition the department for a waiver of the calculus requirements. Entering students should enroll in the most advanced course commensurate with their background; advice is available from the mathematics faculty during Orientation Week and at other times.

## Degree Requirements for BS in Mathematics

These requirements are in addition to general university graduation requirements. The chair of the undergraduate committee of the MATH department may modify requirements to meet the needs of students with advanced backgrounds.

***Required courses include:***
Single variable calculus: MATH 101 and 102;
Differential equations: MATH 211, 381, or 423:
Multivariable calculus: MATH 212, or both 221 and 222;
Linear algebra: MATH 221, 354, or 355;
Real analysis: two classes taken from MATH 321, 322, or 425;
Algebra: MATH 356 and 463;
Geometry and manifolds: MATH 370, 401, or 402;
Complex analysis: MATH 382 or 427;
Topology: MATH 443, 444, or 445

A total of at least 33 credit hours in MATH (e.g., 11 three-hour courses) at the 300 level or above is required. Students may choose electives to reach this number. At most three credit hours for any given course number may be used for this degree.

## Course requirements for a Minor in Mathematics

The minor in mathematics is available to students majoring in other fields who take at least 18 credit hours in MATH at the 200 level or above, including at least 12 credit hours at the 300 level or above. These are subject to the following breadth requirements—at least one course must be from each of the following areas:

- Analysis: MATH 302, 321, 381, 382;
- Discrete mathematics and algebra: MATH 356, 365, 368;
- Linear algebra: MATH 221, 354, 355.

Certain approved classes taken outside the mathematics department may be used to satisfy the breadth requirement in one area, but will not count towards the required 18 credit hours. An approved upper-level MATH course (other than 490 or 499) may be used to satisfy a breadth requirement. Students seeking to substitute approved courses should consult in advance with the chair of the undergraduate committee. At most three credit hours from any particular course or course number may be applied to the minor.

Last Revised : August 11, 2014

# Mathematics

## The Wiess School of Natural Sciences

## Degree Requirements for MA and PhD in Mathematics

Admission to graduate study in mathematics is granted to a limited number of students who have indicated an ability for advanced and original work. Normally, students take one or two years after the BA degree to obtain an MA degree, and they take four or five years to obtain a PhD. An MA is not a prerequisite for the PhD. For general university requirements, see Graduate Degrees.

A number of graduate scholarships and fellowships are available, awarded on the basis of merit. As part of the graduate education in mathematics, students also engage in teaching or other instructional duties, generally for no more than six hours a week.

For courses carrying dual undergraduate and graduate numbers, (e.g., MATH 463/563), the 500-level version is intended to prepare students for advanced work in mathematics. In particular, written assignments should be prepared to high professional standards, typically using LaTeX or other mathematical typesetting software. Mathematics graduate students should enroll in the 500-level version.

**MA Program**—Although students are not normally admitted to study for a masters degree, the department does offer non-thesis and thesis MA degrees. Doctoral students may petition for these once they have satisfied all university and departmental requirements.

Candidates for the MA in mathematics must:

- Complete with a grade of B or better a course of study approved by the department. (Students may transfer credits from another university only with the approval of both the department and the University Graduate Council.)
- Perform satisfactorily on the general examinations in algebra, analysis, and topology or prepare and present an oral defense of an original thesis acceptable to the department

**PhD Program**—Candidates for the PhD in mathematics must:

- Complete with a grade of B or better a course of study approved by the department (students may transfer credits from another university only with the approval of both the department and the University Graduate Council)
- Perform satisfactorily on qualifying examinations (see below)
- Perform satisfactorily on examinations in one approved foreign language (French, German, or Russian)
- Write an original thesis acceptable to the department
- Perform satisfactorily on a final oral examination on the thesis

**Qualifying Examinations**—The qualifying examinations in mathematics consist of the general examinations and the advanced oral examination.

To complete the **general examinations**, students must take exams, one each in algebra, analysis, and topology. Exams are offered every August, January, and May. First-year students may take any combination of exams at any time. After two semesters of study, students must attempt to pass all remaining exams at each offering. Students must perform satisfactorily on all three by the January exams at the beginning of their fourth semester. The judgment of satisfactory performance on the general examinations for either the MA or PhD degree is the responsibility of the department graduate committee. Students may take an exam several times.

To complete the **advanced oral examination**, students must select a special field (e.g., homotopy theory, several complex variables, or group theory) and submit it to the department graduate committee for approval. The committee schedules an advanced examination in the selected field, normally six to nine months after the student completes the general examinations. While students failing the advanced examination may, with the approval of the committee, retake it on the same or possibly on a different topic, they generally are not allowed to take the advanced examination more than twice.

## Degrees Offered: MSNP

Rice University introduced the professional master's degree in nanoscale physics in fall 2002. This program combines a strong component in quantum theory, which governs the behavior of systems at the nanoscale, with the study of practical nano- and mesoscale devices. The program provides the student with the knowledge required to successfully navigate the emerging field of nanotechnology. New courses cover cutting-edge areas such as quantum behavior of nanostructures, quantum nanotechnology, nanoscale imaging, and the fabrication of nanostructures. In addition, a year-long course in methods of experimental physics ensures that students obtain the advanced practical skills valuable to industry.

The nanoscale physics degree is one of five tracks in the Professional Master's Program at Rice housed in the Wiess School of Natural Sciences. These master's degrees are designed for students seeking to gain further scientific core expertise coupled with enhanced management and communication skills. These degrees instill a level of scholastic proficiency that exeeds that of the bachelor's level and creates the cross-functional aptitudes needed in modern industry. This will allow students to move more easily into management careers in consulting or research and development, design, and marketing of new science-based products.

A joint MBA/MSNP degree is offered in conjunction with the Jesse H. Jones Graduate School of Business.

Department Info | Undergraduate Requirements | Graduate Requirements | Course Listings

## Degree Requirements for the MS in Nanoscale Physics

In addition to the core science courses, students are required to complete a three to six month internship and take a set of cohort courses focusing on business and communication. At the conclusion of the internship, students must present a summary of the internship project in both oral and written form as part of the Professional Master's Seminar.

Part-time students who already work in their area of study may fulfill the internship requirement by working on an approved project with their current employer. Certain course requirements may be waived based upon prior graduate coursework or industrial experience. For general university requirements for graduate study, see Academic Regulations.

### Admission

Admission to graduate study in nanoscale physics is open to qualified students holding a bachelor's degree in physics, electrical engineering, or a related field that includes intermediate level work in mathematics, electrodynamics, and quantum physics. Department faculty evaluate the previous academic record and credentials of each applicant individually.

**Science Core Courses for Nanoscale Sciences: (12 hrs)**

- PHYS 533 *Nanostructures and Nanotechnology I*
- PHYS 534 *Nanostructures and Nanotechnology II*
- PHYS 537 *Methods of Experimental Physics I*
- PHYS 538 *Methods of Experimental Physics II*

**Required Cohort Courses: (9 hrs)**

- NSCI 610 *Management in Science and Engineering*
- NSCI 501 *Professional Master's Seminar* (required for **two** semesters)
- NSCI 511 *Science Policy and Ethics*
- NSCI 512 *Professional Master's Project*

**Internship**

An internship may be conducted under the guidance of a host company, government agency, or national laboratory. A summary of the internship project is required in both oral and written form as part of the Professional Master's Project.

**Electives From Focus Areas (18 hrs)**

Students will choose six elective courses, three of which must be in science or engineering 500 level or above.

**Nano-Materials**

- PHYS 416 *Computational Physics*
- PHYS 539 *Characterization and Fabrication at the Nanoscale*

- MSCI 535 *Crystallography and Diffraction plus lab*
- MSCI 580 *Microscopy Methods in Material Science*
- MSCI 614 *Special Topics: Principles of Nanoscale Mechanics*
- MSCI 650 *Nanomaterials and Nanomechanics*

**Nano-Optics and Nano-Photonics**

- ELEC 568 *Laser Spectroscopy*
- ELEC 521 *High Performance Nanoscale Systems*
- ELEC 571 *Imaging at the Nanoscale*
- ELEC 573 *Optical Spectroscopy of Nanomaterials*
- ELEC 603 *Nano-optics and Nano-photonics*
- ELEC 685 *Fundamentals of Medical Imaging*
- PHYS 569 *Ultrafast Optical Phenomena*

**Nano-Bio**

- BIOE 342/442 *Tissue Engineering*
- BIOE 498 *Biomems & Medical Microdevices*
- CHEM 547 *Supramolecular Chemistry*
- CHEM 600 *Biological Chemistry or Nanoscale Chemistry*
- ELEC 571 *Imaging at the Nanoscale*
- ELEC 568 *Laser Spectroscopy*
- HI 5324 *Nanomedicine in Healthcare*
- PHYS 539 *Characterization and Fabrication at the Nanoscale*

**Other Electives (min 3 hrs)**

- CEVE 322 *Engineering Economics and Management*
- MGMT 609 *Energy Constrained World*
- MGMT 661 *International Business Law*
- MGMT 669 *Business Strategy in Energy Industry*
- MGMT 674 *Production and Operations Management*
- MGMT 676 *Project Management / Project Finance*
- MGMT 721 *General Business Law*

Note: Each of these electives is not offered every year, and some courses may have prerequisites or require instructor permission.

## Professional Science Master's 5th Year Degree Option for Rice Undergraduates

Rice students have an option to achieve the MS in nanoscale physics by adding an additional fifth year to the four undergraduate years of science studies. Advanced Rice students in good standing apply during their junior year, then start taking required core courses of the nanoscale physics program during their senior year. A plan of study based on their particular focus area will need to be approved by the track director and the PSM director.

## Degrees Offered: BA, BS, MST, MS, PhD

The Department of Physics and Astronomy offers undergraduate and graduate programs for a wide range of interests. The bachelor of arts degrees in physics and astronomy are suitable for students who wish to obtain a broad liberal education with a concentration in physical science. The bachelor of science degrees in physics, astrophysics, and chemical physics provide preparation for employment or further study in physics and related fields. Students in the professional nonthesis, MST program obtain training in science teaching.

Research facilities and thesis supervision are available for MS and PhD students in atomic, molecular, and optical physics; biophysics; condensed matter and surface physics; earth systems science; nuclear and particle physics; observational astronomy; solar system physics; space plasma physics; and theoretical physics and astrophysics.

Last Revised : February 19, 2012

## The Wiess School of Natural Sciences

Department Info | Undergraduate Requirements | Graduate Requirements | Course Listings

## Undergraduate Degrees

For general university requirements, see Graduation Requirements. Major requirements consist of a common core of basic physics and mathematics courses, with additional course work specific to each degree program. Students may obtain credit for some courses by advanced placement, and the department's undergraduate committee can modify requirements to meet the needs of students with special backgrounds.

## Degree Requirements for BS in Physics

***All options must complete***
PHYS 101 or 111 *Mechanics* (with lab)
PHYS 102 or 112 *Electricity and Magnetism* (with lab)
PHYS 201 *Waves and Optics*
PHYS 202 *Modern Physics*
PHYS 231 *Elementary Physics Laboratory*
PHYS 301 *Intermediate Mechanics*
PHYS 311 *Introduction to Quantum Physics I*
PHYS 425 *Statistical and Thermal Physics*
PHYS 491 and 492 *Undergraduate Research*
PHYS 493 and 494 *Undergraduate Research Seminar*
(The undergraduate research course and seminar must be taken concurrently.)
MATH 101 and 102 *Single Variable Calculus I* and *II*
MATH 211 *Ordinary Differential Equations and Linear Algebra*
MATH 212 *Multivariable Calculus*
(MATH 221 and 222 *Honors Calculus III* and *IV* may substitute for MATH 211 and 212)

***Additional courses for the BS in physics with general physics option***
PHYS 302 *Intermediate Electrodynamics*
PHYS 312 *Introduction to Quantum Physics II*
PHYS 331 and 332 *Junior Physics Laboratory I* and *II*
PHYS 411 *Introduction to Nuclear and Particle Physics*
PHYS 412 *Solid State Physics*
MATH 381 *Introduction to Partial Differential Equations* and MATH 382 *Complex Analysis*
or CAAM 335 *Matrix Analysis* and CAAM 336 *Differential Equations in Science and Engineering*
CHEM 121 and 122 *General Chemistry I and II* (with lab) or CHEM 151 and 152 *Honors Chemistry I and II* (with lab)

***Additional courses for the BS in physics with applied physics option***
PHYS 302 *Intermediate Electrodynamics* or ELEC 306 *Electromagnetic Fields and Devices*
PHYS 312 *Introduction to Quantum Physics II* or ELEC 361 *Quantum Mechanics for Engineers*
Two of: PHYS 331 *Junior Physics Lab I*, PHYS 332 *Junior Physics Lab II*, ELEC 364 *Photonics Measurements*
PHYS 412 *Solid State Physics* or approved substitute in applied physics
ELEC 242 *Fundamentals of Electrical Engineering II* or ELEC 243 *Electronic Measurement Systems*
ELEC 305 *Introduction to Physical Electronics*
MATH 381 *Introduction to Partial Differential Equations* or CAAM 336 *Differential Equations in Science and Engineering*
CHEM 121 and 122 *General Chemistry I and II* (with lab) or CHEM 151 and 152 *Honors Chemistry I and II* (with lab)

***Additional courses for the BS in physics with biological physics option***
PHYS 302 *Intermediate Electrodynamics*
PHYS 312 *Introduction to Quantum Physics II*
PHYS 355 *Introduction to Biological Physics*
BIOC 201 *Introductory Biology*
BIOC 211 *Intermediate Experimental Biosciences*
BIOC 301 *Biochemistry I* or BIOC 341 *Cell Biology*
CHEM 121 and 122 *General Chemistry I and II* (with lab) or CHEM 151 and 152 *Honors Chemistry I and II* (with lab)
CHEM 211 *Organic Chemistry*
MATH 381 *Introduction to Partial Differential Equations* or CAAM 336 *Differential Equations in Science and Engineering*

***Additional courses for the BS in physics with computational physics option***
PHYS 302 *Intermediate Electrodynamics*
PHYS 312 *Introduction to Quantum Physics II*
PHYS 416 *Computational Physics*
CAAM 335 *Matrix Analysis* and CAAM 336 *Differential Equations in Science and Engineering*
CAAM 210 *Introduction to Engineering Computation*
CAAM 453 *Numerical Analysis I*
CAAM 420 *Computational Science I*
One of: CAAM 435 *Dynamical Systems* OR CAAM 452 *Numerical Methods for Partial Differential Equation*s OR CAAM 454 *Numerical Analysis I* OR CAAM 520 *Computational Science II*
CHEM 121 *General Chemistry I* (with lab) or CHEM 151 *Honors Chemistry I* (with lab)

## Degree requirements for BS in Astrophysics

PHYS 101 or 111 *Mechanics* (with lab)
PHYS 102 or 112 *Electricity and Magnetism* (with lab)
PHYS 201 *Waves and Optics*
PHYS 202 *Modern Physics*
PHYS 231 *Elementary Physics Laboratory II*
PHYS 301 *Intermediate Mechanics*
PHYS 302 *Intermediate Electrodynamics*
PHYS 311 *Introduction to Quantum Physics I*
PHYS 425 *Statistical and Thermal Physics*
PHYS 491 and PHYS 492 *Undergraduate Research*
PHYS 493 and PHYS 494 *Undergraduate Research Seminar*
(The undergraduate research course and seminar must be taken concurrently.)
ASTR 230 *Astronomy Lab*
ASTR 350 and ASTR 360 *Introduction to Astrophysics*
Two credits of ASTR 400 *Undergraduate Research Seminar*
Three courses from: ASTR 450 *Experimental Space Science*, ASTR 451 *Astrophysics I - Sun and Stars*, ASTR 452 *Astrophysics II - Galaxies and Cosmology*, ASTR 470 *Solar System Physics*, PHYS 312 *Introduction to Quantum Physics II*, PHYS 480 *Introduction to Plasma Physics*
MATH 101 and 102 *Single Variable Calculus I* and *II*
MATH 211 *Ordinary Differential Equations and Linear Algebra*
MATH 212 *Multivariable Calculus*
(MATH 221 and 222 *Honors Calculus III* and *IV* may substitute for MATH 211 and MATH 212)
CAAM 336 *Differential Equations in Science and Engineering*
NSCI 230 *Computation in Science and Engineering* or CAAM 210 *Introduction to Engineering Computation*
CHEM 121 *General Chemistry I*

## Degree requirements for BA in Physics

PHYS 101 or 111 *Mechanics* (with lab)
PHYS 102 or 112 *Electricity and Magnetism* (with lab)
PHYS 201 *Waves and Optics*
PHYS 202 *Modern Physics*
PHYS 231 *Elementary Physics Laboratory*
PHYS 301 *Intermediate Mechanics*
PHYS 302 *Intermediate Electrodynamics*
PHYS 311 *Introduction to Quantum Physics I*
PHYS 331 *Junior Physics Laboratory I*
PHYS 425 *Statistical and Thermal Physics*
One additional PHYS or ASTR course (3 credit hours) at 400 level

MATH 101 and 102 *Single Variable Calculus I* and *II*
MATH 211 *Ordinary Differential Equations and Linear Algebra*
MATH 212 *Multivariable Calculus*
(MATH 221 and 222 Honors Calculus III and IV may substitute for MATH 211 and 212)
NSCI 230 *Computation in Science and Engineering* or CAAM 210 *Introduction to Engineering Computation*
or one MATH or CAAM course at or above 300 level

## Degree requirements for BA in Astronomy

PHYS 101 or 111 *Mechanics* (with lab)
PHYS 102 or 112 *Electricity and Magnetism* (with lab)
PHYS 201 *Waves and Optics*
PHYS 202 *Modern Physics*
PHYS 231 *Elementary Physics Laboratory*
PHYS 301 *Intermediate Mechanics*
PHYS 302 *Intermediate Electrodynamics*
PHYS 425 *Statistical and Thermal Physics* or CHEM 310 *Physical Chemistry I*
ASTR 230 *Astronomy Lab*
ASTR 350 and ASTR 360 *Introduction to Astrophysics*
Two credits of ASTR 400 *Undergraduate Research Seminar*
One of: ASTR 450 *Experimental Space Science,* ASTR 451 *Astrophysics I - Sun and Stars,*
ASTR 452 *Astrophysics II - Galaxies and Cosmology,* ASTR 470 *Solar System Physics*,
PHYS 480 *Introduction to Plasma Physics*
MATH 101 and 102 *Single Variable Calculus I* and *II*
MATH 211 *Ordinary Differential Equations and Linear Algebra*
MATH 212 *Multivariable Calculus*
(MATH 221 and 222 *Honors Calculus III* and *IV* may substitute for MATH 211 and MATH 212)
One of: PHYS 331 *Junior Physics Laboratory I,* NSCI 230 *Computation in Science and Engineering*,
CAAM 210 *Introduction to Engineering Computation*

## Degree requirements for BS in Chemical Physics

This degree is jointly managed by the Department of Chemistry and the Department of Physics and Astronomy. For more information, see Chemical Physics.

Last Revised : August 11, 2014

Department Info | Undergraduate Requirements | Graduate Requirements | Course Listings

### Advanced Degrees

For general university requirements, see Graduate Degrees. More detailed information on courses and requirements is available from the Department of Physics and Astronomy.

The master of science teaching requires 30 credit hours of approved course work.

The master of science is a research degree, normally undertaken as the first stage of doctoral study. The MS requires at least 30 credit hours of approved graduate-level studies, including a research project performed under the direction of a departmental faculty member. The student must defend the results of the project in a public oral examination and submit an original thesis to the Office of Graduate and Postdoctoral studies.

The nonthesis master of science is a research degree, normally undertaken as the first stage of doctoral study. The MS requires at least 30 credit hours of approved graduate-level studies, including a research project performed under the direction of a departmental faculty member. The student must defend the results of the project in a public oral examination and submit an article, with the student as principal author, to a peer-reviewed journal.

To be eligible for the PhD degree, graduate students must demonstrate to the department their ability to engage in advanced research. This normally is accomplished by successfully completing the work for the MS. Students also must complete 60 credit hours of approved graduate-level study at Rice and produce a research thesis under the direction of a departmental faculty member. At least two years of graduate study are required for the PhD.

## Degrees offered: MSSpS

Rice University is offering this new degree for the first time in 2012. This degree is one of five tracks in the professional master's program at Rice housed in the Wiess School of Natural Sciences and focuses on training students in Space Engineering and Science with the intent of creating new options for engineering and science students interested in working in the space technology industry or related government entities, e.g. NASA, as well as governmental relations positions in non-profit organizations, industry and academic institutions.

The Space Studies track is a collaboration between the Wiess School of Natural Sciences and the George R. Brown School of Engineering, and is geared to help individuals increase their knowledge of space engineering and related science, program management, and policy. The program includes advanced engineering, biological and physical science classes and introduces students to economics, public policy, and management disciplines, which impact space commercialization and national policy. It focuses on training engineers and scientists interested in program management, providing them with the tools to face the complex challenges inherent in US space policy, human and robotic space exploration, and science in space exploration and technology development.

These master's degrees are designed for students seeking to gain further technical core expertise coupled with enhanced management and communication skills instilling a level of scholastic proficiency that exceeds that of the bachelor's level, and creating the cross-functional aptitudes needed in modern industry and government.

In addition, a joint MBA/MSSpS degree is offered in conjunction with the Jesse H. Jones Graduate School of Business.

# Space Studies

## The Wiess School of Natural Sciences

Department Info | Undergraduate Requirements | Graduate Requirements | Course Listings

## Degree Requirements for MS in Space Studies

In addition to the core science courses, students are required to complete a three to six month internship and take a set of cohort courses focusing on business and communications. At the conclusion of their internship, students must present a summary of their internship project in both oral and written form as part of the professional master's seminar.

Part-time students who already work in their area of study may fulfill the internship requirements by working on an approved project with their current employer. For general university requirements, see the Professional Degrees section of Graduate Degrees.

### Admission

Admission to graduate study in Space Studies is open to qualified students holding a bachelor's degree in a related science or engineering program that included course work in general physics, chemistry, calculus, linear algebra, and differential equations. Scores from the general Graduate Record Examination (GRE), good critical thinking and communication skills and strong quantitative abilities. Statistics, introductory economics and computer skills preferred. Department faculty evaluate the previous academic record and credentials of each applicant individually and make admission decisions.

**Required Cohort Requirements:**

| | |
|---|---|
| NSCI 511 | Science Policy and Ethics |
| NSCI 610 | Management for Science and Engineering |
| NSCI 501 | Master Seminar (required for 1 semester) |
| NSCI 502 | Space Studies Seminar Course |
| NSCI 512 | Internship Project |

**Five Core courses:**

| | |
|---|---|
| ASTR 470 | Solar System Physics |
| STAT 410 | Intro to Regression and Statistical Computing |
| MECH 572 | Aerospace Systems Engineering |

**With the remaining two courses chosen from the list below:**

| | |
|---|---|
| ASTR 554 | Astrophysics of the Sun |
| ASTR 451 | Astrophysics I: Sun and Stars |
| BIOC 415 | Experimental Physiology |
| BIO 540 | Metabolic Engineering |
| ESCI 414 | Physics and Chemistry for the Atmosphere |
| ESCI 460 | Geological and Geophysical Fluid Dynamics |
| MECH 454 | Computational Fluid Mechanics |

**Two Statistics/Computation Courses from the list below:**

| | |
|---|---|
| CAAM 453 | Numerical Analysis I |
| CEVE 528 | Engineering Economics |
| ESCI 450 | Remote Sensing (not available every year) |
| MECH 454 | Computational Fluid Mechanics |
| PHYS 416 | Computational Physics |
| STAT 310 | Probability and Statistics |
| STAT 405 | Statistical Computing and Graphics |
| STAT 502/541/640 | Neural Networks and Information Theory, Multivariate Analysis, Data Mining and Statistical Learning - *available with pre-requisites for specific focus areas* |

**Three to four electives according to student's individual interests and career goals**:

**Focus: Engineering**

| | |
|---|---|
| CEVE 504 | Atmospheric Particular Matter |
| CEVE 505 | Eng. Project Development& Management |
| CEVE 511 | Atmospheric Processes |
| CEVE 576 | Structural Dynamics and Control |
| COMP/ELEC/MECH 498 | Intro to Robotics |
| COMP 551 | Advanced Mobile Robotics/Lab |
| MECH 474 | Advanced Computational Mechanics |
| MECH 583 | Convective Heat Transfer |
| MECH 591 | Gas Dynamics (S) |
| MECH 599 | Human Factors in Space (S) |
| MECH 599/Sect 2 | Spacecraft Navigation (S) |
| MECH 599/Sect 3 | Design for Aerospace Environments |
| MECH 691 | Hypersonic Aerodynamics (F) |
| MECH 454 | Computational Fluid Mechanics |

**Focus: Sciences (Astro Science/Earth Science/Life Sciences)**

| | |
|---|---|
| ASTR 542 | Nebular Astrophysics |
| ASTR 551 | Astrophysics I: Sun and Stars |
| ASTR 552 | Astrophysics II Galaxy and Cosmology |
| ASTR 554 | Astrophysics of the Sun |
| ASTR 555 | Protostars and Planets |
| ASTR 565 | Compact Objects |
| ASTR 700 | Independent Study Course |

**NOTE:** *Focus areas in earth science, physics and life sciences can be chosen, depending on student's background. Students will consult with academic advisor about appropriate selection of their elective science courses.*

**Focus: Management**

| | |
|---|---|
| MGMT 734 | Technology Entrepreneurship |
| MGMT 629 | Business Plan Development |
| MGMT 601 | Financial Statement Analysis |
| MGMT 618 | Complexities of People and Organizations |
| MGMT 658 | Applied Risk Management |
| MGMT 619 | Corporate Governance |
| MGMT 719 | Thinking Strategically |

**NOTE:** *Courses vary. Some listed courses may not be offered every year, and others may be offered that satisfy the requirements with pre-approval. Students should consult with their academic advisors before enrolling.*

**Three to six month internship**: Practical experience may be conducted under the guidance of a host company, government agency, or national laboratory. A summary of the internship project is required in both oral and written form as part of the Professional Master's Project.

**Professional Science Master's 5th Year Degree Option for Rice Undergraduates**

Rice students have an option to achieve the MS in space studies by adding an additional fifth year to the four undergraduate years of science studies. Advanced Rice students in good standing apply during their junior year,

then start taking required core courses of the space studies program during their senior year. A plan of study based on their particular focus area will need to be approved by the track director and the PSM director.

## Degrees Offered: MSSG

Rice University introduced the professional master's degree in subsurface geoscience in fall 2003. This degree is designed for students who wish to become proficient in applying geological knowledge and geophysical methods to finding and developing reserves of oil and natural gas. Students can specialize in two focus areas: geology and geophysics. The geology focus area prepares students to be explorationists, with strong skills in using seismic and other geophysical methods along with geological principles to find oil and natural gas. The geophysics focus area prepares students to become technical experts in aspects of exploration seismology.

The subsurface geoscience degree is one of five tracks in the Professional Master's Program at Rice housed in the Wiess School of Natural Sciences. These master's degrees are designed for students seeking to gain further scientific core expertise coupled with enhanced management and communication skills. These degrees instill a level of scholastic proficiency that exceeds that of the bachelor's level, and they create the cross-functional aptitudes needed in modern industry. This program will allow students to move more easily into management careers in consulting or research and development, design, and/or marketing within oil-and gas-related industries.

A joint MBA/MSSG degree is offered in conjunction with the Jesse H. Jones Graduate School of Business.

# Subsurface Geoscience

## The Wiess School of Natural Sciences

Department Info | Undergraduate Requirements | Graduate Requirements | Course Listings

## Degree Requirements for MS in Subsurface Geoscience

In addition to core science courses, students are required to complete a three to six month internship and take a set of cohort courses focusing on business and communication. Students select one of two focus areas: geology and geophysics. Instead of a thesis, students must present their internship project in both oral and written form in the Professional Master's Seminar.

Part-time students who already work in their area of study may fulfill the internship requirement by working on an approved project with their current employer.

## Admission

Admission to graduate study in subsurface geoscience is open to qualified students holding a bachelor's degree in a related science that includes coursework in geoscience, general chemistry, physics, calculus, and differential equations.

Department faculty evaluate the previous academic record and credentials of each applicant individually.

***Required Professional Courses (9 credits):***
NSCI 610 *Management in Science and Engineering*
NSCI 501 *Professional Master's Seminar* [required for two semesters]
NSCI 511 *Science Policy and Ethics*
NSCI 512 *Professional Master's Project*

**There are two focus areas in the Subsurface Geoscience track: Geology and Geophysics.**

## Geology Focus Area:

**Required Courses (22 credits):**
ESCI 415 *Petroleum Geology*
ESCI 417 *Petroleum Industry Economics and Management*
ESCI 428 *Seismic Reflection Data Interpretation*
ESCI 442 *Exploration Geophysics*
ESCI 334 *Geological Field Methods*
ESCI 427 *Sequence Stratigraphy*
ESCI 436 *Well Logging and Petrophysics*

**Students will choose three electives (9 credits):**
***Suggested Electives:***
ESCI 544 *Hydrocarbon Exploration (AAPG Imperial Barrel competition)*
ESCI 420 *Modern Exploration Technology*
ESCI 504 *Siliciclastic Depositional Systems*
ESCI 506 *Carbonate Depositional Systems*
ESCI 444 *Seismic Data Processing*
ESCI 463 *Advanced Structural Geology I*

Not every course is offered every year. Some courses may require pre-requisites or instructor permission. Substitutions for required or elective courses may be approved by the Track Advisor.

## Geophysics Focus Area:

***Required Courses (22 credits):***
ESCI 415 *Petroleum Geology*
ESCI 417 *Petroleum Industry Economics and Management*
ESCI 428 *Seismic Reflection Data Interpretation*
ESCI 442 *Exploration Geophysics*
ESCI 444 *Seismic Data Processing*
ESCI 440 *Geophysical Data Analysis: Digital Signal Processing* or ESCI 441 *Geophysical Data Analysis: Inverse Methods*
ESCI 420 *Modern Exploration Technology*

**Students will choose three electives (9 credits):**
***Suggested Electives:***
ESCI 334 *Geological Field Methods (S)*
ESCI 427 *Sequence Stratigraphy (S)*
ESCI 445 *Joint Inversion of Exploration Geophysical Data*
ESCI 463 *Advanced Structural Geology I* (S)
ESCI 436 *Well Logging and Petrophysics (S)*
ESCI 445 Joint Inversion of Exploration Geophysical Data (F)
*ESCI 544 Hydrocarbon Exploration (AAPG Imperial Barrel competition) (S)*

**Additional Electives for both focus areas:**
COMP 429 Introduction to Computer Networks (S)
ESCI 454 Geographic Information Science (F)
STAT 310 Probability and Statistics (F, S)
STAT 410 Introduction to Statistical Computing and Computer Models (F)
CAAM 378 Introduction to Operational Research (F)
CEVE 322 Engineering Economics for Engineers (F)
ECON 438 Business, Law and Economics (S)
MGMT 610 Fundamentals of the Energy Industry (F)
MGMT 661 International Business Law (S)
MGMT 674 Production and Operations Management (F)
MGMT 676 Social Enterprise (S)
POST 401 Energy Policy

And others

Substitutions for required or elective courses may be approved by the Track Advisor.

## Internship

A three to six month internship under the guidance of a host company, government agency or national laboratory is required. At the conclusion of this internship, students must present their internship project in both oral and written form as part of the Professional Master's Project.

## Professional Science Master's Fifth Year Degree Option for Rice Undergraduates

Rice students have an option to achieve the MS in subsurface geoscience by adding an additional fifth year to the four undergraduate years of science studies. Advanced Rice students in good standing apply during their junior year, then start taking required core courses of the subsurface geoscience program during their senior year. A plan of study based on their particular focus area will need to be approved by the track director and the PSM director.

**Commander and Professor**
Lt. Colonel Lynn Bentley III

**Associate Professors**
Major Albert Meza
Major Shawn Owens

## Degree Offered: None

The Air Force Reserve Officer Training Corps (ROTC) program prepares men and women of character, commitment, and courage to assume leadership positions as commissioned officers in the active duty United States Air Force. On completion of the curriculum, students will have a thorough understanding of the core values, leadership, teamwork, and other requirements to be an effective officer in the world's greatest Air Force. For more information on the Air Force Science program, contact the Air Force Science Department at the University of Houston by calling 713-743-4932 or on-line at www.uh.edu/class/airforce.

All courses and physical training sessions take place at the University of Houston. Flight orientation occurs at airports in the Houston metro area.

Last Revised : August 11, 2014

 

# Air Force Science

Department Info | Undergraduate Requirements | Graduate Requirements | Course Listings

## Course Credit

ROTC classes may be taken for elective credit toward any degree plan at the University of Houston. All academic courses are open to all students. ROTC scholarship students incur a military obligation.

## Four-Year Program

The General Military Course (GMC) is the first half of the four-year ROTC program and is taken during the freshman and sophomore years. This program allows the student to experience Air Force ROTC without obligation (unless the student is on an Air Force ROTC scholarship).

Each semester of the GMC consists of one classroom hour of instruction as well as Leadership Laboratory each week.

During the first two years, the student will learn about the Air Force and the historical development of aerospace power.

During the summer preceding the junior year, the student will compete for the opportunity to attend a four-week Field Training Unit. Successful completion of field training is mandatory for entrance into the Professional Officer Course (POC), the junior and senior years of the four-year program.

As a junior, the student will study the core values, leadership, teamwork, and management tools required to become an effective Air Force officer.

During the senior year, students study the national security policy process and regional and cultural studies, participate in a war-game, and complete final requirements for commissioning as second lieutenants.

## Leadership Laboratory

As an Air Force ROTC cadet, each student is required to attend an additional two-hour class known as Leadership Laboratory.

Although not part of the academic class requirement, it is an essential element of officer training. Leadership Laboratory is an intensive military training program in which students gain invaluable leadership and managerial experience while learning about the Air Force way of life. Students have numerous opportunities to hear guest speakers and panel discussions, participate in field trips, and experience practical leadership exercises.

## AFROTC Scholarship Opportunities

Air Force ROTC offers various scholarship opportunities for students at the University of Houston:

**In-College Scholarship Program (ICSP)** is a highly competitive scholarship program aimed primarily at college freshmen and sophomores in any major (students with a bachelor's degree can compete to earn a master's degree). The ICSP awards cover tuition capped at either $18,000 per year plus $900 per year for books or $9,000 per year plus $900 per year for books.

**The Express Scholarship Program** is operated on a fully qualified basis: those who meet the qualifications are awarded the scholarship. Though the list of eligible college majors differs from year to year, the express scholarship

covers full tuition per year and $900 for books. Currently, majors that qualify include: Electrical and Computer Engineering, and Strategic foreign languages. For the most up-to-date information, visit www.AFROTC.com.

## Stipend

All AFROTC scholarship recipients and POC cadets receive a nontaxable monthly stipend. The annual stipend amount ranges from $2,000 per year to $4,000 per year depending on the recipient's enrollment year.

For additional information on AFROTC scholarship opportunities, please visit the AFROTC website at www.afrotc.com or call 1-800-4AFROTC.

## Field Training (FT)

Cadets completing the General Military Course attend four weeks of field training (FT) during the summer at Maxwell AFB, Alabama. Those who have not completed the GMC attend an extended FT Unit. This rigorous program of leadership training, physical conditioning and academics assesses the cadet's potential to be an Air Force officer.

Cadets also receive survival and firearms training and career information. Cadets receive travel pay and daily pay for FT.

## Flight Orientation Program

All cadets can volunteer to participate in a joint Air Force ROTC/Civil Air Patrol flight orientation program. This consists of eight flights, four in the front seat of a small passenger aircraft and four additional flights in the back seat as an observer. A soaring program also is available in which cadets get four sorties in gliders. In addition, an abbreviated flying ground school course is taught in the ROTC classrooms using FAA textbooks. The flight program and ground school course are both free for all cadets.

## Physical Fitness Training

Cadets meet twice per week at the University of Houston Alumni Center to perform physical fitness training. The training is mandatory and emphasizes push-ups, sit-ups, and running in order to pass the USAF physical fitness test.

## Professional Development Training (PDT)

Cadets are eligible to compete to attend PDT during the summer months.
PDT consists of several programs, including:

- Tours of nearby active duty Air Force bases
- Soaring and free-fall parachuting at the United States Air Force Academy
- (USAFA)
- Cultural and Foreign Language Immersion
- Hands-on research at Air Force laboratories
- Shadowing a Air Force officer in Operation Air Force
- Internships at NASA and other government organizations

Cadets receive travel pay and daily pay for the majority of these programs.

For more information contact the Unit Admissions Officer at 713-743-4932/3704 or visit the University of Houston Air Force website at www.uh.edu/class/airforce.

## Summary

During this time of war, our mission of producing Air Force second lieutenants of character, commitment, and courage is more important than ever.

**See AFSC in the Courses of Instruction section (these are University of Houston listings).**

## Participating Faculty

This program includes faculty from physics and astronomy, chemistry, materials science and nanoengineering, electrical and computer engineering, bioengineering, and chemical and biomolecular engineering.

## Degrees offered: MS*, PhD

* A stand-alone MS is not available.
A joint effort of both the natural sciences and the engineering divisions at Rice and overseen by the Rice Quantum Institute (RQI), the Applied Physics Program (APP) is administered by a committee composed of members from the participating departments mentioned above. The objective is to provide an interdisciplinary graduate education in the basic science that underlies important technology. The faculty believes that the experience obtained by performing research at the intellectually stimulating interface of physical science and engineering is particularly effective in producing graduates who succeed in careers based on new and emerging technologies.

Due to the interdisciplinary nature of the program, students can access virtually any of the research facilities in either the natural sciences or engineering schools of Rice University. The Applied Physics Curriculum and Admissions Committee (APCAC) urges prospective students to contact individual departments or RQI for detailed descriptions of research facilities and ongoing research projects. Within RQI alone, there are more than 100 separate projects, and there are numerous other research opportunities.

## Degree Requirements for MS and PhD in Applied Physics

The Applied Physics Program (APP) offers a PhD degree. The program does not offer a stand-alone thesis Master of Science degree, although students admitted to the program are required to earn the MS within the program before proceeding to the PhD. For each degree, the student must fulfill the university requirements set forth in the General Announcements under which he/she entered. The semester hour requirements may be fulfilled both by classroom hours and research hours. A total of nine one-semester graduate level courses is required for the master's degree in applied physics, ordinarily a requirement for advancement to candidacy in the PhD program. Four of these are core courses required of all students, and five are elective courses chosen according to individual research goals. The Applied Physics Curriculum and Admissions Committee (APCAC) may waive some course requirements for students who demonstrate a thorough knowledge of material in one or more core/elective course(s). Full requirements are available on line at rqi.rice.edu/academics/graduate/graduate.php.

By the end of the third year in the program, all APP students should have completed the university requirements for a master's degree, fulfilled the course requirements of the APP, and defended a master's thesis in a public oral examination by a committee approved by the APCAC. The examination covers the work reported in the thesis as well as the entire field in which the student intends to work toward the PhD. The examining committee votes separately on awarding the master's degree and on admission to candidacy for the PhD. The student also must fulfill the teaching requirements set by the host department to achieve candidacy. Fulfillment of all university degree requirements and successful defense of a PhD thesis in a public examination by an APCAC-approved committee is necessary for the PhD.

**Core courses**
*Quantum Mechanics I* (PHYS 521 or CHEM 530)
*Quantum Mechanics II or Statistical Mechanics* (PHYS 522 or PHYS 526 or CHEM 531 or CHEM 420*)
*Classical Electrodynamics* (PHYS 532)
*Introduction to Solid State Physics* (PHYS 563/ELEC 563)

It is assumed that the student has an adequate background in classical mechanics, electrostatics, and statistical and thermal physics. This background is determined from interviews or exams given to entering students by the APCAC or the host department.

* As of Spring 2014, CHEM 520 changed to CHEM 420

**Elective courses (five required)**

A full list of elective courses can be found on the Applied Physics website at http://rqi.rice.edu/curriculum/.

No courses may be used for both core and elective courses. Due to overlap of curricula, only one from each of the pairs PHYS 521/CHEM 530, PHYS 522/CHEM 531, and PHYS 526/CHEM 420 may be used for the nine required courses.

**Specialization Curricula**

Some examples of specialization tracks that one may choose are listed below. The lists are only suggested lists and are by no means a full list of possible courses for the specialization area.

Applied Biological and Soft Matter Physics

Suggested elective courses:

- BIOE 584 *Lasers in Medicine and Bioengineering*
- BIOE 589 *Computational Molecular Biophysics*
- BIOE/PHYS 610 *Methods of Molecular Simulation*
- BIOE 684 *Advanced Biophotonics*
- BIOE 551 *Molecular Biophysics*
- BIOE 552 *Molecular Biophysics II*
- CHBE 560 *Colloidal and Interfacial Phenomena*
- MSCI 555 *Materials in Nature and Biometic Strategies*
- MSCI/CHBE/CHEM 597 *Polymer Synthesis, Soft Materials & Nanocomposites*
- PHYS 551 *Biological Particles*
- PHYS 552 *Molecular Biophysics*

Applied Mathematical and Computational Physics

Suggested elective courses:

- BIOE/PHYS 610 *Methods of Molecular Stimulation*
- CAAM 415 *Theoretical Neuroscience I:Biophyiscal Modeling of Cells and Circuits*
- CAAM 436 *Partial Differential Equations of Mathematics Physics*
- CHBE 615 *Applications of Molecular Simulations and Statistical Mechanics*
- CHEM 531 *Advanced Quantum Chemistry*
- ELEC 481 *Computational Neuroscience and Neural Engineering*
- MECH 520 *Nonlinear Finite Element Analysis*
- MSCI 533 *Computational Materials Modeling*
- PHYS 516 *Mathematical Models*
- PHYS 517 *Computational Methods*
- PHYS/ELEC 605 *Computational Electrodynamics and Nanophotonics*

Applied Materials Physics

Suggested elective courses:

- CHBE 630 Chemical Engineering of Nanostructured Materials
- ELEC 462 Optoelectronic Devices
- ELEC 573 Optical Spectroscopy of Nanomaterials
- MSCI 523 Properties, Synthesis, and Design of Composite Materials
- MSCI 535 Crystallography and Diffraction
- MSCI 623 Analytical Spectroscopies: Tools in Materials Science
- MSCI 634 Thermodynamics of Alloys
- MSCI 650 Nanomaterials and Nanomechanics
- PHYS 663 Condensed Matter Theory: Applications
- PHYS 539 Characterization and Fabrication at the Nanoscale
- PHYS 567 Quantum Materials

Applied Chemical Physics

Suggested elective courses:

- BIOE/PHYS 610 *Methods of Molecular Simulation*
- CHEM 495 *Transition Metal Chemistry*
- CHEM 531 *Quantum Mechanics II/Quantum Chemistry*
- CHEM 533 *Nanostructure & Nanotechnology*
- CHEM 547 *Supramolecular Chemistry*
- CHEM 630 *Molecular Spectroscopy and Group Theory*
- CHBE 560 *Colloidal and Interfacial Phenomena*
- CHBE 590 *Kinetics, Catalysis and Reaction Engineering*
- CHBE 615 *Applications of Molecular Simulations and Statistical Mechanics*
- CHBE 630 *Chemical Engineering of Nanostructured Materials*
- PHYS 539 *Characterization and Fabrication at the Nanoscale*

Applied Optics & Photonics

Suggested elective courses:

- BIOE 587 *Optical Imaging and Nanobiophotonics*
- BIOE 684 *Advanced Biophotonics*
- ELEC 462 *Optoelectronic Devices*
- ELEC 463 *Lasers and Photonics*
- ELEC 560 *Integrated and Fiber Optics*
- ELEC 568 *Laser Spectroscopy*
- ELEC/PHYS 569 *Ultrafast Optical Phenomena*
- ELEC 571 *Imaging at the Nanoscale*
- ELEC 573 *Optical Spectroscopy of Nanomaterials*
- ELEC 603 *Topics in Micro-and Nano-Photononics*
- PHYS 571 *Modern Atomic Physics and Quantum Optics*

# Civic Leadership

## The Center for Civic Leadership

Department Info | Undergraduate Requirements | Graduate Requirements | Course Listings

**Executive Director**
Caroline Quenemoen

**Faculty Director**
Bob Stein

**Undergraduate Advisor**
Jesse Hendrix

## Degrees Offered: Undergraduate Certificate

In support of Rice's mission of providing a distinctive undergraduate experience, the Center for Civic Leadership (CCL) helps undergraduate students develop the knowledge, skills, and values to address the problems of the 21st century and to lead in a variety of community environments. The focus on civic leadership reflects not only Rice's mission but a broader trend that recognizes the civic purpose of 21st century institutions of higher education to cultivate social responsibility and active citizenship. The CCL's approach to leadership education stresses the development of knowledge to understand the complex challenges facing today's society, skills to motivate and collaborate with diverse stakeholders to take informed action, and values to effect positive change.

All students begin the program by completing a CCL Immersion Program, which introduces them to problems facing the city of Houston (through lectures, community tours, and short-term service) and develops skills in reflective practice critical to leadership development.

Additionally, students will complete one 3-credit elective in social issues and one 3-credit elective in leadership chosen from a list of courses covering relevant topics. Timely, personalized advising will play an important role in the selection of the electives in order to ensure that students follow an academically coherent path to the certificate. The purpose of this element of the certificate pathway is to provide foundational knowledge directly pertinent to a student's capstone project.

Subsequently, students will apply to participate in a CCL Action Program that allows them to work in collaboration with a community partner to address a problem or need. To be selected to one of these programs, students must demonstrate relevant academic preparation.

Upon completion of the above listed requirements, students with a minimum overall GPA of 3.3 may apply in the spring of their sophomore or junior year for admittance to the Certificate in Civic Leadership.

In the fall semester, all admitted certificate students take a course in which they prepare for their capstone projects by researching the community need or problem, designing a sustainable response, developing a project proposal, and reflecting on leadership challenges and solutions. Students subsequently carry out their projects independently in the spring semester under the direction of their faculty advisor and the capstone instructor (UNIV 401). Students will complete a substantial civic leadership project under the guidance of one faculty and one CCL advisor and in partnership with a community organization or office. To register for UNIV 401, students must have successfully completed UNIV 400 and received approval for their CCL capstone project proposal from their advisors, their community partner, and the UNIV 400 course instructor. UNIV 401 students must present their project results to the community partner through a formal presentation and written report before the conclusion of the course. Additionally, students are encouraged to present at a formal venue, such as a conference or symposium, within one year of course completion.

To be considered for receipt of the certificate requires submission of a portfolio that includes the capstone project or description of its outcomes, a reflection essay on civic leadership, and a public presentation to the campus and community. Upon recommendation of the capstone instructor and faculty advisor, the certificate will be awarded by vote of the faculty advisory board and recognized on the student's official transcript.

## Requirements for Certificate in Civic Leadership

(12 credit hours and 2 Experiential Learning Programs)

## Required Electives

(6 credit hours)
Select approved CCL elective coursework with an advisor
3 credit hours Elective: Social Issues*
3 credit hours Elective: Leadership*

## Non-course Requirements: CCL Experiential Learning Programs

Center for Civic Leadership Immersion Program*
Center for Civic Leadership Action Program**
*Select an Action Program from the following:*
Alternative Spring Break Site Leader
Group International Service Project Site Leader
Houston Action Research Team (HART)
Janus Award
Leadership Rice Summer Mentorship Experience (SME)
Loewenstern Fellowship
Urban Immersion Coordinator
Wagoner Foreign Study Scholars

## Admission

Upon completion of the above listed requirements, students with a minimum overall GPA of 3.3 or higher may apply in the spring of their sophomore or junior year for admittance to the Certificate in Civic Leadership.

To apply students must submit the following:
• a transcript demonstrating successful completion of required electives and eligible minimum GPA of 3.3
• an abstract of their project proposal for the capstone course (UNIV 400), which is designed to yield high level, independent, community-based projects, and the signature of the faculty member who agrees to serve as the advisor
• a paragraph explaining the relevance of their elective courses and CCL Action Program to the proposed capstone project

Only students who propose a feasible project and demonstrate a coherent path of preparation will be admitted to the CCL Certificate Program.

## Capstone

(6 credit hours)
3 credit hours Civic Leadership Capstone UNIV 400***
3 credit hours Civic Leadership Capstone UNIV 401***

** To be completed Years 1-2*

# College Courses

One of the colleges' important activities is their sponsorship of courses and workshops open to all students. By expanding course offerings outside the traditional departments, College Courses promote the academic involvement of the colleges while introducing students to interdisciplinary topics of particular interest.

Students who wish to teach a student-taught course must first take COLL 300, a course on pedagogy that is taught by faculty masters in consultation with the Center for Teaching Excellence. As a part of their participation in COLL 300, students then propose College Courses during the semester before they are offered. Once approved by the dean of undergraduates, these 1-credit student-taught College Courses are offered for academic credit on the same basis as departmental courses. More information about student-taught courses can be found here.

No more than three hours of credit for student-taught College Courses (COLL) may be counted toward graduation. This includes all courses COLL 100-199 as well as COLL 200 Teaching Practicum.

Department Info | Undergraduate Requirements | Graduate Requirements | Course Listings

**Director**
Katherine B. Ensor

**Steering Committee and Undergraduate Advisors**
Mahmoud El-Gamal
James R. Thompson

## Degrees Offered: None

The Departments of Statistics and Economics collaborate to offer Rice undergraduate students a minor in financial computation and modeling (FCAM). The FCAM minor consists of six courses focusing on the strategies and computational technologies used in the financial industry. The minor is designed for those students with strong computational skills and an interest in finance. Many students pursuing the FCAM minor enter careers in the financial industry, either immediately after completion of their undergraduate studies or after graduate studies. Students completing the FCAM minor will understand the complexities of financial markets and their role in and impact on world economies.

The basic tools component of the FCAM curriculum will equip students with the economic, probability and statistical tools necessary to pursue the advanced analytical courses. In the advanced courses, students will be exposed to state-of-the-art models and methodologies based on long-standing assumptions about the behavior of financial markets. They also will be exposed to alternative views of market behavior and investment strategies. The goal is to educate students to question basic assumptions as well as utilize and understand technologies based on these important assumptions. In the financial industry, a large suite of solutions are implemented and continually enhanced. A goal of the FCAM program is to train leaders in this industry who not only will understand the financial technologies but also will understand the role, impact, and potential pitfalls of these technologies.

### Course Requirements for the Interdisciplinary Minor in Financial Computation and Modeling

A minor in financial computation and modeling requires the successful completion of at least six courses (a minimum of 18 credit hours). Students must take three courses each from the two following groups:

***Basic Tools (Choose three)***
ECON 201 *Microeconomics I,* or
ECON 301 *Microeconomics II*
STAT 310/ECON 307 *Probability and Statistics*
ECON 409/STAT 400 *Econometrics,* or
STAT 410 *Introduction to Regression and Statistical Computing*

***Financial Computation and Modeling (Choose three)***
ECON 243 *Corporate Finance, or BUSI 343 Financial Management,* or
ECON 355 *Financial Markets (formerly ECON 255),* or
ECON 455 *Money and Financial Markets,* or
ECON 443 *Financial Economics*
STAT 421 *Computational Finance II*: Time Series Analysis*
STAT 449 *Quantitative Financial Risk Management*
STAT 486 *Computational Finance I*: Market Models*

* Courses do not need to be taken in any order.

Veronica Leautaud

## Degrees Offered: None

Rice 360˚: Institute for Global Health Technologies collaborates with a number of departments to offer Rice undergraduate students a minor in global health technologies (GLHT) through the Beyond Traditional Borders (BTB) initiative—a unique, multidisciplinary program to educate and train students to reach beyond traditional disciplinary and geographic boundaries to understand, address, and solve global health disparities. With complementary contributions from the humanities, social science, policy, bioscience, and engineering programs at Rice, the GLHT minor prepares students to integrate diverse perspectives as they develop solutions to the complex problems of global health, using the formal approach of the engineering design process.

Advances in biotechnology and bioengineering are transforming how disease is detected and treated, and have led to significant advances in health over the last 50 years. Developing countries, however, have largely missed out on the gains in health enjoyed by the rest of the world, and the HIV/AIDS pandemic has greatly increased the complexity of health challenges faced by the world's poorest regions. With the GLHT minor, BTB aims to create future leaders who can develop effective solutions to significant world health challenges. Many students pursuing the GLHT minor—having been trained to develop and implement appropriate biotechnology and bioengineering solutions that integrate scientific, engineering, health, policy, and economic data perspectives—enter careers in medicine, public health, public policy, and international development.

Students begin the GLHT minor sequence (five core courses and two elective courses) in a multidisciplinary gateway course. GLHT 201 Bioengineering and World Health provides an overview of the scientific, economic, and policy issues associated with biotechnology and bioengineering advances required to address global health needs. Subsequent minor sequence courses foster a command of specialized knowledge relevant to the development of technologies appropriate for resource-constrained settings. Students conclude the GLHT minor with a common capstone course that enables them to benefit from one another's major area proficiencies. GLHT 451/452 Global Health Design Challenges requires multidisciplinary teams of students, mentored by interdisciplinary faculty teams, to work together in a two-semester course to develop a solution to an international health challenge.

# Global Health Technologies

## The George R. Brown School of Engineering, The Weiss School of Natural Sciences, The School of Humanities, and The School of Social Sciences

Department Info | Undergraduate Requirements | Graduate Requirements | Course Listings

## Course Requirements the Interdisciplinary Minor in Global Health Technologies

Students must complete five core courses. In addition to the core course sequence, students must complete six (6) credit hours in elective courses, three (3) in science/engineering and three (3) in humanities/social science.

**Core Course Sequence**

- GLHT 201 *Bioengineering for Global Health Environments*
- GLHT 360 *Appropriate Design for Global Health*
- PSYC 370 *Introduction to Human Factors and Ergonomics or SOCI 345 Medical Sociology or SOCI 381 Research Methods or ANTH 381 Medical Anthropology or HEAL 313 Foundations of Health Promotion and Education or PSYC 480 Medical Human Factors*
- GLHT 451/452 *Global Health Design Challenges*

All core courses will be offered each year: GLHT 201, PSYC 370, SOCI 381, ANTH 381 and GLHT 451 in the fall and GLHT 360, SOCI 345, PSYC 480, HEAL 313 and GLHT 452 in the spring. The sequence indicated is the required sequence, as prerequisites do apply. Prior to enrollment in the capstone course GLHT 451/452, students must successfully complete all other GLHT minor core course requirements, although electives may be taken concurrently. There is no requirement to initiate the GLHT minor in the freshman year. It can be initiated as late as the junior year (beginning of the fifth semester). It will be possible for students to receive credit for GLHT minor courses that also fulfill a requirement within their major.

### Elective Courses

For a list of approved elective courses, covering a wide range of relevant topics, please visit www.beyondtraditionalborders.rice.edu and/or speak with the minor advisors.

### Admission

Most GLHT minor courses are open to all Rice students, including those not pursing the GLHT minor, with the exception of GLHT 360 and the capstone course GLHT 451/452, which are restricted to students completing the GLHT minor. In addition, for GLHT 360, students are required to submit a 250-word statement explaining their interests in and reasons for taking the course to beyondtraditionalborders@rice.edu to gain instructor permission to register for the course. Preferential admission to GLHT 360 will be given to students who indicate they are seeking to complete the GLHT minor course of studies. For information on GLHT minor declaration, visit the http://www.rice360.rice.edu/minor#Declaration.

# Leadership Rice

**Director**
Judy Le

## Degrees Offered: None

Leadership Rice exists to prepare students for leadership by enhancing their motivations to lead, developing their capacity to lead, and providing opportunities to lead.

Leadership Rice provides leadership development opportunities to undergraduates from every discipline, with additional opportunities for those students displaying the highest capacity and strongest ambition for significant leadership.

Leadership Rice programs have several objectives:

- Provide a theoretical framework that informs the practice of leadership.
- Fuel students' ambition to exert strategic influence.
- Equip students with the skills necessary for significant leadership.
- Open doors of opportunity for high-level leadership.
- Contribute to the mission of the Center for Civic Leadership by developing civic-minded leaders for whom the practice of leadership represents a means of impacting their communities.

Programs include academic classes, Summer Mentorship Experience, the Leading Edge Workshop, Envision Grant, speakers and conferences.

Leadership Rice classes prepare students for the challenges and opportunities leaders face today. Classes are open to students of all years and majors and may be taken independently of each other.

**Courses offered:**

- LEAD 150 Leadership in Professional Contexts
- LEAD 250 Leadership and Professional Excellence
- LEAD 301/HUMA 312 Historical and Intellectual Foundations of Leadership
- LEAD 309 Leadership Theory and Practice
- LEAD 311 Leadership and Creativity
- LEAD 313 Entrepreneurial Leadership
- LEAD 320/HUMA 311 Rhetoric of Leadership
- LEAD/COMM 321 Leadership Communication
- LEAD/COMM 325 Applied Leadership
- LEAD 330 Leadership in Higher Education
- LEAD 335 Crisis Leadership

For more information, visit the LEAD website.

Houston Taylor
Chris Watkins
Ernie Wu
Elliott Young

## Degrees Offered: None

Historically, Rice University has recognized that becoming physically educated is integral to one's overall education. Since the university was founded in 1912, the Lifetime Physical Activity Program has worked to create a multi-faceted learning experience that promotes the physical, social, and emotional benefits of physical activity. It is the mission of the Lifetime Physical Activity Program to teach both theoretical and practical components of a variety of exercise/performance activities such that they will bring enjoyment and demonstrate the importance of maintaining health and wellness throughout the course of a lifetime.

Specifically, the goals of the Lifetime Physical Activity Program are:

- To encourage a lifetime of fitness through the teaching of mechanical, physiological, and nutritional principles.
- To teach other pertinent knowledge such as historical and cultural foundations, rules, and strategy.
- To create an environment that fosters a sense of emotional satisfaction, physical accomplishment, and social interaction for its participants.
- To provide students with high-quality instruction specific to the course material so that they may learn skills that will improve the length and quality of their lives
- To expose Rice University students to activities that are not necessarily mainstream in United States culture.

Undergraduates must successfully complete one LPAP course (1 credit) in order to satisfy the graduation requirement. Students may use up to four LPAP courses (4 credits total) towards the total credits necessary for graduation. LPAP courses are not repeatable for credit.

Lifetime Physical Activity Program classes are strongly recommended for all first-year students, including transfers who have not taken equivalent courses elsewhere. Because LPAP courses are participation based and must be supervised by an instructor, students are required to adhere to a program-wide attendance policy.

The Lifetime Physical Activity Program offers a variety of sport/exercise/performance activities. In the 40-plus sections that are offered each semester, many have a multi-sport focus (e.g., volleyball/basketball), allowing

students to experience three or four activities during one year. A student may select an LPAP section that meets his/her scheduling needs and that offers activities that satisfy his/her interests. Some of the current activities offered include racquet sports (tennis, racquetball, badminton), fitness activities (aerobics, personal fitness, weight training), aquatic activities, dance (Latin, ballroom, modern, ballet, country western, Middle Eastern, classical Indian), martial arts, team sports (flag football, basketball, volleyball, soccer, softball), and other activities such as fencing, self-defense for women, golf, yoga, and nutrition.

## Degrees Offered: None

The goal of the U.S. Army ROTC program is to develop technically competent, physically fit, and highly motivated men and women for positions of responsibility as commissioned officers in the active U.S. Army, the U.S. Army Reserve, and the National Guard. Upon completion of the curriculum, students will have an understanding of the fundamental concepts and principles of the military as an art and as a science. The leadership and managerial experience gained through ROTC provides great benefit for students in both their civilian endeavors and in their military careers.

Last Revised : February 19, 2012

 

# Military Science

Department Info | Undergraduate Requirements | Graduate Requirements | Course Listings

## Degree Requirements

Rice does not offer a bachelor's in military science. However, interested students can obtain a degree in any of the other programs offered by Rice. Credit for courses in military science may be obtained by attending courses at the University of Houston. The financial aid available to a ROTC student may be used for Rice courses as well as the University of Houston ROTC courses.

For general university requirements, see Graduation Requirements. For requirements for a specific degree program, see the pages for that degree program. For more information on the Army ROTC program in particular, contact the military science department at the University of Houston by calling 713-743-3875.

**Statutory Authority—**General statutory authority for establishment and operation of the ROTC program, including the scholarship program, is contained in Title 10, United States Code, Chapter 103 (Sec. 2102–2111). Specific rules and procedures are found in U.S. Army Regulation 145–1.

**Course Credit—**ROTC classes may be taken for elective credit toward any degree plan at the University of Houston or Rice University. Freshman-and sophomore-level classes are open to all students, regardless of age or physical condition. *No military obligation is incurred as a result of enrollment in these courses.* Junior- and senior-level courses are more restrictive and do require a military obligation. ROTC scholarship students also incur a military obligation.

**Four-Year Program—**The four-year program is divided into two courses: the basic course, which is normally attended by students during their freshman- and sophomore years; and the advanced course, attended during the junior and senior years. Advanced course students attend a six-week paid advanced camp in Fort Lewis, Washington, normally between their junior and senior years.

**The Basic Course—**The basic course consists of four semesters of military science, which include MILI 121, MILI 122, MILI 201, and MILI 202. These freshman- and sophomore-level classes are open to all students without obligation.

**The Advanced Course—**Students entering the advanced course must enter into a contract to pursue and accept a commission in the active army, the Army Reserve, or the National Guard. To be considered for contracting into the advanced course, the student must be a full-time student in a course of instruction that leads to a degree in a recognized academic field, have a minimum of two years of academic work remaining in a curriculum leading to a baccalaureate or advanced degree, be under age 30 when commissioned, and pass a physical and medical examination.

**Two-Year Program—**The two-year program is designed for students who did not take the basic course but otherwise are eligible to enroll in the advanced course. This program allows students completing their sophomore year to attend a four-week Leader's Training Course during June and July at Fort Knox, Kentucky, in lieu of taking the first two years of ROTC. *There is no military obligation for attending Leader's Training Course.* The army provides transportation, room, and board. Students are paid approximately $900 for the four-week period.

**Laboratory Requirements—**A military science laboratory is required for students enrolling in MILI 121, MILI 122, MILI 201, MILI 202, MILI 301, MILI 302, MILI 401, and MILI 402. This laboratory provides hands-on opportunities for marksmanship training, rappelling, drill and ceremonies, communications training, and other activities.

**Veterans—**Veterans who have served on active duty or in the Army Reserve or National Guard also are eligible for

the ROTC program. Although veterans are not required to take the basic course, they are encouraged to do so. All students, including veterans, must have a minimum of 54 credit hours prior to enrolling in the advanced course.

**National Guard and Army Reserve Members—**Students enrolled in ROTC may also be members of the Army Reserve/National Guard. Through the Simultaneous Membership Program (SMP), those students enrolled in the advanced course will be placed in a leadership position as a cadet and will receive pay and entitlements from the National Guard or Army Reserve in the pay grade of Sergeant (E-5).

**Financial Assistance—**The United States Army offers, on a competitive nationwide basis, four-, three-, and two-year scholarships. The scholarships cover tuition 100%. Recipients also receive benefits for educational fees (to include lab fees), a book allowance, and a subsistence allowance ranging from $300 to $500 per month. Applicants must be U.S. citizens and must be under age 27 on the anticipated graduation date. Applications are available from the military science department. Veteran applicants can extend the age limit up to a maximum of three years, based on prior active duty service.

**Other Financial Aid—**All students enrolled in the advanced course will receive a subsistence allowance of $450 per month junior year and $500 per month senior year. For more information, contact the military science department. GI Bill recipients still retain benefits.

**Tuition—**Members of the Army or the Army Reserve, National Guard, Texas State Guard, or other reserve forces may be exempted from the nonresident tuition fee and other fees and charges.

**Special Training—**Basic- and advanced-course students may volunteer for and may attend the U.S. Army Airborne and Air Assault courses during June, July, and August. Cadet Troop Leadership Training positions also are available to Advanced-course cadets during the summer months.

**Miscellaneous—**All participating cadets are eligible for our internal scholarships provided by our alumni and sponsors of the program.

The Corps of Cadets sponsors an annual military ball in addition to other social events throughout the school year. The Department of Military Science sponsors extracurricular activities such as the University of Houston Color Guard and the Ranger Challenge Team.

**Minor in Military Science—**To qualify for a minor in military science, students must complete a minimum of 18 semester hours of course work, of which 12 must be advanced. Nine semester hours must be completed in residence, of which six must be advanced. Students also must attend advanced camp. Students must attain a 3.0 grade point average or higher in military science courses attempted at this university. Students may receive credit for 100- and 200-level courses based on prior military training, completion of ROTC Basic Camp, completion of JROTC training, or completion of one year at a service academy.

## Degrees Offered: None

Students may enroll in the Naval Reserve Officers' Training Corps (ROTC) program as scholarship or non-scholarship students. A minor in Naval Science is also open and available to all degree-seeking Rice students. The faculty of the Department of Naval Science consists of active-duty military officers.

Last Revised : August 11, 2014

 

# Naval Science

## Course Requirements for the Minor in Naval Science

The minor in Naval Science (NAVA) is available to all students majoring in other fields. A minor in naval science requires the successful completion of at least six courses (a minimum of 18 credit hours), with a minimum minor grade point average of 2.0. At least three of these courses (minimum of 9 hours) must be at the 300-level or higher, and study abroad or transfer courses cannot count for more than 2 courses (total of 6 hours) toward the minor.

***Required courses:***
• NAVA 101 *Naval Orientation*
• NAVA 103 *Sea Power and Maritime Affairs*
• NAVA 203 *Leadership Management I*
• NAVA 402 *Leadership and Ethics*

***Any two of the following courses:***
• NAVA 301 *Navigation*
• NAVA 302 *Naval Operations and Seamanship*
• NAVA 303 *Evolution of Warfare*
• NAVA 403 *Naval Engineering*
• NAVA 410 *Amphibious Warfare*

All naval science courses are offered once every academic year with the exception of NAVA 303 and NAVA 410. These two courses are offered every other academic year.

## Degrees Offered: None

The Program in Poverty, Justice, and Human Capabilities (PJHC), provides students with a multifaceted understanding of human well-being, both in the U.S. and internationally. This unique interdisciplinary minor emphasizes a “capabilities approach,” which considers what people are able to do and be—for example, live to old age and engage in economic and political activities—rather than strictly what material goods they possess. The program also acknowledges the central importance of a variety of additional influences on well-being beyond income, such as gender, racial, and ethnic disparities; health status; education; human rights; political freedoms; and material necessities like food and shelter. A key goal of the PJHC is to enrich students’ understanding of poverty and inequality, so that, regardless of their choice of occupation, they will maintain a longstanding commitment to enhancing the well-being of all people. More generally, the program aims to train Rice students to be future leaders in solving global problems in human well-being.

The PJHC minor combines high-caliber undergraduate courses with service learning experiences with agencies that help disadvantaged communities and people. Students are placed with organizations where they work directly with clients and gain experiential knowledge that broadens their perspective on human lives and capabilities. Through these academic and experiential learning opportunities, students explore deeper understandings of the structural factors underlying poverty and human well-being and potential policy solutions. The program further aims to promote dialogue among all disciplines about how to address issues of poverty alleviation and human well-being with a sophisticated understanding of the challenges and sound strategies for moving forward.

Although impediments to human well-being take many forms, barriers to the capabilities of women and girls persist across societies; women and girls are therefore disproportionately represented among the poor and those unable to attain their full capabilities. Acknowledging gender inequality as a powerful influence on disparities in human well-being, the academic component of the program, including the content of core and required courses, recognizes gender as a central analytic category.

Department Info | Undergraduate Requirements | Graduate Requirements | Course Listings

### Course Requirements for the Interdisciplinary Minor in Poverty, Justice and Human Capabilities

PJHC minor courses are open to all Rice students, including those not pursuing the PJHC minor; however, in courses with limited space, preference will be given to declared minors. The core courses are HUMA/SOCI 371 and SWGS 322/ASIA 329/SOCI 372, which are offered each year. Students must submit a brief questionnaire to the program director to be considered for admission to HUMA/SOCI 371.

Students must meet the following requirements to complete the minor in PJHC:

- Students must complete six courses (18 credit hours).
- Students must take HUMA/SOCI 371, SWGS 322/ASIA 329/SOCI 372 and an approved capstone course (HIST 421 or SWGS 470) or capstone course sequence (SOCI 469 and 470 or SWGS 494, 496 and 497).
- Students must choose three electives, including one course from the PJHC Non-Western elective list, one course from the PJHC Race and Ethnicity elective list, and a third course from a broader list that also includes courses from the other lists. Electives must include courses from at least two different schools. A complete list of approved required and elective courses may be found at pjhc.blogs.rice.edu/approved-electives/.
- As part of the minor, students must participate in an approved PJHC direct service learning experience. Students can choose from an array of options, including internships, service trips, and coursework, to complete this requirement. These options are described in detail at pjhc.blogs.rice.edu/service-learning-requirement/.

## Degrees Offered: None

The mission of the Program in Writing and Communication (PWC) is to integrate the practice of analytical writing and the techniques of both oral and visual communication into the Rice curriculum, with two goals in mind: To enable our students to articulate their ideas as we prepare them for academic and professional life; and to affirm the necessity of this ability and its fundamental value to every aspect of their education and across every University department and discipline.

The PWC provides oversight for the First-Year Writing-Intensive Seminars (FWIS). FWIS are content-based, 3 credit hour seminars in which writing and communication pedagogy plays a significant role in assignments and grading. They are taught in departments from all across the University.

All first-year students must pass the English Composition Examination and complete a content-based FWIS during their first year at Rice. Students who fail the Composition Exam must successfully complete FWIS 100 during the fall of their first year and prior to enrolling in one of the required content-based FWIS courses.

The PWC also includes the Center for Written, Oral, and Visual Communication. Housed in Fondren Library, the Center supports teaching and learning through workshops, consulting, and courses for undergraduate and graduate students and faculty. Headed by a team of communication professionals, the Center also includes a large staff of writing and communication consultants, both graduate and undergraduate, who are available for individual tutoring appointments. The Center includes facilities for one-on-one consultations and group work, as well as advanced technology for preparation of oral and visual presentations. Physically accessible whenever Fondren Library is open, the Center is virtually accessible around the clock through the PWC website.

## Participating Faculty

This program includes faculty from departments of Biochemistry and Cell Biology, Bioengineering, Chemical and Biomolecular Engineering, Chemistry, Computer Science, Ecology and Evolutionary Biology, Physics & Astronomy, and Statistics.

## Degrees offered: MS, PhD

Systems, Synthetic, and Physical Biology (SSPB) is a new discipline that draws upon principles from physics, chemistry, engineering, and mathematics and integrates experimental biochemical, cell biological, and molecular genetics approaches with computational design, simulation, and modeling to anticipate the properties of complex and multiscale biological systems. The Graduate Program in SSPB represents a cooperative effort by faculty in the schools of Natural Sciences and the Engineering to provide training in this highly interdisciplinary field. This program is overseen by the Institute of Biosciences and Bioengineering (IBB) and overseen by an executive committee composed of members from any of the participating departments.

The interdisciplinary nature of the SSPB program allows students to achieve their graduate degree requirements by taking select classes from any of the participating departments and performing their dissertation research under supervision of any faculty associated with the program.

Last Revised : August 11, 2014

 

# Systems, Synthetic, and Physical Biology

## Institute of Biosciences and Bioengineering

Department Info | Undergraduate Requirements | Graduate Requirements | Course Listings

## Degree Requirements for MS and PhD in Systems, Synthetic, and Physical Biology

The Graduate Program in SSPB offers Master's and Doctoral degrees. Students will be directly admitted only to the Doctoral program. For each degree, the student must fulfill the university requirements set forth in the General Announcements under which he or she entered. The semester hour requirements may be fulfilled both by classroom hours and research hours.

## Admission

Applicants for graduate study in SSPB must have:

- BA or BS degree in natural sciences, engineering, or related field (or some equivalent)
- Strong ability and motivation for research as indicated by academic record, Graduate Record Examination (GRE) scores, and recommendations

Although the program offers a MS degree, only students who intend to pursue the PhD degree are admitted into the program. In rare instances, students who fulfilled the MS degree requirements and who do not wish to continue their studies toward their PhD degree may choose to graduate with MS degree. Information on admission to the program is available on the SSPB website.

## Coursework Requirements (MS and PhD program)

Students are required to have training in the following 5 foundation areas:

1. Molecular Biology (Introductory Biology class and at least one upper-level biology class such as Cell Biology, Genetics or Biophysics)
2. Biochemical reaction kinetics (Biochemistry, Bioreaction Engineering, or equivalent)
3. Physical Chemistry or Thermodynamics or Statistical mechanics,
4. Ordinary Differential Equations
5. Statistics

If students are missing formal training in these subjects, they are required to take the equivalent background courses during their first year at Rice (no more than one of these classes can be taken for Pass/Fail). The corresponding courses at Rice include the following:

1. Cell Biology (BIOC 341)
2. Biochemistry (BIOC 301) or Bioreaction Kinetics (BIOE 330)
3. Physical Chemistry or Thermodynamics (BIOC 352, BIOE 332, PHYS 425, PHYS 526, CHEM 310 or CHEM 420)
4. Ordinary Differential Equations (MATH 211 or 213)
5. Applied Probability and Statistics (STAT 331, BIOE 439, BIOE 514, STAT 431)

Students are required to accumulate at least 25 semester hours of graduate approved courses while maintaining GPA 3.3 or higher. Students must be enrolled for at least 12 credits each semester. Required courses include a Responsible Conduct of Research (UNIV 594 or equivalent) and a series of three core courses: SSPB 501 Physical

Biology, SSPB 502 Introduction to Systems Biology Modeling: Design Principles of Biochemical Networks, and SSPB 503 Synthetic Biology, to be taken during the first or second year of studies. Students will also be required to take at least 2 classes on advanced topics in the SSPB field with at least one of the courses applying quantitative concepts from computer science, physics, and mathematics or statistics to biological problems, and at least one of the courses focusing on biology within the sub-area where they will pursue their dissertation research.

## Other Program Requirements (MS students)

All students involved in research must complete the Collaborative Institutional Training Initiative (CITI) Responsible Conduct of Research online course. Candidates for the MS degree also must:

- Choose an advisor (PI) by the end of the first semester
- Fulfill a teaching requirement of one semester.
- Submit an original research thesis
- Complete 30 semester hours of study (including thesis research hours)
- Defend the thesis in a public oral examination.

## Other Program Requirements (PhD students)

All students involved in research must complete the Collaborative Institutional Training Initiative (CITI) Responsible Conduct of Research online course. Candidates for the PhD degree also must:

- Choose an advisor (PI) by the end of the first semester or equivalent
- Fulfill a teaching requirement of one semester.
- Submit a thesis proposal that provides evidence of their ability to carry out original research in a specialized area of Systems, Synthetic, and Physical Biology by the end of their fourth semester of studies
- Complete 90 semester hours of advanced study (including thesis research hours)
- Pass their qualifying exam which includes thesis proposal defense as well as written and oral answers to a an open-ended question outside of the student's primary research area (see below)
- Defend the PhD thesis in a public oral examination.

## Qualifying Exam (PhD students)

Students are expected to pass their qualifying exam by the end of their fourth semester unless the extension has been granted by Graduate Advising Committee (GAC). The exam consists of two parts: Thesis proposal Defense and Breadth Questions. To successfully pass their qualifying exam, students must pass both sections. Students may retake the exam up to two times if granted permission to do so by GAC. Students who do not pass the Qualifying Exam may exit the program with a MS degree if the appropriate requirements have been met.

Thesis Proposal Defense: Students are required to submit their written proposal to their Graduate Progress Review (GPR) committee no later than two weeks before the scheduled exam. The proposal is expected to be in NIH R01 format – limited to 12 pages (not including References) and include the following sections: Specific Aims, Background, Significance, Methodology, Preliminary Data, and Research Plan. Students whose research area may not be suitable for this format may seek approval of the alternative format by GPR committee. On the day of the defense, students are expected to give an oral presentation of their proposal and answer technical questions. The student should expect to give a presentation, which if uninterrupted would last about 45 minutes, and be prepared for substantial questioning by the GPR committee.

Breadth Question Proposal: The GPR committee will choose an open-ended question, from a list developed by SSPB faculty and approved by GAC, outside of the topic of student's research. The student is expected to develop a solution strategy (plan) and present this strategy as a written proposal (three pages maximum). The written plan must be submitted to the committee no later than two days before the exam. During the examinations student are expected to give a brief white/blackboard talk (not PowerPoint) on their solution plan and be ready to answer committee's questions on the proposed solution.

## Degrees Offered: BA, MA, PhD

The major in anthropology has three areas of concentration: culture, language, and media; knowledge, power, and institutions; and archaeological studies. The focus in the first two areas is on contemporary theoretical issues. By reading primary sources, students gain an exposure to the styles of argument and reasoning of a broad range of theorists. They can engage in the ongoing discussion and definition of central problems within the field. Fieldwork and ethnography are important in the doctoral research.

In archaeology, the focus is on research skills in the library, the field, and the laboratory. Most students also develop at least one analytical skill, such as remote sensing, archaeological statistics, osteology, or geomorphology, drawing on the university's extensive laboratory and computer facilities.

Students may organize a major in one or more fields or combine a major in anthropology with one in another discipline.

## Degree Requirements for BA in Anthropology

Students majoring in anthropology must:

- Complete a total of 30 semester hours of approved courses (10 hours), at least 24 of which should be anthropology courses and at least 18 hours of which should be taken at the 300-level or above.
- Pass two of the following four introductory courses:
  ANTH 200 *Introduction to the Scientific Study of Language*
  ANTH 201 *Introduction to Social and Cultural Anthropology*
  ANTH 203 *Human Antiquity*
  ANTH 205 *Introduction to Archaeology*
- Pass three courses in one of the following categories:
  **Archaeological Studies**
  ANTH 210 *Anthropology of Death*
  ANTH 312 *African Prehistory*
  ANTH 345 *Politics of the Past*
  ANTH 355 *Landscape Archaeology*
  ANTH 362 *Archaeological Field Techniques*
  ANTH 442 *Museums: Theory and Practice*
  ANTH 456 *Heritage Management*
  ANTH 458 *Human Osteology*
  **Culture, Language, and Media**
  ANTH 210 *Anthropology of Death*
  ANTH 212 *Perspectives on Modern Asia*
  ANTH 302 *Anthropological Theory*
  ANTH 332 *The Social Life of Clean Energy*
  ANTH 333 *The Material World*
  ANTH 348 *Anthropologies of Nature*
  ANTH 351 *Cultures of Nationalism*
  ANTH 361 *Latin American Topics*
  ANTH 372 *Cultures of Capitalism*
  ANTH 385 *Media, Culture, and Society*
  ANTH 398 *Ethnographic Research Methods*
  ANTH 413 *Culture After Communism*
  ANTH 449 *Cultures of Sexuality*
  ANTH 483 *Documentary and Ethnographic Film*
  **Knowledge, Power, and Institutions**
  ANTH 302 *Anthropological Theory*
  ANTH 308 *Anthropology of Historical Imagination*
  ANTH 319 *Symbolism and Power*
  ANTH 332 *The Social Life of Clean Energy*
  ANTH 345 *Politics of the Past*
  ANTH 347 *The U.S. as a Foreign Country*
  ANTH 348 *Anthropologies of Nature*
  ANTH 349 *The Anthropology of Ethics*
  ANTH 352 *Interscientific Collaboration*
  ANTH 361 *Latin American Topics*
  ANTH 366 *Science, Local and Global*

ANTH 372 *Cultures of Capitalism*
ANTH 381 *Medical Anthropology*
ANTH 398 *Ethnographic Research Methods*
ANTH 442 *Museums: Theory and Practice*
ANTH 445 *Experts and Expertise*
ANTH 446 *Advanced Seminar in Medical Anthropology*
ANTH 449 *Cultures of Sexuality*

- Pass the appropriate research course(s):
  ANTH 495 *Anthropology Capstone or*
  ANTH 490 and 491 *Directed Honors Research*

Students may petition the undergraduate advisor to apply up to six semester hours of relevant work completed outside anthropology toward satisfaction of the major.

**Honors Program**—Majors considering a career in anthropology should apply to the honors program, as should those who wish to include advanced training and an intensive, individual research project in their undergraduate education. Anthropology faculty determine acceptance into the program. More information is available from the department office; see also Honors Programs.

## Course Requirements for a Minor in Anthropology

A minor in anthropology requires the successful completion of at least six courses (a minimum of 18 credit hours):

- Any two of the following:
  ANTH 200 *Introduction to the Scientific Study of Language*
  ANTH 201 *Introduction to Social and Cultural Anthropology*
  ANTH 203 *Human Antiquity*
  ANTH 205 *Introduction to Archaeology*
- Four other ANTH courses, three of which must be at the 300 level or above

## Archaeological Field School in sub-Saharan Africa

The Department of Anthropology offers a six-week field school in June and July in sub-Saharan Africa, alternating between eastern and western locales. Past field schools have been on the island of Gorée, located off the coast of Senegal, where research focused on the development of Gorée as a supply port for the Atlantic trade, and at Songo Mnara, a 15th-century Swahili urban center on the southern Tanzanian coast. This course is offered for a total of six hours of credit (ANTH 364 and ANTH 370). The course is offered without specific prerequisites, but there is a general requirement that students have some prior course work in archaeology or African history. Program fees apply.

Last Revised : August 11, 2014

# Anthropology

## The School of Social Sciences

Department Info | Undergraduate Requirements | Graduate Requirements | Course Listings

## Degree Requirements for MA and PhD in Anthropology

Because each field of specialization offers different opportunities for training and different research orientations, the department seeks applicants with a defined interest in either cultural anthropology or archaeology; an undergraduate background in anthropology is strongly desirable. Entering students devise a detailed first-year plan of study and provisional plans for succeeding years in consultation with an advisor. The plan should emphasize broad training in the selected field before the eventual definition of a project for dissertation research. For general university requirements, see Graduate Degrees.

**MA Program**—Although students are not normally admitted to study for an MA, graduate students may earn the MA after obtaining approval of their candidacy for the PhD. For the MA as a terminal degree, students must complete:

- 30 semester hours of approved course work
- One of the three special papers required for the PhD
- A thesis

**PhD Program**—For the PhD degree, students must accomplish the following (in addition to the university requirements):

- Required course work for social-cultural students: 90 semester hours of graduate study (undergraduate courses, including language courses, do not satisfy this requirement)
- Seven Required courses
  - ANTH 506 History of Anthropological Ideas
  - ANTH 507 Anthropological Directions from Second World War to the Present
  - ANTH 598 Ethnographic Research Methods
  - ANTH 601 Graduate Proseminar in Anthropology
  - ANTH 602 Anthropology Proposal Writing Seminar
  - ANTH 615 Theories of Modernity/Postmodernity
  - ANTH 650 Pedagogy (one semester; a minimum of 18 hours of graduate credit is required in order to be eligible to take this course.
- Advance to candidacy
- Complete and defend the dissertation

Requirements for candidacy (and thus eligibility for a candidacy MA), to be completed no later than the end of the eighth semester of enrollment in the program:

- Successful completion of all required courses. Students must receive at least a B (3.0) in a course for the department to deem it successfully completed. They must maintain a G.P.A. of at least 3.0 each semester to remain in good standing.
- The approval by a faculty committee (chosen among the regular [i.e. tenured or tenure-track] faculty at Rice) of three major papers:
  - one concerning some issue of research design;
  - one concerning an issue of theory or theorization;
  - one an annotated bibliography of the substantive research relevant to the PhD project.

  One of the first two of these papers should be written in the

format and in conformity with the requirements of one of the major journals in the field.

- The committee's approval of the proposal for the PhD.
- For students not bilingual, the passing of an examination (requiring the translation of at least 1,000 words into English in a period of 90 minutes, with the help of a dictionary) either of the language relevant to the field or of a major scholarly language, such as French, German, or Spanish.

**Special Options**—The department will arrange seminars and tutorials on any topic relevant to a student's training; these seminars may be conducted in supervisory consultation with scholars in other disciplines as well as with adjunct faculty. Students interested in the specialized field of medical anthropology may take advantage of the extensive resources of the Texas Medical Center through ties established with the University of Texas School of Public Health and Graduate School of Biomedical Sciences; students may earn degree credit for formal courses taken at both schools.

**Financial Support**—All first-year students receive the same level of support: a combination of graduate fellowships and tuition scholarships. These awards are renewed for a further three years of study contingent on satisfactory performance.

## Degree Offered: BA

Researchers in this interdisciplinary field seek to understand such mental phenomena as perception, thought, memory, the acquisition and use of language, learning, concept formation, and consciousness. Some investigators focus on relations between brain structures and behavior, some work with computer simulation, some use experimental methodology, and others work at more abstract theoretical levels. See http://cogsci.rice.edu/.

Last Revised : August 11, 2014

 

# Cognitive Sciences

## The School of Social Sciences

## Degree Requirements for BA in Cognitive Sciences

For general university requirements, see Graduation Requirements. Students majoring in cognitive sciences must complete five core courses and seven additional courses (see below). Among the seven additional courses, at least three and no more than four must be in a single area of concentration—linguistics, philosophy, psychology, or neuroscience.

## Introductory Courses

Because the major is interdisciplinary, no single course introduces the full range of the subject. However, students who are interested in majoring in cognitive sciences should take one or more of the following courses during their first and second years: LING 200, PHIL 103, PSYC 101, PSYC 203, or one of the computer science core courses below.

## Honors Program

Students with a 3.5 GPA in cognitive sciences and 3.3 overall GPA may apply for the cognitive sciences honors program. Students in the honors program are expected to conduct an independent research project of either one or two semesters under the guidance of a member of the cognitive sciences faculty. Students who wish to enter this program should consult with prospective advisors during their junior year and submit a proposal by the end of the semester proceeding the initiation of the project. Typically, this means submitting a proposal by the end of the junior year and beginning the project during the fall of the senior year. Proposal will be reviewed by both the supervisor and the program director. Students who undertake a two-semester project will be allowed to continue into the second semester only if their advisor judges that sufficient progress has been made during the 1st semester. At the end of a project, honors students are expected to submit a final paper to both their advisor and the program director and make an oral presentation to faculty and students. For more details, contact the program director.

## Independent Research

Majors may undertake supervised independent research by enrolling in CSCI 390 or the honors program. Students who wish to take CSCI 390 must complete a CSCI 390 contract and have it approved by their supervisor and the program director prior to the end of the first week of classes. All students taking CSCI 390 also must write a substantive research paper, which is to be submitted to both their advisor and the program director at the end of the semester, and presented in the Rice Undergraduate Research Symposium as a poster. (Copies of the contract form and instructions are available on the “forms” section of the cognitive sciences website.)

**Core Courses**

The core courses are divided into five groups. Majors just take one course from each group.

***Computer Science***

*Though all of these courses may be used to satisfy the computer science core requirements, no more than one may be taken for credit within the major*

CAAM 210 *Introduction to Engineering Computation*
COMP 140 *Computational Thinking: Computation and Problem Solving*
COMP 200 *Elements of Computer Science*
COMP 201 *Principles of Object-Oriented Programming*

***Psychology***
PSYC 203 *Introduction to Cognitive Psychology*

***Linguistics***
LING 200 *Introduction to the Scientific Study of Language*
LING 306 *Language, Thought, and Mind*
LING 315 *Semantics*

***Philosophy***
PHIL 103 *Philosophical Aspects of Cognitive Science*
PHIL 305 *Mathematical Logic*
PHIL 312 *Philosophy of Mind*

***Advanced Psychology***
PSYC 308 *Memory*
PSYC 309 *Psychology of Language*
PSYC 351 *Psychology of Perception*
PSYC 360 *Thinking*
PSYC 362 *Biopsychology*
PSYC 430 *Computational Modeling of Cognitive Processes*
PSYC 432 *Brain and Behavior*

**Additional Courses**
At least three and no more than four courses must be in one of the following areas of concentration: linguistics, philosophy, psychology, or neuroscience. Note: you may not use the same course to fulfill both a core course requirement and an additional course requirement; in other words, no double counting. Up to six credits of research courses (CSCI 390, NEUR 485, CSCI 481) may be applied to the major.

***Cognitive Sciences***
CSCI 390 *Supervised Research in Cognitive Sciences*
CSCI 481 *Honors Project*

***Computer Science***
COMP 211 *Principles of Program Design*
COMP 440 *Artificial Intelligence*
COMP 450 *Algorithmic Robotics*

***Linguistics***
LING 200 *Introduction to the Scientific Study of Language*
LING 300 *Linguistic Analysis*
LING 301 *Phonetics*
LING 304 *Introduction to Syntax*
LING 306 *Language, Thought, and the Mind*
LING 309 *Psychology of Language*
LING 311 *Phonology*
LING 314 *Second Language Acquisition*
LING 315 *Semantics*
LING 317 *Language and Computers*
LING 320 *The Origins and Evolution of Human Language*
LING/PSYC 325 *Language Acquisition*
LING 397 *Speech and Hearing Science*
LING 403 *Foundations of Modern Linguistics*
LING 404 *Research Methodologies and Linguistic Theories*
LING 405 *Discourse Analysis*
LING 409 *Special Topics*
LING 411 *Neurolinguistics*
LING 419 *Bilingualism*
LING 420 *Cognition and L2 Acquisition*
LING 428 *Phonology*

***Neuroscience***
Many of the neuroscience courses are taught by Baylor College of Medicine faculty.
For more information, see http://neuroscience.rice.edu/.
BIOC 385 *Fundamentals of Neuroscience*
CAAM 415 *Theoretical Neuroscience*

ELEC 481 *Computational Neuroscience*
LING 411 *Neurolinguistics*
PSYC 362 *Biopsychology*
PSYC 432 *Brain and Behavior*
NEUR 385 *Fundamentals of Neuroscience*
NEUR 485 *Directed Research in Neuroscience*
NEUR 500 *Functional Neuroanatomy and Systems Neuroscience*
NEUR 525 *Neuroscience and Law*

***Philosophy***
PHIL 103 *Philosophical Aspects of Cognitive Science*
PHIL 303 *Theory of Knowledge*
PHIL 305 *Mathematical Logic*
PHIL 312 *Philosophy of Mind*
PHIL 352 *Philosophy of Psychology*
PHIL 353 *Philosophy of Language*
PHIL 354 *Philosophy of Perception*
PHIL 357 *Incompleteness, Undecidability, and Computability*

***Psychology***
PSYC 308 *Memory*
PSYC 309 *Psychology of Language*
PSYC 321 *Developmental Psychology*
PSYC/LING 325 *Language Acquisition*
PSYC 340 *Research Methods*
PSYC 351 *Psychology of Perception*
PSYC 360 *Thinking*
PSYC 362 *Biopsychology*
PSYC 370 *Introduction to Human Factors*
PSYC 375 *Neurophysiology of Language and Memory*
PSYC 380 *Systems of Neroscience (cross listed as NEUR 380/BIOC 380)*
PSYC 409 *Methods in Human-Computer Interaction*
PSYC 411 *History of Psychology*
PSYC 430 *Computational Modeling of Cognitive Processes*
PSYC 432 *Brain and Behavior*
PSYC 441 *Human-Computer Interaction*
PSYC 461 *Decision Making and Problem Solving*
PSYC 465 *Olfactory Perception*
PSYC 471 *Introduction to fMRI*
PSYC 480 *Advanced Topics in HCI: Non-Traditional Interfaces*

***Other***
ANTH 406 *Cognitive Studies in Anthropology and Linguistics*
BIOE 480 *Intro to Neuroengineering (cross listed with ELEC 480)*
BIOE 481 *Computational Neuroscience and Neuroengineering*
ENGI 120 *An Introduction to Engineering Design*
ELEC 498 *Introduction to Robotics*
STAT 300 *Model Building*

*Note:* **Rice-Baylor neuroscience offerings change frequently. Baylor courses not on the above list may be counted at the discretion of the steering committee. The most up-to-date listing of courses counting as additional courses is found at cogsci.rice.edu.**

## Degrees Offered: BA, MA, PhD

Undergraduates may major in economics or mathematical economic analysis (but not both). The major in mathematical economic analysis is recommended for students who intend to pursue graduate work in economics or a business or governmental job in which extensive analytical and quantitative skills are required.

Please note that it is primarily the responsibility of the student to satisfy all degree requirements, including the university credit requirements and university distribution requirements specified elsewhere in General Announcements. Major requirements are not reduced for students with multiple majors, although some courses can satisfy the requirements for more than one major.

The ten fields of specialization available for graduate study are econometrics, economic development, energy economics, health economics, industrial organization and regulation, international trade and finance, labor, microeconomic theory, macroeconomics and/or monetary theory, and public finance.

Last Revised : August 12, 2013

 

# Economics

## The School of Social Sciences

## Degree Requirements for BA in Economics

1. All economics majors must present a minimum of 12 courses with a grade point average of at least 2.0. When students repeat courses or complete more than the minimally required number of courses, the departmental GPA will be based on the set of courses that (i) satisfies all requirements for the degree and (ii) results in the highest GPA for the student.
2. The 12 courses presented for the major in economics must include the following:

***(a) Two courses in mathematics and statistics:***

- MATH 101 Single Variable Calculus I or the combination of MATH 111 Fundamental Theorem of Calculus and MATH 112 Calculus and Its Applications
- STAT 280 Elementary Applied Statistics

***(b) Four core courses in economics and econometrics:***

- ECON 201 Microeconomics I
- ECON 301 Microeconomics II
- ECON 303 Macroeconomics
- ECON 309 Applied Econometrics or ECON 409 Econometrics

***(c) Six electives selected from the following list (or an approved alternative). At least three of the chosen electives must be at the 400 level.***

ECON 205 *Introduction to Game Theory*
ECON 239 *Business, Law, and Economics*
ECON 284 *Foundations of Public Sector Economics*
ECON 307 *Probability and Statistics*
ECON 309 *Applied Econometrics*
ECON 343 *Corporate Finance*
ECON 348 *Organizational Design*
ECON 355 *Financial Markets*
ECON 399 *Independent Research*
ECON 401 *Mathematical Structure of Economic Theory*
ECON 405 *Game Theory and Economic Behavior*
ECON 409 *Econometrics*
ECON 415 *Labor Economics*
ECON 419 *Advanced Econometric Techniques and Applications*
ECON 420 *International Economics*
ECON 421 *International Finance*
ECON 432 *Political Economy*
ECON 435 *Industrial Organization*
ECON 436 *Economics of Regulation*
ECON 437 *Energy Economics*
ECON 439 *Torts, Property, and Contracts*
ECON 443 *Financial Economics*
ECON 445 *Managerial Economics*

ECON 447 *Advanced Topics in Energy Economics*
ECON 449 *Principles of Financial Engineering*
ECON 450 *World Economic and Social Development*
ECON 451 *The Political Economy of Latin America*
ECON 452 *Religion, Ethics, and Economics*
ECON 455 *Money and Financial Markets*
ECON 460 *International Development*
ECON 461 *Urban Economics*
ECON 479 *Economic Modeling and Public Policy*
ECON 480 *Environmental Economics*
ECON 481 *Health Economics*
ECON 482 *Social Welfare and Distributive Justice*
ECON 483 *Public Finance: Tax Policy*
ECON 484 *Public Goods and Public Expenditure Theory*
ECON 485/486 *Special Topics in Economics*

## Transfer Credit

In some cases, transfer credit may be awarded for courses completed at other schools after the student has matriculated at Rice. Students may present a maximum of three such transfer courses in fulfilling item (2). (Additional transfer courses may count toward meeting university graduation requirements, but not toward fulfillment of requirements for the major.) Credits awarded to transfer students for courses taken prior to matriculation at Rice are not counted against the limit on transfer courses, but all students must complete more than half of their upper-level major work at Rice. Transfer credit for ECON 201 will not be awarded for courses taken during high school. In order to receive transfer credit for ECON 201, students must earn a grade no lower than B- in an approved course at another university and also must pass a qualifying examination. Students wishing to take the ECON 201 qualifying examination should apply to the economics department. For additional information on transfer credits, consult "Procedures for Transfer Credit," available on the economics department's website.

## Degree Requirements for BA In Mathematical Economic Analysis

1. All MTEC majors must present a minimum of 16 courses with a grade point average of at least 2.00. When students repeat courses or complete more than the minimally required number of courses, the departmental GPA will be based on the set of courses that (i) satisfies all requirements for the degree and (ii) results in the highest GPA for the student.
2. The 16 courses presented for the major in mathematical economic analysis must include the following:

***(a) Four courses in mathematics:***

- MATH 101 *Single Variable Calculus I*
- MATH 102 *Single Variable Calculus II*
- MATH 211 *Ordinary Differential Equations* or MATH 355 *Linear Algebra* or CAAM 335 *Matrix Analysis*
- MATH 212 *Multivariable Calculus*

***(b) Six core courses in economics and statistics/econometrics:***

- ECON 201 *Microeconomics I*
- ECON 301 *Microeconomics II*
- ECON 303 *Macroeconomics*
- ECON 307/STAT 310 *Probability and Statistics* or STAT 410 *Introduction to Regression and Statistical Computing* or STAT 431 *Overview of Mathematical Statistics*
- ECON 401 *Mathematical Structure of Economic Theory*
- ECON 409 *Econometrics*

***(c) Six electives selected from the following list (or an approved alternative). At least three of the chosen electives must be at the 400 level.***

ECON 205 *Introduction to Game Theory*
ECON 239 *Business, Law, and Economics*
ECON 284 *Foundations of Public Sector Economics*
ECON 309 *Applied Econometrics*
ECON 343 *Corporate Finance*
ECON 348 *Organizational Design*
ECON 355 *Financial Markets*
ECON 399 *Independent Research*

ECON 405 *Game Theory and Economic Behavior*
ECON 415 *Labor Economics*
ECON 419 *Advanced Econometric Techniques and Applications*
ECON 420 *International Economics*
ECON 421 *International Finance*
ECON 432 *Political Economy*
ECON 435 *Industrial Organization*
ECON 436 *Economics of Regulation*
ECON 437 *Energy Economics*
ECON 439 *Torts, Property, and Contracts*
ECON 443 *Financial Economics*
ECON 445 *Managerial Economics*
ECON 447 *Advanced Topics in Energy Economics*
ECON 449 *Principles of Financial Engineering*
ECON 450 *World Economic and Social Development*
ECON 451 *The Political Economy of Latin America*
ECON 452 *Religion, Ethics, and Economics*
ECON 455 *Money and Financial Markets*
ECON 460 *International Development*
ECON 461 *Urban Economics*
ECON 479 *Economic Modeling and Public Policy*
ECON 480 *Environmental Economics*
ECON 481 *Health Economics*
ECON 482 *Social Welfare and Distributive Justice*
ECON 483 *Public Finance: Tax Policy*
ECON 484 *Public Goods and Public Expenditure Theory*
ECON 485/486 *Special Topics in Economics*

## Transfer Credit

In some cases, transfer credit may be awarded for courses completed at other schools after the student has matriculated at Rice. Students may present a maximum of two such transfer courses in fulfilling requirement (2a). Additionally, students may present a maximum of three such transfer courses in fulfilling requirements (2b) and (2c) combined. (Additional transfer courses may count toward meeting university graduation requirements, but not toward fulfillment of requirements for the major.) Credits awarded to transfer students for courses taken prior to matriculation at Rice are not counted against the limit on transfer courses, but all students must complete more than half of their upper-level major work at Rice. Transfer credit for ECON 201 will not be awarded for courses taken during high school. In order to receive transfer credit for ECON 201, students must earn a grade no lower than B- in an approved course at another university and also must pass a qualifying examination. Students wishing to take the ECON 201 qualifying examination should apply to the economics department. For additional information on transfer credits, consult "Procedures for Transfer Credit," available on the economics department's website.

## Requirements for Departmental Honors

1. Candidates for departmental honors in economics or mathematical economic analysis must achieve an average grade of at least 3.67 in the courses presented for their major.
2. Candidates for departmental honors in economics and honors in mathematical economic analysis also must submit a research paper for review by the departmental Honors Review Committee.

- The paper may be the product of an earlier class, or it may be the product of an ECON 399 project. In either case, the paper must be more substantial than what would typically be produced in only one semester.
- The paper must be nominated for honors review by the faculty member under whose instruction the paper was written.
- Departmental honors will require committee affirmation that the paper meets the standard for honors research. In particular, the paper must contain a core component of work that is original to the student and that reflects the student's own independent thought. Survey papers that mainly summarize the work of others will not meet this standard. Submitted papers must adhere to the citation standards described in the Honor System Handbook. (See the section entitled "Acknowledgement of Sources" and the examples of plagiarism contained therein.) Please note that students must cite advisors' contributions as well.
- Students are urged to complete either an ECON 399 project or a suitable paper for another course before their final semester at Rice. Students could then extend and improve their work as necessary prior to the honors review that would occur near the end of their final semester at Rice.

For additional information regarding departmental honors, please refer to the economics department website.

# Economics

## The School of Social Sciences

Department Info | Undergraduate Requirements | Graduate Requirements | Course Listings

## Degree Requirements for MA and PhD in Economics

**Preparation for PhD Program.** Applicants to the PhD program should have had at least two semesters in calculus and one in linear algebra. Students who have not met these requirements may complete these prerequisites as Visiting Post Baccalaureate before being admitted to the graduate program. All applicants are required to take the Graduate Record Exam.

**Requirements.** For general university requirements, see Graduate Degrees. Candidates for the PhD degree usually spend from two to two and a half years in full-time course work and at least one year writing the dissertation; four to five years is a reasonable goal for completing the program. For the PhD, students must:

- Complete an approved program of at least 18 courses (including approved courses in other departments), no more than four of which are research workshops
- Perform satisfactorily on the written general examinations in microeconomics, macroeconomics, and econometrics
- Demonstrate proficiency in a major field by taking the relevant courses in that field and performing satisfactorily on the field examination requirement
- Complete and defend orally a doctoral dissertation setting forth in publishable form the results of original research

Although students are not normally admitted to study for an MA, graduate students may earn the MA after obtaining approval of their candidacy for the PhD.

Department Info | Undergraduate Requirements | Graduate Requirements | Course Listings

**Faculty Director**
Mark P. Jones

## Degrees Offered: MAGA

The Master of Arts in Global Affairs (MGA) program, a joint effort between the Baker Institute for Public Policy and the School of Social Sciences, seeks to offer graduate students a professional Master of Arts degree that simultaneously requires high standards of scholarship and offers practical training for global affairs careers in government, the private sector, and international organizations. More and more globalized economic, political, and cultural spheres are introducing greater complexity to the marketplace, actions of governments, cultural understanding, and the creation, design, and implementation of public policies. Such issues as international conflict, the stability and instability of markets, terrorism, global warming and other environmental concerns, energy production and consumption, and world health increasingly require global strategies that coordinate across nations, their governments, businesses, and non-governmental organizations. It is equally clear that the cultural, economic, and political institutions of a country directly affect what is done and what can be done in the international arena. Addressing these matters require a well-educated group of people who have the academic background, analytic skills, and practical knowledge that make them sensitive to problems outside the borders of their own countries and capable of offering solutions.

To meet these challenges, the MGA program offers a unique educational experience in a two-year, 36-credit hour degree program. The curriculum is offered in four 7-week terms, with two terms run in each semester. There are also two-week pre-term opportunities scheduled in which students may participate in a math boot camp or international travel programs. The third term is reserved for a required internship which is to be concluded abroad or with a major international entity.

Last Revised : August 12, 2014

 

# Global Affairs

## The School of Social Sciences

Department Info | Undergraduate Requirements | Graduate Requirements | Course Listings

## Degree Requirements for MA in Global Affairs

The Master of Arts in Global Affairs degree will require a minimum of 36 credit hours, including the internship and capstone course.

For general university requirements, see the Professional Degrees section of Graduate Degrees.

## Admission

Admission to graduate study in Global Affairs is open to qualified students holding a bachelor's degree or current Rice undergraduate students entering their junior year. Scores from the general Graduate Record Examination (GRE), good critical thinking, communication skills, and strong quantitative abilities are highly desirable. Statistics, introductory economics and computer skills are preferred. Department faculty will evaluate the previous academic record and credentials of each applicant individually and make admission decisions.

## Fifth-Year Master's Degree Option for Rice Undergraduate Students

Advanced Rice undergraduate students in good standing may apply to the MGA program in the first semester of their junior year and hear about their acceptance in the second semester of their junior year. If accepted, students will take courses towards the master's degree in their senior year, while they complete requirements for their baccalaureate degree. A plan of study will need to be approved by the faculty director and associate program director.

**NOTE:** *Rice undergraduate students must complete the requirements for a baccalaureate degree and the Master of Arts in Global Affairs independently of each other, i.e. no course may be counted toward the fulfillment of both degrees.*

## Required Core Courses (18 hours):

GLBL 501 Global Systems I
GLBL 502 Institutions and Development
GLBL 503 Introduction to Statistics for Masters Students
GLBL 504 Intermediate Statistics for Masters Students
GLBL 505 Macroeconomics and the Global Economy
GLBL 506 Macroeconomics for the Global Economy
GLBL 507 Decision Making Under Uncertainty
GLBL 510 Cultural Directions in International Affairs
GLBL 512 International Conflict
GLBL 513 International Cooperation
GLBL 514 Global Communication and Negotiation I
GLBL 515 Global Communication and Negotiation II
GLBL 519 Global Affairs Internship
GLBL 520 Global Affairs Capstone

## Concentration Electives (9 hours):

**Three Electives from one concentration area:** Students will choose three elective courses according to their individual academic interests and career goals.

## Concentration: International Development

ANTH 319/519 Symbolism & Power
ANTH 340/540 Neoliberalism & Globalization
ANTH 366/566 Science, Local and Global
ANTH 413/613 Culture after Communism
ANTH 572 Cultures of Capitalism
ECON 450 World Economics & Social Development **** Pre Reqs
ECON 451 Political Economy of Latin America **** Pre Reqs
ECON 455 Money and Financial Markets
ECON 480 Environmental Economics
ECON 481 Health Economics
ECON 483 Public Finance: Tax Policy
HIST 495 Modernization of China and Japan
HIST 572 America in the Middle East
POLI 450 Elections in the Americas
POLI 457 Conditions of Democracy
POLI 462 Comparative Public Policy
POLI 477 Domestic Politics and International relations
POLI 520 Approaches to Comparative Government
POLI 563 Coalition Politics and Parliamentary Government
POLI 564 Political Economy of Development
POLI 568 Comparative Political Institutions
POLI 572 Foreign Policy Decision Making
POST 411 Integrated Approaches to Sustainable Development
POST 430 The Shaping of Health Policy
POST 455 United States Middle East Policy
RELI 534 Religion and Politics in Africa

## Concentration: International Political Economy

ANTH 322/522 Cultures & Identity: Race, Ethnicity, & Nationalism
ASIA 488 Asia & Energy
ECON 421 International Finance ***Pre Reqs
ECON 437 Energy Economics ***Pre Reqs
ECON 447 Advanced Topics in energy Economics **** Pre Reqs
ECON 450 World Economics & Social Development **** Pre Reqs
ECON 455 Money and Financial Markets
ECON 479 Economic Modeling and Public Policy **** Pre Reqs
ECON 480 Environmental Economics
ECON 481 Health Economics
ECON 483 Public Finance: Tax Policy
POLI 461 Politics, Risk, and Energy
POST 401 Energy Policy

## Concentration: International Security

AFSC 401 National Security Affairs I
AFSC 402 National Security Affairs II
POLI 472 American Foreign Policy
POLI 473 The Craft of Intelligence Analysis, Prediction and Connecting the Dots
POLI 474 International Organizations: Theories & Practice
POLI 477 Domestic Politics and International relations
POLI 540 International Relations
POLI 570 Seminar in International Conflict
POLI 572 Foreign Policy Decision Making
POLI 595 Directed Reading-International Relations
POST 455 United States Middle East Policy

**NOTE:** *Courses vary. Some listed courses may not be offered every year, and others may be offered that satisfy the requirements with pre-approval. Students should consult their academic advisors before enrolling and check for any course pre-requisites.*

**Required internship (6 hours):** Practical experience may be conducted under the guidance of a host company,

government agency, or international nonprofit. A summary of the internship project is required in both oral and written form as part of the Master of Arts in Global Affairs.

**Required Capstone (3 hours):** In the second year, students select a topic of concentration and pursue in-depth research which delves into the real-world, policy aspects of the topic.

## Foreign language proficiency:

Students who expect to complete their degree program with a particular regional focus in mind are expected to be proficient in one of the primary languages of that region. Proficiency is defined as the ability to read and speak the language. This requirement can be met in one of three ways:

- By passing a language proficiency exam administered by the Rice Language Center.
- By achieving a grade of B+ or better in an intermediate language course at Rice. Taking this class does not count toward the 36 credit hours total for degree completion.
- By graduating from a high school or university where a language other than English was the primary language of instruction.

## Degree Requirements for BA in Linguistics

The department offers both a major program in linguistics and a Certificate of Teaching English to Speakers of Other Languages (TESOL), which may be earned with or without a Linguistics major as part of a Rice BA. For general university requirements, see Graduation Requirements. In addition, students must satisfy the distribution requirements and complete no fewer than 60 semester hours for a total of at least 120 semester hours.

Because human language is a multifaceted object of study, linguistics is, by its nature, an interdisciplinary field. The undergraduate major provides both an in-depth grounding in the field as well as cross-disciplinary breadth. Students beginning a linguistics major should take LING 200, which is a prerequisite for many upper-level courses in the department. All majors are required to take at least nine courses (27 semester hours) in linguistics at the 300 level or above, including five core courses as specified below (or otherwise listed in a particular concentration).

### Core Courses

LING 300 *Linguistic Analysis*
LING 301 *Phonetics*
LING 304 *Introduction to Syntax* or LING 311 *Phonology*
LING 305 *Historical Linguistics*, LING 315 *Introduction to Semantics*, or LING 416 *Language Universals and Typology*
LING 415 *Sociolinguistics* or LING 405 *Discourse*

In addition, competency in one language other than English is required. This requirement may be satisfied by two courses in a foreign language at the 200 level or above or equivalent or at the 100 level or above for non-European languages. No more than one independent study course may be counted toward the major requirements.

Students may elect either a general linguistics major or one of five areas of concentration. Options in the list of core courses that are not used as core courses can count as electives for the general major or for concentrations.

The general linguistics major requires, in addition to five core courses and the language requirement, at least four advanced linguistics electives (300 level or above).

Majors who plan to pursue graduate training in linguistics are recommended to choose one of the areas of concentration below. These students also are urged to apply for admission to the Honors Program by the end of their junior year. The requirements for the various concentrations include additional courses as follows:

- **Language Concentration.** In addition to the basic language competency required of all majors, the language concentration requires an advanced level competency in a different language. This can be satisfied by two language courses taught in a language other than English at the 300 level or above, or equivalent. In addition to the five core courses, four advanced electives (300-level or above) also are required, which should be chosen in consultation with the linguistics major advisor. Courses in the structure or the history of the languages studied are especially appropriate.
- **Cognitive Science Concentration.** This concentration requires, in addition to the five core courses, four advanced linguistics courses focused on the cognitive aspects of human language, selected from LING 306 Language, Thought, and Mind, LING 309 Psychology of Language, and LING 315 *Introduction to Semantics*, LING 411 *Neurolinguistics*, and LING 405 *Discourse*; and two courses from cognitively-related disciplines (psychology, computer science, anthropology, philosophy) as approved by the linguistics major advisor.

- **Language, Culture, and Society Concentration.** For an in-depth grounding in a particular language and culture, this concentration requires two language courses at the 300 level or above. The language may be the same as that used to satisfy the basic language competency. Besides the five core courses, the student must take four courses selected from LING 313 *Language and Culture*, LING 406 *Cognitive Studies*, LING 415 *Sociolinguistics*, LING 405 *Discourse*; and two courses in sociocultural studies outside the department approved by the linguistics major advisor. Examples of appropriate courses are ANTH 353 *Cultures of India*, ANTH 361 *Latin American Topics*, PSYC 202 *Introduction to Social Psychology*, HIST 250 *Traditional Chinese Culture*, and SOCI 386 *African Americans in Society*.
- **Second Language Acquisition Concentration.** Two language courses at the 300 level or above are required; the language may be the same as that used to satisfy the basic language competency. In addition to the five linguistics core courses, four additional courses are required, as follows: LING 340 *Theory and Methods of Teaching ESL*; one structure of language course (LING 394 *Structure of English* or other language equivalent such as LING 318 *Structure of French*, LING 370 *Structure of Japanese*, etc., as approved by the linguistics major advisor); and any two of the following: LING 309 *Psychology of Language*, LING 313 *Language and Culture*, LING 415 *Sociolinguistics*, and LING 405 *Discourse.*
- **Speech Sciences Concentration**. This concentration is designed for those who would like to pursue career paths in fields related to speech, language, and hearing. Medical-oriented fields under this rubric include speech pathology and audiology; speech technology fields include speech recognition and speech synthesis. The five core courses required for this concentration are LING 300 *Linguistic Analysis*, LING 301 *Phonetics*, LING 311 *Phonology*, LING 415 *Sociolinguistics*, and LING 405 *Discourse*. In addition to the core courses, students must take the two-unit seminar LING 396 *Professions in the Speech Sciences* and seven other upper-level courses as outlined below:

For students planning careers in medically-oriented fields, the seven additional courses must include LING 397 *Speech and Hearing Science*, LING 309 *Psychology of Language*, and LING 411 *Neurolinguistics.* Additionally, four courses are chosen as follows:

From linguistics one of the following: LING 428 *Laboratory Phonology*, LING 405 *Discourse*, LING 555 *Seminar in Phonetics*, or LING 409 *Special Topics*, when on a topic deemed appropriate by the speech sciences advisor.

From courses outside the department, three of the following:

EDUC 310 *Introduction to Special Education*
PSYC 321 *Developmental Psychology*
PSYC 339 *Statistical Methods*
PSYC 351 *Psychology of Perception*
BIOC 201 *Introductory Biology*
KINE 301 *Human Physiology*
NEUR 511 *Integrative Neuroscience*

For students planning careers in speech technology, the seven additional courses will include four of the following: LING 304 *Introduction to Syntax*, LING 309 *Psychology of Language*, LING 428 *Laboratory Phonology*, LING 405 *Discourse*, LING 555 *Seminar in Phonetics*, or LING 409 *Special Topics*, when on a topic deemed appropriate by the speech sciences advisor. The remaining three requirements should be chosen from the following courses from outside the department:

ELEC 301 *Introduction to Signals*
ELEC 434 *Digital Signal Processing Lab*
MECH 373 *Acoustics*
COMP 200 *Elements of Computer Science* or
COMP 130 *Elements of Algorithms and Computation*
COMP 140 *Computational Thinking:An Integrated Introduction to Computation and Problem Solving*

Further courses in the medical and the language technology areas will enhance students' preparation for these respective fields. Students contemplating careers in the speech sciences should consult with the speech sciences advisor and faculty in other relevant areas concerning course choice and career planning.

**Honors Program.** The Linguistics Honors Program provides selected undergraduate majors with the opportunity to conduct supervised research within their area of specialization in the major. Majors planning to pursue graduate training in linguistics or a related field are strongly encouraged to apply, as well as others who wish to add the experience of an intensive, individualized research project to their undergraduate education.

Application to the Honors Program should be made in person to the undergraduate major advisor before the end of the student's junior year. In support of the application, the student should prepare a brief description of the proposed

project signed by the faculty member who is to supervise the work (the project supervisor). Acceptance into the program is by agreement of the linguistics faculty. On acceptance, the student will enroll in LING 482 *Honors Project*, with the supervising faculty member named as instructor.

The Honors Program framework is designed to facilitate the development of a mentoring relationship between student and faculty member. Students are thus expected to meet regularly with their project supervisor regarding their progress; the supervisor is responsible for providing research guidance and general support.

With the appropriate completion of major requirements and the honors project or thesis, the student will graduate with departmental honors.

**Certificate of Teaching English to Speakers of Other Languages**. This program is designed for Rice students who plan to teach English to non-native speakers in the U.S. or abroad. The Certificate of Teaching English to Speakers of other Languages (TESOL) supplies undergraduate-level training in applied linguistics and the English language. It easily can be combined with linguistics, English, or other majors, but can only be earned with a Rice BA. To enroll in the program, contact the director of the ESL Certificate Program.

The program consists of four required courses and a practicum.

## Required Courses

LING 200 *Introduction to the Scientific Study of Language*, LING 340 *Theory and Methods of Teaching ESL*, LING 394 *Structure of the English Language*, and one of the following:

LING 205 *Language and Society*, LING 300 *Linguistic Analysis*, LING 306 *Language, Thought, and Mind,* LING 309 *Psychology of Language*, LING 313 *Language and Culture,* or LING 415 *Sociolinguistics*.

## Practical Component

The practical component consists of a total of 20 contact hours of language teaching/tutoring experience. This requirement may be filled in a number of ways; see the ESL information on the linguistics department website for further details. On completion of the practicum, a short report on the student's teaching experience should be submitted to the certificate director.

Successful completion of the program must be certified by the director of the ESL Certificate Program and will be indicated by a certificate of completion, awarded on completion of the Rice BA.

## Degree Requirements for MA and PhD in Linguistics

**The Linguistics Department is not accepting new students into the graduate program for Fall 2014.**

The doctoral linguistics program at Rice emphasizes the study of language use and functional/cognitive approaches to linguistic theory. Rice faculty engage in a broad range of research specializations, all of which play an important role for in-depth graduate training. These interrelated areas include cognitive linguistics, language change, sociolinguistics, discourse analysis, language documentation and description, phonetics, laboratory phonology, and typology. Other faculty research interests include phonological theory, acoustic phonetics, speech sciences and technology, syntax, language revitalization, neurolinguistics, and forensic linguistics. The program only admits students planning to study for the PhD degree full time. Undergraduate preparation ideally should include language study and course work in linguistics or disciplines related to linguistics, such as anthropology, applied linguistics, speech and hearing sciences, psychology, sociology, or studies of particular languages, although an advanced degree is not required. Students will earn a masters degree upon advancement to candidacy. Students admitted to the program are generally offered financial support in the form of tuition scholarships and/or stipends for living expenses.

During the first year of residence, each entering student works closely with the graduate advisor to choose a plan of study congruent with the demands of the program and the student's interests. Emphasis throughout the program is on a close working relationship with faculty. Students should select areas of specialization that fit well with faculty research interests and activities.

Students will, in general, take five years to progress through the degree program. With no prior linguistics background, course work in the first three years will include:

- one problem-solving course in linguistic analysis (LING 500) to be taken in the first year of study
- two courses in the area of phonetics/phonology (LING 501 and 511)
- two courses in the area of syntactic/semantic analysis (LING 504 and LING 515 or LING 413)
- the two-course sequence in field methods (LING 407 and LING 408) to be taken normally in the second year of study
- two seminars in the department usually to be taken in the second and/or third year of study
- five additional elective courses, including two courses in other subfields of linguistics

Prior preparation in linguistics will be assessed with regard to its equivalence to particular Rice courses. Graduate students are required to register for at least 12 hours credit per semester before advancing to candidacy. The department requires a minimum semester GPA of 3.0 to avoid probationary status. Students are expected to serve as teaching assistants for one course per year for four of the five years during the time they are receiving departmental support and this service is included in the normal course load.

Before advancing to candidacy, students must prepare two in-depth research papers. Each paper must represent a different area in the field of linguistics (as determined by the linguistics faculty); a separate committee of two members of the faculty reads and referees each paper. The committees are chosen by the student and approved by the student's faculty mentor. The first publishable paper must be approved no later than the end of the fifth semester. Students who fail to meet this deadline will be dismissed from the program. The second publishable paper must be approved by the beginning of the eighth semester In addition, one of the papers must be presented in the departmental colloquium, and it is expected that students submit their work for presentation at relevant professional meetings and publish their work in venues such as conference proceedings and/or journals when

possible.

Finally, students must fulfill the departmental language requirement of competency in at least one language other than English. See the department web page and Linguistics Graduate Student Handbook for specific details.

In the course of the first three years in the program, the student should work toward establishing a close working relationship with various members of the faculty such that multiple faculty members are familiar with the student's work. During the first year, the graduate advisor serves as the student's advisor, but after the first year, the student selects a faculty mentor to provide more personalized advising in addition to the general advice of the graduate advisor. After the student's second paper is accepted, a dissertation advisor is selected and a doctoral committee is formed, by mutual agreement of the student and the anticipated committee members. During the fourth year, students present to their committee members a third research paper, called the dissertation prospectus, consisting of a substantial dissertation proposal and a comprehensive bibliography. It may be based on a grant proposal to an external funding agency, particulary in the case of proposed fieldwork. Upon completion of the prospectus, students will submit to an oral qualifying exam to be administered by the dissertation committee. The exam will consist of two parts, a general exam demonstrating the student's knowledge of the field and a dissertation prospectus hearing. Upon completion of this qualifying examination, the student will advance to candidacy.

Following advancement to candidacy, the student works full time toward the completion of the dissertation. The student is expected to consult regularly with the committee members during the data collection and writing process. Upon completion of a complete and acceptable draft of the dissertation, the student will then, in consultation with all members of the dissertation committee, schedule a public defense of the work. When the final version of the dissertation is accepted by the doctoral committee and filed with the university and all other requirements are certified as fulfilled, the degree is then granted.

For more in-depth information about the linguistics graduate program requirements, consult the official Linguistics Graduate Student Handbook and the departmental web page at linguistics.rice.edu.

**MA Program.** Although students are not normally admitted to study for an MA, graduate students may earn the MA after obtaining approval of their candidacy for the PhD. After all the requirements necessary to advance to candidacy have been met, the student may apply for a candidacy masters.

# Managerial Studies

## The School of Social Sciences

**Program Director**
Richard J. Stoll

## Degree Offered: BA

The major in managerial studies is an interdepartmental, nonprofessional program designed to provide undergraduates with an understanding of the environment in which businesses and other organizations exist today and of some of the tools employed by management in the commitment of its financial and human resources. All students taking the managerial studies major also must complete at least one of the established departmental or interdepartmental majors, other than an area major. Managerial studies is not the equivalent of an undergraduate business major at other universities.

## Degree Requirements for BA in Managerial Studies

For general university requirements, see Graduation Requirements. For the BA degree, students majoring in managerial studies must complete the following 10 core courses in addition to satisfying all the requirements for their second departmental or interdepartmental major:

ACCO 305 *Introduction to Accounting* or
BUSI 305 *Financial Accounting*
ECON 211/201 *Principles of Economics I* (microeconomics)
ECON 243/343/443/448 *Corporation Finance* or ENGI 303 *Engineering Economics and Management* (for engineering majors only)
*MANA 404 *Management Communications in a Consulting Simulation*
PSYC 101 *Introduction to Psychology*
PSYC 231 *Industrial and Organizational Psychology*
**STAT 280 *Elementary Applied Statistics*
***STAT 385 *Methods for Data Analysis and System Optimization*

Two courses from the following:

ACCO 406 *Management Accounting*
ECON 348/245/POLI 348/245 *Organizational Design*
(note: POLI 348 only counts if taken before Spring 2013)
ECON 355/255 *Financial Markets and Institutions*
ECON 370/301 *Microeconomics Theory*
ECON 421 *International Finance*
ECON 435 *Industrial Organization*
ECON 437 *Energy Economics*
ECON 438/239 *Business, Law, and Economics*
ECON 439 *Torts, Property, and Contracts*
MECH 456 *Legal Themes in Engineering Practice*
POLI 335 *Political Environment of Business*
POLI 338 *Policy Analysis*
STAT 411 *Advanced Statistical Methods*

*MANA 404 *is a capstone course that may not be taken until eight of the 10 other required courses in the major have been completed.*

---

** Psychology and sociology majors may satisfy this requirement with PSYC 339/STAT 339 or SOCI 398, respectively. Students with a calculus background should take STAT 305, STAT 310/ECON 382/307, or STAT 331/ELEC 331.
*** or CAAM 378, ECON/STAT 400, ECON 409/STAT 410, 421, 486.

**Honors Program—**To apply for admission to the honors program, students must have completed eight of the regular managerial studies courses and have a B+ (3.33) average in those courses. All applications must be approved by the director of Managerial Studies.

The Honors Program consists of taking two additional courses from:

MANA 497/498 *Independent Research*
ECON 440 *Advanced Game Theory*
ECON 445 *Managerial Economics*
ECON 449 *Basics of Financial Engineering*
STAT 486 *Methods in Computational Finance I: Market Models*
STAT 421 *Methods in Computational Finance II: Time Series*

MANA 497/498 are offered in collaboration with faculty in the Jesse H. Jones Graduate School of Business. Admission to these courses must be approved by a participating faculty member. A list of participating faculty and their research interests is available from the director of Managerial Studies.

For more information, students should consult the program director in 120 Herzstein Hall.

## Degrees Offered: Minor in Neuroscience

Neuroscience is an interdisciplinary field that uses very diverse methodologies to investigate the human mind and brain and the relation between them. Its subject ranges from the study of cognitive processes and representations via the empirical study of behavior, to investigations of the biochemical processes that occur in brain functions, and all of the interactions and correlations between brain, behavior, and biology that can be observed and/or modeled. The primary aim of neuroscience is to provide an understanding of how the cognition and behavior of organisms are embodied in neural processes. Such an understanding of mind and brain, bringing to bear many types of knowledge, is necessary as a basis for understanding and solving many practical problems: understanding the neurophysiology of disease; devising treatment for many pathologies related to aging, stroke, autism, and hearing and other impairments; improved understanding of human behavior relating to risk, addiction, and social pathologies; addressing practical problems in memory, learning, and acquisition of literacy; understanding the neural basis of emotion and its relation to human perception and behavior; and many other applications.

## Course Requirements for the Interdisciplinary Minor in Neuroscience

A minor in neuroscience requires the successful completion of at least six courses (a minimum of 18 credit hours). At least three courses must be at the 300-level or higher, and no more than two courses can apply from study abroad to transfer credits.

Depending on a student's interest, those wishing to minor in neuroscience may choose from one of two unique tracks, either a Humanities and Social Science (HS) track, which represents cognitive and behavioral approaches to neuroscience, or a Natural Science and Engineering (SE) track, representing genetics, cellular/molecular, bioengineering, computation, and systems-level investigations.

**Required Classes:**
1) Core Course (regardless of track):

- NEUR/PSYC/BIOC 380 Fundamental Neuroscience Systems

2) Core Elective (dependent on chosen track):

- NEUR/PSYC 362 Biopsychology (HS track)
- NEUR/BIOC 385 Cellular & Molecular Neuroscience (SE track)

**Elective Classes:**
Students must select four electives (of at least three credits each), and should be chosen in accordance with the track selected by the student for the core. At least one elective, however, must be chosen from the opposite track, to provide breadth. No more than two of these electives can be used to fulfill a student's major requirements.

For a list of approved elective courses, in either of the two tracks, please review http://neuroscience.rice.edu/electives and/or speak with the minor advisors.

# Policy Studies

## The School of Social Sciences

**Director**
Donald Ostdiek

## Degree Offered: BA

This interdisciplinary major focuses on policy issues that are of public interest. Students in policy studies evaluate and analyze both the determinants and the effects of policy decisions, gaining an understanding of the policy-making process addresses theoretical issues as well as applied and prescriptive policy questions.

Students may take policy studies only as a second major. It complements majors in any university department. For instance, engineering or science majors who are contemplating careers in business or government can investigate how technical innovations or regulations are adopted and implemented as matters of public policy. Humanities majors can explore career options where language skills are particularly valuable.

Students are encouraged to investigate research opportunities with Rice faculty. Students also may elect to participate in the Washington Semester Program at American University, which includes both course work and an internship in the federal government. Students may also participate in the Rice Policy Studies Abroad program in London for course credit, which includes an internship experience in London. See the policy studies director and website for more information.

Last Revised : February 19, 2012

 

# Policy Studies

## The School of Social Sciences

## Degree Requirements for BA in Policy Studies

For general university requirements, see Graduation Requirements. Students may take the policy studies major only as a second major (their first major cannot also be in an interdepartmental program). The major contains 11 courses divided into the following elements: a basic curriculum, an area curriculum, and a capstone requirement.

The policy studies basic curriculum introduces students to the fundamental concepts and tools needed to understand and study policy, regardless of the policy area on which they choose to focus. The four courses ensure that all policy studies majors have a common professional vocabulary and conceptual frame of reference. The policy studies area curriculum provides specialized training that builds on students' work in the basic curriculum.

Students also are required to take six courses from one of the following areas of specialization or in an area approved by the policy studies director:

- Environmental policy
- Healthcare management
- International affairs
- Law and justice
- Urban and social change
- Energy Policy Studies

In consultation with the policy studies director, each student also must complete an approved capstone requirement. This requirement may be met by participating in an approved Rice University study abroad program, a School of Social Sciences Gateway experience, or another approved internship or research opportunity.

### Basic Curriculum Courses

**Choose four courses from the following:**

- ECON 111 or 201 *Microeconomics I*
- POLI 338/POST 338 *Policy Analysis*
- ECON 348 *Organizational Design* or POLI 337 *Public Policy & Bureaucracy or* POLI 336 *Regulation* or SOCI 348 *Organizational Sociology*
- POST 200 or POST 201 *Introduction to Policy*
- POST 300 *Public Policy Planning, Management and Advocacy*
- POST 350 *Global Urban Lab*
- One advanced analysis or methods course approved by the Policy Studies director
- POLI 317 *The Congress* or POLI 318 *The Presidency* or POLI 321 *Constitutional Law* or POLI 342 *Politics of the Judiciary*

### Area Curriculum Courses

**Six courses from one of the following seven groups** (courses listed are illustrative and not all-inclusive; students should review with current course offerings and discuss course substitutions with the policy studies director, who approves substitutions):

***1. Environmental Policy (Choose six)***

- CEVE 302 *Sustainable Design*
- CEVE 307 *Energy and the Envrionment*
- CEVE 406 *Introduction to Environmental Law*
- ECON 480 *Environmental Economics*
- ENGL 368 *Literature and the Environment*
- ENST 302 *Environmental Issues: Rice into the Future*
- ESCI 414 *Physics and Chemistry of the Atmosphere*
- POLI 331 *Environmental Politics and Policy*
- POLI 336 *Politics of Regulation*
- SOCI 304 *Envrionmental Issues*
- SOCI 342 *Sociology of Globalization*
- SOCI 350 *Urban Transportation*
- SOCI 367 *Environmental Sociology*
- SOCI 415 *The Environmental Movement*
- SOCI 422 *Social Autopsies*
- SOCI 423 Sociology of Food

***2. Healthcare Policy and Management (Choose six)***

- ANTH 381 *Medical Anthropology*
- ANTH 386 *Medical Anthropology of Food and Health*
- ANTH 388 *Life Cycle: A Biocultural View*
- HEAL 212 *Consumer Health and the Media*
- HEAL 222 *Principles of Public and Community Health*
- HEAL 313 *Foundations of Health Promotion*
- HEAL 350 *Understanding Cancer*
- HEAL 360 *Violence in America*
- HEAL 407 *Epidemiology*
- HEAL 410 *Program Development in Health Education*
- PHIL 310 *Philosophy of Biology*
- PHIL 313 *Philosophy of Science*
- PHIL 314 *Philosophy of Medicine*
- PHIL 315 *Ethics, Medicine, and Public Policy*
- PHIL 337 *Research and Ethics*
- PHIL 339 *Death and Dying*
- POST 430 *The Shaping of Health Policy*
- SOCI 334 *Sociology of the Family*
- SOCI 345 *Medical Sociology*
- SOCI 451 *Immigration in a Global World*
- SOSC 330 *Healthcare Reform in the 50 States*
- SOCI 334 *Sociology of the Family*
- SOCI 345 *Medical Sociology*
- SOCI 355 *Sociology of Drugs and Alcohol*
- SOCI 422 *Social Autopsies*
- SOCI 423 *Sociology of Food*
- SOCI 425 *Population Health Seminar*
- SOCI 451 *Immigration in the Global World*
- SOCI 465 *Gender and Health*
- SOSC 330 *Healthcare Reform in the 50 States*
- UNIV 350 *Rice Health Advisors*

***3. International Affairs (Choose six)***

- ECON 420 *International Trade*
- ECON 421 *International Finance*
- ECON 451 *Political Economy of Latin America*
- HIST 386 *Recent U.S. Foreign Policy*
- POLI 354 *Latin American Politics*
- POLI 355 *Government and Politics of the Middle East*
- POLI 357 *Democracy and Democratization*
- POLI 360 *West European Democracies*
- POLI 372 *American Foreign Policy*
- POLI 373 *International Conflict*

- POLI 378 *The Politics of American National Security*
- POLI 462 *Comparative Public Policy*
- POST 351 *Ethics in the Media*
- POST 352 *International Economics*
- POST 354 *Understanding Britain Today*
- POST 355 *European Government & Politics*
- POST 356 *Politics, Democracy, and Islam: Apartism and Alienation in London's East End*
- POST 357 *International Finance*
- POST 358 *International Marketing*
- POST 359 *Analyzing & Exploring the Global City: London- Modernity, Empire, and Globalization*
- POST 401 *Energy Policy*
- POST 455 *United States Middle East Policy*
- UNIV 312 *Public Diplomacy and Global Policymaking in the 21st Century*

***4. Law and Justice (Choose six)***

- ANTH 419 *Law and Society*
- CEVE 406 *Introduction to Environmental Law*
- ECON 239 *Business, Law, and Economics*
- ECON 439 *Torts, Property, and Contracts*
- HIST 398 *Topics in Legal History*
- PHIL 306 *Ethics*
- PHIL 307 *Social and Political Philosophy*
- PHIL 315 *Ethics, Medicine, and Public Policy*
- PHIL 316 *Philosophy of Law*
- PHIL 319 *Feminist Philosophy*
- PHIL 331 *Moral Psychology*
- POLI 330 *Minority Politics*
- POLI 438 *Race and Public Policy*
- POST 351 *Ethics in the Media*
- POST 354 *Understanding Britain Today*
- POST 356 *Politics, Democracy, and Islam: Apartism and Alienation in London's East End*
- SOCI 301 *Social Inequality*
- SOCI 309 *Race and Ethnic Relations*
- SOCI 311 *Sociology of Deviant Behavior*
- SOCI 321 *Criminology*
- SOCI 325 *Sociology of Law*
- SOCI 329 *Multiracial America*
- SOCI 338 *Social Problems*
- SOCI 349 *Deviance, Justice, and Popular Culture*
- SOCI 351 *Theory and Practice of Punishment*
- SOCI 355 *Sociology of Drugs and Alcohol*
- UNIV 310 *Rice Legal Lab*

***5. Urban and Social Change (Choose six)***

- ANTH 344 *City/Culture*
- ARCH 311 *Houston Architecture*
- ARCH 313 *Case Studies in Sustainable Design*
- ARCH 455 *Housing and Urban Programs: Issues in Policy*
- ECON 450 *World Economic and Social Development*
- ECON 461 *Urban Economics*
- ECON 480 *Environmental Economics*
- ECON 481 *Health Economics*
- ECON 483 *Public Finance*
- ECON 484 *Public Goods*
- PHIL 307 *Social and Political Philosophy*
- POLI 332 *Urban Politics*
- POLI 438 *Race and Public Policy*
- POST 351 *Ethics in the Media*
- POST 354 *Understanding Britain Today*
- POST 356 *Politics, Democracy, and Islam: Apartism and Alienation in London's East End*

## Degrees Offered: BA, MA, PhD

Students majoring in political science are encouraged to achieve both a broad understanding of the field and a specialized knowledge of one or more aspects of political science, including American politics, comparative politics, and politics and international relations. Graduate study is grounded in the areas of American politics, comparative politics, and international relations.

Last Revised : April 02, 2012

 

# Political Science

## The School of Social Sciences

## Degree Requirements for BA in Political Science

For general university requirements, see Graduation Requirements. Students majoring in political science must complete 30 semester hours (10 courses) in the field of political science, plus six hours (two courses) of upper-level work in any of the following fields: anthropology, economics, history, philosophy, psychology, or sociology.

**Political science degree requirements are as follows:**

- At least one course in each of the following fields: American politics, comparative politics, international relations, theory and methods.
- At least two of the four introductory courses.
- A concentration of at least four courses in one of the following fields: American politics, comparative politics, and international relations. These four courses must include the introductory course and a seminar (400 level course).
- A statistics course offered by the Department of Political Science.
- Two seminars with different instructors.
- POLI 110 and 112 do not satisfy any requirement for the political science major

**Introductory Courses—**POLI 209 *Introduction to Constitutionalism and Modern Political Thought*, POLI 210 *American Government and Politics,* POLI 211 *International Relations*, and POLI 212 *Introduction to Comparative Politics* constitute the introductory courses in political science. Students should note, however, that POLI 210 is the course that meets the Texas state licensing requirements in political science for teachers.

**Directed Readings Courses—**Directed readings courses are intended for students who have completed a substantial number of political science courses and who seek to explore a subject not covered in regular courses. They are available only if an appropriate faculty member agrees to supervise. The faculty member supervising a directed readings course must have a full-time appointment in the Department of Political Science, and a student may not take more than one readings course from him or her. Students should submit a brief, one-page description of the work to be conducted in the readings course (including the name of the faculty supervisor) to the department director of undergraduate studies no later than two weeks into the semester in which they intend to take the course. Readings courses do not count toward the department's distribution requirement.

**Honors Program—**Admission to the honors program requires the approval of the department director of undergraduate studies. The faculty member supervising the thesis must have a full-time appointment in the Department of Political Science. During the first semester of the two-semester program, students take a readings course that provides them with a basis for drawing up a thesis prospectus. During the second semester, students write their honors thesis, which also must meet with committee approval. Students may not combine the two honors courses into one semester. Those who successfully complete the honors program may substitute it for one of the seminars required for the major. Failure to complete the second semester of the honors program will result in loss of credit for the first semester of the honors program.

Alternatively, students may earn honors in political science by successfully completing the Rice University Honors Program (RUSP), HONS 470/471. In addition to successfully completing this program, the student must complete a research project in political science, and the student must be supervised by a full-time faculty member in the political science department. See also Honors Programs.

### Degree Requirements for MA and PhD in Political Science

For general university requirements, see Graduate Degrees. Students in the PhD program must complete 42 semester hours in advanced courses or seminars before candidacy and conclude the degree program with the oral presentation of a dissertation displaying original research. Normally, students take the specified core courses in two of the three general fields of American politics, comparative politics, and international relations, completing additional course work and comprehensive examinations as well. Before taking the comprehensive examinations, students must:

- Complete courses in statistical analysis
- Satisfy the language or skill requirement in their major field
- Complete all course requirements

Students select specific courses for graduate study in consultation with the faculty advisor.

The master of arts degree can be obtained with 36 semester hours of course work, all of which must be taken at the graduate level (500 level or above, except with permission of the director of graduate studies), and the completion of two research papers in seminars taken over the course of study. A minimum G.P.A. of 3.0 is required for awarding the MA.

The political science department requires that not more than three years elapse between the time the student is admitted to graduate study and the completion of the MA degree, unless an extension is approved by the department graduate committee.

## Degrees Offered: BA, MA, PhD

The undergraduate program offers the core preparation recommended by the nation's leading graduate schools of psychology, with advanced courses and research opportunities to fit individual needs. Programs of study may be structured around prospective careers in several fields of psychology, as well as in medicine, law, business, or education.

Program emphasis in graduate study is on doctoral training. An important feature of our doctoral program is its strong research orientation. Students are expected to spend a good portion of their graduate years actively engaged in research and are expected to acquire a high level of research competence. Faculty research interests and areas of specialization for graduate students include: cognitive psychology (basic mental activities such as perceiving, attending, remembering, learning, judging, verbalizing, and imagining), systems and cognitive neuroscience (understanding the relationship between the human brain and higher forms of behavior), human factors/human-computer interaction (the scientific discipline concerned with the understanding of interactions among humans and other elements of a system and the application of theories, principles, data, and other methods of design in order to optimize human well-being and overall system performance), industrial/organizational psychology (human behavior in organizational and work situations), and training (broad interdisciplinary area drawing on cognitive psychology, industrial/organizational psychology, and educational psychology).

Last Revised : August 12, 2013

 

# Psychology

## The School of Social Science

## Degree Requirements for BA in Psychology

For general university requirements, see Graduation Requirements. Students majoring in psychology must complete 47 semester hours in departmental courses. All majors must take the following courses:

**Core Courses – 17 Hours**
PSYC 101 *Introduction to Psychology* (3 hours)
PSYC 202 *Introduction to Social Psychology* (3 hours)
PSYC 203 *Introduction to Cognitive Psychology* (3 hours)
PSYC 339 *Statistical Methods- Psychology* (4 hours)
PSYC 340 *Research Methods- Psychology* (4 hours)

**Selected Substance Courses – 30 Hours**

In addition to the 17 hours of core courses, majors must take an additional 30 hours of other courses that are to be selected from the psychology curriculum. Students may take up to 12 credit hours of PSYC 485/488 (Supervised Research/Reading) toward the major, but only 3 of the 12 hours may be from PSYC 488.

No substitutions or transfer credits are allowed for PSYC 339 or 340.

Once enrolled at Rice, students must obtain approval from the psychology department to transfer courses taken at another college or university. Students are strongly encouraged to take all of their core courses before taking the upper level courses that comprise their 30 hours of substance courses. Students should take PSYC 339 and PSYC 340 preferably by the end of their sophomore year.

**Honors Program** – Qualified students may apply to the honors program during preregistration in the spring semester of their junior year. A written proposal for the project must be submitted by the end of the second week of classes in the fall of their senior year, and the faculty will decide on final admission to the honors program by the end of the fourth week of classes. Admission to the honors program requires a psychology GPA of 3.7 and an overall GPA of 3.5, completion of PSYC 339, and completion of or concurrent enrollment in PSYC 340. To graduate with departmental honors, students must complete the requirements for the psychology major, a written honors thesis approved by a faculty committee, and other requirements as determined by their honors committee. Detailed information about the honors program is available from the instructor of the course or the department website.

### Degree Requirements for MA and PhD in Psychology

(For general university requirements, see Graduate Degrees.) For both MA and PhD degrees, students must complete a research thesis, including a public oral defense. Required coursework is determined by the student's Research Interest Group (cognitive, cognitive neuroscience, human factors/human-computer interaction, industrial/organizational, or training). Students must complete an admission-to-candidacy procedure to establish their expertise in their chosen specialty. Competence in a foreign language is not required.

## Degrees Offered: BA, MA and PhD

Sociology is a branch of the social sciences that evolved in response to the revolutionary social changes of the 19th century, such as industrialization and urbanization, that ushered in the modern era. Sociology's founding fathers include Emile Durkheim, Max Weber, Karl Marx, Herbert Spencer, and George Herbert Mead. They explored how social relationships and interactions affect individuals and large-scale social institutions, including religion, government, and education. Today, sociologists use qualitative techniques, including ethnography; participant observation; and case studies of a variety of social phenomena, processes, and problems as methods for exploring the meaning of social life and culture to those who live it, and in building inductive theory. Quantitative techniques engage in hypothesis testing of established theories and concepts, using techniques that include experimental designs, survey questionnaires, and network analysis. Sociology as a discipline includes "ways of knowing" that link it closely to methods of the natural sciences, and more interpretive and critical perspectives that are closer to scholarship in the humanities.

The Sociology department does not have a terminal MA program, and students seeking only a master's degree will not be admitted. However, the Master of Arts degree is earned as a student progresses toward the PhD.

Last Revised : August 11, 2014

 

# Sociology

## The School of Social Sciences

## Degree Requirements for BA in Sociology

Eleven courses are required for the major in sociology (at least 33 semester hours). Ordinarily, these courses will be distributed as follows. Any exceptions to these requirements must be approved by the Major/Minor Advisor and/or chair of the Undergraduate Advising Committee Chair.

**A Survey of the Field:**

- SOCI 101 (formerly SOCI 203) *Introduction to Sociology*

**Theoretical Approaches:**

Students are required to take at least one course that offers a systemic analysis of alternative theoretical perspectives.

- SOCI 380 (formerly SOCI 250) *Social Theory*
- SOCI 383 (formerly SOCI 275) *Feminist Social Thought*

**Research Methods:**

A) Both of these courses are highly recommended. One of them must be taken to meet the requirements of the major.

- SOCI 381 (formerly SOCI 290) *Research Methods:* This course provides hands-on experience with both the quantitative and qualitative methods of sociological research. Sociology majors who are thinking about doing Honors research are urged to take this course no later than the fall semester of their junior year.
- SOCI 384 (formerly SOCI 241) *The Craft of Sociology:* This course provides an overview of the history of sociology, focusing on the empirical studies that have been crucial in its development.

B) Students are required to take this course:

- SOCI 382 (formerly SOCI 298) *Social Statistics:* This course provides students with the skills they need to analyze quantitative data in order to answer sociological research questions and to test hypotheses. Students learn sample description, sampling and probability, sampling theory, and how to make inferences from samples to populations. They learn to apply common univariate statistics for description, and bivariate and multi-variate statistics for testing relationships. Because most statistical analysis is done with the aid of computers, this course also focuses on common statistical packages.

**Areas of Substantive Interest:**

The remaining courses (to reach a minimum total of eleven courses in all) should be chosen from the list of courses offered.

## Honors Program

The Honors Program is designed to provide sociology majors with the opportunity to sharpen their research skills and

deepen their understanding of the discipline through a two-to-three semester program of directed independent research and writing. The program also offers the opportunity for formal recognition, through Departmental Honors, of those undergraduates who have demonstrated unusual competence in sociology by successfully completing a sustained independent research project. Small grants for honors thesis research are generously supported by the Chandler and Ian Davidson Scholars Fund as well as the Walter Hall Scholars program.

**Eligibility**

To be eligible for the program, students must have:

- Taken at least four sociology courses beyond SOCI 101 *Introduction to Sociology*, including SOCI 381 *Research Methods*. If their project requires statistical analysis, students should also complete SOCI 382 *Social Statistics* before beginning their research.
- An A- average in all sociology courses taken.

**Application Process**

1. During the fall and early spring semester of their junior year, students are invited to consult with tenured and tenure-track members of the faculty about a potential thesis topic. All students must have at least one tenured or tenure-track faculty member in the sociology department as their thesis chair. The student must submit a written description of their proposed research project to the chosen faculty member for approval of their topic and review of their proposal, as well as secure agreement of the chosen faculty member(s) to serve as their thesis committee chair.
2. Once a thesis supervisor has been identified, the student must submit a written description of their proposed research project to the departmental undergraduate advisor. The proposal should be 2-3 pages in length, double-spaced, and is due by April 1st of their junior year. It should include a signed statement from the chosen faculty member agreeing to serve as their chair advisor.
3. The sociology faculty will vote on the merits of the proposed thesis project at their monthly faculty meeting in mid-April. If approved, the student may begin work on their thesis immediately, or at a start time agreed upon with their thesis supervisor (including summer semester, if desired).

**Program**

Students in the Honors Program register for two successive semesters in *Directed Honors Research* (SOCI 492 and 493). An honors thesis typically involves much discussion over both semesters between the student and their tenure or tenure-track advisor. Students should meet early in the process to agree on ground rules for the project, to choose the other members of the thesis committee (made up of two additional faculty members, who serve as readers and ad-hoc advisors), and to set up a schedule for discussions and submission of written work. It is the department's experience that students who work alone without much consultation with faculty are less likely to succeed in their project than students who maintain close contact with their advisor and the department. Students are also encouraged to include other members of the committee in discussion of the thesis, especially as the project nears completion, so that their feedback can be incorporated before the final draft of the project is submitted.

Students normally begin by conducting a thorough review of the relevant literature, formulating hypotheses that grow out of the literature review, and proposing a research design that clearly describes how the data for the project are to be collected and analyzed. The research itself is usually carried out in the fall semester of the senior year (and sometimes in the summer following the junior year), and is analyzed, written up, and defended as a completed Honor's Thesis during the spring semester of the senior year. (Students are encouraged to examine several previously written theses, which are available in the sociology department.)

In addition to the student's primary advisor, the thesis is read and evaluated by the faculty members, sometimes from other departments, who make up the student's thesis committee.

**Program Timeline**

- A first draft of the final thesis must be turned in to the committee members no later than February 1st of the student's senior year.
- After receiving feedback on the project, the student will have until the last Monday in March to submit a final draft of the senior thesis to their committee.
- A short presentation (10-15 minutes) of the final thesis project must be given to the full sociology faculty by mid-April. Faculty will vote on whether to grant Departmental Honors to the student at the conclusion of their presentation.

## Course Requirements for Minor in Sociology

Six classes are required for a minor in sociology (18 semester hours).

- **Required Classes:** SOCI 101 *Introduction to Sociology*; one methods course (SOCI 381 or SOCI 384) OR theory course
- **Elective Classes:** 4 electives (12 credits), including at least one 400-level class.

Last Revised : August 11, 2014

# Sociology

## The School of Social Sciences

Department Info | Undergraduate Requirements | Graduate Requirements | Course Listings

## Degree Requirements for MA and PhD in Sociology

The PhD program is a five-year degree program. Students will normally obtain a master's degree after two years of study and research, and will usually need an additional three years to complete the requirements for a PhD. The course work is sequenced and will typically be completed in 2½ years. By this point, students will be required to have written their Masters thesis and completed their Masters degree. This leaves one semester to take the comprehensive exams and two years to complete the dissertation. Each student will attend a monthly Teaching and Professionalization Workshop that the department will hold throughout the academic school year.

The Sociology department does not admit students seeking only a masters degree. The Master of Arts degree is earned as a student progresses toward the PhD. Students who currently hold a Master's Degree are welcome to apply. However, PhD students must complete four semesters of residency and coursework at Rice University. At the department's discretion, some credits may transfer from other graduate programs.

**Admission Policy**

Students are admitted on a competitive basis. Admitted students must have a Baccalaureate degree (BA or BS) or equivalent, a minimum 3.0 (B) GPA in undergraduate work, and the intent to complete a PhD in sociology. We consider GRE scores, undergraduate GPA, letters of recommendation, writing samples, a personal essay, and professional experience when making admission decisions for the PhD program. We strongly encourage applications from women and minority groups.

**Required Courses:**

SOCI 526: *Contemporary Social Theory*
SOCI 541: *Qualitative Research Methods*
SOCI 580: *Classical Social Theory*
SOCI 581: *Quantitative Research Methods*
SOCI 582: *Quantitative Data Analysis I*
SOCI 583: *Quantitative Data Analysis II*
SOCI 596: *Statistical Computer Programming* (1 credit)
SOCI 610: *Professionalization Workshop* (1 credit)
SOCI 611: *Teaching Practicum* (1 credit)
SOCI 700: *Thesis Seminar*

**The sequence of courses will normally be as follows:**

**First Semester:**
Classical Social Theory or Contemporary Social Theory
Quantitative Research Methods or Qualitative Research Methods
Statistical Computer Programming
Elective 1
Professionalization Workshop

**Second Semester:**
Quantitative Data Analysis I and/or Qualitative Research Methods
Elective 2
Elective 3

Professionalization Workshop

**Third Semester:**
Contemporary Social Theory or Classical Social Theory
Quantitative Data Analysis II
Qualitative Research Methods (if not already taken)
Professionalization Workshop

**Fourth Semester:**
Thesis Seminar
Electives
Teaching Practicum
Professionalization Workshop

**Semesters 5-10:**
Electives, Comprehensive Exams, and Dissertation

BUSI 305 *Financial Accounting*
BUSI 310 *Leading People in Organizations*
BUSI 343 *Financial Management*
BUSI 380 *Marketing*

BUSI 471 *Strategic Management*

**Description**

Sport Management is an interdisciplinary field of study that draws from a wide range of academic disciplines, including business, management, law, and communication. Each discipline can be applied to the business enterprise of amateur and professional sport, as well as the management of highly effective teams in sport, corporate America, or other management related professions. While public and private sector sport operation is the topic of a large segment of the curriculum, the thoroughly interdisciplinary emphasis of the sport management major aims to educate students in the skills and theory necessary to assume leadership roles both in and out of sport.

Career preparation for leadership and entrepreneurial positions is the ultimate goal of the sport management major at Rice. Students will acquire a solid academic and practical foundation and thus will be competitive for opportunities that include entering the sport business industry or applying to the country's best law and business schools.

Students will complete a minimum of two internships prior to graduation, often with one of the professional teams in Houston (Rockets, Astros, Texans, Dynamo, etc). Students also will receive networking and out-of-class developmental training, as these play a significant role in obtaining high-profile positions in collegiate and professional sports.

Rice is one of a very small number of universities that has received "program approval status" from the North American Society of Sport Management. This is the highest level of academic achievement available in the field.

Students are encouraged to go to www.sport.rice.edu for the latest information about the major.

## Trustees

Robert B. Tudor III *Chair*
Edward B. Adams, Jr.
J.D. Bucky Allshouse
Keith Anderson
Doyle L. Arnold
Laura Arnold
Nancy P. Carlson
Albert Y. Chao
T. Jay Collins
Mark Dankburg
Charles L. Landgraf
Lynn Laverty Elsenhans
Douglas Lee Foshee
Lawrence Guffey
John Jaggers
Ralph Parks
Lee H. Rosenthal
Ruth J. Simmons
Jeffery A. Smizek
Amy L. Sutton
Robert M. Taylor, Jr.
Guillermo Trevino
James S. Turley
Randa Duncan Williams
Huda Y. Zoghbi

## Trustees Emeriti

Josephine E. Abercrombie
D. Kent Anderson
James A. Baker, III
Teveia Rose Barnes
E. William Barnett
Subha Barry
Suzanne Deal Booth
Alfredo Brener
Vicki Whamond Bretthauer
Raymond Brochstein
Robert T. Brockman
Robert L. Clarke
James W. Crownover
Edward A. Dominguez
Janice G. Doty

Charles W. Duncan, Jr.
Bruce W. Dunlevie
Karen Ostrum George
Susanne Morris Glasscock
Matt F. Gorges
James T. Hackett
Ben Hollingsworth
C. M. Hudspeth
Carl E. Isgren
Edward W. Kelley, Jr.
Larry Kellner
Albert N. Kidd
K. Terry Koonce
Cindy J. Lindsay
Michael R. Lynch
Robert R. Maxfield
Burton J. McMurtry
Robert C. McNair
Steven L. Miller
Ralph S. O'Connor
Bob Parks
W. Bernard Pieper
Harry M. Reasoner
Karen Hess Rogers
Jeffery O. Rose
Hector de J. Ruiz
Marc Shapiro
William N. Sick
L.E. Simmons
Charles Szalkowski
Lewis T. Williams

## Trustee Advisors

Judy Ley Allen
Richard A. Chapman
Stephen C. Cook
Thomas H. Cruikshank
J. Thomas Eubank
William S. Farish, III
Joyce Pounds Hardy
Gerald D. Hines
William P. Hobby
T. Robert Jones
William F. Kieschnick
Neal T. Lacey, Jr.
G. Walter McReynolds
James R. Meyers
Pat H. Moore
Paula Meredith Mosle
Frank B. Ryan
Louisa Stude Sarofim
Gus A. Schill, Jr.
Stephen J. Shaper
Stephen B. Smith
Selby W. Sullivan

## Administration

| | |
|---|---|
| President | David W. Leebron |
| Senior Assistant to the President | David Vassar |
| Deputy Secretary to the Board of Trustees and Assistant to the President | Cynthia L. Wilson |
| Provost | George L. McLendon |
| Vice Provost for Academic Affairs | Paula Sanders |
| Vice Provost for Research | Yousif Shamoo |
| Vice Provost for Information Technology | Kamran Khan |
| Vice Provost for Strategic Partnerships | Daniel Carson |
| Vice Provost for Translational Bioscience (on leave) | Mary "Cindy" Farach-Carson |
| Vice Provost and University Librarian | Sara Lowman |
| Dean of the School of Architecture | Sarah Whiting |
| Dean of the Susanne M. Glasscock School of Continuing Studies | Mary B. McIntire |
| Dean of the George R. Brown School of Engineering | Edwin L. Thomas |
| Dean of the School of Humanities | Nicolas Shumway |
| Dean of the Jesse H. Jones Graduate School of Business | William H. Glick |
| Dean of the Shepherd School of Music | Robert Yekovich |
| Dean of the Wiess School of Natural Sciences | Peter Rossky |
| Dean of the School of Social Sciences | Lyn Ragsdale |
| Dean of Undergraduates | John Hutchinson |
| Dean of Graduate and Postdoctoral Studies | Seiichi Matsuda |
| Director of the James A. Baker III Institute for Public Policy | Edward P. Djerejian |
| Director of Athletics, Recreation and Fitness | Joe Karlgaard |
| Vice President for Administration | Kevin Kirby |
| Vice President for Development and Alumni Relations | Darrow Zeidenstein |
| Vice President for Enrollment | Chris Muñoz |
| Vice President for Finance | Kathy Collins |
| Vice President for Investments and Treasurer | Allison Thacker |
| Vice President for Public Affairs | Linda Thrane |
| Vice President for Digital Education and Strategic Initiatives | Caroline Levander |
| Vice President and General Counsel | Richard A. Zansitis |
| University Representative | Y. Ping Sun |

## Administrative Offices

| | |
|---|---|
| Academic Advising | Brian Gibson |
| Academic and Research Computing | Michael Dewey |
| Administrative Systems | Randy Castiglioni |
| Admission | Julie Browning |
| Affirmative Action/Equal Employment Opportunity | Russell Barnes |
| Alumni Relations | Marthe "Marta" Golden |
| Athletics | Joe Karlgaard |
| Budget Office | Kathy Collins |
| Campus Store | Kristie Whitehead |
| Career Development | Nicole Van Den Heuvel |
| Cashier's Office | Carla Perez |
| Civic Leadership | Matthew Taylor |
| Community Involvement Center | Mac Griswold |
| Controller's Office | Brad Fralic |
| Counseling Center | Timothy Baumgartner |
| Delivery Services | Ute Franklin |
| Digital Initiatives | Caroline Levander |
| Disability Support Services | Alan Russell |
| Diversity and Inclusion | Roland B. Smith Jr. |
| Emergency Medical Service (EMS) | Lisa Basgall |
| Enterprise Applications | Andrea Martin |
| Environmental Health and Safety | Kathryn Cavender |
| Events Office | TBN |
| Facilities, Engineering and Planning | Jim Alty |
| Faculty Development | Louma Ghandour |
| General Counsel | Richard A. Zansitis |
| Graduate and Postdoctoral Studies | Seiichi Matsuda |
| Housing and Dining | Mark Ditman |
| Human Resouces | Mary A. Cronin |
| Institutional Effectiveness | John M. Cornwell |
| Institutional Research | Ratna Sarkar |
| International Students and Scholars | Adria Baker |
| KTRU General Manager | Will Robedee |
| Multicultural Affairs | Catherine E. Clack |
| Networking, Telecommunications, and Data Center | William Deigaard |
| News and Media Relations | B.J. Almond |
| Payroll Office | Tim DeFosse |
| Police Department (RUPD) | Johnny Whitehead |
| President's Office | David Vassar |
| Provost's Office | Colleen F. Morimoto |
| Procurement | Brian Soika |
| Public Affairs | B.J. Almond |
| Public Art Program | Molly Hubbard |

| | |
|---|---|
| Office of the Registrar | David Tenney |
| Recreation Center | Tina Villard |
| Research Computing | Kim Andrews |
| Risk Management | Renee Block |
| Scholarships, Fellowships, and Undergraduate Research | Caroline Quenemoen |
| Sponsored Research | Melinda Cotten |
| Student Activities | E. Kate Abad |
| Student Center | E. Kate Abad |
| Student Financial Services | Anne Walker |
| Student Health Services | Mark Jenkins, MD |
| Student Judicial Programs | Lisa Zollner |
| Student Wellbeing | Kate Noonan |
| Study Abroad | Erika Payan Zanetti |
| Systems, Architecture, and Infrastructure | Barry Ribbeck |
| Telecommunications | Keith Kostelecky |
| Title IX Coordinator | Russell Barnes |
| Transportation Office | Eugen Radulescu |
| University Relations | Greg Marshall |
| Web Services | Diane Swain |

## College Masters

| | |
|---|---|
| Baker College | Ivo-Jan and Rosemary van der Werff |
| Brown College | José Aranda and Krista Corner |
| Duncan College | Luis Duno-Gottberg |
| Hanszen College | Paul and Klaudia Brace |
| Jones College | Melanie and Michel Achard |
| Lovett College | Jose and Mayra Onuchic |
| Martel College | Ted and Beata Loch-Temzelides |
| McMurtry College | Karim Al-Zand and Dereth Phillips |
| Sid Richardson College | Ken Whitmire |
| Wiess College | Alexander X. and Jeanette Byrd |
| Will Rice College | Bridget Gorman and Mike Reed |

# Faculty

A B C D E F G H I J K L M N O P Q R S T U V W X Y Z

**Aazhang, Behnaam**, 1985. J.S. Abercrombie Professor of Electrical and Computer Engineering
BS (1981), MS (1983), PhD (1986) University of Illinois

**Abreu, Vitor dos Santos**, 2000. Adjunct Professor of Earth Science, Lecturer
BA (1984), MS (1990) Federal University of Rio Grande, Porto Alegre, Brazil; PhD (1997) Rice University

**Achard, Michel**, 1997. Professor of Linguistics and French Studies, Department Chair of Linguistics
BA (1983) University of Aix-en-Provence; MA (1987), PhD (1993) University of California–San Diego

**Adam, Hajo**, 2012. Assistant Professor of Management
BBA (2004) International University in Germany; MS (2007), PhD (2010) INSEAD

**Adams, Wade**, 2013. Senior Faculty Fellow in Materials Science and NanoEngineering
BS (1968) U.S. Air Force Academy; MS (1971) Vanderbilt University; PhD (1984) University of Massachusetts

**Adnan, Sarmad**, 2001. Adjunct Professor of Mechanical Engineering
BSME (1987) Ohio University; MS (1989), PhD (1992) Rice University

**Ajayan, Pulickel M.**, 2007. Benjamin M. and Mary Greenwood Anderson Professor in Engineering and Professor of Materials Science and NanoEngineering, Chemistry, and Chemical and Biomolecular Engineering, Department Chair of Materials Science and NanoEngineering
BTech (1985) Banaras Hindu University, India; PhD (1989) Northwestern University

**Akin, John Edward**, 1983. Professor of Mechanical Engineering and Computational and Applied Mathematics
BS (l964) Tennessee Polytechnic Institute; MS (1966) Tennessee Technological University; PhD (1968) Virginia Polytechnic Institute

**Akins, Brian**, 2012. Assistant Professor of Accounting
BS (1997) University of Texas at Austin; MBA (2006) Rice University; MA (2008) Lubbock Christian University; PhD (2012) Massachusetts Institute of Technology

**Albers, Andrew**, 2008. Lecturer of Architecture
BS (1995) Georgia Institute of Technology; MArch (1999) Rice University

**Albert, Laurence (Larry)**, 2001. Visiting Critic
BA (1986) Yale University; MArch (1997) Rice University

**Alemany, Lawrence B.**, 1994. NMR Manager and Lecturer of Chemistry
BS (1975) City College of New York; PhD (1980) University of Chicago

**Alexander, David**, 2003. Professor of Physics and Astronomy
BSc (1985), PhD (1988) University of Glasgow, Scotland

**Alfaro, Ernesto**, 2008. Lecturer of Architecture
BA (1996) Columbia University; MArch (2000) Rice University

**Alford, Grant**, 2010. Visiting Assistant Professor of Architecture
BS (2005) Texas Tech University, M.Arch (2008) Princeton University

**Alford, John R.**, 1985. Associate Professor of Political Science
BS (1975), MPA (1977) University of Houston; MA (1980), PhD (1981) University of Iowa

**Allen, Genevera I.**, 2010. Dobelman Family Junior Chair and Assistant Professor of Statistics
BA (2006) Rice University; PhD (2010) Stanford University

**Alpak, F. Omer**, 2014. Adjunct Associate Professor of Computational and Applied Mathematics
BSc (1997) Middle East Technical University; MSc (1999), PhD (2005) University of Texas–Austin

**Alvarez, Pedro J. J**., 2003. George R. Brown Professor of Materials Science and NanoEngineering, Department Chair of Civil and Environmental Engineering
BEng (1982) McGill University; MSE (1989), PhD (1992) University of Michigan

**Al-Zand, Karim**, 2002. Associate Professor of Composition and Theory
BM (1993) McGill University; PhD (2000) Harvard University

**Ambrose, Catherine G**., 2009. Adjunct Associate Professor of Bioengineering
BS (1987) Washington University–St. Louis; MS (1989), PhD (1992) University of Texas–Austin

**Anandasabapathy, Sharmila**, 2007. Adjunct Professor of Bioengineering
BA (1993) Yale University; MD (1998) Albert Einstein College of Medicine

**Anderson, John B**., 1975. W. Maurice Ewing Chair in Oceanography, Professor of Earth Science
BS (1968) University of South Alabama; MS (1970) University of New Mexico; PhD (1972) Florida State University

**Anding, Roberta**, 1997. Lecturer of Kinesiology
BS (1977), MS (1980) Louisiana State University

**Angelaki, Dora E.**, 2012. Adjunct Professor of Electrical and Computer Engineering, Adjunct Professor of Psychology
Diploma (1985) National Technical University of Athens; MS (1989), PhD (1991) University of Minnesota

**Annapragada, Ananth**, 2005. Adjunct Associate Professor of Chemical and Biomolecular Engineering
BTech (1985) A.C. College of Technology; PhD (1989) University of Michigan

**Antoulas, Athanasios C**., 1985. Professor of Electrical and Computer Engineering
Diploma in Electrical Engineering (1975), Diploma in Mathematics (1975), PhD (1980) Eidgenösische Technische Hochschule, Switzerland

**Anwar, Mekhail**, 2014. Adjunct Assistant Professor of Electrical and Computer Engineering
BA (1998), MSC (2001) University of California–Berkeley; PhD (2007) Massachusetts Institute of Technology; MD (2009) University of California–San Francisco

**Aranda Jr, José F**., 1994. Associate Professor of English and Spanish and Portuguese, Department Chair of Spanish and Portuguese
BA (1984) Yale University; MA (1988), PhD (1994) Brown University

**Arbizu-Sabater, Victoria**, 2006. Lecturer of Spanish
BA (1986), MA (1996) University of Seville, Spain; MA (1999) Rice University

**Aresu, Bernard**, 1977. Laurence H. Favrot Professor of French, Department Chair of French Studies
Licence es lettres (1967) Université de Montpellier, France; PhD (1975) University of Washington

**Arnold, William, M**., 2009. Professor in the Practice of Management
AB (1966) Cornell University; MA (1968), MBA (1972) University of Texas–Austin

**Aschwanden, Markus**, 2007. Adjunct Professor of Physics and Astronomy
MS (1982) University of Zurich; PhD (1987) ETH Zurich

**Atherholt, Robert**, 1984. Professor of Oboe
BMus (1976), MMus (1977) Juilliard School of Music

**Atkinson, E. Neely**, 1985. Senior Lecturer of Statistics
BA (1975), MA (1981), PhD (1981) Rice University

**Awad, Maher M**., 2005. Senior Lecturer of Arabic
BA (1988) California State University, MA (1990) University of Colorado

**Babakhani, Aydin**, 2011. Assistant Professor of Electrical and Computer Engineering
BS (2003) Sharif University of Technology, Iran; MS (2005), PhD (2008) California Institute of Technology

**Back, Kerry E**., 2009. J. Howard Creekmore Professor of Finance
BA (1978) Western Kentucky University; PhD (1983) University of Kentucky

**Bader, Graham**, 2008. Associate Professor of Art History

BA (1991) Yale University; MA (1995) Williams College; MA (2000), PhD (2005) Harvard University

**Bae, Kyung-Hee**, 2012. Lecturer in the Program in Writing and Communication
BS (1993) Seoul Women's University; MA (2003) University of Houston

**Badgwell, Thomas A**., 2000. Adjunct Associate Professor of Chemical and Biomolecular Engineering
BS (1982) Rice University; MS (1990), PhD (1992) University of Texas–Austin

**Bado, Richard**, 2005. Professor of Opera, Director of the Opera Studies Program
BM (1981) West Virginia University; MM (1983) Eastman School of Music

**Baggerly, Keith A**., 2004. Adjunct Associate Professor of Statistics
BA (1990), MA (1993), PhD (1994) Rice University

**Bailar, Melissa,** 2012. Professor in the Practice of Humanities
BA (1997) Rice University; PhD (2005) Rice University

**Bailey, Walter B**., 1982. Associate Professor of Musicology
BMus (1976) Lewis and Clark College; MA (1979), PhD (1982) University of Southern California

**Baker, George C.**, 2012. Lecturer in Improvisation
BMus (1973) Southern Methodist University; Diplôme de Virtuosité (1975) Schola Cantorum;
MMus (1977) University of Miami; DMA (1979) University of Michigan;
MD (1987) University of Texas-Southwestern; MBA (1998) Southern Methodist University

**Balabanlilar, Lisa A**., 2007. Associate Professor of History, Head Resident Fellow McMurtry College
BA (1998) Portland State University; MA (2003), PhD (2007) Ohio State University

**Balazsi, Gabor**, 2009. Adjunct Associate Professor of Bioengineering
BS (1996), MS (1997) Babe–Bolyai University of Cluj, Romania; MS (1999), PhD (2001) University of Missouri–St. Louis

**Ball, Zachary T**., 2006. Associate Professor of Chemistry, Associate Department Chair of Chemistry for Undergraduate Studies
AB (1999) Harvard University; PhD (2004) Stanford University

**Ballestero, Andrea,** 2012. Assistant Professor of Anthropology
BA (1997) Universidad Autonome de Centro América; MS (2002) University for International Cooperation, San Jose, Costa Rica; MS (2004)
University of Michigan, Ann Arbor; PhD (2010) University of California, Irvine

**Baraniuk, Richard G**., 1992. Victor E. Cameron Professor of Electrical and Computer Engineering
BS (1987) University of Manitoba; MS (1988) University of Wisconsin; PhD (1992) University of Illinois

**Baring, Matthew G**., 2000.Professor of Physics and Astronomy
BS (1983) University of Melbourne; PhD (1989) Trinity College, Cambridge

**Barlow, Tani E**., 2008. T. T. and W. F. Chao Professor of History
BA (1975) San Francisco State University; MA (1979), PhD (1985) University of California–Davis

**Barnett, Gregory**, 2002. Associate Professor of Musicology
BA (1988) Oberlin College; MFA (1992), PhD (1997) Princeton University

**Barnhill, Allen**, 2010. Associate Professor of Trombone
BM (1977) Eastman School of Music

**Barrera, Enrique V**., 1990. Professor of Materials Science and NanoEngineering
BS (1979), MS (1985), PhD (1987) University of Texas–Austin

**Barrett, Deborah**, 1998. Professor of the Practice of Professional Communication
BA (1972), MA (1977) University of Houston; PhD (1983) Rice University

**Barron, Andrew R**., 1995. Charles W. Duncan Jr–Welch Professor of Chemistry, Professor of Materials Science and NanoEngineering
BS (1983), PhD (1986) Imperial College of Science and Technology, University of London

**Bartel, Bonnie**, 1995. Ralph and Dorothy Looney Professor of Biochemistry and Cell Biology
BA (1983) Bethel College; PhD (1990) Massachusetts Institute of Technology

**Batsell, Richard R**., 1980. Associate Professor of Marketing, Associate Professor of Psychology
BA, BBA (1971), PhD (1976) University of Texas–Austin

**Bayazitoglu, Yildiz**, 1977. Harry S. Cameron Professor of Mechanical Engineering and of Materials Science and NanoEngineering
BS (1967) Middle East Technological University; MS (1969), PhD (1974) University of Michigan

**Beason Abmayr, Beth**, 2001. Lecturer of Biochemistry and Cell Biology
BS (1990) Auburn University; PhD (1996) University of Alabama

**Beauchamp, Michael S**., 2005. Adjunct Associate Professor of Psychology
AB (1992) Harvard University; MS (1994), PhD (1997) University of California–San Diego

**Beckingham, Kathleen M**., 1980. Professor of Biochemistry and Cell Biology
BA (1967), MA (1968), PhD (1972) University of Cambridge

**Bedient, Philip B**., 1975. Herman Brown Professor of Engineering
BS (1969), MS (1972), PhD (1975) University of Florida

**Bednar, J. Bee**, 1997. Adjunct Professor of Computational and Applied Mathematics
BS (1962) Southwest Texas State University; MA (1964), PhD (1968) University of Texas–Austin

**Begley, Charles E**., 1989. Adjunct Associate Professor of Economics
BS (1969) Northern Arizona University; MA (1972), PhD (1978) University of Texas–Austin

**Behr, Marek**, 1999. Adjunct Professor of Chemical and Biomolecular Engineering
BS (1988), PhD (1992) University of Minnesota

**Behringer, Richard**, 2008. Adjunct Professor of Biochemistry and Cell Biology
PhD (1986) University of South Carolina

**Beier, Margaret E**., 2004. Associate Professor of Psychology
BA (1988) Colby College; MS (1999), PhD (2003) Georgia Institute of Technology

**Belik, Katerina**, 2013. Lecturer in the Program in Writing and Communication
BA (1993), PhD (1995) Kuban State University, Russia

**Bennett, George M**., 1978. E. Dell Butcher Professor of Biochemistry and Cell Biology
BS (1968) University of Nebraska; PhD (1974) Purdue University

**Bennett, Matthew**, 2009. Assistant Professor of Biochemistry and Cell Biology
BS (2000), PhD (2006) Georgia Institute of Technology

**Berry, Donald A**., 2000. Adjunct Professor of Statistics
AB (1965) Dartmouth College; MA (1967), PhD (1971) Yale University

**Bertolusso, Roberto**, 2013. Lecturer
BS (1999) Universitad de Buenos Aires; MA (2009), PhD (2011) Rice University

**Bhutani, Manoop S**., 2009. Adjunct Professor of Bioengineering
MD (1988) Maharishi Dayanand University Medical College, India

**Bidani, Akhil**, 1994. Adjunct Professor of Electrical and Computer Engineering
BS (1969) Punjab University, India; PhD (1975) University of Houston; MD (1981) University of Texas Medical Branch–Galveston

**Billups, W. E**., 1970. Professor of Chemistry
BS (1961), MS (1965) Marshall University; PhD (1970) Pennsylvania State University

**Birge, Sarah E**., 2010. Lecturer in the Rice Center for Engineering Leadership, Adjunct Lecturer in the Program for Writing and Communication
BA (2002) Austin College; MA (2005), PhD (2010) Pennsylvania State University

**Bissada, K. K**., 1996. Adjunct Professor of Earth Science
BSc (1962) University of Assiut, Egypt; MS (1965), PhD (1967) Washington University

**Biswal, Sibani Lisa**, 2006. Associate Professor of Chemical and Biomolecular Engineering and of Materials Science and NanoEngineering
BS (1999) California Institute of Technology; MS (2001), PhD (2004) Stanford University

**Blackburn, James B**., 1981. Professor in the Practice of Environmental Law
BA (1969), JD (1972) University of Texas–Austin; MS (1974) Rice University

**Blanch, Joakim O**., 2010. Adjunct Associate Professor of Computational and Applied Mathematics
MSc (1992) Uppsala University, Sweden; MA (1995), PhD (1996) Rice University

**Blättler, Damian**, 2013. Assistant Professor of Music Theory
AB (2006) Harvard University, MA, MPhil (2008), PhD (2013) Yale University

**Bloem, Suzana Maria Campos Pinto**, 1999. Lecturer of Portuguese
BA (1970) Pontifícia Universidade Católica de Campinas, Brazil

**Blumenthal-Barby, Martin**, 2009. Assistant Professor of German Studies
MA , MPhil (2006), PhD (2008) Yale University

**Boles, John B**., 1981. William Pettus Hobby Professor of History, Associate of Will Rice College
BA (1965) Rice University; PhD (1969) University of Virginia

**Bondos, Sarah**, 2004. Adjunct Assistant Professor of Biochemistry and Cell Biology
BS (1993) University of North Carolina; PhD (1998) University of Illinois

**Bongmba, Elias K**., 1995. Harry and Hazel Chavanne Professor of Christian Theology, Professor of Religion, Associate of Wiess College
BA (1987) Sioux Falls College; MDiv (1989) North American Baptist Seminary; MA (1991) University of Iowa; PhD (1995) University of Denver, Iliff School of Theology

**Bordeaux, Janice**, 1994. Associate Dean of Engineering, Adjunct Assistant Professor of Psychology
BFA (1971) University of Illinois; MA (1978), PhD (1983) Duke University

**Boriek, Aladin**, 1997. Adjunct Professor of Mechanical Engineering
BSc (1980) Helwan Institute of Technology, Egypt; MSc (1984) University of Michigan; MSc (1989), PhD (1990) Rice University

**Borle, Sharad**, 2003. Associate Professor of Marketing
BTech (1989) Banaras Hindu University–Varanasi; MBA (1992) XLRI Institute of Management–Jamshedpur; PhD (2003) Carnegie Mellon University

**Boshernitzan, Michael**, 1982. Professor of Mathematics
BA (1971) Moscow University, U.S.S.R.; MA (1974) Hebrew University, Israel; PhD (1981) Weizmann Institute of Science, Israel

**Bottero, Jean- Yves**, 1996. Adjunct Professor of Civil and Environmental Engineering
Docteur d'Etat es Sciences Physiques (1979) Université de Nancy, France

**Bowdoin, Natasha**, 2013. Assistant Professor in Visual and Dramatic Arts
BA (2003) Brandeis University; MFA (2007) Tyler School of Art

**Boyer, Dominic C**., 2009. Professor of Anthropology
BA (1992) Brown University; MA (1994), PhD (2000) University of Chicago

**Boylan, Richard Thomas**, 2005. Professor of Economics
BA (1986) Pitzer College; MS (1988), PhD (1991) California Institute of Technology

**Braam, Janet**, 1990. Professor of Biochemistry and Cell Biology and Department Chair of BioSciences
BS (1980) Southern Illinois University; PhD (1985) Sloan- Kettering Division of Cornell Graduate School of Medical Sciences

**Brace, Paul**, 1996. Clarence L. Carter Professor of Political Science
BS (1976) University of Oregon; MA (1979), PhD (1982) Michigan State University

**Bradford, Gwendolyn M**., 2010. Assistant Professor of Philosophy
BA (2003) University of Toronto; MA (2006), MPhil (2008), PhD (2010) Yale University

**Bradshaw, Stephen J**., 2010. William V. Vietti Junior Chair of Space Physics, Assistant Professor of Physics and Astronomy
MPhys (2000) University of Wales; PhD (2003) University of Cambridge

**Brandt, Anthony K**., 1998. Associate Professor of Composition and Theory

BA (1983) Harvard College; MA (1987) California Institute of the Arts; PhD (1993) Harvard University

**Bratter, Jenifer L**., 2006. Associate Professor of Sociology
BA (1995) Pennsylvania State University; MA (1998), PhD (2001) University of Texas–Austin

**Breikjern, Heather**, 2010. Lecturer of Theatre
BA (2002) University of Minnesota; MFA (2005) North Carolina School of the Arts

**Brennan, Marcia**, 2001. Professor of Religion and Art History, Faculty Fellow at Center for Teaching Excellence
BA (1988) Mt. Holyoke College; MA (1993), PhD (1997) Brown University

**Brinkley, Douglas G**., 2007. Professor of History
BA (1982) Ohio State University; MA (1983), PhD (1989) Georgetown University

**Brito, Dagobert L**., 1984. George A. Peterkin Professor of Political Economy
BA (1967), MA (1970), PhD (1970) Rice University

**Brody, Baruch**, 1975. Andrew W. Mellon Professor of Humanities, Professor of Philosophy
BA (1962) Brooklyn College; MA (1965), PhD (1967) Princeton University

**Brogioli, Michael C**., 2009. Adjunct Assistant Professor of Electrical and Computer Engineering
BS (1999) Rensselaer Polytechnic Institute; MS (2003), PhD (2007) Rice University

**Broker, Karin L**., 1980. Professor of Visual Arts
BFA (1972) University of Iowa; MFA (1980) University of Wisconsin–Madison

**Brooks, Philip R**., 1964. Professor of Chemistry
BS (1960) California Institute of Technology; PhD (1964) University of California–Berkeley

**Brown, Barry W**., 1970. Adjunct Professor of Statistics
BS (1959) University of Chicago; MS (1961), PhD (1963) University of California–Berkeley

**Brown, Bryan W**., 1983. Reginald Henry Hargrove Professor of Economics and Statistics
BA (1969), MA (1972) Texas Tech University; PhD (1977) University of Pennsylvania

**Brown, James N**., 1992. Professor of Economics
BA (1973) University of Redlands; MA (1975), PhD (1980) University of Chicago

**Brown, Richard**, 1984. Professor of Percussion, Chair of Percussion and Harp
BME (1969) Temple University; MMus (1971) Catholic University of America

**Brownell, William**, 2000. Adjunct Professor of Bioengineering
SB (1968), PhD (1973) University of Chicago

**Browning, Logan D**., 1991. Professor of the Practice; Publisher, Executive Editor, SEL Studies in English Literature, 1500–1900
BA (1977) University of the South; MA (1980) Oxford University; PhD (1999) University of North Carolina–Chapel Hill

**Bryant, John B**., 1981. Henry S. Fox Sr. Professor of Economics, Professor of Management
BA (1969) Oberlin College; MS (1973), PhD (1975) Carnegie Mellon University

**Buchman, Rachel**, 2005. Lecturer of Music
BA (1978) Vassar College

**Bufetov, Alexander I**., 2006. Adjunct Assistant Professor of Mathematics
BS (2000) Independent University of Moscow; PhD (2005) Princeton University

**Burch, James L**., 1990. Adjunct Professor of Physics and Astronomy
BS (1964) St. Mary's University; PhD (1968) Rice University; MSA (1973) George Washington University

**Butler, Alexander W**., 2009. Professor of Finance
BA (1992) Rice University; MB (1996), PhD (1999) Indiana University

**Butler, Barbara**, 2013. Professor of Trumpet and Director of Artist Diploma Program
BMus (1974) Northwestern University

**Buyse, Leone**, 1997. Joseph and Ida Kirkland Mullen Professor of Flute, Chair of Woodwinds
BM (1968) Eastman School of Music; Certificat d'Etudes (1970) Paris Conservatory; MM (1980) Emporia State University

**Byrd, Alexander X**., 2001. Associate Professor of History, Master of Wiess College
BA (1990) Rice University; MA (1996), PhD (2001) Duke University

**Byrne, John H**., 1994. Adjunct Professor of Psychology and Electrical and Computer Engineering
BS (1968), MA (1970), PhD (1973) Polytechnic Institute, Brooklyn

**Byrne, Michael D**., 1999. Professor of Psychology
BA (1991), BS (1991) University of Michigan; MS (1993), MS (1995), PhD (1996) Georgia Institute of Technology

**Cain, Chester R**., 2008. Adjunct Assistant Professor of Anthropology
BA (1992) Rice University; AM (1994), PhD (2000) Washington University–St. Louis

**Caldwell, Peter C**., 1994. Samuel G. McCann Professor of History
BA (1987) New York University; MA (1990), PhD (1993) Cornell University

**Campana, Jr., Joseph A**., 2006. Alan Dugald McKillop Chair in English, Associate Professor of English Literature
BA (1996) Williams College; MA (1997) University of Sussex; MA (2000), PhD (2003) Cornell University

**Cannady, William Tillman**, 1964. Professor of Architecture
BArch (1961) University of California–Berkeley; MArch (1962) Harvard University

**Cantor, Scott**, 2006. Adjunct Professor of Statisics
BA (1981) Yale University; MA, SM ( 1987), PhD (1991) Harvard University

**Caprette, David R**., 1992. Lecturer of Biochemistry and Cell Biology
BS (1974) Case Western Reserve University; MS (1979), PhD (1982) Cleveland State University

**Carpenter, Tei**, 2013. Wortham Visiting Lecturer in Architecture
BA (2005) Brown University; March (2011) Princeton University

**Carroll, Michael M**., 1988. Burton J. and Ann M. McMurtry Professor of Engineering in Mechanical Engineering and Computational and Applied Mathematics
BA (1958), MA (1959) University College Galway; PhD (1964) Brown University

**Carroll, Royce A**., 2007. Associate Professor of Political Science
BA (2000) University of Texas–Austin; MA (2004), PhD (2007) University of California–San Diego

**Carson, Daniel D**., 2009. Vice Provost for Strategic Partnerships, Schlumberger Chair of Advanced Studies and Research, Professor of Biochemistry and Cell Biology
BS (1975) University of Pennsylvania; PhD (1979) Temple University

**Carter, Richard**, 1997. Adjunct Professor of Computational and Applied Mathematics
BS (1979) Mississippi State University; PhD (1986) Rice University

**Cartwright Jr, Robert S**., 1980. Professor of Computer Science
BA (1971) Harvard College; MA (1973), PhD (1973) Stanford University

**Casbarian, John Joseph**, 1973. Harry K. and Albert K. Smith Professor of Architecture
BA (1969) Rice University; MFA (1971) California Institute of the Arts; BArch (1972) Rice University

**Castillo, Edward**, 2010. Adjunct Assistant Professor of Computational and Applied Mathematics
BA (2001) St. Mary's University; MA (2005), PhD (2007) Rice University

**Cates, Mary Susan**, 2003. Lecturer of Biochemistry and Cell Biology
BS (1995) University of Houston; PhD (2000) Rice University

**Cavallaro, Joseph R**., 1988. Professor of Electrical and Computer Engineering and Computer Science
BSEE (1981) University of Pennsylvania; MSEE (1982) Princeton University; PhD (1988) Cornell University

**Cech, Erin**, 2012. Assistant Professor of Sociology
BS (2005) Montana State University; MS (2008) University of California, San Diego; PhD (2011) University of California, San Diego

**Cevher, Volkan**, 2010. Faculty Fellow of Electrical and Computer Engineering
BS (1999) Bilkent University, Turkey; PhD (2005) Georgia Institute of Technology

**Chan, Anthony A**., 1993. Professor of Physics and Astronomy
BSc (1982), MSc (1984) University of Auckland; MA (1986), PhD (1989) Princeton University

**Chan, Jesse**, 2013. Pfeiffer Postdoctoral Instructor of Computational and Applied Mathematics
BA (2008) Rice University; PhD (2013) University of Texas–Austin

**Chang-Diaz, Franklin R**., 1998. Adjunct Professor of Physics and Astronomy
BS (1973) University of Connecticut; PhD (1977) Massachusetts Institute of Technology

**Chapman, Walter G**., 1990. William W. Akers Professor of Chemical and Biomolecular Engineering, Department Chair of Chemical and Biomolecular Engineering
BS (1983) Clemson University; PhD (1988) Cornell University

**Chaudhuri, Swarat**, 2011. Assistant Professor of Computer Science
BTech (2001) Indian Institute of Technology, Kharagpur; PhD (2007) University of Pennsylvania

**Chavez, Sergio**, 2010. Assistant Professor of Sociology
BA (1996), MS (1998) University of California–Davis; MS (2002), PhD (2007) Cornell University

**Chehab, E. Wassim**, 2010. Faculty Fellow in Biochemistry and Cell Biology
BS (1993) American University of Beirut; PhD (2003) University of Nevada, Reno

**Chen, Shih-Hui**, 2000. Associate Professor of Composition and Theory
Diploma (1982) National Academy of the Arts, Taiwan; MM (1985) Northern Illinois University; DMA (1993) Boston University

**Chen, Wei**, 2005. Adjunct Professor of Civil and Environmental Engineering
BS (1992) Nankai University, Tianjin, China; MS (1997), PhD (2000) Rice University

**Chiu, Wah**, 2004. Adjunct Professor of Computer Science
BA (1969), PhD (1975) University of California– Berkeley

**Cibor, Joseph**, 2001. Professor of the Practice in Civil Engineering Management
BS (1976), MS (1978) Purdue University

**Citron, Marcia J**., 1976. Martha and Henry Malcolm Lovett Distinguished Service Professor of Musicology
BA (1966) Brooklyn College; MA (1968), PhD (1971) University of North Carolina

**Ciufolini, Marco A**., 2000. Adjunct Professor of Chemistry
BS (1978) Spring Hill College; PhD (1981) University of Michigan

**Clark Jr, John W**., 1968. Professor of Electrical and Computer Engineering and Bioengineering
BS (1962) Christian Brothers College; MS (1965), PhD (1967) Case Western Reserve University

**Clementi, Cecilia**, 2001. Wiess Career Development Chair, Professor of Chemistry and of Chemical and Biomolecular Engineering
BS (1995) University of Florence; MS (1996), PhD (1998) International School for Advanced Studies, Italy

**Clements, Niki**, 2014. Watt and Lilly Jackson Assistant Professor of Biblical Studies, Assistant Professor of Religion
BA (2003) Sarah Lawrence; MTS (2007) Harvard Divinity School, PhD (2014) Brown University

**Cochran, Tim D**., 1990. Professor of Mathematics
BS (1977) Massachusetts Institute of Technology; MA (1979), PhD (1982) University of California–Berkeley

**Cohan, Daniel**, 2006. Associate Professor of Civil and Environmental Engineering
BA (1998) Harvard University; PhD (2004) Georgia Institute of Technology

**Cohan, Dinah A.**, 2009. Assistant Professor of Marketing
MA, MS (1999) Ulyanovsk State University, Russia; PhD (2009) Duke University

**Cohen, G. Daniel**, 2003. Associate Professor of History, Associate of McMurtry College
BA (1991) Tel Aviv University; MA (1992) Institute of French Studies; MA (1993), PhD (2000) New York University

**Colman, Scott**, 2010. Senior Lecturer of Architecture
BS (1994), PhD (1998) University of Sydney; M.Arch (2006) Ohio State University

**Colopy, Andrew**, 2014. Assistant Professor of Architecture
BS (2003) Ohio State University; MArch (2006) Columbia University

**Comer, Krista**, 1998. Associate Professor of English, Master of Brown College
BA (1988) Wellesley College; PhD (1996) Brown University

**Connelly, Brian**, 1984. Artist Teacher of Piano and Director of Piano Chamber Music and Accompanying Program
BMus (1980), MMus (1983) University of Michigan

**Cook, David**, 2001. Associate Professor of Religion, Associate of Brown College
BA (1994), MA (1996) Hebrew University; PhD (2001) University of Chicago

**Cooper, Keith D**., 1990. L. John and Ann H. Doerr Chair in Computational Engineering, Professor of Computer Science, Professor of Electrical and Computer Engineering
BS (1978), MA (1982), PhD (1983) Rice University

**Corcoran, Marjorie D**., 1980. Professor of Physics and Astronomy
BS (1972) University of Dayton; PhD (1977) Indiana University

**Cornwell, John M**., 2007. Associate Vice President for Institutional Effectiveness, Adjunct Professor of Psychology
BA (1977) Capital University; MS (1982) Georgia Institute of Technology; PhD (1987) University of Tennessee

**Costello, Leo**, 2005. Associate Professor of Art History
BA (1993) Skidmore College; MA (1996) American University–Washington, D.C.; MA (1999), PhD (2002) Bryn Mawr College

**Cowan, Kenneth**, 2012. Associate Professor of Organ
BMus (1997) Curtis Institute of Music; MMus (1999), Artist Diploma (2000) Yale University School of Music

**Cox, Alan L**., 1991. Professor of Computer Science and of Electrical and Computer Engineering
BS (1986) Carnegie Mellon University; MS (1988), PhD (1991) University of Rochester

**Cox, Dennis**, 1992. Professor of Statistics, Associate Department Chair in the Department of Statistics
BA (1972) University of Colorado; MS (1976) University of Denver; PhD (1980) University of Washington

**Cox, Edward L**., 1989. Associate Professor of History, Associate of Martel College
BA (1970) University of the West Indies; MA (1973), PhD (1977) Johns Hopkins University

**Cox, Kenneth R**., 2000. Professor in the Practice of Chemical and Biomolecular Engineering
BS (1974) Ohio State University; MS (1977), PhD (1979) University of Illinois

**Cox, Steven J**., 1988. Professor of Computational and Applied Mathematics
BS (1982), MS (1983) Marquette University; PhD (1988) Rensselaer Polytechnic Institute

**Crane, Alan David**, 2010. Assistant Professor of Finance
BS (2002), BA (2002) Trinity University; PhD (2010) University of Texas–Austin

**Creek, Jefferson L**., 2007. Adjunct Professor of Chemical and Biomolecular Engineering
BS (1967) Middle Tennessee State University; MS (1969), PhD (1975) Southern Illinois University–Carbondale

**Cronin, Justin C**., 2003. Distinguished Faculty Fellow in English
BA (1984) Harvard University; MFA (1989) University of Iowa

**Cronin, Thomas W**., 2011. Adjunct Professor of Electrical and Computer Engineering
BS (1967) Dickinson College; MS (1969), PhD (1979) Duke University

**Crotty, Kevin**, 2012. Assistant Professor of Finance
BMus (2004), MAcco (2005) University of North Carolina; PhD (2012) Kellogg School of Management, Northwestern University

**Crowell, Steven G**., 1983. Joseph and Joanna Nazro Mullen Professor of Philosophy, Department Chair of Philosophy
AB (1974) University of California at Santa Cruz; MA (1976) Northern Illinois University; PhD (1981) Yale University

**Cruz, Miguel**, 2007. Adjunct Assistant Professor of Bioengineering
BS (1983) University of Puerto Rico; PhD (1989) University of Puerto Rico–School of Medicine

**Cunha Flávio**, 2014. Associate Professor of Economics
MS (2000) Fundação Getúlio Vargas; PhD (2007) University of Chicago

**Cuthbertson, Gilbert Morris**, 1963. Professor of Political Science
BA (1959) University of Kansas; PhD (1963) Harvard University

**Cutler, Scott E**., 2001. Professor in the Practice of Computer Technology
BS (1973), MS (1973), PhD (1976) Massachusetts Institute of Technology

**Dabaghian, Yuri A**., 2010. Assistant Professor of Computational and Applied Mathematics
MS (1992) Landau Institute for Theoretical Physics and Moscow Institute for Physics and Technology; PhD (1999) University of Rhode Island

**Dabak, Anand**, 2003. Adjunct Associate Professor of Electrical and Computer Engineering
BTech (1987) Indian Institute of Technology; MS (1989), PhD (1992) Rice University

**Dabney, James B**., 2000. Adjunct Professor of Mechanical Engineering
BS (1974) Virginia Polytechnic Institute and State University; MS (1993) University of Houston–Clear Lake; PhD (1998) Rice University

**Dacso, Clifford C**., 2010. Adjunct Professor of Electrical and Computer Engineering
BA (1972), MA (1972) University of Pennsylvania; MD (1975) Baylor College of Medicine; MPH (1980) University of Texas School of Public Health; MBA (1990) Pepperdine University

**Dai, Pengcheng**, 2013. Professor of Physics and Astronomy
BS (1984) Zhenzhou University, PhD (1993) University of Missouri

**Damanik, David**, 2006. Professor of Mathematics, Department Chair of Mathematics
BS (1995) Mathematics, BS (1996) Computer Science, PhD (1998) Johann Wolfgang Goethe-Universität

**Damjanovic´, Danijela**, 2009. Associate Professor of Mathematics
Diploma (1997) Belgrade University; PhD (2004) Pennsylvania State University

**Danbom, Stephen**, 2001. Adjunct Professor of Earth Science
BS (1966), MS (1969) Texas Tech University; PhD (1975) University of Connecticut

**Dane, Erik**, 2007. Associate Professor of Management
BA (2001), MBA (2002) Tulane University; PhD (2007) University of Illinois–Urbana-Champaign

**Dannemiller, James L**., 2004. Lynette S. Autrey Professor of Psychology
BA (1974) Northwestern University; PhD (1983) University of Texas–Austin

**Dasgupta, Rajdeep**, 2008. Associate Professor of Earth Science
BSc (1998), MSc (2000) Jadavpur University, India; PhD (2006) University of Minnesota

**DeConick, April D**., 2006. Isla Carroll Turner and Percy Turner Professor of Religion, Department Chair of Religion
AB (1987), MA (1988), PhD (1994) University of Michigan

**Deem, Michael W**., 2002. John W. Cox Professor of Biochemical and Genetic Engineering; Professor of Physics and Astronomy; Department Chair of Bioengineering; Director of Graduate Program in Systems, Synthetic, and Physical Biology
BS (1991) California Institute of Technology; PhD (1994) University of California–Berkeley

**de Luna, Kathryn M**., 2009. Adjunct Assistant Professor of History
BA (2001) University of South Carolina; MA (2002), PhD (2008) Northwestern University

**DeAngelis, David**, 2012. Assistant Professor of Finance
BBA (2004) HEC Montreal; MA (2006) University of Montreal; PhD (2012) Cornell University

**Delk, Nikki**, 2012. Faculty Fellow of Biochemistry and Cell Biology
BS (1996) Georgetown University; PhD (2006) Rice University

**Denney, Justin T**., 2010. Assistant Professor of Sociology
BS (2000) Morningside College; MA (2002) University of Montana–Missoula; PhD (2010) University of Colorado–Boulder

**DerHovsepian, Joan**, 2001. Artist Teacher of Viola
BM (1991), MM (1994) Eastman School of Music

**Dermont, Amber**, 2013. Gladys Louise Fox Associate Professor of English
BA (1993) Vassar College, MA (1996) Emerson College, MFA (1998) University of Iowa, Iowa Writers Workshop, PhD (2006) University of Houston

**Derrick, Scott S**., 1990. Associate Professor of English
BA (1975) Albright College; MA (1978) University of Chicago; PhD (1987) University of Pennsylvania

**DeVore, Ronald A**., 2009. Adjunct Professor of Electrical and Computer Engineering
BS (1964) Eastern Michigan University; PhD (1967) Ohio State University

**Dholakia, Utpal**, 2001. Professor of Management
BE (1993) University of Bombay; MS (1994) Ohio State University; MS (1997), PhD (1998) University of Michigan–Ann Arbor

**Diamond, John**, 2006. Adjunct Assistant Professor of Economics and Lecturer of Economics
BS (1993) Texas A&M University; MA (1999), PhD (2000) Rice University

**Diaz-Saiz, Joaquin**, 2000. Adjunct Associate Professor of Statistics
BS (1966) Instituto Tecnologico y de Estudios Superiores de Monterrey; MS (1968) Centro Interamericano de Enscnanza de Estadistica; PhD (1985) Oklahoma State University

**Dib, Lina**, 2014. Lecturer in the Program in Writing and Communication
DEC Fine Arts (1999) Cégep St-Laurent; BSc (2002), MSc (2006) Université de Montréal; PhD (2013) Rice University

**Dick, Andrew J**., 2007. Assistant Professor of Mechanical Engineering
BS (2003), MS (2003) Rochester Institute of Technology; PhD University of Maryland–College Park

**Dick, Christopher H**., 2005. Adjunct Professor of Electrical and Computer Engineering
BSci (1984), PhD (1996) La Trobe University, Melbourne, Australia

**Dickens, Gerald R**., 2001. Professor of Earth Science
BS (1989) University of California, Davis; MS (1993), PhD (1996) University of Michigan

**Dickinson, Debra**, 1993. Artist Teacher of Opera Studies
BS (1975) Northwestern University; MA (1991) Hunter College

**Dickinson, Mary**, 2006. Adjunct Professor of Bioengineering
BS (1989) Vanderbilt University; MA (1992), PhD (1996) Columbia University

**Dickman, J. David**, 2012. Adjunct Professor of Psychology, Director of the Neuroscience Program
BA (1979) University of Oklahoma; MS, PhD (1985) University of Wyoming

**Diddel, Roberta M**., 1985. Adjunct Assistant Professor of Psychology
BA (1976) Wesleyan University; PhD (1989) Boston University

**Diehl, Michael**, 2005. Associate Professor of Bioengineering and of Chemistry
BA (1997) The College of New Jersey; PhD (2002) University of California–Los Angeles

**DiLorenzo, Daniel John**, 2010. Adjunct Professor of Electrical and Computer Engineering
BS (1987), MS (1988), MBA (1999), PhD (1999) Massachusetts Institute of Technology

**Disch, James G**., 1973. Associate Professor of Sport Management
BS (1969), MEd (1970) University of Houston; PED (1973) Indiana University

**Dixon, Richard A**., 2003. Adjunct Professor of Biochemistry and Cell Biology
BA (1973), MA (1976), PhD (1976) University of Oxford

**Djerejian, Edward P**., 1994. Edward A. and Hermena Hancock Kelly University Chair for Senior Scholars, Janice and Robert McNair Director of the James A. Baker III Institute for Public Policy
BS (1960), Doctor of Humanities (Hon) (1992) Georgetown University

**Do, Kim-Anh**, 1999. Adjunct Professor of Statistics
BS (1983) Queensland University; MS (1985), PhD (1990) Stanford University

**Dobelman, John**, 2008. Professor in the Practice, Director of Professional Master's Program
BS (1979), MBPM (1985), PhD (2004) Rice University

**Dodds, Stanley A**., 1977. Associate Professor of Physics and Astronomy, Associate of Wiess College
BS (1968) Harvey Mudd College; PhD (1975) Cornell University

**Doerr, Harold K**., 2004. Adjunct Assistant Professor of Psychology
BA (1979) Rutgers University; MD (1987) University of Texas Health Science Center

**Dongarra, Jack**, 1988. Adjunct Professor of Computer Science
BS (1972) Chicago State University; MS (1973) Illinois Institute of Technology; PhD (1980) University of New Mexico

**Doody, Terrence Arthur**, 1970. Professor of English
AB (1965) Providence College; MA (1969), PhD (1970) Cornell University

**Dove, Charles**, 2001. Professor in the Practice of Film, Director of Rice Cinema
BA (1984) University of Illinois; MA (1988), PhD (1995) Johns Hopkins University

**Dow, David R.**, 2012. Rorschach Visiting Professor in History
BA (1981) Rice University; MA (1982) Yale University; JD (1985) Yale Law School

**Dravis, Jeffrey, J**., 1987. Adjunct Professor of Earth Science
BS (1971) St. Mary's University; MS (1977) University of Miami; PhD (1980) Rice University

**Drezek, Rebekah Anna**, 2002. Professor of Bioengineering and of Electrical and Computer Engineering
BSE (1996) Duke University; PhD (2001) University of Texas– Austin

**Driskill, Linda P**., 1970. Research Professor in English
BA (1961), MA (1968), PhD (1970) Rice University

**Droxler, André W**., 1987. Professor of Earth Science
MS (1978) University of Neuchatel; PhD (1984) University of Miami

**Du, Rui-Rui**, 2004. Professor of Physics, Astronomy, and Nanoscale Physics
BS (1982) Fudan University; PhD (1990) University of Illinois

**Duarte, Jefferson**, 2008. Gerald D. Hines Associate Professor of Real Estate Finance
BS (1991) Eng. Instituto Technologico de Aeronautica, Brazil; MBA (2000), PhD (2000) University of Chicago

**Dudey, Marc Peter**, 1990. Associate Professor of Economics
BA (1980) University of Wisconsin at Madison; MS (1986) University of Southern California; PhD (1984) Princeton University

**Dueñas-Osorio, Leonardo**, 2006. Associate Professor of Civil and Environmental Engineering
BS (1996) Universidad de la Salle, Bogotá, Colombia; MS (1998) Universidad de los Andes, Bogotá, Colombia; MS (2000) Pontificia Universidad Javeriana, Bogotá, Colombia; MEng (2001) Massachusetts Institute of Technology; PhD (2005) Georgia Institute of Technology

**Dufour, Reginald J**., 1975. Professor of Physics and Astronomy
BS (1970) Louisiana State University; MS (1971), PhD (1974) University of Wisconsin–Madison

**Dugan, Brandon**, 2004. Associate Professor of Earth Science
BGeoE (1997) University of Minnesota; PhD (2003) Pennsylvania State University

**Dunham, Amy E**., 2007. Assistant Professor of Ecology and Evolutionary Biology
BA (1995) Connecticut College; PhD (2003) State University of New York–Stony Brook

**Dunham, James F**., 2001. Professor of Viola and Chamber Music
BFA (1972), MFA (1974) California Institute of the Arts

**Dunn, Susan**, 2002. Artist Teacher of Voice
BMus (1985), Graduate Diploma of Music (1987) Queensland Conservatorium of Music

**Dunning, F. Barry**, 1972. Sam and Helen Worden Professor of Physics and Astronomy
BSc (1966), PhD (1969) University College, London

**Duno-Gottberg, Luis**, 2008. Associate Professor of Spanish and Portuguese, Master of Duncan College
BA (1994) Universidad Central de Venezuela; MA (1996), PhD (2000) University of Pittsburgh

**Eagleman, David M.**, 2011. Adjunct Assistant Professor of Electrical and Computer Engineering
BA (1993) Rice University; PhD (1998) Baylor College of Medicine

**Ecklund, Elaine Howard**, 2008. Herbert S. Autrey Chair and Professor of Sociology
BS (1995), MA (2001), PhD (2004) Cornell University

**Ecklund, Karl M**., 2008. Assistant Professor of Physics and Astronomy
AB (1989) Princeton University; PhD (1996) Stanford University

**Egan, Scott**, 2014. Assistant Professor of Ecology and Evolutionary Biology
BA (1999) University of Texas–Austin; MS (2004) Texas State University–San Marcos, PhD (2010) Vanderbilt University

**Eich, Elizabeth**, 2006. Lecturer of Biochemistry and Cell Biology
BS (1998) Texas A&M University; PhD (2005) Rice University

**Eisner, Elmer**, 1988. Adjunct Professor of Computational and Applied Mathematics
BS (1939) Brooklyn College; PhD (1943) Johns Hopkins University

**El-Bakry, Amr**, 1998. Adjunct Associate Professor of Computational and Applied Mathematics
BS (1984) Alexandria University, Egypt; MA (1990), PhD (1991) Rice University

**El-Dahdah, Farès**, 1996. Professor of Humanities
BFA (1986), BArch (1987) Rhode Island School of Design; MAUD (1989), DDes (1992) Harvard University

**El-Gamal, Mahmoud A**., 1998. Chair of Islamic Economics, Finance, and Management; Professor of Economics; Professor of Statistics
BA (1983), MA (1985) American University, Cairo; MS (1985) Stanford University; PhD (1988) Northwestern University

**Ellenzweig, Sarah**, 2000. Associate Professor of English
BA (1990) Wesleyan University; MS (1996), PhD (2000) Rutgers University

**Elliot, James**, 2014. Associate Professor of Sociology in the School of Social Sciences
BA (1989) University of California–Santa Cruz; MS (1992), PhD (1997) University of Wisconsin–Madison

**Ellison, Paul V. H**., 1975. Lynette S. Autrey Professor of Double Bass, Chair of Strings
BME (1965) Eastern New Mexico University; MM (1966) Northwestern University

**Ellmore, Timothy M**., 2009. Adjunct Associate Professor of Psychology
BA (1998) George Washington University; MA (2003), PhD (2006) University of Arizona

**Emami, Maryam**, 2010. Lecturer of French
BA (1997), MA (1999) Teheran Azad Shomal University, Iran; MA (2005) University of California–Santa Barbara

**Embree, Mark P**., 2014. Adjunct Professor of Computational and Applied Mathematics
BS (1996) Virginia Polytechnic Institute and State University; DPhil (2000) University of Oxford

**Emden, Christian**, 2003. Professor of German Studies
BA (1995), BA (1996) University of Konstanz; MPhil (1997), PhD (2000) University of Cambridge

**Emerson, Michael O**., 1999. Allyn and Gladys Cline Professor of Sociology
BA (1998) Loyola University of Chicago; MA (1990), PhD (1991) University of North Carolina–Chapel Hill

**Engel, Paul S**., 1970. Professor of Chemistry
BS (1964) University of California at Los Angeles; PhD (1968) Harvard University

**Engelhardt Jr., Hugo Tristram**, 1982. Professor of Philosophy
BA (1963), PhD (1969) University of Texas at Austin; MD (1972) Tulane University School of Medicine

**Englebretson, Robert**, 2000. Associate Professor of Linguistics
BA (1992), MA (1996), PhD (2000) University of California–Santa Barbara

**Ensor, Katherine Bennett**, 1987. Professor of Statistics
BSE (1981), MS (1982) Arkansas State University; PhD (1986) Texas A&M University

**Eraslan, Hülya,** 2014. Professor of Economics
BS (1991) Bilkent University; MA (1994) State University of New York-Buffalo, PhD (2001) University of Minnesota

**Ernst, Philip A.**, 2014. Assistant Professor of Statistics
AB (2007) Harvard University; AM (2010), PhD (2014) University of Pennsylvania

**Esarey, Justin**, 2012. Assistant Professor of Political Science
BA and BS (2002) Bowling Green State University; MS (2004) Florida State University; PhD (2008) Florida State University

**Etnyre, Bruce**, 1984. Professor of Kinesiology
BS (1973) Valparaiso University; MS (1977) Purdue University; PhD (1984) University of Texas– Austin

**Fang, Songying**, 2009. Assistant Professor of Political Science
BS (1990) Science and Technology University of Beijing; MA (1996) Renmin University of China; MA (2000)

Binghamton University SUNY; PhD (2006) University of Rochester

**Fang, Zheyu**, 2013. Adjunct Assistant Professor of Electrical and Computer Engineering
BA (2006) Nankai University; PhD (2011) Peking University

**Fanger, Claire**, 2009. Assistant Professor of Religion
BA (1979) Reed College; MA (1983) Boston University; MA (1987), PhD (1994) University of Toronto

**Farach- Carson, Mary C**., 2009. Ralph and Dorothy Looney Professor of Biochemistry and Cell Biology and Bioengineering, Vice Provost for Translational Biosciences (on leave)
BS (1978) University of South Carolina; PhD (1982) Medical College of Virginia/Virginia Commonwealth University

**Faubion, James D**., 1993. Professor of Anthropology, Radoslav A. Tsanoff Chair of Public Affairs in the Department of Anthropology, Associate of Jones College
BA (1980) Reed College; MA (1984), PhD (1990) University of California–Berkeley

**Feeback, Daniel L**., 1997. Adjunct Professor of Biochemistry and Cell Biology
BS (1978) Missouri Western State College; PhD (1982) University of Oklahoma Health Sciences Center

**Ferrari, Mauro**, 2006. Adjunct Professor of Bioengineering
Dottore in Matematica (1985) Universitá di Padova, Italy; MS (1987), PhD (1989) University of California–Berkeley

**Ferris, David**, 1998. Associate Professor of Musicology
BM (1982) New England Conservatory; PhD (1993) Brandeis University

**Festa, Elizabeth A**., 2007. Lecturer in the Program in Writing and Communication
BA (1995) University of Notre Dame; MA (2000), PhD (2007) Vanderbilt University

**Fette, Julie**, 2005.Associate Professor of French Studies
BS (1989) Georgetown University; MA (1994) New York University; DEA (1995) Ecole Normale Superieure & Ecole des Hautes Etudes en Science; M Phil (1997) New York University; Doctorat (2001) Ecole des Hautes Etudes en Sciences; PhD (2001) New York University

**Few Jr, Arthur A.,** 1970. Research Professor in Physics and Astronomy
BS (1962) Southwestern University; MBS (1965) University of Colorado; PhD (1969) Rice University

**Finley, Dawn**, 2001. Associate Professor of Architecture
BS (1993) University of Michigan; MArch (1999) Rice University

**Fischer, Cornelius**, 2009. Adjunct Assistant Professor of Earth Science
PhD (2002) Institut für Growissenschaften, Friedrich-Schiller Universität, Jena, Germany

**Fischer, Jeanne K**., 1992. Artist Teacher of Piano and Collaborative Skills
BMus (1971) Oberlin College; MMus (1977) New England Conservatory of Music

**Fischer, Norman**, 1992. Herbert S. Autrey Professor of Cello
BMus (1971) Oberlin College

**Fischer-Baum, Simon J.**, 2012. Assistant Professor of Psychology
BA (2003) Columbia University; PhD (2010) Johns Hopkins University

**Fisher, Ronald E**., 2002. Adjunct Assistant Professor of Psychology
BA (1982) Brandeis University; PhD (1990), MD (1991) Baylor College of Medicine

**Fleishacker, Alan**, 2003. Senior Lecturer of Architecture
BA (1973) Oklahoma State University; JD (1976) University of Oklahoma

**Fleisher, Jeffrey B**., 2007. Associate Professor of Anthropology
BA (1992), MA (1997), PhD (2003) University of Virginia

**Fleming, Jefferson D**., 1993. Fayez Sarofim Vanguard Professor of Finance
BA (1987) Cornell College; MBA (1989), PhD (1993) Duke University

**Floyd, Eric**, 2014. Assistant Professor of Accounting
BA (2009) University of Chicago; PhD (2014) University of Chicago, Booth School of Business

**Foote, Jill**, 2003. Senior Lecturer of Finance
BA (1987) Rice University; MA (1992) New York University; PhD (2002) Fordham University

**Foster, Aaron**, 2011. Adjunct Assistant Professor of Bioengineering
BA (1994) University of Puget Sound; PhD (2003) University of Sydney, Australia

**Foster, Matthew S**., 2012. Assistant Professor of Physics and Astronomy
B. of Eng. (2000) The Cooper Union for the Advancement of Science and Art; PhD (2006) University of California, Santa Barbara

**Fox, David Stephen**, 1990. Lecturer of Architecture
BA (1973), BArch (1975) Rice University

**Fox, Robert O**., 2003. Adjunct Professor of Biochemistry and Cell Biology
BS (1976) University of Pittsburgh; MPhil (1978), PhD (1981) Yale University

**Franklin, Amy**, 2009. Adjunct Assistant Professor of Cognitive Sciences
BS (1999) University of Houston; MA (2007), PhD ( 2007) University of Chicago

**Frantz, Gene**, 2012. Professor in the Practice of Electrical and Computer Engineering
BSEE (1971) University of Central Florida; MSEE (1977) Southern Methodist University; MBA (1982) Texas Tech University

**Fraser, Charles D**., 2005. Adjunct Professor of Bioengineering
BA (1980) University of Texas at Austin; MD (1984) University of Texas Medical Branch– Galveston

**French, Christopher**, 1999. Artist Teacher of Cello Orchestral Repertoire
BMus (1982) North Park University

**Fronczyk, Kassandra**, 2011. VIGRE Postdoctoral Instructor
BS (2006), MS (2007) Brigham Young University; PhD (2011) University of California-Santa Cruz

**Fu, Liang**, 2010. Lecturer of Chinese
BA (1991) Central China Normal University; MA (1999) Beijing University of Aeronautics and Astronautics; MBA (2002) Miami University

**Fukuyama, Tohru**, 1995. Adjunct Professor of Chemistry
BS (1971), MS (1973) Nagoya University; PhD (1977) Harvard University

**Furr, James**, 2003. Senior Lecturer of Architecture
BArch (1969) Louisiana State University

**Gabbiani, Fabrizio**, 2004. Adjunct Assistant Professor of Computational and Applied Mathematics
MS (1989) Swiss Federal Institute of Technology, Switzerland; PhD (1992) Institute of Theoretical Physics, Switzerland

**Gao, Zhiyong**, 1986. Associate Professor of Mathematics
BA (1979) Fudan University; PhD (1984) State University of New York–Stony Brook

**Gaytán, Raquel**, 1996. Senior Lecturer of Spanish
BA (1993), MA (1996) Rice University

**Geiser, Reto**, 2011. Wortham Assistant Professor of Architecture
MArch (2002), PhD (2010) ETH Zurich

**George, Jennifer M**., 1999. Mary Gibbs Jones Professor of Management, Professor of Psychology
BA (1977) Weslayan University; MBA (1979), PhD (1987) New York University

**Georges, Eugenia**, 1986. Professor of Anthropology, Department Chair of Anthropology
BA (1970) Florida Presbyterian College; MA (1971) Tulane University; PhD (1985) Columbia University

**Geurts, Franciscus Johannes Maria**, 2008. Assistant Professor of Physics and Astronomy
Propedeuse Physics (1988), MS (1992), PhD (1998) Universiteit Utrecht, The Netherlands

**Geyer, Charles**, 2013. Professor of Trumpet, Chair of Brass
B.Music Education, Northwestern University, MM (1969) University of Maryland-College Park

**Ghorbel, Fathi**, 1994. Professor of Mechanical Engineering and Bioengineering
BS (1985) Pennsylvania State University; MS (1987) Carnegie Mellon University; PhD (1991) University of Illinois

**Gibson, Brian**, 1996. Assistant Professor of the Practice of Kinesiology
BA (1990), MA (1993), PhD (1996) University of Texas–Austin

**Gilbertson, Michelle**, 2009. Wiess Instructor of Chemistry
BS (1990) Valparaiso University; MS (1992), PhD (1994) Northwestern University

**Gillenwater, Ann M**., 2006. Adjunct Professor of Bioengineering
BA (1983) Brown University; MD (1987) University of Virginia– Charlottesville

**Gillis, Malcolm**, 1993. University Professor, Ervin Kenneth Zingler Professor of Economics, Professor of Management
BA (1962), MA (1963) University of Florida; PhD (1968) University of Illinois

**Gillman, Adrianna**, 2014. Assistant Professor of Computational and Applied Mathematics
BS (2003), MS (2006) California State University–Northridge; PhD (2011) University of Colorado–Boulder

**Girault, Vivette Claire**, 2014. Visiting Professor of Computational and Applied Mathematics
BS (1963) McGill University; PhD (1996) Faculté des Sciences de Paris; Habilitation (2002) Université Pierre et Marie Curie

**Glassberg, Jeffrey**, 2007. Adjunct Professor of Ecology and Evolutionary Biology
BS (1969) Tufts University; PhD (1976) Rice University; JD (1993) Columbia University School of Law

**Glick, William H**., 2005. Dean of the Jesse H. Jones Graduate School of Business, H. J. Nelson III Professor of Management
AB (1975) University of Michigan; PhD (1981) University of California–Berkeley

**Glowinski, Roland**, 1986. Adjunct Professor of Computational and Applied Mathematics
Ecole Polytechnique (1958); Ecole Nationale Superiewe das Telecommunications; PhD (1970) University of Paris

**Goetz, Rebecca A**., 2006. Adjunct Associate Professor of History, Associate of Baker College
BA (2000) Bates College; MA (2002), PhD (2006) Harvard University

**Goldman, Ronald N**., 1990. Professor of Computer Science
BS (1968) Massachusetts Institute of Technology; MA, PhD (1973) Johns Hopkins University

**Goldsmith, Kenneth**, 1991. Professor of Violin
BM (1966) George Peabody College for Teachers; MA (1968) Leland Stanford University

**Gonnermann, Helge**, 2009. Assistant Professor of Earth Science
BA (1992) University of Montana; MS (1995) University of Arizona–Tucson; PhD (2004) University of California–Berkeley

**Gonzalez, Ramon**, 2005. Professor of Chemical and Biomolecular Engineering
BS (1993) Central University of Las Villas, Cuba; MS (1999) Catholic University of Valparaiso, Chile; PhD (2001) University of Chile

**González-Stephan, Beatriz**, 2001. Lee Hage Jamail Chair of Latin American Literature, Professor of Spanish and Portuguese
BA (1974) Universidad Católica Andres Bello, Caracas, Venezuela; MA (1981) Instituto Universitario Pedagógico de Caracas, Venezuela; PhD (1985) University of Pittsburgh

**Gordon, Richard G**., 1995. W. M. Keck Professor of Earth Science, Department Chair of Earth Science, Associate of Lovett College
BA (1975) University of California–Santa Cruz; MS (1977), PhD (1979) Stanford University

**Gorlova, Olga Y**., (2004) Adjunct Associate Professor of Statistics
MSc (1992) Novosibirsk University; PhD (2000) Novosibirsk University

**Gorman, Bridget K**., 2002. Professor of Sociology, Department Chair of Sociology, Associate of Jones College
BA (1994) Western Washington University; MA (1996), PhD (2000) Pennsylvania State University

**Gorry, G. Anthony**, 1976. Friedkin Professor of Management, Professor of Computer Science
BE (1962) Yale University; MS (1963) University of California–Berkeley; PhD (1967) Massachusetts Institute of Technology

**Gottschalk, Arthur W**., 1977. Professor of Composition and Theory
BMus (1974), MA (1975), DMA (1978) University of Michigan

**Goux, Jean-Joseph**, 1990. Adjunct Research Professor
Licence de Philosophie (1965), DES Philosophie (1966), Doctorat du 3ème cycle de Philosophie (1973), Doctorat d'Elat es Lettres et Sciences Humaines (1988) Sorbonne, Paris

**Grace, Morgan L.**, 2013. Lecturer in Communications
BA (2005), MA (2011 Texas Tech University

**Grande-Allen, Kathryn Jane**, 2003. Professor of Bioengineering
BA (1991) Transylvania University; PhD (1998) University of Washington

**Grandy, Richard E**., 1980. Carolyn and Fred McManis Professor of Philosophy
BA (1963) University of Pittsburgh; MA (1965), PhD (1968) Princeton University

**Greig, Nancy**, 1991. Adjunct Assistant Professor of Ecology and Evolutionary Biology
BA (1980), PhD (1991) University of Texas–Austin

**Greiner, John**, 1997. Lecturer of Computer Science
BA (1989) Rice University; MS (1992), PhD (1997) Carnegie Mellon University

**Greitzer, Mary**, 2013. Lecturer in Music
BM (1994) Eastman School of Music; MM (1998) New England Conservatory; PhD (2007) Harvard University

**Grenader, Nonya S**., 1995. Professor in the Practice of Architecture
BArch (1976) University of Texas; MArch (1994) Rice University

**Griffin, Robert, J**., 2008. Professor of Civil and Environmental Engineering
BS (1993) Tufts University; MS (1997), PhD (2000) California Institute of Technology

**Gruber, Ira Dempsey**, 1966. Research Professor of History
AB (1955), MA (1959), PhD (1961) Duke University

**Grullon, Gustavo**, 1998. Professor of Finance
BBA (1991) University of Puerto Rico; PhD (1998) Cornell University

**Guerra, Rudy**, 2001. Professor of Statistics
BS (1984) University of Texas–San Antonio; MA (1987), PhD (1992) University of California–Berkeley

**Guerrero, Thomas M**., 2005. Adjunct Associate Professor of Computational and Applied Mathematics
BA (1983) University of California–San Diego; MS (1987) San Diego State University; PhD (1994), MD (1997) University of Southern California–Los Angeles

**Guindani, Michele**, 2011. Adjunct Professor of Statistics
BS (2001), MS (2001), PhD (2005) Universita Commerciale Luigi Bocconi

**Gurewitz, Omer**, 2012. Adjunct Lecturer in Electrical and Computer Engineering
BA (1990) Ben Gurion University of the Negev-Beer Sheva; MS (2000), PhD (2005) Technion-Israel Institute of Technology-Haifa

**Gustin, Michael C**., 1988. Professor of Biochemistry and Cell Biology
AB (1974) Johns Hopkins University; PhD (1981) Yale University

**Guthrie Shimizu, Sayuri**, 2014. Professor of History and Dunlevie Family Chair in History
BA (1982) Sophia University; JD (1987) Hitosubashi University; MA (1989), PhD (1992) Cornell University

**Gutiérrez, Manuel**, 2010. Assistant Professor of Spanish and Portuguese
BA (2001), MA (2003) University of California–Santa Cruz; MA (2007), PhD (2009) University of California–Los Angeles

**Hafner, Jason H**., 2001. Associate Professor of Physics and Astronomy and of Chemistry
BS (1993) Trinity University; MA (1996), PhD (1998) Rice University

**Halas, Naomi J**., 1989. Stanley C. Moore Professor of Electrical and Computer Engineering, Professor of Chemistry, of Biomedical Engineering, of Physics and Astronomy, and of Materials Science and NanoEngineering
BA (1980) La Salle College; MA (1984), PhD (1986) Bryn Mawr College

**Halen, Eric**, 2008. Artist Teacher of Violin Orchestral Repertoire
BM (1977) Central Missouri State University; MM (1979) University of Illinois

**Hall, Randal L.**, 2008. Associate Professor of History
BA (1994) Wake Forest University; MA (1997), PhD (1998) Rice University

**Hamadeh, Shirine T**., 2003. Associate Professor of Art History
BArch (1984) American University of Beirut; MArch (1987) Rice University; PhD (1999) Massachusetts Institute of

Technology

**Hamm, Keith Edward**, 1988. Thomas Cook and Mary Elizabeth Edwards Memorial Chair in American Government, Professor of Political Science
AB (1969) Franklin and Marshall College; MA (1972) Florida Atlantic University; PhD (1977) University of Wisconsin–Milwaukee

**Han, Jung Won**, 2005. Lecturer of Korean
BA (1968), Taejun Presbyterian College, Korea; MA (1997) University of Houston

**Hand, Paul, 2014.** Assistant Professor of Computational and Applied Mathematics
BS (2004) California Institute of Technology; PhD (2009) New York University

**Hanlon, Roger**, 2011. Adjunct Professor of Electrical and Computer Engineering
BS (1969) Florida State University; MS (1975), PhD (1978) University of Miami

**Hanten, Gerri R**., 2011. Adjunct Associate Professor of Psychology
BS (1974) Oklahoma State University; MA (1997), PhD (2000) Rice University

**Haptonstall, Clark D**., 2003. Professor in the Practice of Sport Management, Director of the Sport Management Program, Department Chair of Sport Management
BA (1991), MS (1993) Marshall University; PhD (2005) Florida State University

**Haque, Moyeen**, 1988. Lecturer of Civil and Environmental Engineering
BS (1978) Aligark Muslim University; MS (1982) University of Petroleum and Minerals; PhD (1988) University of Texas–Austin

**Hardt, Robert M**., 1988. W. L. Moody Professor of Mathematics
BS (1967) Massachusetts Institute of Technology; PhD (1971) Brown University

**Harrington, Daniel A**., 2009. Faculty Fellow in Biochemistry and Cell Biology
BS (1996), PhD (2004) Northwestern University

**Harris, Paul M. "Mitch,"** 2000. Adjunct Professor of Earth Science
BS (1971), MS (1973) West Virginia University; PhD (1977) University of Miami

**Harter, Deborah A**., 1990. Associate Professor of French
BA (1973) University of California–Los Angeles; MA (1980), PhD (1989) University of California–Berkeley

**Hartgerink, Jeffrey D**., 2002. Professor of Chemistry and of Bioengineering, , Associate Department Chair for Graduate Studies
AB (1993) Washington University; PhD (1999) Scripps Research Institute

**Hartigan, Patrick M**., 1994. Professor of Physics and Astronomy
BS (1981) University of Minnesota; PhD (1987) University of Arizona

**Hartley, Maria K**., 2011. Adjunct Assistant Professor of Ecology and Evolutionary Biology
BSc (1999) University of Greenwich, London; MSc (2002), PhD (2006) Rice University

**Hartley, Peter Reginald**, 1986. George and Cynthia Mitchell Chair in Sustainable Development
BA (1974), MEc (1977) Australian National University; PhD (1980) University of Chicago

**Harvey, Shelly L**., 2005. Associate Professor of Mathematics
BS (1997) California Polytechnic State University; PhD (2002) Rice University

**Hassett, Brendan E**., 2000. Professor of Mathematics
BA (1992) Yale University; MA (1994), PhD (1996) Harvard University

**Hauge, Robert H**., 1967. Distinguished Faculty Fellow in Chemistry and in Materials Science and NanoEngineering
BA (1960) Loras College; PhD (1965) University of California–Berkeley

**Hawley, Richard**, 2011. Professor of Clarinet
BM (1992) Curtis Institute of Music

**Hazzard, Kaden**, 2014. Assistant Professor of Physics and Astronomy
BS (2004) Ohio State University; MS (2009), PhD (2010) Cornell University

**Hebl, Michelle "Mikki" R**., 1998. Professor of Psychology and Management
BA (1991) Smith College; MS (1993) Texas A&M University; PhD (1997) Dartmouth College

**Heffes, Gisela**, 2009. Associate Professor of Spanish and Portuguese, Associate of Duncan College
UBA (1997) Universidad de Buenos Aires; PhD (2007) Yale University

**Heinkenschloss, Matthias**, 1996. Professor of Computational and Applied Mathematics, Department Chair of Computational and Applied Mathematics
BS (1988), PhD (1991) Universität Trier, Germany

**Hemmer, Thomas**, 2009. Houston Endowment Professor of Accounting
BA (1984), MBA (1986), PhD (1990) Odense University, Denmark

**Hennessy, Rosemary**, 2006. L.V. Favrot Chair in Humanities, Professor of English Literature; Director of the Center for the Study of Women, Gender, and Sexuality
BA (1972) University of Pennsylvania; MA (1976) Temple University; PhD (1990) Syracuse University

**Henning, Alison T**., 2011. Lecturer of Earth Science
BS (1994), MA (1997) University of Texas–Austin; PhD (2005) Rice University

**Henze, Matthias**, 1997. Isla Carroll and Percy E. Turner Professor of Biblical Studies and Professor in Religion
MDiv (1992) University of Heidelberg; PhD (1997) Harvard University

**Hester, Paul**, 2003. Lecturer of Visual and Dramatic Arts
BA (1971) Rice University; MFA (1976) Rhode Island School of Design

**Hewitt, Janice**, 1999. Senior Lecturer of Professional Communications in the School of Engineering
BA, University of Michigan; MA (1986) PhD (1997) Rice University

**Heydorn, Richard P**., 1998. Adjunct Professor of Statistics
BEE (1958), MA (1964) University of Akron; PhD (1971) Ohio State University

**Hicks, Illya V**., 2007. Associate Professor of Computational and Applied Mathematics
BS (1995) Southwest Texas State University; MA (2000), PhD (2000) Rice University

**Hight, Christopher**, 2003. Associate Professor of Architecture
BA (1993), BArch (1995) Rice University; MA (1997) Architectural Association; PhD (2003) University of London

**Hill, N. Ross**, 2010. Adjunct Professor of Earth Science
BS (1971) Louisiana State University; MS (1973) University of New Orleans; PhD (1978) University of Virginia

**Hirasaki, George J**., 1989. Research Professor of Chemical and Biomolecular Engineering
BS (1963) Lamar University; PhD (1967) Rice University

**Hirschi, Kendal**, 2003. Adjunct Professor of Biochemistry and Cell Biology
BA (1984) University of Arizona; MS (1988) Arizona State University; PhD (1993) University of Arizona

**Ho, Vivian**, 2004. James A. Baker III Institute Chair in Health Economics, Professor of Economics
BA (1984) Harvard; PhD (1992) Stanford University

**Hobby, William P**., 1989. Radoslav A. Tsanoff Professor of Public Affairs
BA (1953) Rice Institute

**Hochberg, Yael**, 2013. Ralph S. O'Connor Associate Professor in Finance and Entrepreneurship
BSc (1997) Israel Institute of Technology; MA (2000), PhD (2003) Stanford University

**Hoebig, Desmond**, 2008. Professor of Cello
BM (1982), MM (1983) The Juilliard School of Music

**Hokanson, David A**., 2000. Adjunct Assistant Professor of Chemical and Biomolecular Engineering
BS (1977), MChE (1978) Rice University

**Hopkins, John**, 2013. Assistant Professor of Art History and Classical Studies
BS (2001) Northwestern University, MA (2004), PhD (2010) University of Texas-Austin

**Horowitz, Sophie**, 2014. Assistant Professor of Philosophy
BA (2008) Swarthmore College; PhD (2014) Massachusetts Institute of Technology

**Hoskisson, Robert E**., 2009. George R. Brown Professor of Strategic Management
BS (1973), MA (1975) Brigham Young University; PhD (1984) University of California–Irvine

**Hotez, Peter Jay**, 2011. Adjunct Professor of Bioengineering
BA (1980) Yale University; PhD (1986) Rockefeller University; MD (1987) Cornell University

**Hou, Jerry**, 2014. Associate Conductor
BM (1999) University of Minnisota; MM (2003) Rice University; Performance Certificate (2008) Royal Northern College of Music; DMA (2014) Eastman School of Music

**Houchens, Brent C**., 2005. Adjunct Assistant Professor of Materials Science and NanoEngineering
BS (2000), MS (2002), PhD (2005) University of Illinois–Urbana-Champaign

**House, Waylon V**., 1986. Adjunct Associate Professor of Chemical and Biomolecular Engineering
BS (1966) Massachusetts Institute of Technology; MS (1969), PhD (1974) University of Pittsburgh

**Howe, A. Cymene**, 2009. Associate Professor of Anthropology
BA (1992) University of California–Berkeley; MA (1999), PhD (2003) University of New Mexico

**Huang, Huey W**., 1973. Sam and Helen Worden Chair of Physics and Astronomy
BS (1962) National Taiwan University; PhD (1967) Cornell University

**Huang, Shih-Shan, Susan**, 2006. Associate Professor of Art History
BA (1991) National Taiwan University; MA (1995) National University of Taiwan; PhD( 2002) Yale University

**Huang, Xuelin**, 2008. Adjunct Associate Professor of Statistics
BS (1994) Peking University, China; MS (1997) Texas A&M University; PhD (2002) University of Michigan

**Huberman, Brian Michael**, 1975. Associate Professor of Visual Arts
MFA Equivalent (1974) National Film School of Great Britain

**Hudspeth, C. M**., 1947. Lecturer of Political Science
BA (1940) Rice Institute; JD (1946) University of Texas–Austin

**Hughes, Gordon**, 2008. Mellon Assistant Professor of Art History
BFA (1989) Nova Scotia College of Art and Design; MFA (1992) University of Illinois–Chicago; MA (1996) University of Western Ontario; PhD (2004) Princeton University

**Hughes, Thomas J. R.**, 2002. Adjunct Professor of Mechanical Engineering
BS (1965), MS (1967) Pratt Institute; MS (1974), PhD (1974) University of California–Berkeley

**Hulet, Randall G**., 1987. Fayez Sarofim Professor of Physics and Astronomy
BS (1978) Stanford University; PhD (1984) Massachusetts Institute of Technology

**Hund, John**, 2006. Visiting Assistant Professor of Finance
BA (1987) Williams College; PhD (2000) University of Texas-Austin

**Hunter, Allison**, 2012. Artist in Residence in Visual and Dramatic Arts
BFA (1989) Ecole Cantonale d'Art Lausanne; MFA (1990) Ecole Cantonale d'Art Lausanne, MFA (1997) Rensselaer Polytechnic Institute

**Huston, J. Dennis**, 1969. Gladys Louise Fox Professor of English
BA (1961) Wesleyan University; MA (1964), PhD (1966) Yale University

**Hutchinson, John S**., 1983. Dean of Undergraduates, Professor of Chemistry
BS (1977), PhD (1981) University of Texas–Austin

**Iammarino, Nicholas K**., 1978. Professor of Kinesiology, Department Chair of Kinesiology
BS (1973) University of Dayton; MEd (1975) University of Toledo; PhD (1978) Ohio State University

**Igoshin, Oleg A**., 2006. Associate Professor of Bioengineering
BSc (1998) Novosibirsk State University; MSc (2000) Weizmann Institute of Science, Israel; PhD (2004) University of California at Berkeley

**Irish, Maya Soifer**, 2010. Assistant Professor of History
BA (1995), MA (2000) University of Colorado–Colorado Springs; PhD (2007) Princeton University

**Isella, Andrea**, 2014. Assistant Professor of Physics and Astronomy
MS (2003), PhD (2006) Università degli Studi di Milano

**Jaber, Thomas I**., 1988. Professor of Music, Director of Choral Ensembles
BME (1974) Arkansas State University; MMus (1976) Indiana University; Performer's Certificate (1977) Curtis

Institute of Music

**Jacot, Jeffrey G**., 2008. Assistant Professor of Bioengineering
BS (1994) University of Colorado–Boulder; PhD (2005) Boston University

**Jalbert, Pierre D**., 1996. Professor of Composition and Theory, Chair of Composition and Theory
BM (1989) Oberlin Conservatory of Music; PhD (1993) University of Pennsylvania

**Jeanneret, P. Richard "Dick,"** 2003. Adjunct Professor of Psychology
BA (1962) University of Virginia; MA (1963) University of Florida; PhD (1969) Purdue University

**Jermaine, Christopher M**., 2009. Associate Professor of Computer Science
BA (1993) University of California–San Diego; MS (1997) Ohio State University; PhD (2002) Georgia Institute of Technology

**Ji, Yuan**, 2008. Adjunct Associate Professor of Statistics
BS (1997) Fudan University; MS (1999) University of Minnesota; PhD (2003) University of Wisconsin

**Jimenez, Carlos**, 1997. Professor of Architecture
BArch (1981) University of Houston

**Johns-Krull**, Christopher M., 2001. Professor of Physics and Astronomy
BA, BS (1989) University of Texas–Austin; MA (1991), PhD (1994) University of California–Berkeley

**Johnson, Bruce R**., 1994. Distinguished Faculty Fellow in Chemistry, Executive Director of the Rice Quantum Institute
BA (1975) University of Minnesota; PhD (1981) University of Wisconsin–Madison

**Johnson, David B**., 2000. Professor of Computer Science and of Electrical and Computer Engineering
BA (1982), MS (1985), PhD (1990) Rice University

**Johnson, Richard R**., 2008. Professor in the Practice of Environmental Studies in Sociology
BS (1992) Rice University; MS (1997) University of Virginia

**Johnson, Valen**, 2006. Adjunct Professor
BS (1981) Rensselaer Polytechnic Institute; MA (1985) University of Texas–Austin; PhD (1989) University of Chicago

**Jones Jr, B. Frank**, 1962. Noah Harding Professor of Mathematics
BA (1958) Rice Institute; PhD (1961) Rice University

**Jones, Mark P**., 2004. Joseph D. Jamail Chair in Latin American Studies, Professor of Political Science, Department Chair of Political Science
BA (1989) Tulane University; PhD (1994) University of Michigan

**Jones, Thomas A**., 2003. Adjunct Professor of Earth Science
BS (1964), MS (1967) Colorado State University; MS (1968), PhD (1969) Northwestern University

**Joseph, Betty**, 1995. Associate Professor of English
BA (1985) University of Bombay; MA (1987) Jawaharlal Nehru University; MA (1989) Syracuse University; PhD (1995)

University of Minnesota

**Joshi, Amit**, 2009. Adjunct Assistant Professor of Electrical and Computer Engineering
BE (2000) Panjab University, India; PhD (2005) Texas A&M University

**Joshua, Shanicca**, 2011. Lecturer of Education Certification
BS (1998) Tennessee State University; MEd (2002) The University of North Carolina--Charlotte

**Juntti, Markku**, 2007. Adjunct Professor of Electrical and Computer Engineering
MS (1993), PhD (1997) University of Oulu, Finland

**Kabbani, Ahmad Toufik**, 2014. Adjunct Professor of Materials Science and NanoEngineering
MS (1974) American University of Beirut; PhD (1979) University of California–Davis

**Kalamangalam, Giridhar**, 2012. Adjunct Professor of Electrical and Computer Engineering
B.Med, B.Surgery (1989) University of Madras; MS (1991), PhD (1995) Oxford University

**Kale, Prashant**, 2007. Associate Professor of Strategic Management
BE (1986) Pune University, India; MA (1996), PhD (1999) Wharton School of Business

**Kalra, Ajay**, 2008. Herbert S. Autry Chair in Business, Professor of Marketing
MA (1980) Birla Institute of Technology and Science; PhD (1992) Duke University

**Kamakura, Wagner**, 2013. Jesse H. Jones Professor of Marketing
BS (1974) Aeronautical Institute of Technology, MS (1979) University of Sao Paolo, PhD (1983) University of Texas–Austin

**Kamins, Benjamin C**., 1987. Professor of Bassoon

**Kaminski, Vincent**, 2001. Professor in the Practice of Management
PhD (1975) Main School of Planning and Statistics, Warsaw, Poland; MBA (1978) Fordham University

**Kanatas, George**, 1994. Jesse H. Jones Professor of Finance
BS (1966) City College of New York; PhD (1971) University of Kansas; PhD (1978) Johns Hopkins University

**Kantor, Paul**, 2012. Sallie Shepherd Perkins Professor of Violin
BMus (1977), MMus (1978) The Juilliard School

**Kauffmann, Robert Lane**, 1976. Associate Professor of Spanish and Portuguese, Associate of Hanszen College
BA (1970) Princeton University; PhD (1981) University of California–San Diego

**Kavraki, Lydia**, 1996. Noah Harding Professor of Computer Science, Professor of Bioengineering
BS (1989) University of Crete; MS (1992), PhD (1995) Stanford University

**Keefe, Christina**, 2008. Professor in the Practice in Theatre, Director of the Theatre Program
BFA (1979) New York University; MFA (1994) University of South Carolina

**Kehoe, John**, 2002. Senior Lecturer of Management
BA (1960) Northwestern University; MA (1964) St. Louis University; DBA (1975) Harvard University

**Kelly, Kevin**, 2002. Associate Professor of Electrical and Computer Engineering
BS (1993) Colorado School of Mines; MS (1996), PhD (1999) Rice University

**Kemere, Caleb**, 2012. Assistant Professor of Electrical and Computer Engineering
BS (1998) University of Maryland College Park; MS (2000) Stanford University; PhD (2006) Stanford University

**Kemmer, Suzanne E**., 1993. Associate Professor of Linguistics and Cognitive Sciences, Associate of Sid Richardson College
BA (1980) Rice University; MA (1985), PhD (1988) Stanford University

**Kenter, Franklin**, 2013. Pfeiffer-VIGRE Postdoctoral Instructor of Computational and Applied Mathematics
BA (2008), MA (2010), PhD (2013) University of California—San Diego

**Khoury, Dirar**, 1998. Adjunct Associate Professor of Electrical and Computer Engineering
BS (1987) Louisiana Technical University; MS (1989), PhD (1993) Case Western Reserve University

**Kiang, Ching-Hwa,** 2002. Associate Professor of Physics and Astronomy
BS (1987) National Taiwan University; PhD (1995) California Institute of Technology

**Killian, Thomas C**., 2000. Professor of Physics and Astronomy, Department Chair of Physics and Astronomy
AB (1991) Harvard University; MPhil (1993) Cambridge University; PhD (1999) Massachusetts Institute of Technology

**Kimbro, Rachel Tolbert**, 2007. Associate Professor of Sociology
BA (2001) Rice University; MA (2003), PhD (2005) Princeton University

**Kimmel, Marek**, 1990. Professor of Statistics
MS (1977), PhD (1980) Silesian Technical University

**Kimmey, Kim**, 2008. Lecturer of Communications
BBA (1978) Baylor University; MS (1996) Texas A&M University

**King, Stephen**, 2003. Lynette S. Autrey Professor of Voice and Chair of Voice
BMus (1982) Auburn University; MMus (1985) Florida State University; DMA (1991) Southern Baptist Theological Seminary

**Kirchner, Stefan**, 2009. Adjunct Assistant Professor of Physics and Astronomy
Vordiplom (1993), MS (1995), Diplom (1997) University of Würzburg; PhD (2002) Technical University of Karlsruhe, Germany

**Kirk, David E**., 1982. Associate Professor of Tuba
BM (1982) Juilliard School of Music

**Kiselev, Alexander**, 2014. Professor of Mathematics
BS (1992) St. Petersburg State University; PhD (1996) California Institute of Technology

**Klein, Andrew A.**, 2014. Lecturer in the Program in Writing and Communication
BA (2002) University of Michigan; MA (2010), PhD (2013) Rice University

**Klein, Anne C**., 1989. Professor of Religion
BA (1969) State University of New York at Binghamton; MA (1971) University of Wisconsin–Madison; PhD (1981) University of Virginia

**Klineberg, Stephen L**., 1972. Professor of Sociology, Associate of Lovett College
BA (1961) Haverford College; MA (1963) University of Paris; PhD (1966) Harvard University

**Knightly, Edward W**., 1996. Professor of Electrical and Computer Engineering and Computer Science, Department Chair of Electrical and Computer Engineering
BS (1991) Auburn University; MS (1992), PhD (1996) University of California–Berkeley

**Kohn, Michael H**., 2004. Associate Professor of Ecology and Evolutionary Biology
MSc (1994) University of Munich; PhD (2000) University of California–Los Angeles

**Koka, Balaji**, 2008. Associate Professor of Strategic Management
BE (1984) Madurai Kamaraj University, India; MBA (1987) Indian Institute of Management, India; PhD (1999) University of Pittsburgh

**Kolomeisky, Anatoly B**., 2000. Professor of Chemistry and of Chemical and Biomolecular Engineering
MS (1991) Moscow State University; MS (1996), PhD (1998) Cornell University

**Kono, Junichiro**, 2000. Professor of Electrical and Computer Engineering, of Physics and Astronomy, and of Materials Science and NanoEngineering
BS (1990), MS (1992) University of Tokyo; PhD (1995) State University of New York–Buffalo

**Kortum, Philip T**., 2005. Assistant Professor of Psychology
BS (1985) University of Nebraska; MS (1990) Northeastern University; PhD (1994) University of Texas– Austin

**Koushanfar, Farinaz**, 2006. Associate Professor of Electrical and Computer Engineering
BS (1998) Sharif University of Technology, Tehran, Iran; MS (2000) University of California–Los Angeles; MA (2005), PhD (2005) University of California–Berkeley

**Kripal, Jeffrey J**., 2002. J. Newton Rayzor Professor of Religion, Associate of Brown College
BA (1985) Conception Seminary College; MA (1987), PhD (1993) University of Chicago

**Krouskop, Mark**, 2013. Lecturer of Theater and Theater Production Manager
BA (2002), MFA (2012) University of Houston

**Kulstad, Mark**, 1975. Professor of Philosophy
BA (1969) Macalester College; PhD (1975) University of Michigan

**Lairson, David R**., 1977. Adjunct Professor of Economics
BA (1970), MA (1971), PhD (1975) University of Kentucky

**Lamos, Colleen R**., 1989. Associate Professor of English
BA (1978) State University of New York–Binghamton; PhD (1988) University of Pennsylvania

**Landes, Christy F**., 2009. Associate Professor of Chemistry, Norman Hackerman-Welch Young Investigator
BS (1998) George Mason University; PhD (2003) Georgia Institute of Technology

**Lane, David M**., 1977. Associate Professor of Psychology, Statistics, and Management
BA (1971) Clark University; MA (1973) Tufts University; PhD (1977) Tulane University

**Lane, Neal F**., 1996. Malcolm Gillis University Professor, Professor of Physics and Astronomy
BS (1960), MS (1962), PhD (1964) University of Oklahoma

**Lansford, Benjamin**, 2014. Professor in the Practice of Accounting
BA (1997) University of South Carolina; MBA (2000) University of Pittsburgh; PhD (2005) Pennsylvania State University

**Lapinksi, Lisa**, 2014. Assistant Professor of Visual and Dramatic Arts
BA (1990) University of California–San Diego; MFA (2000) Art Center College of Design

**Lapotko, Dmitri**, 2011. Faculty Fellow in Biochemistry and Cell Biology and Physics and Astronomy
MS (1985), PhD (1988) Belarussian State University; DSc (2003) A.V. Lykov Heat and Mass Transfer Institute

**Latva-aho, Matti Sakari**, 2007. Adjunct Professor of Electrical and Computer Engineering
Diploma engineer (1992), Licentiate of Technology (1996), Doctor of Technology (1998) University of Oulu, Finland

**Lavenda, Richard A**., 1987. Professor of Composition and Theory
BA (1977) Dartmouth College; MMus (1979) Rice University; DMA (1983) University of Michigan

**Leal, Suzanne**, 2008. Adjunct Professor of Statistics
BS (1981) Fordham University; MS (1989), PhD (1994) Columbia University

**Lee, Cin-Ty**., 2002. Professor of Earth Science
BA (1996) University of California at Berkeley; PhD (2001) Harvard University

**Lee, J. Jack**, 2004. Adjunct Professor of Statistics
DDS (1982) National Taiwan University; MS (1984), PhD (1989) University of California–Los Angeles

**Leebron, David W**., 2004. President and Professor of Political Science
BA (1976) Harvard University; JD (1979) Harvard Law School

**Leeds, Brett Ashley**, 2001. Professor of Political Science
BA (1991), University of North Carolina at Chapel Hill; PhD (1998) Emory University

**LeGrand, Thomas**, 2003. Associate Professor of Clarinet
BMus (1980) Curtis Institute of Music

**Lenardic, Adrian**, 1999. Professor of Earth Science
BA (1986) University of Wisconsin; MS (1990), PhD (1995) University of California–Los Angeles

**Lerup, Lars**, 1993. Harry K. and Albert K. Smith Professor of Architecture
BArch (1968) University of California at Berkeley; MArch (1970) Harvard University

**Levander, Alan R**., 1984. Carey Croneis Professor of Earth Science
BS (1976) University of South Carolina; MS (1978), PhD (1984) Stanford University

**Levander, Caroline F**., 2000. Carlson Chair in the School of Humanities, Professor of English, Vice President for Digital Education and Strategic Initiatives
BA (1986), MA (1993), PhD (1995) Rice University

**Levin, Harvey S**., 2004. Adjunct Professor of Psychology
BA (1967) City University of New York; MA (1971), PhD (1972) University of Iowa

**Levine, Herbert**, 2012. Karl F. Hasselmann Professor of Bioengineering, Professor of Physics and Astronomy and of Biochemistry and Cell Biology
BS (1976) Massachusetts Institute of Technology; MA (1997) Princeton; PhD (1979) Princeton

**Levy, Eugene H**., 2000. Andrew Hays Buchanan Professor of Physics and Astronomy
AB (1966) Rutgers University; PhD (1971) University of Chicago

**Lewis, Steven W**., 1996. Professor in the Practice, Research Fellow at the James A. Baker III Institute for Public Policy, Associate Director at the Chao Center for Asian Studies
BS (1985) Ohio University; PhD (1996) Washington University

**Li, Haiyang**, 2005. Professor of Strategic Management
BA (1991), MA (1994) University of China; PhD (1998) City University of Hong Kong

**Li, Hui**, 2002. Adjunct Associate Professor of Physics and Astronomy
BS (1990) Beijing University; PhD (1995) Rice University

**Li, Joseph**, 2011. Artist Teacher of Opera Studies
BA (2002); MMus (2004) Manhattan School of Music

**Li, King Chuen Peter**, 2007. Adjunct Professor of Bioengineering
BS (1977), MD (1981) University of Toronto; MBA (1998) San Jose State University

**Li, Qilin**, 2006. Associate Professor of Civil and Environmental Engineering and of Materials Science and NanoEngineering
BE (1995) Tsinghua University, Beijing, China; MS (1999), PhD (2002) University of Illinois–Urbana-Champaign

**Li, Wei,** 2012. Assistant Professor of Physics and Astronomy
BS (2004) University of Science and Technology of China; PhD (2009) Massachusetts Institute of Technology

**Liang, Edison P**., 1991. Andrew Hays Buchanan Professor of Astrophysics
BA (1967), PhD (1971) University of California–Berkeley

**Liberman-Aiden, Erez**, 2013. Adjunct Assistant Professor of Computer Science and Computational and Applied Mathematics
BA (2002) Princeton University; MA (2010), PhD (2010) Harvard University

**Lichtarge, Olivier**, 2008. Adjunct Professor of Biochemistry and Cell Biology
BS (1980) McGill University; PhD (1987), MD (1990) Stanford University

**Lilleberg, Jorma**, 2002. Adjunct Professor of Electrical and Computer Engineering
BS (1984) University of Oulu; PhD (1992) Tampere University of Technology

**Lin, Cho-Liang**, 2006. Professor of Violin
BMus (1981) The Juilliard School of Music

**Link, Stephan**, 2006. Associate Professor of Chemistry and Chemical and Biomolecular Engineering
MA (1996) Technical University of Braunschweig, Germany; PhD (2000) Georgia Institute of Technology

**Little, Stephen H**., 2010. Adjunct Associate Professor of Bioengineering
BS (1993) York University, Canada; MD (1997) McMaster University, Canada

**Llope, William J**., 1994. Senior Faculty Fellow in Physics and Astronomy
BA (1986) University of Michigan; MA (1989), PhD (1992) State University of New York–Stony Brook

**Loch-Temzelides, Ted, 2008.** Professor of Economics
BA (1988) University of Piraeus, Greece; PhD (1995) University of Minnesota

**Loewen, Peter V**., 2006. Associate Professor of Musicology
BMus (1987) University of Manitoba; MMus (1990), PhD (2000) University of Southern California

**Logan, Jessica M**., 2006. Assistant Professor of Psychology
BA (1998) University of Texas–Austin; MA (2001), PhD (2004) Washington University

**Logan, Jill "Thad,"** 1982. Lecturer of English
BA (1973) University of California–Santa Barbara; PhD (1981) Rice University

**López-Durán, Fabiola**, 2011. Assistant Professor of Art History
BA (1987) Universidad de los Andes School of Architecture; PhD (2009) Massachusetts Institute of Technology

**Lopez Alonso, Moramay**, 2009. Associate Professor of History
Licenciatura (1994) Instituto Tecnologico Autonomo de Mexico; MA (1999), PhD (2000) Stanford University

**Lord, Tom F**., 1992. Lecturer of Architecture
BA (1960) Southern Methodist University; MA (1965) Yale University

**Lou, Jun, 2005**. Associate Professor of Materials Science and NanoEngineering, Associate Department Chair of Materials Science and NanoEngineering
BE (1998) Tsinghua University, Beijing, China; MS (1999) Ohio State University; PhD (2004) Princeton University

**Loveland, Katherine A**., 1991. Adjunct Professor of Psychology
BA (1975) University of Virginia; PhD (1980) Cornell University

**Ludwig, Jonathan**, 2003. Senior Lecturer of Russian
BA (1989) University of the South; MA (1991), PhD (1995) Indiana University

**Ludwig, Joseph A**., IV, 2007. Adjunct Assistant Professor of Bioengineering
BBA (1994) University of Iowa College of Business; MD (1998) University of Iowa College of Medicine

**Lurie, Susan**, 1987. Associate Professor of English
BA (1969) State University of New York; MA (1972), PhD (1989) University of California–Berkeley

**Lüttge, Andreas**, 1999. Research Professor of Earth Science, Research Professor of Chemistry, Associate of Will Rice College
BS (1982) Technische University Carolo Wilhelmina; MS (1985), PhD (1990) Eberhard-Karls Universität

**Lwigale, Peter Y**., 2008. Assistant Professor of Biochemistry and Cell Biology
BS (1994), MS (1997) University of Northern Iowa; PhD (2001) Kansas State University

**Ma, Jianpeng,** 2000. Professor of Bioengineering, Professor of Biochemistry and Cell Biology
BS (1985) Fudan University P.R. China; PhD (1996) Boston University

**Maas, Michael R**., 1984. Professor of History and Classical Studies
BA (1973) Cornell University; MA (1975), PhD (1982) University of California–Berkeley

**MacKenzie, Kevin R**., 2000. Adjunct Assistant Professor of Biochemistry and Cell Biology
BSc (1988) McGill University; MPhil (1991), PhD (1996) Yale University

**Mackie, Hilary S**., 1993. Associate Professor of Classics
BA (1987) Cambridge University; PhD (1993) Princeton University

**Mackwell, Stephen J**., 2005. Adjunct Professor of Earth Science
BS (1978), MS (1979) University of Canterbury, Christchurch, NZ; PhD (1985) Australian National University

**Maher, Lynn M**., 2007. Adjunct Professor of Psychology
BA (1978) Catholic University of America; MA (1979) George Washington University; PhD (1995) University of Florida

**Makdisi, Ussama**, 1997. Arab-American Educational Foundation Professor of Arab Studies in History
BA (1990) Wesleyan University; MA (1993), PhD (1997) Princeton University

**Manca, Joseph**, 1989. Nina J. Cullinan Professor of Art History, Associate of Baker College
BA (1978) University of Rochester; MA (1980), MPhil (1982), PhD (1986) Columbia University

**Mani, Sendurai**, 2014. Adjunct Associate Professor of Materials Science and NanoEngineering
BS (1991), MS (1993) Madurai Kamaraj University; PhD (2000) Indian Institute of Science

**Marschall, Melissa J**., 2003. Professor of Political Science
BA (1990) Florida State University; MA (1993) Bogazici University; PhD (1998) State University of New York–Stony Brook

**Martí-Arbona, Angel A**., 2008. Assistant Professor of Chemistry and Bioengineering and of Materials Science and NanoEngineering
BS (1999), PhD (2004) University of Puerto Rico–Rio Piedras

**Martin, Lanny W**., 2004. Albert Thomas Associate Professor of Political Science
BA (1990), MA (1997), PhD (2000) University of Rochester

**Martin, Randi C**., 1982. Elma Schneider Professor of Psychology
BA (1971) University of Oregon; MS (1977), PhD (1979) Johns Hopkins University

**Martinez Calderon, Luz Maria**, 2011. Adjunct Associate Professor of Chemistry
BS (1991) Tecnológico de Monterrey; PhD (2000) Arizona State University

**Masiello, Caroline A**., 2004. Associate Professor of Earth Science
BA (1991) Earlham College; MA (1993) University of North Carolina–Chapel Hill; PhD (1999) University of California–Irvine

**Massimino, Michael J.**, 2004. Adjunct Professor of Mechanical Engineering
BS (1984) Columbia University; MS (1988), PhD (1992) Massachusetts Institute of Technology

**Massoud, Yehia**, 2003. Adjunct Associate Professor in Electrical and Computer Engineering
BS (1991), MS (1994) Cairo University; PhD (1999) Massachusetts Institute of Technology

**Matsuda, Seiichi P. T**., 1995. Dean of Graduate and Postdoctoral Studies, E. Dell Butcher Professor of Chemistry, Professor of Biochemistry and Cell Biology
BA (1984) Bethel College; PhD (1994) Harvard University

**Matthews, Kathleen Shive**, 1972. Stewart Memorial Professor of Biochemistry and Cell Biology
BS (1966) University of Texas at Austin; PhD (1970) University of California– Berkeley

**Matthews, Kirstin**, 2010. Adjunct Lecturer of Sociology
BA (1996) University of Texas– Austin; PhD (2003) University of Texas Health Science Center–Houston

**Matusow, Allen J**., 1963. William Gaines Twyman Professor of History, Associate Director of the James A. Baker III Institute for Public Policy
BA (1958) Ursinus College; MA (1959), PhD (1963) Harvard University

**Matzakos, Andreas N**., 2003. Adjunct Assistant Professor of Chemical and Biomolecular Engineering
Diploma of Chemical Engineering (1987) National Technical University; PhD (1992) Rice University

**Mawlawi, Osama R**., 2002. Lecturer of Electrical and Computer Engineering
BEE (1988) American University of Beirut; MS (1990) Polytechnic University; PhD (1998) Columbia University

**McCullough, Laurence**, 2001. Adjunct Professor of Philosophy
AB (1969) Williams College; PhD (1975) University of Texas–Austin

**McDaniel, W. Caleb**, 2008. Assistant Professor of History, Head Resident Fellow Duncan College
BA (2000), MA (2001) Texas A&M University; PhD (2006) Johns Hopkins University

**McDavid, Carol**, 2008. Adjunct Assistant Professor of Anthropology
BA (1973), MA (1996) University of Houston; PhD (2002) University of Cambridge

**McDevitt, John T**., 2008. Brown-Wiess Professor of Bioengineering and Chemistry and of Materials Science and NanoEngineering
BS (1982) California Polytechnical State University; PhD (1987) Stanford University

**McGill, Scott**, 2001. Professor of Classics, Department Chair of Classical Studies
BA (1990) Salve Regina College; PhD (2001) Yale University

**McGovern, Patrick J**., 2005. Adjunct Associate Professor of Earth Science
SB (1986), PhD (1996) Massachussetts Institute of Technology

**McIntosh, Susan Keech**, 1980. Herbert S. Autrey Professor in Anthropology
BA (1973) University of Pennsylvania; MA (1975) Girton College, Cambridge University; MA (1976), PhD (1979) University of California–Santa Barbara

**McLendon, George**, 2010. Howard R. Hughes Provost and Professor of Chemistry
BS (1972) University of Texas–El Paso; PhD (1976) Texas A&M University

**McLurkin, James D**., 2009. Assistant Professor of Computer Science
SB (1995) Massachusetts Institute of Technology; MS (1999) University of California–Berkeley; SM (2003), PhD (2008) Massachusetts Institute of Technology

**McNeil, Caroline V**., 2008. Laboratory Coordinator, Lecturer of Chemistry
BS (2002) University of Houston; MA (2006) Rice University; PhD (2008) Rice University

**McNeil, Linda M**., 1984. Professor of Education
BA (1966) Texas Tech University; MA (1968) Baylor University; PhD (1977) University of Wisconsin–Madison

**McNew, James A**., 2000. Associate Professor of Biochemistry and Cell Biology
BS (1989) Texas A&M University; PhD (1994) University of Texas Southwestern Medical Center–Dallas

**McPhail, S. Morton**, 2003. Adjunct Associate Professor of Psychology
BA (1972) Trinity University; MS (1975), PhD (1978) Colorado State University

**McStravick, David**, 1999. Professor in the Practice of Mechanical Engineering
BS (1965), MS (1969), PhD (1972) Rice University

**Meade, Andrew, J**., 1989. Professor of Mechanical Engineering, Department Chair of Mechanical Engineering
BS (1982) Rice University; MS (1984), PhD (1989) University of California–Berkeley

**Medlock, Kenneth**, 2003. Lecturer of Economics and Adjunct Assistant Professor of Economics
MA (1999), PhD (2000) Rice University

**Mehta, Sarita**, 2011. Lecturer of Hindi
BA (1974) Punjab University; Bed (1983) Punjab University; MA (2003) Unification Theological Seminary-New York; MFA (1985), Med (1986), MA (2010), PhD (2007) Punjab University

**Mellor-Crummey, John M**., 1989. Professor of Computer Science and Electrical and Computer Engineering

BSE (1984) Princeton University; MS (1986), PhD (1989) University of Rochester

**Merényi, Erzsébet**, 2000. Research Professor of Statistics
MSc (1975) Attila Jozsef University, Hungary; PhD (1980) Attila Jozsef University and Central Research Institute for Physics, Hungarian Academy of Sciences

**Merlo, Antonio**, 2014. George A. Peterkin Professor of Economics, Department Chair of Economics
Laurea (1987) Bocconi University; PhD (1992) New York University

**Messmer, David K**., 2009. Lecturer in the Program for Writing and Communication
BA (2001) Colorado State University; MA (2006), PhD (2009) Rice University

**Metcalf, Alida C**., 2009. Harris Masterson Jr. Professor of History, Department Chair of History
BA (1976) Smith College; MA (1978), PhD (1983) University of Texas–Austin

**Metzker, Michael L**., 2001. Adjunct Associate Professor of Chemistry
BS (1984) University of California–Davis; PhD (1996) Baylor College of Medicine

**Michenaud, Sebastien**, 2008. Assistant Professor of Finance
MSc (1997) HEC School of Management, France; MSc (2003) Delta-EHESS, France; PhD (2008) HEC School of Management, France

**Michie, Helena**, 1990. Agnes Cullen Arnold Professor of Humanities, Professor of English
BA (1979) Princeton University; PhD (1984) University of Pennsylvania

**Mikos, Antonios G**., 1991. Louis Calder Professor of Bioengineering and Chemical and Biomolecular Engineering, and of Materials Science and NanoEngineering
Diploma (1983) Aristotle University of Thessaloniki, Greece; MS (1985), PhD (1988) Purdue University

**Miller, Jordan**, 2013. Assistant Professor of Bioengineering
BS (2003) Massachusetts Institute of Technology, PhD (2008) Rice University

**Miller, Thomas E. X**., 2009. James and Deborah Godwin Assistant Professor of Ecology and Evolutionary Biology
BA (2002) Colgate University; PhD (2007) University of Nebraska

**Miller, William F**., 2009. Adjunct Professor of Mechanical Engineering
BS (1974) Vanderbilt University; MD (1978) Baylor College of Medicine; Master of Public Health (1992) University of Texas School of Public Health

**Mittal, Vikas**, 2007. J. Hugh Liedtke Professor of Marketing
BBA (1991) University of Michigan; PhD (1997) Temple University

**Mittleman, Daniel**, 1995. Professor of Electrical and Computer Engineering
BS (1988) Massachusetts Institute of Technology; MS (1990), PhD (1994) University of California–Berkeley

**Mody, Cyrus C. M**., 2007. Associate Professor of History, Associate of Wiess College
AB (1997) Harvard University ; MA (2001), PhD (2004) Cornell University

**Moran, Gayle**, 2013. Lecturer in Communications
BA (1975) Texas Lutheran University; MA (1979) Texas A&M-Commerce; PhD (2011) University of Texas-Dallas

**Morey, Daryl**, 2010. Adjunct Professor of Sport Management
BS (1996) Northwestern University, MBA (2000) Massachusetts Institute of Technology

**Morgan, Julia K**., 1999. Professor of Earth Science, Associate of Hanszen College
AB (1987) Vassar College; PhD (1993) Cornell University

**Morgan, T. Clifton**, 1987. Albert Thomas Professor of Political Science
BA (1978) University of Oklahoma; MA (1980), PhD (1986) University of Texas–Austin

**Morosan, Emilia**, 2007. Associate Professor of Physics and Astronomy, of Chemistry, and of Materials Science and NanoEngineering
BS (1999) A. I. Cuza University; PhD (2005) Iowa State University

**Morris, Jeffrey**, 2011. Adjunct Professor of Statistics
BS (1993) Messiah College; MS (1997), PhD (2000) Texas A&M University

**Morris, Wesley Abram**, 1968. Professor of English
BA (1961), MA (1963) University of Kentucky; PhD (1968) University of Iowa

**Morrison, Donald Ray**, 1988. Professor of Philosophy and Classical Studies
BA (1977) Carleton College; PhD (1983) Princeton University

**Morton, Scott A**., 2004. Adjunct Associate Professor of Computational and Applied Mathematics
BA (1981) Gustavus Adolphus College; PhD (1991) University of Illinois

**Morton, Timothy**, 2012. Rita Shea Guffey Chair in English
BA (1989) Oxford University; PhD (1992) Oxford University

**Moskovits, Martin**, 2013. Adjunct Professor of Electrical and Computer Engineering
BS (1965), PhD (1971) University of Toronto

**Motowidlo, Stephan J**., 2005. Herbert S. Autrey Professor of Psychology
BA (1969) Yale University; PhD (1976) University of Minnesota

**Muharemovic, Tarik**, 2011. Adjunct Professor in Electrical and Computer Engineering
BS (1998), MS (2000), PhD (2004) Rice University

**Murdock, Steve H**., 2007. Allyn and Gladys Cline Professor of Sociology
BA (1970) North Dakota State University; MA (1975), PhD (1975) University of Kentucky

**Nagarajaiah, Satish**, 1999. Professor of Civil and Environmental Engineering and of Materials Science and NanoEngineering
BS (1980) Bangalore University, India; MS (1982) Indian Institute of Science, India; PhD (1990) State University of New York–Buffalo

**Nagrath, Deepak, 2009**. Assistant Professor of Chemical and Biomolecular Engineering
BTech (1992) Indian Institute of Technology–Roorkee; MS (2000), PhD (2003) Rensselaer Polytechnic Institute

**Nakhleh, Luay K**., 2004. Associate Professor of Computer Science, Assistant Professor of Biochemistry and Cell Biology
BS (1996) Technion-Israel Institute of Technology; MS (1998) Texas A&M; PhD (2004) University of Texas–Austin

**Napier, H. Albert**, 1983. Professor of Entrepreneurship and Psychology
BA (1966), MBA (1968), PhD (1971) University of Texas–Austin

**Naranjo, Patricia**, 2014. Assistant Professor of Accounting
BE (2003) Pontificia Universidad Católica de Chile; PhD (2014) Massachusetts Institute of Technology

**Narbona, Jose A**., 1999. Senior Lecturer of Spanish
BA (1995) University of Seville, Spain; MA (1999) Rice University

**Natelson, Douglas**, 2000. Professor of Physics and Astronomy, of Electrical and Computer Engineering, and of Materials Science and NanoEngineering
BS (1993) Princeton University; PhD (1998) Stanford University

**Neagley, Linda E**., 1993. Associate Professor of Art History, Department Chair of Art History
BA (1971) Russell Sage College; MA (1976), PhD (1983) Indiana University

**Nelson, Karen K**., 2003. Harmon Whittington Professor in Accounting
BS (1988) University of Colorado; PhD (1997) University of Michigan

**Nelson-Campbell, Deborah**, 1974. Professor of French
BA (1960) Wittenberg University; Certificat d'etudes Francaises, Ier Degré (1961) University of Grenoble, France; MA (1964), PhD (1970) Ohio State University

**Nevidomskyy, Andriy**, 2010. Assistant Professor of Physics and Astronomy
MSc (2001) Ivan Franko National State University of Lviv; PhD (2005) University of Cambridge

**Newell, Charles J**., 1993. Adjunct Professor of Civil and Environmental Engineering
BS (1978), MS (1981), PhD (1989) Rice University

**Newman, James H**., 1985. Adjunct Professor of Physics and Astronomy
BS (1978) Dartmouth College; MA (1982), PhD (1984) Rice University

**Ng, T. S. Eugene**, 2003. Associate Professor of Computer Science and Electrical and Computer Engineering
BS (1996) University of Washington; MS (1998), PhD (2003) Carnegie Mellon University

**Nichol, Carolyn, A**., 2009. Lecturer of Chemistry
BS (1984) University of Massachusetts–Amherst; MS (1990), PhD (1992) University of Texas–Austin

**Nicolaou, K.C.**, 2013. Harry C. and Olga K. Wiess Professor of Chemistry
B.Sc. (1969) Bedford College, University of London; PhD (1972) University College, University of London

**Niedzielski, Nancy A**., 1999. Associate Professor of Linguistics, Department Chair of Linguistics, Associate of Lovett College
BS (1987), MA (1989) Eastern Michigan University; PhD (1997) University of California–Santa Barbara

**Nikonowicz, Edward P**., 1993. Associate Professor of Biochemistry and Cell Biology
BS (1985) St. Louis University; PhD (1990) Purdue University

**Niño, David**, 2011. Professor in the Practice of Engineering Leadership
BA (1989), BBA (1992), MA (1995), PhD (2002) University of Texas–Austin

**Nittrouer, Jeffrey**, 2012. Assistant Professor of Earth Science
BS (2003) University of Washington; MS (2006) Tulane University; PhD (2010) University of Texas at Austin

**Niu, Fenglin**, 2002. Professor of Earth Science
BS (1988) University of Science and Technology of China; MS (1994), PhD (1997) University of Tokyo

**Nixon, Burke**, 2014. Lecturer in the Program in Writing and Communication
BA (2003) University of Texas–Austin; MFA (2011) University of Mississippi

**Nordlander, Peter**, 1989. Professor of Physics and Astronomy, of Electrical and Computer Engineering, and of Materials Science and NanoEngineering
BA (1977) Swedish Cavalry Officers' School; MS (1980), PhD (1985) Chalmers University of Technology, Gothenburg, Sweden

**Novotny, Alma M**., 2000. Lecturer of Biochemistry and Cell Biology
BS (1968) Duke University; PhD (1972) Purdue University

**Nowak, Robert**, 1999. Adjunct Professor of Electrical and Computer Engineering
BS (1990), MS (1992), PhD (1995) University of Wisconsin–Madison

**Obodaru, Otilia**, 2012. Assistant Professor of Management
BS (2000) Academy of Economics, Bucharest; MS (2007) INSEAD Business School, Fontainebleau; PhD (2010) INSEAD Business School, Fontainebleau

**Oden, Z. Maria**, 2004. Professor in the Practice of Engineering, Director of the Oshman Engineering Design Kitchen
BS (1989), MS (1991), PhD (1994) Tulane University

**Oesmann, Astrid**, 2013. Senior Lecturer in German
BA (1989) Hamburg University; MA (1991) The Johns Hopkins University; PhD (1997) Columbia University

**Oghalai, John**, 2005. Adjunct Associate Professor of Bioengineering
BS (1990), MD (1994) University of Wisconsin

**Ogren, Brian**, 2012. Assistant Professor of Religion, Associate of Hanszen College
BA (1997) University of California, Santa Barbara; MA (2000) Hebrew University of Jerusalem; PhD (2008) Hebrew University of Jerusalem

**Oko, Christina Willis**, 2009. Assistant Professor of Linguistics
BA (1996) University of Montana; PhD (2007) University of Texas–Austin

**Olgaard, David L**., 2007. Adjunct Associate Professor of Earth Science
BS (1978) Cornell University; PhD (1985) Massachusetts Institute of Technology

**Oliver, Douglas E**., 1997. Professor in the Practice of Architecture
BA (1982) Texas A&M University; MArch (1987) Harvard University

**Olson, John Steven**, 1973. Ralph and Dorothy Looney Professor of Biochemistry and Cell Biology
BS (1968) University of Illinois; PhD (1972) Cornell University

**O'Malley, Marcia K**., 2001. Associate Professor of Mechanical Engineering and Computer Science
BS (1996) Purdue University, MS (1999), PhD (2001) Vanderbilt University

**Onuchic, Jose Nelson**, 2011. Harry C. and Olga K. Wiess Chair of Physics and Professor of Physics and Astronomy, of Chemistry and of Biochemistry and Cell Biology
BS (1980) Universidade de Sao Paolo; BS (1981) Universidade de Sao Paolo; MS (1982) Universidade de Sao Paolo; PhD (1987) California Institute of Technology

**Orchard, Michael T**., 2001. Professor of Electrical and Computer Engineering
BS (1981), MS (1986) San Diego State University; MA (1988), PhD (1990) Princeton University

**Ostdiek, Barbara**, 1994. Associate Professor of Finance and Statistics, Senior Associate Dean of Degree Programs
BA (1986) University of Nebraska; PhD (1994) Duke University

**Ostdiek, Donald**, 1995. Policy Studies Director, Associate Dean of Undergraduates
BA (1988), MA (1990) University of Nebraska; PhD (1995) University of North Carolina

**Ostherr, Kirsten**, 2002. Professor of English
BA (1993) Reed College; MA (1997), PhD (2001) Brown University

**O'Sullivan, Elizabeth**, 2001. Senior Lecturer of Communications, Director of Communications Program
BA (1978) Gettysburg College; MBA (1982) Texas A&M University

**Oswald, Frederick L**., 2008. Professor of Psychology
BA (1992) University of Texas–Austin; MA (1998), PhD (1999) University of Minnesota

**Otremba, Paul**, 2014. Assistant Professor of English
BA (2002) University of Minnesota; MA (2005) University of Maryland, PhD (2010) University of Houston

**Oubre, Carroll**, 1999. Adjunct Professor of Civil and Environmental Engineering
BS (1955) University of Southwestern Louisiana; MS (1956) Ohio State University; PhD (1966) Rice University

**Oukaderova, Lida**, 2008. Assistant Professor of Art History
BA (1997) Martin-Luther University; MA (1999), PhD (2005) University of Texas–Austin

**Overall, John E**., 1983. Adjunct Professor of Psychology
BS (1954) Trinity University; MA (1956), PhD (1958) University of Texas–Austin

**Padgett, Jamie Ellen**, 2007. Associate Professor of Civil and Environmental Engineering
BS (2003) University of Florida–Gainesville; PhD (2007) Georgia Institute of Technology

**Padley, B. Paul**, 1996. Professor of Physics and Astronomy
BS (1981) York University; MS (1984), PhD (1987) University of Toronto

**Page, Paula**, 1985. Associate Professor of Harp
BMus (1969) Cleveland Institute of Music

**Palem, Krishna**, 2007. Ken and Audrey Kennedy Professor of Computer Science and Electrical and Computer Engineering, Professor of Statistics
MS (1981), PhD (1986) University of Texas

**Palmer, Graham A**., 1974. Research Professor in Biochemistry and Cell Biology
BS (1957), PhD (1962) University of Sheffield

**Palzkill, Timothy**, 2008. Adjunct Professor of Biochemistry and Cell Biology
BS (1983) Creighton University; PhD (1988) University of Iowa

**Papadopoulos, Pamela Constantinou**, 2010. Faculty Fellow in Biosciences
BA (1999) Vassar College; PhD (2005) New York University

**Park, Sohyoung**, 2005. Artist Teacher of Piano and Piano Pedagogy
BMus (1991) Seoul National University; MMus (1993) University of Michigan; DMA (2000) Rice University

**Parker, Jon Kimura**, 2000. Professor of Piano
BMus, MMus (1981), DMA (1989) Juilliard School of Music

**Parry, Ronald J**., 1978. Research Professor in Chemistry
BA (1964) Occidental College; PhD (1968) Brandeis University

**Parsons, Sandra V**., 2011. Lecturer of Psychology
BA (1992) University of Virginia; MA (1995), PhD (1999) Miami University

**Parsons, Spencer W**., 1969. Associate Professor of Architecture
BA (1953) University of Michigan; MArch (1963) Harvard University

**Parsons, William B**., 1993. Professor of Religion, Associate of Brown College
BA (1979) Brandeis University; MDiv (1982) Yale University; PhD (1993) University of Chicago

**Pasquali, Matteo**, 1999. Professor of Chemical and Biomolecular Engineering, of Materials Science and NanoEngineering, and of Chemistry, Department Chair of Chemistry, Master of Lovett College
MS (1992) University of Bologna; PhD (1999) University of Minnesota

**Pati, Debananda**, Adjunct Assistant Professor of Biochemistry and Cell Biology
BSc (1986) Orissa University; MS (1988) University of Buckingham; PhD (1995) University of Calgary

**Patterson, Peggy**, 2003. Senior Lecturer of Spanish
BS (1974) University of Texas–Austin; MA (1986) University of Hawaii; MA (1989), PhD (2001) University of Texas–Austin

**Paver, Barbara**, Associate Professor of Voice
BM (1992) University of Arizona, MM (1996), DMA (2010) University of Cincinnati College-Conservatory of Music

**Pazgal, Amit**, 2006. Professor of Marketing
BS (1987), MS (1992) Tel Aviv University; PhD (1997) Northwestern University

**Peaceman, Donald W**., 1983. Adjunct Professor of Computational and Applied Mathematics
BChE (1947) College of the City of New York; ScD (1952) Massachusetts Institute of Technology

**Pearson, Deborah A**., 1991. Adjunct Professor of Psychology
BA (1979) Wesleyan University; MA (1982), PhD (1986) Rice University

**Peek, Kathryn**, 2006. Adjunct Associate Professor of Bioengineering
BA (1968) Lamar University; MS (1970) University of Houston; MA ( 1981) University of Houston–Clear Lake; PhD (1988) University of Texas Health Science Center–Houston

**Pellis, Neil R**., 1997. Adjunct Professor in the Mabee Laboratory

**Peres, S. Camille**, 2007. Adjunct Associate Professor of Psychology
BA (1990), MA (1996) University of Houston–Clear Lake; MA (2005), PhD (2005) Rice University

**Perkins, Heidi**, 2008. Lecturer of Kinesiology
BS (1985) Missouri State University; MEd (1992), PhD (2006) University of Houston

**Perrigne, Isabelle**, 2012. Professor of Economics
BS (1984) Université de Toulouse; MS (1985) Université de Toulouse; PhD (1991) Université de Toulouse

**Pettitt, B. Montgomery**, 2010. Adjunct Professor of Chemistry
BS (1975), PhD (1980) University of Houston

**Phillips, Dereth**, 2004. Lecturer of Biochemistry and Cell Biology
BA (1991) Hiram College; PhD (2000) Harvard University

**Phillips, George**, 2012. Ralph and Dorothy Looney Professor of Biochemistry and Cell Biology
BA (1974) Rice University; PhD (1976) Rice University

**Pimpinelli, Alberto**, 2014. Faculty Fellow in Materials Science and NanoEngineering

**Pinn, Anthony B**., 2004. Agnes Cullen Arnold Professor of Humanities, Professor of Religion, Associate of Wiess College
BA (1986) Columbia University; MDiv (1989) Harvard Divinity School; MA (1991), PhD (1994) Harvard University

**Pitts, Timothy**, 1992. Professor of Double Bass
BMus (1981) New England Conservatory of Music

**Pomerantz, James R**., 1988. Professor of Psychology
BA (1968) University of Michigan; PhD (1974) Yale University

**Pope, Albert H**., 1986. Gus Sessions Wortham Professor of Architecture
BArch (1978) Southern California Institute of Architecture; MArch (1986) Princeton University

**Porter, Constance Elise**, 2011. Visiting Assistant Professor of Marketing

BS (1988) University of Pennsylvania; MBA (1992) University of Michigan; PhD (2005) Georgia State University

**Portillo, Mary C**., 2010. Adjunct Assistant Professor of Psychology
BS (1996) Colorado School of Mines; BA (2000) Fort Lewis College; MA (2006), PhD (2010) Rice University

**Postolos, George**, 2010. Adjunct Professor of Sport Management
AB (1986) Harvard University, JD (1990) Harvard Law School

**Pu, Han**, 2003. Associate Professor of Physics and Astronomy
BS (1992) University of Science and Technology of China; MS (1994), PhD (1999) University of Rochester

**Purugganan, Mary M**., 2000. Senior Lecturer of Professional Communications
BS (1990) Texas A&M University; PhD (1998) Rice University

**Putman, Andrew**, 2010. Edgar Odell Lovett Assistant Professor of Mathematics
BA (2002) Rice University; PhD (2007) University of Chicago

**Qian, Nanxiu**, 1993. Associate Professor of Chinese Literature
MA (1982) Nanjing University; PhD (1994) Yale University

**Quiocho, Florante A**., 1972. Adjunct Professor of Biochemistry and Cell Biology
BS (1959) Central Philippine University; MS (1961) Howard University; PhD (1966) Yale University

**Qutub, Amina Ann**, 2009. Assistant Professor of Bioengineering
BS (1999) Rice University; PhD (2004) University of California–Berkeley and San Francisco

**Rachleff, Larry**, 1991. Walter Kris Hubert Professor of Orchestra Conducting
BS (1977) University of Connecticut; MM (1979) University of Michigan

**Radigan, Judy**, 2002. Lecturer of Education Certification
MFA (1985) University of Houston; MEd (1997) University of St. Thomas; PhD (2001) University of Houston

**Ragsdale, Lyn**, 2006. Dean of the School of Social Sciences, Radoslav A. Tsanoff Chair of Public Affairs, Professor of Political Science
BS (1974) Arizona State University; MA (1978), PhD (1982) University of Wisconsin

**Ramesh, Kris**, 2010. Herbert S. Autrey Professor of Accounting, Deputy Dean of Academic Affairs in the Jesse H. Jones Graduate School of Business
BComm (1978) University of Madras; MAcct (1985) Washington State University; PhD (1991) Michigan State University

**Ramos, Renata**, 2010. Lecturer of Bioengineering
BS (2002) Instituto Tecnológico y de Estudios Superiores de Monterrey, Mexico; PhD (2008) University of Arizona

**Rao, Arvind**, 2014. Adjunct Assistant Professor of Electrical and Computer Engineering
BEC (2001) Bangalore University; MSE (2003) University of Texas–Austin; MA (2007), PhD (2008) University of Michigan

**Raphael, Robert M**., 2001. Associate Professor of Bioengineering
BS (1989) University of Notre Dame; MS (1992), PhD (1996) University of Rochester

**Rarick, Janet**, 1992. Associate Professor of Music Career Development
BM (1973) University of Southern California

**Rau, Carl**, 1983. Professor of Physics and Astronomy
BS (1963), MS (1967), PhD (1970) Technical University, Munich

**Raun, Loren Hopkins**, 2006. Faculty Fellow of Statistics, Environmental Analysis and Decision Making
BS (1986) University of Texas; MS (1989), PhD (1998) Rice University

**Ray, Bonnie**, 2008. Adjunct Associate Professor of Statistics
BS (1985) Baylor University; PhD (1991) Columbia University

**Redding, Stephen**, 2009. Lecturer of Architecture
BS (1970) Rice University; MME (1971) Rice University

**Reddy, Deepa**, 2005. Adjunct Professor of Anthropology
BA (1994) University of Toronto; PhD (2000) Rice University

**Regier, Alexander T**., 2009. Associate Professor of English
BA (1999) University of Durham; MPhil (2000), PhD (2004) University of Cambridge

**Reiff, Patricia H**., 1992. Professor of Physics and Astronomy
BS (1971) Oklahoma State University; MS (1974), PhD (1975) Rice University

**Richards-Kortum, Rebecca,** 2005. Stanley C. Moore Professor of Bioengineering, Professor of Electrical and Computer Engineering
BS (1985) University of Nebraska; MS (1987), PhD (1990) Massachusetts Institute of Technology

**Rickman, Steven**, 2011. Adjunct Professor of Mechanical Engineering
BS (1985) University of Cincinnati; MS (1993) University of Houston—Clear Lake

**Remacle, Jean-François**, 2014. Visiting Professor of Computational and Applied Mathematics
MS (1992), PhD (1997) Université de Liège

**Riedel, Brian**, 2012 Professor in the Practice of Humanities
BA (1994) University of North Carolina-Chapel Hill; PhD (2005) Rice University

**Riese, W. C. "Rusty,"** 1985. Adjunct Professor of Earth Science, Lecturer
BS (1973) New Mexico Institute of Mining and Technology; MS (1977), PhD (1980) University of New Mexico

**Ring Freeman, Wendy**, 2008. Senior Lecturer of French
MA (1997) Université Grenoble III Stendahl; DESS (1998) Université Lyon II Lumière; PhD (2007) University of Arizona

**Ringe, Emily**, 2014. Assistant Professor of Materials Science and NanoEngineering and of Chemistry
BA (2006), MS (2008), PhD (2012) Northwestern University

**Rivière, Béatrice M**., 2008. Professor of Computational and Applied Mathematics
Licence de Mathématiques (1993) Université Claude-Bernard, France; Diplome d'Ingénieur (1995) École Centrale de Lyon, France; MS (1996) Pennsylvania State University; PhD (2000) University of Texas–Austin

**Rixner, Scott**, 2000. Professor of Computer Science and in Electrical and Computer Engineering
BS (1995), ME (1995), PhD (2000) Massachusetts Institute of Technology

**Robert, Marc A**., 1984. Professor of Chemical and Biomolecular Engineering
Diploma (1975) Swiss Federal Institute of Technology, Zurich; PhD (1980) Swiss Federal Institute of Technology, Lausanne

**Roberts, Jabus B**., Jr., 1975. Professor of Physics and Astronomy
BA (1965) Columbia University; PhD (1969) University of Pennsylvania

**Robinson, Jacob**, 2012. Assistant Professor of Electrical and Computer Engineering
BS (2003) University of California at Los Angeles; MS/PhD (2008) Cornell University

**Rodriguez, Augusto X**., 2010. Lecturer of Kinesiology
BEd (1998) University of Puerto Rico; MS (2003), PhD (2010) University of Houston

**Roof, Judith**, 2010. William Shakespeare Chair in English, Professor of English, Department Chair of English
BA (1972) Ohio State University; MA (1973) University of Toronto; JD (1979), MA (1980), PhD (1984) Ohio State University

**Rosenberg, Susan M**., 2009. Adjunct Professor of Biochemistry and Cell Biology
BA (1980) State University of New York–Potsdam; MS (1981), PhD (1986) University of Oregon

**Rossky, Peter**, 2014. Harry C. and Olga K. Chair of Chemistry, Dean of Natural Sciences
BA (1971) Cornell University; MA (1972), PhD (1978) Harvard University

**Rountree, Brian R**., 2003. Associate Professor of Accounting
BS (1996) Babson College; PhD (2003) University of North Carolina–Chapel Hill

**Roux, Robert**, 1990. Professor of Piano, Chair of Keyboard
BMus (1970) Loyola University; MMus (1978), DMA (1980) University of Texas–Austin

**Rudgers, Jennifer**, 2005. Associate Professor of Ecology and Evolutionary Biology
BS (1996) Denison University; PhD (2002) University of California–Davis

**Rudolf, Volker H. W**., 2007. Associate Professor of Ecology and Evolutionary Biology
BS (2000) University of Regensburg; MS (2003) Julius-Maximilians-Universität Wurzburg; PhD (2007) University of Virginia

**Rusin, Craig**, 2013. Adjunct Assistant Professor of Computational and Applied Mathematics
BSE (2001) Princeton University; PhD (2009) University of Virginia

**Rusk, Jerrold G**., 2006. Professor of Political Science
BS (1963) Brigham Young University; PhD (1968) University of Michigan

**Ryang, Sonia**, 2014. T.T. and W.F. Chao Center Professor of Asian Studies, Director of the Chao Center for Asian Studies
MPhil (1988) University of York; MPhil (1991), PhD (1995) University of Cambridge

**Sabharwal, Ashutosh**, 2001.Professor of Electrical and Computer Engineering
BTech (1993) Indian Institute of Technology; MS (1995), PhD (1999) Ohio State University

**Saggau, Peter**, 2000. Adjunct Professor of Bioengineering
BS (1973) Technical College Ulm, Germany; MS (1977) Technical University, Munich, Germany; PhD (1988) University of Munich

**Salaberry, M. Rafael**, 2013. Mary Gibbs Jones Professor of Humanities, Professor of Spanish, Director of the Center for Languages and Intercultural Communication
BA (1983) Air Force Academy-Uruguay, MAT (1989) Alianza Uruguay-EEUU, MAT (1993) University of Maine, PhD (1997) Cornell University

**Salas, Marcela**, 1995. Senior Lecturer of Spanish.
BA (1987) Instituto Nacional del Profesorado, Buenos Aires, Argentina; MA (1995) Rice University; PhD (2003) University of Houston

**Saltz, Julia**, 2014. Assistant Professor of Ecology and Evolutionary Biology
AB (2005) Princeton University; PhD (2011) University of California-Davis

**Sams, Clarence F**., 1997. Adjunct Assistant Professor of Biochemistry and Cell Biology
BA (1975), PhD (1983) Rice University

**Samuels, Danny M**., 1981. Professor in the Practice of Architecture
BArch (1971) Rice University

**San, Ka-Yiu**, 1984. E.D. Butcher Professor of Bioengineering, Professor of Chemical and Biomolecular Engineering
BS (1978) Rice University; MS (1981), PhD (1984) California Institute of Technology

**Sanders, Paula A**., 1987. Vice Provost for Academic Affairs, Professor of History
BA (1977) Northwestern University; MA (1981), PhD (1984) Princeton University

**Sanders-Goldsberry, Betty S.**, 1988. Adjunct Assistant Professor of Psychology
BA (1965) Central State University; MA (1978) Framingham State College; PhD (1984) Rice University

**Sankaranarayanan, Aswin**, 2009. Adjunct Assistant Professor of Electrical and Computer Engineering
BS (2003) Indian Institute of Technology; PhD (2009) University of Maryland—College Park

**Sarkar, Vivek**, 2007. Professor of Computer Science, E.D. Butcher Chair in Engineering, Department Chair of Computer Science
BTech (1981) Indian Institute of Technology, Kanpur, India; MS (1982) University of Wisconsin–Madison; PhD (1987) Stanford University

**Saterbak, Ann**, 2002. Professor in the Practice of Bioengineering Education
BA (1990) Rice University; PhD (1995) University of Illinois

**Sato, Hiroko**, 1989. Senior Lecturer of Japanese
BA (1977) Obilin College, Japan; MA (1981) University of Michigan

**Sawyer, Dale S**., 1988. Professor of Earth Science, Master of Sid Richardson College
BS (1976) Purdue University; PhD (1982) Massachusetts Institute of Technology

**Saxer Quance, Gerda**, 2011. Faculty Fellow, Biochemistry and Cell Biology
MS (1998) University of Zurich; PhD (2005) University of Houston

**Sazer, Shelley**, 2008. Adjunct Associate Professor of Biochemistry and Cell Biology
PhD (1988) Stanford University

**Sazykin, Stanislav**, 2005. Senior Faculty Fellow in Physics and Astronomy
BS (1994) Utah State University; MS (1996) Moscow Institute of Physics and Technology; PhD (2000) Utah State University

**Schaefer, Jacqueline**, 2012. Lecturer of Architecture
BA (2007) Rice University; BArch (2009) Rice University

**Schaum, R. Troy**, 2011. Assistant Professor in Architecture
BArch (1999) Virginia Polytechnic Institute; MArch (2006) Princeton University

**Schell, Rick**, 2006. Senior Lecturer of Management
BA (1971) Eastern Michigan University; MA (1975), PhD (1976) Rice University

**Schell, Wendy**, 2008. Lecturer of Kinesiology
BS (1994) Auburn University; BS (1996) Georgia State University; MS (2007) Texas Women's University

**Schnur, Tatiana T**., 2007. Assistant Professor of Psychology
BA (1995), University of Virginia; MA (1999), PhD (2003) Harvard University

**Schuler, Douglas A**., 1992. Associate Professor of Business and Public Policy
BS (1985) University of California–Berkeley; PhD (1992) University of Minnesota

**Schwanauer, Stephen**, 2011. Adjunct Professor in Electrical and Computer Engineering
BS (1981), PhD (1986) Yale University

**Schweinberger, Michael**, 2013. Assistant Professor of Statistics
MS (2002), PhD (2007) University of Groningen, the Netherlands

**Schwindt-Bayer, Leslie A.**, 2013. Associate Professor of Political Science
BA (1996) Virginia Polytechnic Institute and State University; MA (1999), PhD (2003) University of Arizona

**Scott, David W**., 1979. Noah Harding Professor of Statistics
BA (1972), MA, PhD (1976) Rice University

**Scuseria, Gustavo E**., 1989. Robert A. Welch Professor of Chemistry, of Physics and Astronomy, and of Materials Science and NanoEngineering
BS (1979), PhD (1983) University of Buenos Aires

**Seed, Patricia**, 1982. Adjunct Professor of Anthropology
BA (1971) Fordham University; MA (1975) University of Texas–Austin; PhD (1980) University of Wisconsin–Madison

**Segatori, Laura**, 2007. T.N. Law Assistant Professor of Chemical and Biomolecular Engineering, Associate Professor of Biochemistry and Cell Biology
BS (2000), MS (2000) University of Bologna, Italy; PhD (2005) University of Texas–Austin

**Segner III, Edmund**, 1996. Professor of the Practice in Civil Engineering Management
BS Rice University; MA University of Houston

**Self, Bethany**, 2014. Artist Teacher of Opera Studies
BM (2002) Gordon College; MM (2004) University of Michigan

**Semmes, Stephen W**., 1987. Noah Harding Professor of Mathematics
BS (1980) Armstrong State College; PhD (1983) Washington University

**Sereno, Anne Bibiana**, 2002. Adjunct Professor of Psychology
BS (1985) Northern Illinois University; MA (1991), PhD (1991) Harvard University

**Shahsavari, Rouzbeh**, 2011. Assistant Professor of Civil and Environmental Engineering and of Materials Science and NanoEngineering
BS (2002) Sharif University of Technology, Iran; MS (2005) McGill University, Canada; PhD (2010) Massachusetts Institute of Technology

**Shamoo, Yousif**, 1998.Vice Provost for Research, Professor of Biochemistry and Cell Biology
BS (1983) Carnegie Mellon University; PhD (1988) Yale University

**Shank Jr, C. Dean**, 1984. Artist Teacher of Piano and Piano Technology
BMus (1968), MMus (1971) North Texas State University; DMA (1988) University of Texas–Austin

**Shanks, Jacqueline**, 2002, Adjunct Professor of Bioengineering
BS (1983) Iowa State University; PhD (1989) California Institute of Technology

**Shaw, Chad A**., 2004. Adjunct Assistant Professor of Statistics
BS (1995) Duke University; PhD (2001) Rice University

**Sheafor, Stephen J**., 2002. Adjunct Professor of Electrical and Computer Engineering
BS (1972), MEE (1972), Rice University; PhD (1974) University of Illinois; MBA (1979) Santa Clara University

**Shehabuddin, Elora**, 2001. Associate Professor of Humanities and Political Science
BA (1991) Harvard University; PhD (2000) Princeton University

**Shen, Chao-Mei**, 2000. Senior Lecturer of Chinese
BA (1986) National Tsing Hua University; MA (1989) National Taiwan University; PhD (1998) University of Texas–Austin

**Shen, Yu**, 2002. Adjunct Professor of Statistics
BS (1984), MS (1986) East China Normal University; MS (1990) University of Notre Dame; PhD (1994) University of Washington

**Sher, George**, 1991. Herbert S. Autrey Professor of Philosophy
BA (1964) Brandeis University; PhD (1972) Columbia University

**Shete, Sanjay S**., 2007. Adjunct Professor of Statistics
BS (1987), MS (1989), M.Phil (1993) Shivaji University, India; PhD (1998) University of Georgia

**Shibatani, Masayoshi**, 2002. Deedee McMurtry Professor of Humanities, Professor of Linguistics
BA (1970), PhD (1973) University of California–Berkeley

**Shipp, Stephanie S**., 2000. Adjunct Assistant Professor of Earth Science
BS (1988) University of Maine; PhD (1999) Rice University

**Shouval, Harel**, 2004. Adjunct Associate Professor of Computational and Applied Mathematics
BSc (1987) Tel Aviv University; MSc (1990) Weizmann Institute; PhD (1994) Brown University

**Shumway, Nicolas**, 2010. Dean of the School of Humanities, Frances Moody Newman Professor of Humanities, Professor of Spanish and Portuguese
BA (1969) Brigham Young University; MA (1971), PhD (1976) University of California–Los Angeles

**Shvets, Gennady**, 2005. Adjunct Associate Professor of Electrical and Computer Engineering
PhD (1995) Massachusetts Institute of Technology

**Si, Qimiao**, 1994. Harry C. and Olga K. Wiess Professor of Physics and Astronomy
BS (1986) University of Science and Technology of China; PhD (1991) University of Chicago

**Sickles, Robin**, 1985. Reginald Henry Hargrove Chair in Economics and Professor of Statistics
BS (1972) Georgia Institute of Technology; PhD (1976) University of North Carolina

**Sidbury, James**, 2011. Andrew W. Mellon Distinguished Professor of Humanities, Professor of History
BA (1980), MA (1988), PhD (1991) Johns Hopkins University

**Siefert, Janet**, 2002. Senior Faculty Fellow in Statistics
BS (1975) University of Central Arkansas; PhD (1997) University of Houston

**Siemann, Evan**, 1998. Harry C. and Olga K. Wiess Professor of Ecology and Evolutionary Biology
AB (1989) Cornell University; PhD (1997) University of Minnesota

**Siewert, Charles**, 2010. Robert Alan and Kathryn Dunlevie Hayes Chair of Humanities, Professor of Philosophy
BA (1983) Reed College; PhD (1994) University of California– Berkeley

**Silberg, Jonathan J**., 2004. Associate Professor of Biochemistry and Cell Biology
BS (1994), PhD (2000) University of California–Irvine

**Simar, Ray, Jr**., 2009. Professor in the Practice of Computer Architecture and Electrical and Computer Engineering
BS (1981) Texas A&M University; MS (1983) Rice University

**Simpson, Robert**, 2002. Lecturer of Church Music
AB (1970) Brown University; SMM (1972) Union Theological Seminary

**Simson, Julie**, 2013. Professor of Voice
BM (1978) Western Michigan University, MM (1981) University of Illinois-Urbana

**Sinclair, James B**., 1978. Lecturer of Electrical and Computer Engineering, Associate Dean of Engineering
BSEE (1973), MEE (1974), PhD (1979) Rice University

**Sivaramakrishnan, K.**, 2012. Henry Gardiner Symonds Professor of Accounting
B. Tech. (1977) Indian Institute of Technology, Madras; MBA (1980) Xavier Labor Relations Institute, Jamshedpur; PhD (1989) Northwestern University

**Sizova, Natalia M**., 2009. Assistant Professor of Economics
BS (2002), MS (2004) Moscow Institute of Physics and Technology, MA (2004) New Economic School; PhD (2009) Duke University

**Skura, Meredith**, 1978. Libby Shearn Moody Professor of English
BA (1965) Swarthmore College; PhD (1971) Yale University

**Smith, Brinton Averil**, 2005. Associate Professor of Cello
BA (1986) Arizona State University; MA (1988) University of Southern California; MMus (1991), DMA (1998) Juilliard School of Music

**Smith, D. Brent**, 2000. Associate Professor of Management, Associate Professor of Psychology, Senior Associate Dean of
Executive Education
BA (1992) University of Tulsa; MA (1996), PhD (1999) University of Maryland–College Park

**Smith, Ian**, 2000. Senior Faculty Fellow in Physics and Astronomy
BSc (1986) Bristol University; MA (1987), PhD (1990) Washington University

**Smith, Richard J., 1973**. George and Nancy Rupp Professor of Humanities, Professor of History
BA (1966), MA (1968), PhD (1972) University of California–Davis

**Smith Jr, Roland B**., 1996. Associate Provost, Adjunct Professor of Sociology and of Education Certification
BA (1969) Bowie State University; MPA (1976) Indiana University; EdD (1988) Harvard University

**Snow, Edward A**., 1981. Mary Gibbs Jones Chair for the Humanities, Professor of English
BA (1964) Rice University; MA (1966) University of California–Riverside; PhD (1969) State University of New York–Buffalo

**Socaciu, Gheorghe-Ciprian**, 2009. Lecturer of French
BA (1998), MA (1999) Babes-Bolyai University

**Solomon, Scott**, 2009. Lecturer and Lab Coordinator
BS (2000) University of Illinois– Urbana-Champaign; PhD (2007) University of Texas–Austin

**Somerville, Ted**, 2008. Lecturer of Classical Studies
BA (1999) University of Texas–Austin; PhD (2007) Harvard University

**Sonenshein, Scott**, 2007. Associate Professor of Management
BA (1998) University of Virginia; MPhil (1999) University of Cambridge; PhD (2007) University of Michigan

**Song, Yongcheng**, 2009. Adjunct Assistant Professor of Chemistry
BS (1993) Nanjing University; PhD (2001) National University of Singapore/Institute of Molecular and Cell Biology

**Sorensen, Danny C**., 1989. Noah Harding Professor of Computational and Applied Mathematics
BS (1972) University of California–Davis; MA (1975), PhD (1977) University of California–San Diego

**Sosa, Jason**, 2007. Senior Lecturer of Sport Management
BA (2002), MS (2003), PhD (2007) Texas A&M University

**Souza Paula, Leonora**, 2013. Assistant Professor of Spanish and Portuguese
BA (2002), MA (2004) Universidade Federal de Minas Gerais, Belo Horizonte, PhD (2013) University of California-San Diego

**Spanos, Pol D**., 1984. Lewis B. Ryon Professor of Mechanical Engineering, Civil and Environmental Engineering, and of Materials Science and NanoEngineering

Diploma (1973) National Technical University, Greece; MS (1974), PhD (1976) California Institute of Technology

**Sparagana, John**, 1989. Professor of Visual and Dramatic Arts, Grace Christian Vietti Chair in Visual Arts, Department Chair of Visual and Dramatic Arts
BGS (1980) University of Michigan; MFA (1987) Stanford University

**Sperandio, Christopher**, 2008. Assistant Professor of Visual and Dramatic Arts
BFA (1987) West Virginia University; MFA (1991) University of Illinois– Chicago

**Spieler, Christof**, 2000. Senior Lecturer of Architecture
BS (1997), MS (1999) Rice University

**Stallings, Tom**, 2007. Professor in the Practice of Sport Management
BA (1991) University of Texas; MED (2008) University of Houston

**Stallmann, Kurt**, 2002. Associate Professor of Composition and Theory
BM (1987) Northern Illinois University; AM (1998), PhD (1999) Harvard University

**Stanciulescu, Ilinca**, 2009. Assistant Professor of Civil and Environmental Engineering and Mechanical Engineering
BA (1995), MASc (1996) Technical University of Civil Engineering, Bucharest, Romania; BS (2000) Bucharest University; PhD (2005) Duke University

**Stanley, Melinda A**., 2010. Adjunct Professor of Psychology
BA (1980) Gettysburg College; MA (1982) Princeton University; PhD (1987) Texas Tech University

**Stasney, C. Richard**, 1999. Adjunct Professor of Performing Arts Medicine
BA (1965) Yale University; MD (1969) Baylor College of Medicine

**Stein, Robert M**., 1979. Lena Gohlman Fox Professor of Political Science
BA (1972) Ohio Wesleyan University; MA (1974), PhD (1977) University of Wisconsin–Milwaukee

**Steiner, Uwe**, 2001. Professor of German Studies, Department Chair of German Studies, Associate of Wiess College
Erste (Wissenschaftliche) Staatsprüfung (1981), PhD (1987), Habilitation (1998) Freie Universität Berlin

**Stern, Michael**, 1991. Professor of Biochemistry and Cell Biology
BS (1978) Stanford University; PhD (1985) University of California–San Francisco

**Stevens, Sara**, 2012. Lecturer of Architecture
BA (2000), BArch (2002) Rice University; MED (2006) Yale University; PhD (2012) Princeton University

**Stevenson, Paul M**., 1984. Professor of Physics and Astronomy, Associate of Brown College
BA (1976) Cambridge University; PhD (1979) Imperial College

**Stevenson, Randolph T**., 1997. Professor of Political Science
BA (1991) Texas A&M University; MA (1994), PhD (1997) University of Rochester

**Stewart, Charles R**., 1969. Professor of Biochemistry and Cell Biology
BS (1962) University of Wisconsin–Madison; PhD (1967) Stanford University

**Stewart-Halevy, Samuel**, 2013. Visiting Wortham Fellow in Architecture
BA (2008), MArch (2012) Princeton University

**Stoll, Richard J**., 1979. Albert Thomas Chair in Political Science, Professor of Political Science
AB (1974) University of Rochester; PhD (1979) University of Michigan

**Storthz, Karen Adler**, 2007. Adjunct Professor of Bioengineering
BS (1976) Louisiana State University; MS (1978), PhD (1981) Louisiana State University–Medical Center

**Stotts, Angela L**., 2007. Adjunct Associate Professor of Psychology
BA (1986) University of Northern Iowa; MA (1989) Mankato State University; MA (1993), PhD (1996) University of Houston

**Strait, Richard B**., 2007. Adjunct Professor of Chemical and Biomolecular Engineering
BS (1970) Ohio State University; MBA (1978) University of Tulsa

**Strassmann, Diana**, 2004. Carolyn & Fred McManis Distinguished Professor in the Practice of Humanities
AB (1977) Princeton University; MA (1982), PhD (1983) Harvard University

**Stringer, Tish**, 2012. Lecturer of Film and Film Program Manager
BA (1997) University of Minnesota; PhD (2006) Rice University

**Stroup, John M**., 1988. Harry and Hazel Chavanne Professor of Religion
AB (1968) Washington University; MDiv (1972) Concordia Seminary; MPhil (1975), PhD (1980) Yale University

**Studer, Christoph**, 2013. Adjunct Assistant Professor of Electrical and Computer Engineering
MSc (2005), DrSc (2009) ETZ Zurich

**St-Cyr, Amik**, 2012. Adjunct Associate Professor of Computational and Applied Mathematics
BS (1997), MS (1998), PhD (2002) University of Montreal

**Subramanian, Devika**, 1995. Professor of Computer Science and of Electrical and Computer Engineering
BTech (1982) Indian Institute of Technology; MS (1984), PhD (1989) Stanford University

**Suh, Junghae**, (2007). Assistant Professor of Bioengineering
BS (1999) Massachusetts Institute of Technology; PhD (2004) Johns Hopkins University

**Sumners, Carolyn**, 1999. Adjunct Professor of Physics and Astronomy
BA (1970) Vanderbilt University; MEd (1977), EdD (1979) University of Houston

**Swint, John Michael**, 1977. Adjunct Professor of Economics
BA (1968) California State University–Humboldt; MA, PhD (1972) Rice University

**Symes, William W**., 1984. Noah Harding Professor of Computational and Applied Mathematics, Professor of Earth Science
BA (1971) University of California–Berkeley; PhD (1975) Harvard University

**Tabor, Jeffrey J**., 2010. Assistant Professor of Bioengineering
BA (2001), PhD (2006) University of Texas–Austin

**Taha, Walid**, 2011. Adjunct Professor of Computer Science
BSc (1993) Kuwait University; PhD (1999) Oregon Graduate Institute

**Takizawa, Kenji**, 2011. Adjunct Associate Professor in Mechanical Engineering
BS (2001), MA (2002), PhD (2005) Tokyo Institute of Technology

**Tandon, Nitin**, 2012. Adjunct Professor of Electrical and Computer Engineering
MBBS (1992) Armed Forces Medical College

**Tang, Ming**, 2014. Adjunct Professor of Materials Science and NanoEngineering
BS (1999), MS (2002) Shanghai Jiao Tong University, PhD (2008) Massachusetts Institute of Technology

**Tang, Xun**, 2014. Associate Professor of Economics
BA (1998) Beijing Foreign Studies University; MPP (2003) University of Chicago; MA (2004), PhD (2008) Northwestern University

**Tao, Yizhi Jane**, 2002. Associate Professor of Biochemistry and Cell Biology
BS (1992) Peking University; PhD (1999) Purdue University

**Tapia, Richard A**., 1970. University Professor, Maxfield-Oshman Professor of Computational and Applied Mathematics
BA (1961), MA (1966), PhD (1967) University of California–Los Angeles

**Taylor, Matthew D**., 2005. Associate Vice-Provost for Academic Affairs, Associate Dean of Undergraduates, Adjunct Associate Professor of Humanities
BA (1985) Southern Methodist University; MA (1989) Rice University; Ph.D. (1992) Rice University

**Taylor, Rives T**., 2003. Lecturer of Architecture
BA (1982), BArch (1984) Rice University; MS (1988) Massachusetts Institute of Technology

**Tezduyar, Tayfun E**., 1998. James F. Barbour Professor of Mechanical Engineering
MS (1978), PhD (1982) California Institute of Technology

**Thomann, Isabell**, 2012. Assistant Professor of Electrical and Computer Engineering and of Materials Science and NanoEngineering
MS (2001) Swiss Federal Institute of Technology; PhD (2009) University of Colorado at Boulder

**Thomas, Edwin L**., 2011. William and Stephanie Sick Dean of the George R. Brown School of Engineering, Professor

of Materials Science and NanoEngineering and of Chemical and Biomolecular Engineering
BS (1969) University of Massachusetts; PhD (1974) Cornell University

**Thompson, Ewa M**., 1970. Research Professor of Slavic Studies
BA (1963) University of Warsaw; MFA (1963) Sopot Conservatory of Music, Poland; PhD (1967) Vanderbilt University

**Thompson, James R**., 1970. Noah Harding Professor of Statistics
BEng (1960) Vanderbilt University; MA (1963), PhD (1965) Princeton University

**Tittel, Frank K**., 1967. J. S. Abercrombie Professor of Electrical and Computer Engineering
BA (1955), MA, PhD (1959) Oxford University

**Tkaczyk, Tomasz**, 2007. Associate Professor of Bioengineering
MS (1994), PhD (2000) Warsaw University of Technology

**Tobin, David H**., 2007. Senior Lecturer of Communications
BA (1972) University of Michigan; MA (1974), PhD (1977) Princeton University

**Toffoletto, Frank R**., 1996. Professor of Physics and Astronomy
BS (1981) La Trobe University; PhD (1987) Rice University

**Tolias, Andreas S**., 2006. Adjunct Assistant Professor of Computational and Applied Mathematics
BA (1993), MA (1997) Cambridge University, U.K.; PhD (1999) Massachusetts Institute of Technology

**Tomson, Mason B**., 1977. Professor of Civil and Environmental Engineering
BS (1967) Southwestern State College; PhD (1972) Oklahoma State University

**Tour, James M**., 1999. T. T. and W. F. Chao Professor of Chemistry, Computer Science, and of Materials Science and NanoEngineering
BS (1981) Syracuse University; PhD (1986) Purdue University

**Tran, Thanh T**., 2004. Adjunct Lecturer of Electrical and Computer Engineering
BSEE (1984) University of Illinois; MEE (1995); PhD (2001) University of Houston

**Treichler, John**, 2014. Professor in the Practice of Electrical and Computer Engineering
BA (1970), MEE (1970) Rice University; PhD (1977) Stanford University

**Tsai, Ah-Lim**, 2007. Adjunct Professor of Biochemistry and Cell Biology
BS (1974) National Taiwan University; PhD (1983) Rice University

**Tsai, Pei-Ting**, 2006. Lecturer of Chinese
BA (1997), MA (2005) National Central University, Taiwan

**Turan, Neyran**, 2009. Assistant Professor of Architecture
BArch (1998) Istanabul Technical University; MArch (2003) Yale University; PhD (2008) Harvard University

**Turi, Luziris**, 2010. Lecturer of Spanish, Associate Director, Center for Languages and Intercultural Communication
BA (2003), MA (2005) University of Houston

**Turley, Ruth N. Lopez**, 2010. Professor of Sociology
BA (1996) Stanford University; MA (1999), PhD (2001) Harvard University

**Vajtai, Robert**, 2008. Senior Faculty Fellow in Materials Science and NanoEngineering
MSc (1986) Jate University; PhD (1997) Szeged University, Hungary

**Van der Werff, Ivo-Jan**, 2007. Professor of Viola
Associate Hons (1980) Royal College of Music

**Vannucci, Marina**, 2006. Professor of Statistics, Department Chair of Statistics
BS (1982), PhD (1996) University of Florence, Italy

**Vardi, Moshe**,1993. Karen Ostrum George Distinguished Service Professor of Computational Engineering, Professor of Computer Science
BS (1975) Bar-Ilan University; MS (1980) Feinberg Graduate School of the Weizmann Institute of Science; PhD (1982) Hebrew University

**Vargas Arreola, Francisco M**., 2013. Assistant Professor of Chemical and Biomolecular Engineering
BS (1999), MS (2002) Technologico de Monterrey, Mexico; PhD (2009) Rice University

**Varilly-Alvarado, Anthony**, 2009. Assistant Professor of Mathematics
AB (2003) Harvard University; PhD (2009) University of California–Berkeley

**Varman, Peter J**., 1983. Professor of Electrical and Computer Engineering and Computer Science
BTech (1978) Indian Institute of Technology, Kanpur; MSEE (1980), PhD (1983) University of Texas–Austin

**Vassallo Fernando, Jesus**, 2013. Assistant Professor of Architecture
BArch (2004) Escuela Superior de Architectura de Madrid, MA (2007) Harvard University, PhD (2014) Escuela Superior de Architetura de Madrid

**Vasudevan, Venu**, 2009. Adjunct Assistant Professor of Electrical and Computer Engineering
BS (1984) Indian Institute of Technology, New Delhi; PhD (1990) Ohio State University

**Veech, William A**., 1969. Edgar Odell Lovett Chair in Mathematics
AB (1960) Dartmouth College; PhD (1963) Princeton University

**Veeraraghavan, Ashok**, 2010. Assistant Professor of Electrical and Computer Engineering
BS (2002) Indian Institute of Technology, Madras; MS (2004), PhD (2008) University of Maryland-- College Park

**Verduzco, Rafael**, 2009. Assistant Professor of Chemical and Biomolecular Engineering, and of Materials Science and NanoEngineering
BS (2001) Rice University; MS (2003), PhD (2006) California Institute of Technology

**VerMeulen, William**, 1990. Professor of French Horn

**Videa, Marcelo Vargas**, 2011. Adjunct Associate Professor of Chemistry
BSc (1993) Instituto Technologico y de Estudios Superiores de Monterrey; PhD (1999) Arizona State University

**Vieux, Baxter**, 2003. Adjunct Professor of Civil and Environmental Engineering
BS (1978) University of Kansas; MS (1982) Kansas State University; PhD (1988) Michigan State University

**Villado, Anton J**., 2008. Assistant Professor of Psychology
BA (1999), MS (2001) California State University; PhD (2008) Texas A&M University

**Volz, Tracy**, 1999. Professor of the Practice in Professional Communication, Director of the Program for Writing and Communication
BA (1989) University of Iowa; MA (1998), PhD (2001) Rice University

**Wagner, Daniel S**., 2003. Associate Professor of Biochemistry and Cell Biology
BA (1990) University of Texas; PhD (1997) University of Texas Health Science Center

**Waligora-Davis, Nicole**, 2008. Associate Professor of English
BA (1995) University of North Carolina–Chapel Hill; MA (1998), PhD (2001) Duke University

**Wallach, Dan Seth**, 1998. Professor of Computer Science and of Electrical and Computer Engineering
BS (1993) University of California–Berkeley; MA (1995), PhD (1998) Princeton University

**Wallach, Steve**, 2010. Adjunct Professor of Computer Science
BSEE (1966) Polytechnic University; MSEE (1967) University of Pennsylvania; MBA (1973) Boston University

**Wamble, Mark S**., 1991. Professor in the Practice of Architecture
BDes (1983) Texas A&M University; DiplSt (1987) Cambridge; MArch (1988) Harvard University

**Warburton, Tim**, 2004. Professor of Computational and Applied Mathematics
BA (1993) Oxford University; MSc (1994), PhD (1998) Brown University

**Ward, Kerry R**., 2001. Associate Professor of History, Associate of Lovett College
BA (1983) University of Adelaide; BA (1985), MA (1992) University of Cape Town; PhD (2002) University of Michigan, Ann Arbor

**Warren, Joe D**., 1986. Professor of Computer Science
BA (1983), MS (1985) Rice University; PhD (1986) Cornell University

**Warren, Scott K**., 1979. Adjunct Assistant Professor of Computer Science
BA (1972), MA (1974), PhD (1976) Rice University

**Watkins, Cornelia**, 2009. Lecturer of Music
BM (1983) The Hartt School, University of Hartford; MM (1974) University of Houston

**Webster, Michael**, 1997. Professor of Music
BM (1966), MM (1967), DMA (1975) Eastman School of Music

**Weckstrom Kantor, Virginia**, 2012. Artist Teacher of Piano Chamber Music and Accompanying
BA (1969) Western College of Women; MMus (1971) Yale University School of Music

**Weisman, R. Bruce**, 1979. Professor of Chemistry and of Materials Science and NanoEngineering
BA (1971) Johns Hopkins University; PhD (1977) University of Chicago

**Weissenberger, Klaus H. M**., 1971. Professor of German Studies, Associate of Hanszen College
MA (1965) University of Hamburg, Germany; PhD (1967) University of Southern California

**Wellington, Scott**, 2011. Distinguished Faculty Fellow in Chemical and Biomolecular Engineering
BA (1966) Hiram College; MS (1968) John Carroll University; PhD (1972) Case Western Reserve University

**Wellner, Julia Smith**, 2003. Adjunct Assistant Professor of Earth Science
AB (1983) Bryn Mawr College; MS (1995) University of Alabama; PhD (2001) Rice University

**Westbrook, Robert A**., 1989. William Alexander Kirkland Professor of Marketing
AB (1969), MBA (1971), PhD (1975) University of Michigan

**Weston, James P**., 2000. Professor of Finance
BA (1993) Trinity College; MA (1996), PhD (2000) University of Virginia

**Wetter, David W.**, 2014. Professor of Psychology, Department Chair of Psychology
BA (1982) Whitman College; MS (1988) University of Oregon;, PhD (1993) University of Wisconsin–Madison

**Whitaker, Jarrett Reid**, 2013. Professor in the Practice in Digital Learning
BS (2002) University of Texas-Austin, MEd (2004) University of St. Thomas, PhD (2002) University of Texas–Austin

**White, Frank S**., 1982. Lecturer of Architecture
BS (1977) Rochester Institute of Technology

**Whitehead, Kerry**, 2001. Visiting Critic of Architecture
BS (1993) Cornell University; MArch (1997) Rice University

**Whiting, Sarah**, 2010. Dean of the School of Architecture, William Ward Watkin Professor of Architecture
BA (1986) Yale University; MArch (1990) Princeton University; PhD (2001) Massachusetts Institute of Technology

**Whitmire, Kenton H**., 1982. Associate Dean of the Wiess School of Natural Sciences, Professor of Chemistry, Department Chair of Kinesiology
BS (1977) Roanoke College; MS (1978), PhD (1982) Northwestern University

**Whitmore, Mihriban**, 1999. Adjunct Assistant Professor of Psychology
BS (1983) Middle East Technical University; MS (1988), PhD (1991) Wichita State University

**Whitney, Stephen E**., 2003. Professor in the Practice of Healthcare Management
BS (1975) Rice University; MA (1976) Union Theological Seminary; MD (1979) Baylor College of Medicine; MBA (2000) University of Houston

**Whitson, Peggy**, 1997. Adjunct Associate Professor of Biochemistry and Cell Biology
BS (1981) Iowa Wesleyan College; PhD (1986) Rice University

**Wiener, Martin J**., 1967. Mary Gibbs Jones Professor of History
BA (1962) Brandeis University; MA (1963), PhD (1967) Harvard University

**Wildenthal, Lora**, 2003. Professor of History, Associate of Will Rice College, Department Chair of History
BA (1987) Rice University; MA (1991), PhD (1994) University of Michigan

**Wilkerson, Steven M**., 2010. Adjunct Professor in Civil and Environmental Engineering
BS (1984), MCE (2005) Rice University

**Wilkinson, Harry E**., 1990. Professor in Professional Sciences Masters Program
BA (1952), MBA (1957) Washington University, St. Louis; DBA (1960) Harvard Business School

**Wilson, Jennifer S**., 2012. Senior Lecturer, Program in Writing and Communication, Director of the Center for Written, Oral, and Visual Communication
BA (1993) Rice University; MA (2004) University of Houston; Ph.D. (2012) University of Toronto

**Wilson, Lon J**., 1973. Professor of Chemistry
BA (1966) Iowa State University; PhD (1971) University of Washington–Seattle

**Wilson, Rick K**., 1983. Herbert S. Autrey Professor of Political Science, Professor of Statistics and of Psychology
BA (1975), MA (1977) Creighton University; PhD (1982) Indiana University

**Windsor, Duane**, 1977. Lynette S. Autrey Professor of Management
BA (1969) Rice University; AM (1973), PhD (1978) Harvard University

**Winer, Rachel T**., 2004. Adjunct Assistant Professor of Psychology
BA (1992) Barnard College; MA (2000), PhD (2002) St. John's University

**Winkler, Kathleen**, 1992. Dorothy Richard Starling Professor of Classical Violin
BMus (1972) Indiana University; MMus (1974) University of Michigan

**Winningham, Geoffrey L**., 1969. Lynette S. Autrey Professor of Humanities, Professor of Visual Arts, Honorary Associate of Wiess College
BA (1965) Rice University; MS (1968) Illinois Institute of Technology

**Wise, J. D**., 1995. Lecturer of Electrical and Computer Engineering
BA (1970), MEE (1971), PhD (1977) Rice University

**Witte, Ron**, 2010. Associate Professor of Architecture
BA (1984) California Polytechnic State University; MArch (1989) Princeton University

**Wittenberg Jr, Gordon G**., 1979. Professor of Architecture
BFA (1968) Trinity College, Connecticut; MArch (1972) Washington University

**Wolf, Michael**, 1988. Professor of Mathematics
BS (1981) Yale University; PhD (1986) Stanford University

**Wolfe, Cary E**., 2003. Bruce and Elizabeth Dunlevie Professor of English
BA (1984), MA (1986) University of North Carolina–Chapel Hill; PhD (1990) Duke University

**Wolfthal, Diane**, 2008. David and Caroline Minter Professor of Humanities, Professor of Art History
BA (1970) City College; MA (1973) Queens College; PhD (1983) New York University

**Wolpin, Kenneth**, 2014. Lay Family Chair in Economics and Distinguished Research Professor
BS (1967) City College of New York; PhD (1974) Graduate School of the City University of New York

**Wolynes, Peter C**., 2011. D.R.Bullard-Welch Foundation Professor of Science, Professor of Chemistry, of Biochemistry and Cell Biology, of Physics and Astronomy and of Materials Science and NanoEngineering
AB (1971) Indiana University; AM (1972) Harvard University; PhD (1976) Harvard University

**Wong, Michael S**., 2001. Professor of Chemical and Biomolecular Engineering, of Chemistry, and of Materials Science and NanoEngineering, Department Chair of Chemical and Biomolecular Engineering
BS (1994) California Institute of Technology; MS (1997), PhD (2000) Massachusetts Institute of Technology

**Wong, Stephen B**., 2001. Lecturer of Computer Science
BA (1981) Swarthmore College; PhD (1988) Massachusetts Institute of Technology

**Wong, Stephen T. C**., 2010. Adjunct Professor of Bioengineering and Electrical and Computer Engineering
BE (1984) University of Western Australia; MS (1989), PhD (1991) Lehigh University

**Wood, Philip R**., 1990. Associate Professor of French
BA (1974) University of Cape Town; MA (1980) University of York; PhD (1988) Yale University

**Woods, Gary L**., 2008. Professor in the Practice of Computer Technology and Electrical and Computer Engineering
BA, BSEE (1988) Rice University; MS (1991), PhD (1997) Stanford University

**Wooten, Kevin C**., 1994. Adjunct Associate Professor of Psychology
BA (1976), MA (1978) University of Houston–Clear Lake; PhD (1991) Tulane University

**Worth, David S**., 2002. Senior Lecturer of Humanities, Director of Forensics
BA (1992), MA (1995) Texas Tech University; PhD (2003) University of Oklahoma

**Wright, Anthony A**., 1980. Adjunct Professor of Psychology
BA (1965) Stanford University; MA (1970), PhD (1971) Columbia University

**Wu, Samuel Miao-Sin**, 2009. Adjunct Professor of Bioengineering
AB (1973) University of California–Berkeley; PhD (1979) Harvard University

**Wysocki, Gerald**, 2006. Adjunct Assistant Professor of Electrical and Computer Engineering
MS (1999) Wroclaw University of Technology, Wroclaw, Poland; PhD (2003) Johannes Kepler University, Linz, Austria

**Xing, Yuhang**, 2003. Associate Professor of Finance, Faculty Director of the El Paso Finance Center
BA (1997) Peking University; MS (1998) Northwestern University; PhD (2003) Columbia University

**Xu, Qianfan**, 2013. Adjunct Assistant Professor of Electrical and Computer Engineering
BE (1999), ME (2002) Tsinghua University; PhD (2007) Cornell University

**Yakobson, Boris I**., 1999. Karl F. Hasselmann Professor of Materials Science and NanoEngineering and of Chemistry
MS (1978) Novosibirsk State University; PhD (1982) Russian Acadamy of Sciences

**Yarbrough, Fay**, 2013. Associate Professor of History
BA (1997) Rice University, MA (2000), PhD (2003) Emory University

**Yeh, Meng**, 2001. Senior Lecturer of Chinese, Associate Director of the Center for Languages and Intercultural Communication
BA (1986) Tamkang University; MA (1988), PhD (1993) University of Texas–Austin

**Yekovich, Robert A**., 2003. Dean of the Shepherd School of Music, Elma Schneider Professor of Music
BMus (1978), MMus (1980) University of Denver; DMA (1991) Columbia University

**Yepes, Pablo P**., 1994. Senior Faculty Fellow in Physics and Astronomy
BS (1982), MS (1983), PhD (1988) University of Santiago de Compostela

**Yin, Wotao**, 2013. Adjunct Professor of Computational and Applied Mathematics
BS (2001) Nanjing University; MS (2003), MPhil (2006), PhD (2006) Columbia University

**Yost, Julianne M**., 2011. Wiess Instructor of Chemistry
BS (2003) Cedar Crest College; PhD (2009) Duke University

**Young, James**, 1990. Research Professor of Electrical and Computer Engineering
BS (1965), MS (1966) Massachusetts Institute of Technology; PhD (1970) Stanford University

**Yuan, Ying**, 2010. Adjunct Associate Professor of Statistics
BS (1995) Huazhong University of Science and Technology, China; MA, MS (2000) Brandeis University; PhD (2005) University of Michigan

**Yunis, Harvey E**., 1987. Andrew W. Mellon Chair in Humanities, Professor of Classics
BA (1978) Dartmouth College; BA (1982), MA (1985) University of Cambridge; PhD (1987) Harvard University

**Zammito, John H**., 1994. John Antony Weir Professor of History, Associate of Hanszen College
BA (1970) University of Texas–Austin; PhD (1978) University of California–Berkeley

**Zanetti, Renato**, 2012. Adjunct Assistant Professor of Mechanical Engineering
PhD (2007) University of Texas at Austin

**Zavyalova, Anastasiya**, 2012. Assistant Professor of Strategic Management
BS (2006) Methodist University; PhD (2012) University of Maryland, College Park

**Zeff, Stephen A**., 1978. Keith Anderson Professorship in Business and Professor of Accounting
BS (1955), MS (1957) University of Colorado; MBA (1960), PhD (1962) University of Michigan; Dr. Econ. (Hon.) (1990) Turku School of Economics and Business Administration, Finland; DLitt (Hon.) (2010) University of Waterloo, Canada; Dr. Econ. Mgmt Sci (Hon.) (2011) Universidad de Alcalá, Spain

**Zelt, Colin A**., 1995. Professor of Earth Science
BS (1984) University of Victoria; PhD (1989) University of British Columbia

**Zhang, David**, 2013. Assistant Professor of Bioengineering
BS (2005), PhD (2010) California Institute of Technology

**Zhang, Yan Anthea**, 2001. Professor of Management
BA (1992), MA (1995) Nanjing University; MA (1997) City University of Hong Kong; PhD (2001) University of

Southern California

**Zhang, Yin**, 1996. Professor of Computational and Applied Mathematics
BS (1977), MS (1981) Chongqing Institute of Architecture and Engineering, China; PhD (1987) State University of New York–Stony Brook

**Zheng, Junrong**, 2008. Assistant Professor of Chemistry
BS (1997), MS (2000) Peking University; MS (2003) Rensselaer Polytechnic Institute; PhD (2007) Stanford University

**Zhong, Lin**, 2005. Associate Professor of Electrical and Computer Engineering
BS (1998), MS (2000) Tsinghua University, Beijing, China; PhD (2005) Princeton University

**Zhong, Weiwei**, 2008. Assistant Professor of Biochemistry and Cell Biology
BS (1997) University of Science and Technology of China; MS (2003), PhD (2002) University of Georgia

**Zhou, Jing**, 2003. Houston Endowment Professor of Organizational Behavior, Professor of Psychology
BS (1987), MA (1990) Peking University; PhD (1996) University of Illinois–Urbana

**Zhu, Jian-Xin**, 2010. Adjunct Associate Professor of Physics and Astronomy
BS (1990), MS (1993) Nanjing University; PhD (1997) University of Hong Kong

**Zimmerman Espinosa, Carissa**, 2011. Lecturer of Psychology
BA (2005) Trinity University; MS (2008), PhD (2010) Florida State University

**Zodrow, George**, 1979. Professor of Economics
BA, MME (1973) Rice University; MA (1977), PhD (1980) Princeton University

**Zoghbi, Huda Y**., 2011. Adjunct Professor of Biochemistry and Cell Biology
BSc (1975) American University of Beirut; MD (1979) Meharry Medical College

**Zubarev, Eugene**, 2005. Associate Professor of Chemistry and of Materials Science and NanoEngineering
MS (1993) Moscow State University; PhD (1996) Russian Academy of Sciences

**Zygourakis, Kyriacos**, 1980. A.J. Hartsook Professor of Chemical and Biomolecular Engineering, Professor of Bioengineering
Diploma (1975) National Technical University of Athens; PhD (1981) University of Minnesota

Last Revised : September 30, 2014

# Emeritus Faculty

**Akers, William Walter**, 1947–93. Professor Emeritus of Chemical and Biomolecular Engineering
BS (1943) Texas Technological College; MS (1944) University of Texas at Austin; PhD (1950) University of Michigan

**Alcover, Madeleine**, 1975–2004. Professor Emerita of French
Licence de lettres modernes (1962), Diplôme d'études supérieures (1963), Doctorat de 3e cycle (1965) France

**Ambler, John S.**, 1964–2003. Professor Emeritus of Political Science
BA (1953) Willamette University; MA (1954) Stanford University; Certificat d'etudes politiques (1955) University of Bordeaux; PhD (1964) University of California–Berkeley

**Andrews, John F.**, 1982–91. Professor Emeritus of Environmental Science and Engineering
BSCE (1951), MS (1954) University of Arkansas; PhD (1964) University of California–Berkeley

**Apple, Max**, 1972–2001. Gladys Louise Fox Professor Emeritus of English
BA (1963) University of Michigan; MA (1965) Stanford University; PhD (1970) University of Michigan

**Armeniades, Constantine D**, 1969–2006. Professor Emeritus of Chemical and Biomolecular Engineering
BS (1961) Northeastern University; MS (1967) Case Institute of Technology; PhD (1969) Case Western Reserve University

**Avé Lallemant, Hans G.**, 1970–2006. Professor Emeritus of Earth Science, Associate of Sid Richardson College
BA (1960), MA (1964), PhD (1967) University of Leiden

**Bailar, Benjamin F.**, 1987–97. H. Joe Nelson III Professor Emeritus of Administration
BA (1955) University of Colorado; MBA (1959) Harvard Graduate School of Business Administration

**Baker, Stephen D.**, 1963–2004. Professor Emeritus of Physics and Astronomy
BS (1957) Duke University; MS (1959), PhD (1963) Yale University

**Bale, Allen M.**, 1947–78. Athletic Director Emeritus
BS (1930) Rice Institute; MA (1939) Columbia University

**Bally, Albert W.,** 1981–96. Harry Carothers Wiess Professor Emeritus of Geology
PhD (1953) University of Zurich, Switzerland

**Barker, J. R.**, 1949–86. Professor Emeritus of Health and Physical Education
BS (1949) Rice Institute; MEd (1954) University of Texas–Austin

**Bixby, Robert E.**, 1984–98. Noah Harding Professor Emeritus of Computational and Applied Mathematics
BS (1968) University of California at Berkeley; MS (1971), PhD (1972) Cornell University

**Black, Earl**, 1993-2012. Herbert S. Autrey Professor Emeritus of Political Science
BA (1964) University of Texas–Austin; PhD (1968) Harvard University

**Bonner, Billy E.**, 1985–2009. Professor Emeritus of Physics and Astronomy
BS (1961) Louisiana Polytechnic Institute; MA (1963), PhD (1965) Rice University

**Boterf, Chester Arthur**, 1973–93. Professor Emeritus of Art
BA (1959) Kansas University; MFA (1965) Columbia University

**Brown, Katherine Tsanoff**, 1963–89. Professor Emerita of Art History, Honorary Associate of Will Rice College
BA (1938) Rice Institute; MFA (1940) Cornell University

**Burnett, Sarah A.**, 1972-2012. Professor Emerita of Psychology
BS (1966) Memphis State University; MA (1970), PhD (1972) Tulane University

**Burrus, C. Sidney**, 1965–2005. Maxfield and Oshman Professor Emeritus of Electrical and Computer Engineering, Research Professor
BA (1957), BSEE (1958), Rice Institute; MS (1960) Rice University; PhD (1965) Stanford University

**Burt, George**, 1984–97. Professor Emeritus of Theory and Composition
BA (1955) University of California at Berkeley; MA (1958) Mills College; MFA (1962) Princeton University

**Camfield, William A**., 1969–2002. Joseph and Joanna Nazro Mullen Professor Emeritus of Art History
AB (1957) Princeton University; MA (1961), PhD (1964) Yale University

**Cason, Carolyn**, 1956–74. Lecturer Emerita of Dietetics
BS (1934) University of Texas at Austin; MA (1939) Columbia University

**Chance, Jane**, 1973–2011. Mellon Distinguished Professor Emerita of English
BA (1967) Purdue University; MA (1968), PhD (1971) University of Illinois

**Clark, Howard Charles**, 1966–88. Professor Emeritus of Geology and Geophysics
BS (1959) University of Oklahoma; MA (1965), PhD (1967) Stanford University

**Class, Calvin M**., 1952–85. Professor Emeritus of Physics
AB (1943), PhD (1951) Johns Hopkins University

**Cloutier, Paul A**., 1967–2008. Professor Emeritus of Physics and Astronomy
BS (1964) University of Southwestern Louisiana; PhD (1967) Rice University

**Copeland, James E**., 1966–2001. Professor Emeritus of Linguistics and German
BA (1961) University of Colorado; PhD (1965) Cornell University

**Curl Jr, Robert F**., 1958–2005. University Professor Emeritus, Kenneth S. Pitzer-Schlumberger Professor Emeritus of Natural Sciences
BA (1954) Rice Institute; PhD (1957) University of California–Berkeley

**Daichman, Graciela S**., 1973–99. Lecturer Emerita of Spanish and Portuguese
Profesorado (1959) Instituto Nacional del Profesorado en Lenguas Vivas, Argentina; MA (1975), PhD (1983) Rice University

**Datta, Evelyne D.,** 1987-2012. Senior Lecturer Emerita of French
Maîtrise de Philologie romane (1966) University of Ghent, Belgium; MA (1979) University of Houston; PhD (1987) Rice University

**Davidson, Chandler**, 1966–2003. Radoslav A. Tsanoff Professor Emeritus of Public Affairs and Sociology
BA (1961) University of Texas at Austin; MA (1966), PhD (1969) Princeton University

**Davis, Philip W**., 1969–2003. Agnes Cullen Arnold Professor Emeritus of Linguistics
BA (1961) University of Texas at Austin; PhD (1965) Cornell University

**Davis Jr, Sam H**., 1957–2000. Professor Emeritus of Chemical Biomolecular Engineering and Computational and Applied Mathematics
BA (1952), BS (1953) Rice Institute; ScD (1957) Massachusetts Institute of Technology

**De Bremaecker, Jean-Claude**, 1959–94. Professor Emeritus of Earth Science
Ingenieur Civil des Mines (1948) University of Louvain, Belgium; MS (1950) Louisiana State University; PhD (1952) University of California–Berkeley

**Dennis, John E**., 1979–2002. Noah Harding Professor Emeritus of Computational and Applied Mathematics
BS (1962), MS (1964) University of Miami; PhD (1966) University of Utah

**Dessler, Alexander J**., 1963–1993. Professor Emeritus of Space Physics and Astronomy
BS (1952) California Institute of Technology; PhD (1956) Duke University

**Dharan, Bala G**., 1982–2009. J. Howard Creekmore Professor Emeritus of Accounting
BTech (1973) Indian Institute of Technology, India; MBA (1975) Indian Institute of Management, India; MS (1977), PhD (1981) Carnegie Mellon University

**Drew, Katherine Fischer**, 1950–96. Lynette S. Autrey Professor Emerita of History
BA (1944), MA (1945) Rice Institute; PhD (1950) Cornell University

**Driskill, Linda P**., 1970-2013. Professor Emerita of English
BA (1961), MA (1968), PhD (1970) Rice University

**Durrani, Ahmad J**., 1982–2008. Professor Emeritus of Civil and Environmental Engineering
BSCE (1968) Engineering University, Pakistan; MS (1975) Asian Institute of Technology, Thailand; PhD (1982) University of Michigan; MBA (1999) University of Houston

**Dyson, Derek C**., 1966–2000. Professor Emeritus of Chemical and Biomolecular Engineering
BA (1955) University of Cambridge; PhD (1966) University of London

**Eifler, Margret**, 1973–2005. Professor Emerita of German Studies
BA (1962), MA (1964), PhD (1969) University of California–Berkeley

**Evans, Elinor Lucile**, 1964–85. Albert K. and Harry K. Smith Professor Emerita of Architecture
BA (1938) Oklahoma State University; MFA (1954) Yale University

**Farwell, Joyce**, 1994–2005. Professor Emerita of Voice
BME (1956), MME (1958) University of Oklahoma; DMA (1976) College Conservatory of Music, University of Cincinnati

**Few Jr, Arthur A**., 1970–2008. Professor Emeritus of Physics and Astronomy and Environmental Science
BS (1962) Southwestern University; MBS (1965) University of Colorado; PhD (1969) Rice University

**Fisher Jr, Frank M**., 1963–2002. Professor Emeritus of Biology
BA (1953) Hanover College; MS (1958), PhD (1961) Purdue University

**Forman, Robin**, 1987–2010. Professor Emeritus of Mathematics
BA (1981), MA (1981) University of Pennsylvania; PhD (1985) Harvard University

**Freeman, John W**., 1964–2000. Professor Emeritus of Space Physics and Astronomy, Research Professor, Associate of Lovett College
BS (1957) Beloit College; MS (1961), PhD (1963) University of Iowa

**Fultz, Lucille P**., 1990–2007. Associate Professor Emeritus of English
AB (1959) Spellman College; MA (1968) University of Iowa; PhD (1990) Emory University

**Gardner, Gerald H. F**., 1990–93. Professor Emeritus of Geophysics
BS (1948) Trinity College, Dublin; MSc (1949) Carnegie Mellon University; PhD (1953) Princeton University

**Glantz, Raymond M**., 1969–2006. Professor Emeritus of Biochemistry and Cell Biology, Research Professor
BA (1963) Brooklyn College; MS (1964), PhD (1966) Syracuse University

**Glass, Graham P**., 1967–2005. Professor Emeritus of Chemistry
BS (1959) Birmingham University, England; PhD (1963) Cambridge University

**Goux, Jean-Joseph**, 1990–2011. Laurence H. Favrot Professor Emeritus of French Studies
Licence de Philosophie (1965), DES Philosophie (1966), Doctorat du 3ème cycle de Philosophie (1973), Doctorat d'Elat es Lettres et Sciences Humaines (1988) Sorbonne, Paris

**Gruber, Ira Dempsey**, 1966–2009. Harris Masterson, Jr. Professor Emeritus of History
AB (1955), MA (1959), PhD (1961) Duke University

**Hansz, Ingrid**, 1987–2000. Lecturer Emerita of Spanish and Portuguese, 2001 Language Consultant for School of Continuing Studies
BA (1952) Universidad de la Republica; MA (1987) Rice University

**Harcombe, Paul A**, 1972–2007. Professor Emeritus of Ecology and Evolutionary Biology
BS (1967) Michigan State University; PhD (1973) Yale University

**Harvey, F. Reese**, 1968–2003. Professor Emeritus of Mathematics
BS, MA (1963) Carnegie Institute of Technology; PhD (1966) Stanford University

**Haskell, Thomas L**., 1970–2009. Samuel G. McCann Professor Emeritus of History
BA (1961) Princeton University; PhD (1973) Stanford University

**Havens, Neil**, 1964–2000. Professor Emeritus of Art and Art History
BA (1956) Rice Institute; MA (1959) Indiana University

**Haymes, Robert C**., 1968–98. Professor Emeritus of Space Physics and Astronomy
BA (1952), MS (1953), PhD (1959) New York University

**Hellums, Jesse David**, 1960–1998 and 2003–2005. A.J. Hartsook Professor Emeritus of Chemical and Biomolecular Engineering and of Bioengineering
BS (1950), MS (1957) University of Texas–Austin; PhD (1961) University of Michigan

**Hempel, John**, 1964-2013. Milton B. Porter Professor of Mathematics
BS (1957) University of Utah; MS (1959), PhD (1962) University of Wisconsin at Madison

**Heymann, Dieter**, 1966–98. Professor Emeritus of Geology and Geophysics, Adjunct Professor of Chemistry
MS (1954), PhD (1957) University of Amsterdam, The Netherlands

**Hill, Thomas W**., 1979–2013. Professor Emeritus of Physics and Astronomy
BA (1967), MS (1971), PhD (1973) Rice University

**Hirasaki, George J**., 1989 - 2013. A. J. Hartsook Professor Emeritus of Chemical and Biomolecular Engineering
BS (1963) Lamar University; PhD (1967) Rice University

**Hodges, Lee**, 1930–71. Professor Emeritus of French
BS (1930) Harvard University; MA (1934) Rice Institute

**Holt, Edward C**., 1956–93. Professor Emeritus of Civil and Environmental Engineering
SB (1945), SM (1947) Massachusetts Institute of Technology; PhD (1956) Pennsylvania State University

**Huddle, Donald L**., 1964–92. Professor Emeritus of Economics
BS (1959), MA (1960) University of California–Los Angeles; PhD (1964) Vanderbilt University

**Hyman, Harold M**., 1968–97. William P. Hobby Professor Emeritus of History
BA (1948) University of California–Los Angeles; MA (1950), PhD (1952) Columbia University

**Jitcoff, Andrew N**., 1950–72. Professor Emeritus of Russian
Bachelor (1928), Master (1931) Prague Institute of Technology, Czechoslovakia

**Johnson, Don Herrick**, 1977–2008. J.S. Abercrombie Professor Emeritus of Electrical and Computer Engineering, Professor of Statistics
SB, SM (1970), EE (1971), PhD (1974) Massachusetts Institute of Technology

**Jones, Samuel**, 1973–97. Professor Emeritus of Music
BA (1957) Millsaps College; MA (1958), PhD (1960) Eastman School of Music, University of Rochester

**Jump, J. Robert**, 1968–2003. Professor Emeritus of Electrical and Computer Engineering, Professor of Computer Science, Honorary Master of Lovett College
BS (1960), MS (1962) University of Cincinnati; MS (1965), PhD (1968) University of Michigan

**Kaun, Kathleen**, 1998-2013. Lynette S. Autrey Professor Emerita of Voice
BM (1966) Indiana University; MM (1970) University of Texas–Austin

**Kecht, Maria-Regina**, 1997–2010. Associate Professor Emerita of German Studies
Teacher's Diploma (1978) Pushkin Institute, Moscow State University; MA (1979) University of Illinois–Urbana-Champaign; PhD (1982) Innsbruck University

**Keeton, Darra**, 1994-2012. Professor Emerita of Visual Arts
BFA (1974) Miami University, Ohio; MFA (1979) Queens College, New York

**Kelber, Werner H**., 1973–2005. Isla Carroll Turner and Percy E. Turner Professor Emeritus of Religion
MT (1963) Princeton Theological Seminary; MA (1967), PhD (1970) University of Chicago

**Kinsey, James L**., 1987–2007. D.R. Bullard-Welch Foundation Professor Emeritus of Science in the Department of Chemistry
BA (1956), PhD (1959) Rice Institute

**Kiperman, Anita**, 1976–98. Lecturer Emerita of Spanish
BA (1957) Universidad Nacional de Buenos Aires; MA (1971) University of Houston

**Konisky, Jordan**, 1996–2007. Professor Emeritus of Biochemistry and Cell Biology
BS (1963), Providence College; PhD (1968) University of Wisconsin

**Lamb, Sydney M**., 1981–98. Agnes Cullen Arnold Professor Emeritus of Linguistics and Cognitive Sciences
BA (1951) Yale University; PhD (1958) University of California–Berkeley

**Laughery, Kenneth R**., 1982–2002. Herbert S. Autrey Professor Emeritus of Psychology, Research Professor

BS (1957), MS (1959), PhD (1961) Carnegie Mellon University

**Leal, Maria Teresa**, 1965–96. Professor Emerita of Spanish and Portuguese
BA (1946) Pontifícia Universidade Católica, Brazil; PhD (1963) Universidade Federal de Rio de Janeiro, Brazil

**Lecuyer, Maurice Antoine**, 1962–79. Professor Emeritus of French
Baccalaureat es lettres (1937), Licence es lettres (1943), Diplome d'etudes superieures (1944) Universite de Paris, France; PhD (1954) Yale University

**Lee, Eva J**., 1969–2000. Professor Emerita of Kinesiology
BS (1962) North Texas State University; MEd (1967) Sam Houston State University; EdD (1974) Louisiana State University

**Leeds Jr, J. Venn**, 1964–89. Professor Emeritus of Electrical and Computer Engineering
BA (1955), BSEE (1956) Rice Institute; MSEE (1960), PhD (1963) University of Pittsburgh; JD (1972) University of Houston

**Leeman, William P**., 1977–2005. Professor Emeritus of Earth Science
BA (1967), MA (1969) Rice University; PhD (1974) University of Oregon

**Long, Elizabeth**, 1978-2014. Professor Emerita of Sociology, Department Chair of Sociology, Associate of Baker College
BA (1966) Stanford University; MA (1974), PhD (1979) Brandeis University

**Lüttge, Andreas**, 1999-2013. Professor Emeritus of Earth Science, Professor Emeritus of Chemistry, Associate of Will Rice College
BS (1982) Technische University Carolo Wilhelmina; MS (1985), PhD (1990) Eberhard-Karls Universitat

**Marcus, George E**., 1975–2006. Professor Emeritus of Anthropology
BA (1968) Yale University; PhD (1976) Harvard University

**Martin, William**, 1968–2005. Harry & Hazel Chavanne Professor Emeritus of Religion and Public Policy and Sociology
BA (1958), MA (1960) Abilene Christian University; BD (1963) Harvard Divinity School; PhD (1969) Harvard University

**McEvilley, Thomas**, 1969–2005. Distinguished Lecturer Emeritus of Art History
BA (1963) University of Cincinnati; MA (1965) University of Washington; MA (1968) University of Cincinnati

**McIntosh, Roderick J**., 1980. Professor Emeritus of Anthropology
BA (1973) Yale University; MLITT (1975), PhD (1979) Trinity College, University of Cambridge

**McLellan, Rex B**., 1964-2013. Professor Emeritus of Materials Science and NanoEngineering
BMet (1957) Sheffield University; PhD (1962) Leeds University

**Merwin, John E**., 1955–98. Professor Emeritus of Civil and Environmental Engineering
BA (1952), BSME (1953), MSME (1955) Rice Institute; PhD (1962) University of Cambridge

**Michel, F. Curtis**, 1963–2000. Andrew Hays Buchanan Professor Emeritus of Astrophysics
BA (1955), PhD (1962) California Institute of Technology

**Miele, Angelo**, 1964–93. Foyt Family Professor Emeritus of Mechanical Engineering and Materials Science and Computational and Applied Mathematics, Research Professor

**Mieszkowski, Peter**, 1981–2009. Professor Emeritus of Economics
BS (1957), MA (1959) McGill University; PhD (1963) Johns Hopkins University

**Miettinen, Hannu E**., 1977–2009. Professor Emeritus of Physics and Astronomy
Fil. Kand. (1967), Fil. Lic. (1971) University of Helsinki; PhD (1975) University of Michigan

**Miller, Clarence A**., 1981–2008. Louis Calder Professor Emeritus of Chemical and Biomolecular Engineering
BA, BS (1961) Rice University; PhD (1969) University of Minnesota

**Minter, David Lee**, 1967–80 and 1990–2002. Bruce and Elizabeth Dunlevie Professor Emeritus of English
BA (1957), MA (1959) North Texas State University; BD (1961), PhD (1965) Yale University

**Murray, William**, 1992–2003. Associate Professor Emeritus of Voice
BA (1956) Adelphi University; Certificate (1958) Universita de Perugia; Certificate (1958) Yale University School of Languages; Certificate (1960) Goethe Institute, Blaubeuren, Germany

**Nielsen Jr, Niels C**., 1951–91. Professor Emeritus of Philosophy and Religious Thought, Honorary Associate of Will Rice College
BA (1942) George Pepperdine University; BD (1946), PhD (1951) Yale University

**Nordgren, Ronald P**., 1989–2000. Herman and George R. Brown Professor Emeritus of Civil and Environmental Engineering
BS (1957), MS (1958) University of Michigan; PhD (1962) University of California–Berkeley

**O'Dell, Charles Robert**, 1982–2000. Andrew Hays Buchanan Professor Emeritus of Astrophysics
BSEd (1959) Illinois State University; PhD (1962) University of Wisconsin–Madison

**Palmer, Graham A**., 1974–2000. Professor Emeritus of Biochemistry and Cell Biology
BS (1957), PhD (1962) University of Sheffield

**Parry, Ronald J**., 1978-2012. Professor Emeritus of Chemistry and of Biochemistry and Cell Biology
BA (1964) Occidental College; PhD (1968) Brandeis University

**Patten, Robert L**., 1969-2012. Lynette S. Autry Professor Emeritus in Humanities, Professor Emeritus of English
BA (1960) Swarthmore College; MA (1962), PhD (1965) Princeton University

**Pearson Jr, James Boyd**, 1965–99. J. S. Abercrombie Professor Emeritus of Electrical and Computer Engineering
BSEE (1958), MSEE (1959) University of Arkansas; PhD (1962) Purdue University

**Pfeiffer, Paul E**., 1947–97. Professor Emeritus of Computational and Applied Mathematics
BSEE (1938) Rice Institute; BD (1943) Southern Methodist University; MSEE (1948), PhD (1952) Rice Institute

**Philpott, Charles William**, 1964–96. Professor Emeritus of Ecology and Evolutionary Biology
BA (1957), MS (1958) Texas Technological College; PhD (1962) Tulane University

**Piper, William Bowman**, 1969–1999. Professor Emeritus of English
BA (1951) Harvard University; MA (1952) Columbia University; PhD (1958) University of Wisconsin–Madison

**Poindexter, Hally Beth W**., 1965–98. Professor Emeritus of Kinesiology
BA (1947) Rice Institute; BS (1949) University of Houston; MA (1950) University of Northern Colorado; EdD (1957) Columbia University

**Polking, John C**., 1968–2004. Professor Emeritus of Mathematics, Research Professor
BS (1956) University of Notre Dame; MS (1961), PhD (1966) University of Chicago

**Poulos, Basilios N**., 1975–2008. Professor Emeritus of Visual Arts
BFA (1965) Atlanta School of Art; MFA (1968) Tulane University

**Rachford Jr, Henry H**., 1964–82. Professor Emeritus of Mathematical Sciences
BS (1945), MA (1947) Rice Institute; ScD (1950) Massachusetts Institute of Technology

**Rea, Joan**, 1968–2000. Professor Emerita of Spanish and Portuguese
BA (1954) New York University; MA (1964) University of Houston; PhD (1970) University of Texas–Austin

**Sass, Ronald L**., 1958–2005. Harry C. and Olga Keith Wiess Professor Emeritus of Ecology and Evolutionary Biology
BA (1954) Augustana College; PhD (1957) University of Southern California

**Schneider, David J**., 1989–2009. Professor Emeritus of Psychology
BA (1962) Wabash College; PhD (1966) Stanford University

**Schnoebelen, Anne**, 1974–2004. Joseph and Ida Kirkland Mullen Professor Emerita of Music
BA (1958) Rosary College; MMus (1960), PhD (1966) University of Illinois

**Seed, Patricia**, 1982–2006. Professor Emerita of History
BA (1971) Fordham University; MA (1975) University of Texas–Austin; PhD (1980) University of Wisconsin–Madison

**Sellers, James**, 1971–1993. Former Professor of Religion
BEE (1947) Georgia Institute of Technology; MS (1952) Florida State University; PhD (1958) Vanderbilt University

**Smith, George**, 1981–2010. Professor Emeritus of Visual and Dramatic Arts
BFA (1969) San Francisco Art Institute; MA (1972) Hunter College

**Soligo, Ronald**, 1967-2012. Professor Emeritus of Economics
BA (1958) University of British Columbia; PhD (1964) Yale University

**Spence, Dale W**., 1963. Professor Emeritus of Kinesiology
BS (1956) Rice Institute; MS (1959) North Texas State University; EdD (1966) Louisiana State University

**Speziale, Marie**, 2002-2013. Professor Emerita of Trumpet
BM (1964) College Conservatory of Music, University of Cincinnati

**Spuler, Richard**, 1992-2013. Senior Lecturer Emeritus of German
BA (1975), MA (1976) Washington State University; PhD (1980) Ohio State University

**Stebbings, Ronald F**., 1968–95. Professor Emeritus of Space Physics and Astronomy
BSc (1952), PhD (1956) University College, London

**Stormer Jr, John C**., 1983–95. Croneis Professor Emeritus of Geology
AB (1963) Dartmouth College; PhD (1971) University of California–Berkeley

**Subtelny, Stephen**, 1968–2000. Professor Emeritus of Ecology and Evolutionary Biology
BA (1949) Hobart College; MA (1952), PhD (1955) University of Missouri

**Talwani, Manik**, 1985–2006. Professor Emeritus of Advanced Studies and Research in Earth Science, Research Professor
BScHons (1951), MSc (1953) Delhi University; PhD (1959) Columbia University; PhD (Honoris Causa) (1981) Oslo University

**Taylor, Julie M**., 1981–2005. Professor Emerita of Anthropology
BA (1966) Harvard University; Diploma (1969), PhD (1973) Oxford University

**Taylor, Ronald N**., 1983–2009. Professor Emeritus of Management
BA (1960) Westminster College; MA (1964) University of Nebraska; PhD (1970) University of Minnesota

**Thompson, Ewa M**., 1970-2012. Professor Emerita of Slavic Studies
BA (1963) University of Warsaw; MFA (1963) Sopot Conservatory of Music, Poland; PhD (1967) Vanderbilt University

**Todd, Anderson**, 1949–92. Gus Sessions Wortham Professor Emeritus of Architecture
BA (1943), MFA (1949) Princeton University

**Trammell, George T**., 1961–93. Professor Emeritus of Physics
BA (1944) Rice Institute; PhD (1950) Cornell University

**Trepel, Shirley**, 1975–94. Professor Emerita of Violoncello
BMus (1945) Curtis Institute of Music

**Tyler, Stephen A**., 1970–2011. Herbert S. Autry Professor Emeritus of Anthropology and Linguistics
BA (1957) Simpson College; MA (1962), PhD (1964) Stanford University

**Uecker, Wilfred C**., 1984-2012. Professor Emeritus of Management
BA (1968), MBA (1970), PhD (1973) University of Texas–Austin

**Urrutibéheity, Hector N**., 1967–2000. Professor Emeritus of Spanish and Portuguese
Profesorado (1956) La Plata National University, Argentina; PhD (1968) Stanford University

**Vail, Peter R**., 1986–2001. W. Maurice Ewing Professor Emeritus of Oceanography
AB (1952) Dartmouth College; MS (1953), PhD (1959) Northwestern University

**Van Helden, Albert**, 1970–2001. Lynette S. Autrey Professor Emeritus of History
BEng (1962), MS (1964) Stevens Institute of Technology; MA (1967) University of Michigan; PhD (1970) University of London

**Veletsos, Anestis S**., 1964–2008. Brown and Root Professor Emeritus of Civil and Environmental Engineering
BS (1948) Robert College, Turkey; MS (1950), PhD (1953) University of Illinois

**von der Mehden, Fred R**., 1968–97. Albert Thomas Professor Emeritus of Political Science
BA (1948) University of the Pacific; MA (1950) Claremont Graduate School; PhD (1957) University of California–Berkeley

**Wadsworth, Philip A**., 1964–73. Professor Emeritus of French
AB (1935), PhD (1939) Yale University

**Wall, Frederick T**., 1972–79. Professor Emeritus of Chemistry
BC (1933), PhD (1937) University of Minnesota

**Wallace, Kristine Gilmartin**, 1969–2006. Lecturer Emerita of Classics
BA (1963) Bryn Mawr; MA (1965), PhD (1967) Stanford University

**Wang, Chao-Cheng**, 1968–2000. Noah Harding Professor Emeritus of Computational and Applied Mathematics, Associate Professor of Mechanical Engineering and Materials Science
BS (1959) National Taiwan University; PhD (1965) Johns Hopkins University

**Ward, Calvin H.**, 1966-2014. Professor Emeritus of Civil and Environmental Engineering
BS (1955) New Mexico State University; MS (1958), PhD (1960) Cornell University; MPH (1978) University of Texas School of Public Health

**Wells Jr, Raymond O**., 1965–2000. Professor Emeritus of Mathematics
BA (1962) Rice University; MS (1964), PhD (1965) New York University

**Widrig, Walter M**., 1969–2000. Professor Emeritus of Art History
BA (1951) Yale University; MA (1956) Columbia University; PhD (1975) New York University

**Wilson, Joseph B**., 1954–98. Professor Emeritus of German Studies
BA (1950), MA (1953) Rice Institute; PhD (1960) Stanford University

**Winkler, Michael**, 1967–2000. Professor Emeritus of German Studies
BA (1961) St. Benedict's College; MA (1963), PhD (1966) University of Colorado

**Wolf, Richard A**., 1967–2002. Professor Emeritus of Physics and Astronomy, Research Professor
BEngPhys (1962) Cornell University; PhD (1966) California Institute of Technology

**Wood, Susan**, 1981-2013. Gladys Louise Fox Professor Emerita of English
BA (1968) East Texas State University; MA (1970) University of Texas–Arlington

**Young, James F**., 1990–2011. Professor Emeritus of Electrical and Computer Engineering
BS (1965), MS (1966) Massachusetts Institute of Technology; PhD (1970) Stanford University

**Young, Richard D**., 1965–92. Professor Emeritus of Economics and Mathematical Sciences
BA (1951), MA (1954) University of Minnesota; PhD (1965) Carnegie Institute of Technology

# Message from the President

Now barely into our second century, Rice University has changed a tremendous amount since 59 students and 12 faculty members participated in the first matriculation in the early fall of 1912. We have remained true to our founding ideals and ambitions, building over the course of a century one of the great universities of America. Rice's mission and aspirations are captured in our mission statement:

As a leading research university with a distinctive commitment to undergraduate education, Rice University aspires to pathbreaking research, unsurpassed teaching, and contributions to the betterment of our world. It seeks to fulfill this mission by cultivating a diverse community of learning and discovery that produces leaders across the spectrum of human endeavor.

We are indeed an unusual university. While we are among the renowned research universities of the world, we also are among the smallest. And although comparatively small, we are committed to a wide spectrum of endeavors ranging across our eight schools and many inter-disciplinary institutes and centers. Our success is built on the contributions of every part of our community: graduate and undergraduate students, faculty and staff, alumni and other supporters across our city and around the world.

Our ambition and our standards are not constrained by our size. We strive to be bold in our aspirations and entrepreneurial in our approach. We seek to make a distinctive contribution to our home city of Houston while achieving a global impact through education, research and service. We are committed to enriching understanding, creating opportunity, discovering knowledge, and improving our world.

The General Announcements of the University sets forth the immense array of opportunities for our students, as well as the rules and policies which govern their participation as students in the university. But we demand more of each other than just adherence to rules and policies. We expect that all members of our community will be guided in all their endeavors by the core Rice values: Responsibility, Integrity, Community and Excellence. These values are just as important as the academic offerings and rules included in these announcements.

We take great pride in the diversity of our community. Our success requires thoughtfulness and respect in every interaction on our campus, whether with members of the Rice community of the visitors we welcome. Our "culture of care" demands not only that we not cause harm to others, but also that we look out for each other and provide or seek help when needed.

We are pleased that you have chosen to become a part of this dynamic university as it embarks on its second century of excellence and achievement. On behalf of our faculty and staff, I wish you every success as you pursue your educational endeavors. We take pride in the special community of Rice, and are look forward to working with you as you seize the opportunities of Rice to achieve your aspirations and dreams.

David W. Leebron
President
Rice University

# Complaints Process

## Rice University's "Program Integrity"-Compliant Student Complaint Process

The Texas Higher Education Coordinating Board (THECB) and the Texas Administrative Code (19 TAC § 1.110-1.120) require Rice University -- and all other Texas universities -- to provide a student complaint procedure that complies with the U.S. Department of Education's "Program Integrity" regulations as part of the university's eligibility for Title IV federal funds.

The requisite complaint process must inform current, former or prospective students who have exhausted Rice's grievance, complaint or appeal processes how to initiate a complaint outside of Rice with THECB. The THECB's procedures for such complaints are found here. Students wishing to use this outside process should ensure they have first addressed their complaint to the appropriate Rice University complaint process. If Rice is unable to resolve the matter after the student has exhausted internal complaint and appeal processes, the student may then file a complaint with THECB according to the following:

1. The THECB's complaint process can be found here. Students start THECB complaint process by sending the first three forms linked below either by electronic mail to StudentComplaints@thecb.state.tx.us or by regular mail to the Texas Higher Education Coordinating Board, Office of General Counsel, P.O. Box 12788, Austin TX 78711-2788 (fax forms are not accepted). The fourth form must also be included for complaints regarding a student with a disability.

   (a) THECB Student Complaint Form
   (b) FERPA Consent and Release Form
   (c) THECB Consent and Agreement Form
   (d) Authorization to Disclose Medical Record Information

2. Complainants should understand that the THECB does not handle, investigate, or attempt to resolve complaints concerning actions that occurred more than two years prior to the filing of a student complaint form with the THECB (unless the delay in filing the THECB complaint was caused by the complainant exhausting Rice's grievance procedures). The THECB also does not handle the various types of complaints listed in 19 TAC § 1.113.

3. Former students must file a complaint with the THECB no later than one year after the student's last date of attendance at Rice, or within 6 months of discovering the grounds for complaint, unless the delay in filing the THECB complaint was caused by the complainant exhausting Rice's grievance procedures.

4. The THECB will refer complaints alleging that Rice has violated state consumer protection laws to the Consumer Protection Division of the Office of the Attorney General of Texas for investigation and resolution. If THECB determines that a complaint is appropriate for investigation and resolution by Rice's accrediting agency (SACSCOC -- the Southern Associations of Colleges and Schools Commission on Colleges) or an educational association such as ICUT (Independent Colleges & Universities of Texas), the THECB may refer the complaint to the appropriate entity and may terminate the referral of the complaint to those entities at any time and proceed to investigate and adjudicate the complaint.

5. If a person wishes to file a complaint against Rice through the university's accrediting agency, SACSCOC, that agency's complaint process can be found here. A complainant should complete SACSCOC's Complaint Form and send two print copies to the President, Southern Association of Colleges and Schools Commission on Colleges, 1866 Southern Lane, Decatur, GA 30033-4097. The details of the agency's complaint process explain that it is intended to address significant, documented, alleged non-compliance with SACSCOC accreditation standards, policies or procedures. Complainants are expected to have attempted to resolve the issue through Rice's complaint processes before filing a complaint with SACSCOC.

6. If the complaint concerns compliance with statutes or regulations administered by the THECB and the complaint has not been referred to another entity, the THECB Office of General Counsel staff, often assisted by other staff of THECB, will initiate an investigation. The student must provide documentation that all Rice grievance, complaint

or appeal procedures have been exhausted.

7. The THECB, as part of its investigation, may request a Rice response, and may also contact other persons or entities named in the complaint or in Rice's response, in order to ascertain relevant facts. The THECB will also, where appropriate, attempt to facilitate an informal resolution acceptable to both the student and Rice. When this is not feasible, the THECB will evaluate investigation results and recommend action by the Commissioner of the THECB, who after considering any recommendations will render a written determination dismissing the complaint or requiring Rice to take specific actions to remedy the complaint. The Commissioner may also request the THECB to review and decide issues regarding institutional integrity.

# GENERAL ANNOUNCEMENTS 2014-2015

## Ethical Concerns

Rice University pursues excellence at all levels and strives to practice the highest standards of ethical conduct. Rice students are encouraged, as are all community members, to communicate ethical concerns or questions to officials in their schools or departments, the Dean of Undergraduates, or the Dean of Graduate & Postdoctoral Studies. They may also contact the offices of Human Resources, Internal Audit, General Counsel, Equal Employment Opportunity/Affirmative Action and Risk Management, all of which are listed in the university directory. The University also provides an ethics reporting mechanism through the EthicsPoint website (a third-party agent) that allows students and other community members a simple, risk-free way to report activities that may involve potential criminal conduct, ethical breaches, or violations of university policies. (Follow the EthicsPoint link at http://internalaudit.rice.edu/) Persons making reports through EthicsPoint may elect not to provide their names in making a complaint or raising a concern. Rice treats the investigation of any report as a confidential matter. Reports submitted to EthicsPoint are forwarded to the proper university officials for appropriate action. No student will be subjected to retaliation or reprisal for making a report or inquiry in good faith or for seeking guidance on dealing with potential or suspected improper behavior.

# GENERAL ANNOUNCEMENTS 2014-2015

## Equal Opportunity Notice

Rice University is committed to equal opportunity in education and employment. It is the policy of Rice University to attract qualified individuals of diverse backgrounds to its faculty, staff, and student body. Rice University does not discriminate against any individual on the basis of race, color, religion, sex, sexual orientation, gender identity, national or ethnic origin, ancestry, age, disability, or veteran status in its admissions, educational programs, or employment. In employment, the university seeks to recruit, hire, and advance qualified candidates, including women, members of underrepresented minority groups, individuals with disabilities, and certain classes of military veterans specified by law.
